Topic: 1 Message: 5

I am new to HAM Radio community, well, I don't
have any equipment or liscence yet. I will be trying
for my liscence in Feb. 2000, in St. Albans, VT. at
the HAM fest. I figured I'd get involved with any
clubs or people so I can learn what I need to in the
mean time. I've been interested in it as a hobby for
quite a while, but I figured I should do something
about it. So, if there are any pointers you can give me
please do. I'm just figuring out where to get started.
THANK

Hi my name is Rosie from Wisconsin. You shouldn't have any problems on taking the test. You can also go to <> I think they have practice test that you can take and this will help you understand what will be on the test.
My whole family are hams. My daughter was only 9 when she got her license. She thought the test were alright.
Thats good that you find a local club to talk to the members and get some of their in put. Hope this helps.

Rosie

7. Better late than never!

Yahoo group: hamstuff
Date: 2000-07-07 23:26:38 UTC
From: crewsglass
Topic: 1 Message: 7

Hello to the group.....Looks like a slow start for what could be a good club. Let's kick around a couple of ideas for topics, like Elmering over the net! Sort of a new twist on an old tradition!
I just moved to NJ from TX, and I'm temporarily QRT until my radios arrive in Sept. or Oct. Then, I have to deal with a landlord that allows no antennas of any kind! Nothing like a challenge to get a ham cooking..... Limited space ideas, anyone? Oh, yeah. I forgot one thing. My favorite band is 40m, and I have a basement apartment!!!! Now THAT'S a challenge!!!! E-mail me anytime you want, I don't bite (but my new shack might, if I can't get a good ground going....RF bite, that is.)...

From: w1nra
Topic: 1 Message: 16

There are a lot of antennas for 6 out there. It has been dead for a long time now so might think about another band maybe. Cushcraft has several 6 meter ants. Bandmaster makes great quad antennas for all the v/u bands. I have a 6el 2meter quad and a 2el 6meter quad mounted together with the 2m vert and the 6m horiz. They work good together and I think Bandmaster makes one like that now.
Cuchcraft has a new one with 2meter 440 vertical and 50 mhz horiz and it looks like it would be a great antenna. It has one feedline. check around and see what other locals use and go from there. don't overlook the verticals as they do a great job for dx. The antron 99 vertical can be used with a tuner for 20, 17, 15, 12, 10 AND 6 meters. I use one and it works great worldwide. Just not much if any activity on 6 lately. I have worked cuba with the a-99 several times. I'm hoping for 6 to open some here soon.

Yahoo group: hamstuff
Date: 2002-09-02 16:44:05 UTC
From: Ken Simpson, W8EK
Topic: 40 Message: 40

For Sale:

TenTec Triton IV, Model 544, digital HF xcvr
Covers 80 thru 10 meters (no WARC bands) with 100 W
output. SSB and CW, with full QSK on CW. This is
the model with the digital readout. This one is in nice
shape. It has a scratch on the heat sink, and some wear
around the mode switch, but in general is in very nice
condition. With manual for $ 275.

TenTec 252 M power supply, 20 amp, 13 V DC supply.
Matches the Triton IV series of transceivers. It has an
ammeter on front. Good condition, with manual for $ 100

Buy both of above together for $360.

Prices do not include shipping from Florida.

Thanks.

From: Steve Silverwood
Topic: 41 Message: 43

Dennis:

First, welcome to ham radio! Congratulations on passing your exam.
Make sure to let everyone know your new callsign when you find out.

As for that antenna, all I can find right now through a web search is
that it's discontinued. You can probably get details from Comet
directly at:

NCG Companies
1275 North Grove Street
Anaheim, CA 92806
Phone: (714) 630-4541
FAX: (714) 630-7024

Email: sales@...

Hope that helps.

44. Heath SB-630 station console FS

Yahoo group: hamstuff
Date: 2002-09-07 12:39:54 UTC
From: Ken Simpson, W8EK
Topic: 44 Message: 44

Heath SB-630 Station Console For Sale

This unit includes an SWR bridge, phone patch, station ID
timer (both visual and auditory), and digital mechanical clock.
Its styling is such to match the SB-100/101/102 xcvrs, and
the SB-300/301/303 and SB-400/401 combos.

This particular unit has a WORKING original digital mechanical
clock. Most of these have had the clock quit, but this one works,
and the big digits look fine as well. The seconds digits are
not as clear, but if I remember correctly, those digits
smeared when a new one was about a week old. It is all
original. The face is in nice shape. The case is not perfect,
but it is not as bad as most. A bit of dust, but no dings.

Paper work included for $ 100 plus shipping from Florida.

Thanks.

FOR SALE:

Two James Millen adjustable coils on ceramic forms.
Type 69045 Dimensions 2-1/8" long X 1/2" diameter.
Single hole mounting, solder terminals.
QTY 2 available for $4.00 each
http://home.cfl.rr.com/happysurfer/imag/two_james.jpg

3 turn link with two tube plate caps attached.
Ideal for homebrewing.
Bakelite swinging arm for coupler. Pivot goes to ceramic "BVL" Jack bar with 4
metal jack sockets, and pivot brackets that are wired to two large plate caps made
for tubes with 1/2" diameter plate cap. Part of a BVL tank system.
Has enameled copper wire and some very useful hardware attached.
Link coil dimensions 2-1/2" diameter. Enamelled 18 gauge copper wire.
QTY 1 only at $5.00
http://home.cfl.rr.com/happysurfer/imag/3turn_link.jpg

6 turn air wound coil - airdux style. Dimensions 3/4" long X
2" diameter. Inductance 2.2 uH.
One only - available for $3.00
http://home.cfl.rr.com/happysurfer/imag/6turn_air_wound_coil.jpg

18 turn coil. Airdux style. 1.75" long and 2" diameter. 10 TPI.
12.2 uH. Will sell for $5.00
Similar to above coil only longer. Picture available.

30 turn air core coil. Dimensions are 4" long and 2" in diameter.
Inductance is 18 uH. QTY 1 only at $6.00
http://home.cfl.rr.com/happysurfer/imag/30turn_air_core.jpg

48 turn air core coil - airdux style. Has Dimensions 7" long X 2" diameter.
Inductance is 29 uH. QTY 1 only available for $10.00
http://home.cfl.rr.com/happysurfer/imag/48_turn_air_core.jpg

91 turn air core coil - Measures 6.5" in length and 1.5" diameter. 14 turns per inch.
65 uH inductance. Excellent with plexiglas support and four mounting holes. QTY 1 only for $12.00
http://home.cfl.rr.com/happysurfer/imag/91turn_air_core_coil.jpg

Ceramic coil, split off-center. Has total of 20 turns with a tap at 13 turns.
On white ceramic form - former dimensions 3" long X 1.5" diameter.

Coil length is 2". Inductance is 8.56 uH.
Qty 1 only for $3.00
http://home.cfl.rr.com/happysurfer/imag/ceramic_coil_split.jpg

Ceramic coil with approx 110 turns of green cotton covered wire.
White ceramic form has dimensions - 2" long X 1.5" diameter.
Inductance is around 330 uH. Suitable for AM band or LF applications.
Has screw terminals and solder lugs for connection.
New old stock. QTY 1 only for $4.00
http://home.cfl.rr.com/happysurfer/imag/ceramic_coil_with.jpg

Coil form, ribbed white ceramic. Dimensions are 5" long and
2" diameter.
Ribbed style with slots for wire. Designed to hold 26 turns and
would have about 20 uH. Has 4 mounting holes on each end.
Has been repaired; looks fine, hence low price.
Qty 1 only at $1.00
http://home.cfl.rr.com/happysurfer/imag/coil_form_ribbed.jpg

Coil form - odd design ribbed ceramic former with 6 terminals on
base and three nice threaded holes for mounting screws.
Dimensions are 2-1/2" tall X 1-1/8" diameter.
Inner coupling coil is 7/8" diameter with tapped coil of enamelled
wire brought out to three terminals.
Qty 1 available for $3.00
http://home.cfl.rr.com/happysurfer/imag/coil_form_odd.jpg

Multi-tapped coil. Unique design attached to a PC board with a tap
for every turn.
Airdux type air core form. Coil has a total of 32 turns and dimensions of
4" long X
1.5" diameter. Approx 12.5 uH.
QTY 1 available for $6.00
http://home.cfl.rr.com/happysurfer/imag/Multi-tapped_coil.jpg

14 MHz plug-in tank coil with link coupling. 20m coil on 5-pin base.
Marked as model 2420. Medium size. Airdux style coil has 11 turns
and the link outside it has 3 turns. QTY 1 only for $5.00
http://home.cfl.rr.com/happysurfer/imag/plug_in_coil_with_link.jpg

59. TenTec 229B high power HF tuner and other TenTec items FS

Yahoo group: hamstuff
Date: 2002-10-09 12:31:26 UTC
From: Ken Simpson, W8EK
Topic: 59 Message: 59

For Sale:

Ten-Tec 229 B antenna tuner. Has roller inductor,
so will match almost any antenna, 160 through 10
meters, including WARC bands. Good for full legal
power. Also has wattmeter, SWR bridge, and a 4
position antenna switch. Almost new condition.
This particular one is the color that matches the
Corsair II / Paragon series. With manual for $ 250.

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes ammeter
and speaker, and trim ring. Dual pass transistors similar
to the heavy duty 280 power supply. Good for 20 amps
at 13 V DC. This one looks almost like new, and works
the same. With manual and original box for $ 145.

TenTec 252 M power supply, 20 amp, 13 V DC supply.
Matches the Triton IV series of transceivers. It has an
ammeter on front. Good condition, with manual for $ 100

TenTec 248 noise blanker.
This is the noise blanker that goes in the Omni 546 or 545,
but not the newer Omni V or VI. This one has all the paper
work with it, for $50.

TenTec 245 CW filter
Plugs in to the Triton (I, II, IV, 540 and 544).
Works great, with paper work for $50

Prices do not include shipping from Florida.

Thanks.

60. Kenwood 2 m HT and accessories FS

Yahoo group: hamstuff
Date: 2002-10-14 21:06:01 UTC
From: Ken Simpson, W8EK
Topic: 60 Message: 60

For Sale:

Kenwood TH-21 AT 2 meter HT.
Fully synthesized, small HT, about the size of a deck of
cards. Thumbwheel selection of frequency. Very easy
to use. About 1.3 W in high power and 1/3 W in low power.
This one is in very nice condition. It includes rubber duck
antenna, good battery, charger, and original manual for $65.

Kenwood TH-41 BT HT for 440 MHz.
Similar to the TH-21, but for 440 MHz.
SubAudible (PL) tones internal, with DIP switch selection.
Very good shape, with rubber duck, battery, charger and
original manual for $95.

Kenwood PB-21 H
This is the heavy duty battery for the TH-21 / 31 /41 series
of HTs. It is 450 mahr, instead of the standard 180 mahr of
the regular PB-21. With paperwork for $35.

Kenwood BC-6 fast desk charger.
Charges PB-21 and PB-21 H battery packs, as used on the
Kenwood TH-21 / 31 / 41 series of HTs. Holds two batteries,
charging one and then the other. Takes about an hour or so
to charge. It can also be used to power the radio for base
station use. With manual for $ 50.

Kenwood W09-0393
"Wall wort" charger to use with the PB-21 H battery pack
(above), if you do not use the desk charger. This is NOT
the standard charger for the regular PB-21, but a special
one for the PB-21 H. $12

AC adapter for TH-21 / 31 / 41 HTs
Wall wort DC supply plugs into wall, and has adapter
that slides on to the HT to use it off of 115 V AC. $ 25

Kenwood SC-6 protective case.
Fits the TH-21 /31 /41 series of HTs. It does not have a
"cut out" for the DIP switches on the PL encoder, but will
protect the HT in great shape. $ 10

Kenwood DC-21 used to operate the TH-21 / 31 / 41
from 13 V DC. Includes cigarette lighter plug, and
voltage converter. With paper work for $25.

Kenwood RA-8 A "Stubby duck" antenna for the TH-21,
two meter HT. $ 10

Kenwood RA-10 A "Stubby duck" antenna for the TH-41.
440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH -
21 / 31/ 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Prices do not include shipping from Florida.

Thanks.

2000 Watts p.e.p. AC Power Supply has 120V AC primary.
Part of Motorola power amp system.
Nice shiny rackmount panel measures 19" X 9" X 10" deep.
Panel extends 2" in front of chassis and 8" behind.
This complete supply is rated for 2500V DC at 400 mA + continuous.
Upright transformer with nice shiny black end bells. All very clean.
Includes non-PCB oil filled capacitor and two other smaller transformers
or
chokes. This complete power supply includes
American Monarch Co. of Minneapolis plate transformer that is
6" X 9" X 7" tall, and looks new.

Very sharp chassis with ancillary components.
Untested but guarantee all iron and caps are good.
Overall dimensions are 19" wide X 10-1/2" tall X 11" deep
consisting of 4" deep in front of panel and 7" deep behind the panel.
Available for $65.00 plus $12.00 for packing materials plus shipping
90 pounds

METERS

Nice round voltmeter with keystone face appears to be from a General Radio Company RF voltmeter. Scales calibrated in VHF 0 - 0.4 and UHF 0-2 with a dBm scale up to +4 DBm.
Made for 2-/14" round hole. Great looking meter. Ideal as spare part for your test gear. Will sell for $5.00

Phasetron 0 - 300 A DC, new meter in box. Yes, it's NOT 300 mA!
Needs shunt. Has black case and is 3" in diameter.
Very nice looking. Available for $8.00

Tiny meter - black. Looks like antique type. Dimensions 1-1/8" diameter with mounting hardware for 1" diameter hole.
Two are marked 0 - 12 X 1000 FT. The other reads 0 - 1.
QTY 3 available for $3.00 each

6A DC meter by Prime Co. of Ohio. Rectangular face dimensions 2.25" wide X 1.375" high.
Overall dimensions are 2.25" wide X 2.375" high.
QTY 1 only for $2.00

E-mail me for pictures of any of these.

69. Drake 2B Speaker

From: Brian Carling
Topic: 69 Message: 69

Drake deluxe speaker for model 2B receiver. Very good condition. Has been tastefully
modified slightly on the front, with the addition of a plate and jacks for 1/4" and 1/8" connectors. Speaker is better than the original.
Cabinet looks very nice. Will sell for $30.00 plus shipping
Picture available on request

75. Greenlee Chassis Punches FS

Yahoo group: hamstuff
Date: 2002-11-16 20:07:39 UTC
From: Ken Simpson, W8EK
Topic: 75 Message: 75

In digging thru some more "stuff", I found a box of Greenlee chassis punches that I am certain I will never use, so they might as well go to someone that can.

All of them are in very good shape, and all are in their original boxes. I have attempted to price them at about 1/2 to 2/3 of new price, which I think would be fair.

Here is what is available:

Round
1 3/8 inch - $ 23
7/8 inch - $ 21
5/8 inch - $ 20

Square
1/2 inch - $ 50
3/4 inch - $ 100 (appears to be new and never used)

"Conduit set"
These are sold as a set only, for two reasons. They came that way, and there are only 2 bolts for four punches. Greenlee has the size of the conduit marked on them, but of course the hole is larger than the conduit. Hole size, as best I can measure is in ( ).
1 inch (1 1/4)
1 1/4 inch (1 5/8)
1 1/2 inch (1 3/4)
2 inch (2 1/4)
These are not in boxes, and are used more, but still have a lot of life left, and are in good shape. $100 for the set.

Prices do not include shipping from Florida.

Thanks.

Mattco 745 Frequency Counter

Works with any radio to measure and show your
operating frequency. Simply connects in line with your
antenna with a PL-259 jumper.

Has controls for ON-OFF, SENSITIVITY and MHz-KHz.

The digital readout will show, for example 27.185
in the MHz position or down two digits further
(if you want) in the kHz position.

Works at all power levels from 2 watts and up.

Requires 12V DC to operate. Fully tested and guaranteed.

Will sell for $125.00 plus $5.00 conus shipping

E-mail me for a picture or to arrange purchase:

84. Low Pass Filters for TVI prevention FS

Yahoo group: hamstuff
Date: 2002-11-24 16:38:56 UTC
From: Ken Simpson, W8EK
Topic: 84 Message: 84

For Sale:

E F Johnson low pass filter for sale.
52 ohms impedance, Catalog number 250-20. This is the
cylindrical filter, with an SO-239 connector on each end.
It even has its brackets for mounting it to the wall still with
it. $30

B & W TVI filter, model 425, (also known as model
FL 10 / 1500). Translated, this means that it cuts off just
above 10 meters, and will handle 1500 Watts. SO-239
connector on each end. $ 30

Ameco Model LN-2
It says it is designed for 50 to 72 ohm coax. This is a smaller
filter, good only for about 100 watts. It could be used between
an exciter and amplifier, if desired. SO-239 connector on
each end. Good shape. $ 12

B & W TVI filter, model 415
I have not been able to find specs on this model, but it says
right on it that it is for 52 ohm systems. It looks like it will
easily handle 1500 Watts. SO-239 connector on each end.
Good shape. $ 30

TVI filter, made by Communications Power, Inc in the USA.
This appears to be a bandpass filter for use on 10 (or 11)
meters, and is rated at 600 watts. It has provisions for tuning
the input and output for maximum TVI reduction. SO-239
connector on each end. $ 30

NyeViking 020-001
Cuts off just above 10 meters, and will take full legal
power. Nice shape. $ 30

Prices do not include shipping from Florida.

Thanks.

From: Brian Carling
Topic: 88 Message: 88

FOR SALE: Icom HM-7 Hand microphone with standard built-in pre-amplifier. This microphone is used with many of the earlier Icom rigs such as IC-740, IC-251A etc. and is in excellent condition.
Will need the connector to be attached. Nice coil cord and all in excellent shape.

Picture at:
http://home.cfl.rr.com/happysurfer/imag/icom_hm7.jpg

Available for $20.00 plus shipping

89. Kenwood MC-50 and other desk microphones FS

Yahoo group: hamstuff
Date: 2002-12-05 23:42:41 UTC
From: Ken Simpson, W8EK
Topic: 89 Message: 89

For Sale:

Kenwood MC-50 desk microphone. This is the
popular mic that is made to match the TS-120,
TS-130, TS-180, TS-520, TS-820, TS-530, TS-830
and others of that vintage. It has both high and low
Z output. This one is in very nice shape. Someone
very tastefully added and "up" and a "down" pushbutton
switch to it, making it function like the $100 type of
desk mics. But this one is only $ 60.

Other microphones and related for sale:

Turner 253 desk microphone.
This is a low Z model, so it will work with most of
the new modern rigs. It is a brushed chrome styling
with nice PTT switch. It looks almost like new. $45

Shure 444 desk microphone.
The Shure has voice shaping built in to it, with PTT switch
on the base, and a switch for High or Low Z under the base.
This mic is the gray color, and is in good shape for $ 45.

Turner "Plus 3" desk microphone
It has an amplifier built in to the base, so will match
either Hi Z or Lo Z rigs. Nice shape for $50

Prices do not include shipping from Florida.

Thanks.

91. CW keyer and paddles FS

Yahoo group: hamstuff
Date: 2002-12-09 19:11:39 UTC
From: Ken Simpson, W8EK
Topic: 91 Message: 91

For Sale:

MFJ 422 B electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 60

MFJ 422 (Not the "B" model)
Very similar to above, but older version. $55

MFJ-564 Deluxe Iambic Paddle.
This is the MFJ clone of the Bencher Paddle.
This model is the all chrome model, and is in very
nice shape. It will work with the MFJ 422 keyer above.
It looks close to new. With paper work for $ 45.

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the
black base, with chrome parts. Very nice condition. $65

I'll make you a deal if you want both a keyer and a paddle.
Either keyer will fit on either paddle.

Prices do not include shipping from Florida.

Thanks.

Topic: 93 Message: 93

Accessories for Kenwood TH-21 / 31 / 41 HTs For Sale:

Kenwood PB-21 H
This is the heavy duty battery for the TH-21 / 31 /41 series
of HTs. It is 450 mahr, instead of the standard 180 mahr of
the regular PB-21. With paperwork for $ 25.

Kenwood W09-0393
"Wall wort" charger to use with the PB-21 H battery pack
(above), if you do not use the desk charger. This is NOT
the standard charger for the regular PB-21, but a special
one for the PB-21 H. $10

AC adapter for TH-21 / 31 / 41 HTs
Wall wort DC supply plugs into wall, and has adapter
that slides on to the HT to use it off of 115 V AC. $ 25

Kenwood SC-6 protective case.
Fits the TH-21 /31 /41 series of HTs. It does not have a
"cut out" for the DIP switches on the PL encoder, but will
protect the HT in great shape. $ 10

Kenwood DC-21 used to operate the TH-21 / 31 / 41
from 13 V DC. Includes cigarette lighter plug, and
voltage converter. With paper work for $25.

Kenwood RA-8 A "Stubby duck" antenna for the TH-21,
two meter HT. $ 10

Kenwood RA-10 A "Stubby duck" antenna for the TH-41.
440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH -
21 / 31/ 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Prices do not include shipping from Florida.

Thanks.

94. FS: Glass Chimneys for 4-400 Tubes

Yahoo group: hamstuff
Date: 2002-12-17 17:21:51 UTC
From: Brian Carling
Topic: 94 Message: 94

FOR SALE:
Two EIMAC SK-406 Glass Chimneys

Suitable for 4-400 and similar class tubes.

Brand new, never used.

Selling the pair for $50.00 plus shipping

95. FS: VARIACS

Yahoo group: hamstuff
Date: 2002-12-21 14:00:43 UTC
From: Brian Carling
Topic: 95 Message: 95

FOR SALE:

VARIAC Model W10 variable transformer for 120V AC in,
and 0-120V out at 10 Amps, brand new and complete with
the knob and dial scale
$75.00 plus shipping

VARIAC Model W10 variable transformer for 120V AC in,
and 0-120V out at 10 Amps, looks like new, has knob
but is missing the dial scale plate
$65.00 plus shipping

General Radio Variac model M20 has 0-140V AC at 20 Amps - enclosed in heavy
duty aluminum case with feet.
Heavy duty construction that G.R. is famous for.
Comes with knob and scale. Excellent shape - Looks like new.
Plate states that it is for 350 Hz and up but works OK up to a
few amps on 60 Hz also.
Will sell for $45.00 plus shipping.

E-mail me for pictures or to arrange purchase.

96. Gonset VHF Rigs FS

Yahoo group: hamstuff
Date: 2002-12-21 14:07:08 UTC
From: Brian Carling
Topic: 92 Message: 96

99. MFJ keyer and paddle FS

Yahoo group: hamstuff
Date: 2003-01-09 22:04:48 UTC
From: Ken Simpson, W8EK
Topic: 99 Message: 99

For Sale:

MFJ 422 B electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 60

MFJ 422 (Not the "B" model)
Very similar to above, but older version. $55

MFJ-564 Deluxe Iambic Paddle.
This is the MFJ clone of the Bencher Paddle.
This model is the all chrome model, and is in very
nice shape. It will work with the MFJ 422 keyer above.
It looks close to new. With paper work for $ 45.

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the
black base, with chrome parts. Very nice condition. $65

I'll make you a deal if you want both a keyer and a paddle.
Either keyer will fit on either paddle.

Prices do not include shipping from Florida.

Thanks.

(I finally got a free web site that has decent capacity and actually works! Just close or ignore the pop-ups!)

102. FS: Power transformers and Filter Chokes

Yahoo group: hamstuff
Date: 2003-01-13 17:21:08 UTC
From: Brian Carling
Topic: 102 Message: 102

For Sale:

Freed Power Transformer model 16619
Primary is 115 / 230V AC at 50 - 1600 Hz
Secondaries:
700V CT at 220mA ICAS, 110 mA continuous
6.3V at 4 A
5V at 3A
Gray potted steel case in excellent clean condition.
Dimensions: 4-1/4" X 3-1/2" X 5-3/8" tall.
QTY 2 available for $19.00 each plus shipping

Freed Filter Chokes type #18863:
10 Henries at 220 mA ICAS, 110 mA continuous
and series R = 260 ohms.
Gray potted steel case in excellent clean condition.
Dimensions: 2-3/4" X 2-/12" X 3-1/2" tall.
QTY 2 available for $12.00 each plus shipping

Raytheon Plate transformer type TF15X02YY
Has 120V AC Primary.
Secondary is 1100V CT at 360 mA ICAS,
180 mA continuous.
Dimensions: 3" X 5.25" X 6.5" tall.
Potted, encased case with four mounting studs.
Will sell for $38.00 plus shipping

ADC Co. (AVCO-Crosley) model TF4SX03KA
Has 120V AC primary and two secondaries.
Sec A: 1050 V CT at 150mA ICAS, 75 mA continuous
Sec B: 5V at 20 A
The dimensions are: 3.5" X 4" X 5.25" tall
Will sell for $25.00 plus shipping

106. Some more rigs for sale

Yahoo group: hamstuff
Date: 2003-01-17 02:41:50 UTC
From: Brian Carling
Topic: 106 Message: 106

FOR SALE:
Radio Shack DX-150A receiver.
This is the model with the built-in speaker. Excellent working
condition. Shortwave/Amateur Table-Top Receiver for AM, SSB and CW.
Covers 535 kHz to 30 MHz in four bands.
Has main tuning dial and bandspread for the ham bands.
Has AVC, BFO, s-meter etc. Headphone jack on front panel.
Will sell for $85.00 plus shipping.
Picture at:
http://www.gizba.com/x/sidevalve/imag/dx150.jpg

Gonset Communicator II in near mint condition.
This is the 2m AM transceiver model. Collectors item.
Silver case. Looks just like when it was new.
Will sell for $115.00 plus shipping
Picture at:
http://www.gizba.com/x/sidevalve/imag/gonset2.jpg

Military Surplus Heterodyne Frequency Meter.
Type CKB-74028 in excellent condition with manual.
Untested but looks good.
Available for $50.00 plus shipping
Picture at:
http://www.gizba.com/x/sidevalve/imag/ckb74028.jpg

Heathkit SW-717 receiver in excellent condition.
Not a mark on it. Looks like new. Works well.
Comes with schematic and partial manual.
1968 - 1972 era superhet design covers 0.55 - 30 MHz in 4 bands:
550 - 1550 kHz,
2.0 - 5.0 MHz,
5.0 - 12.5 MHz,
12.5 - 30.0 MHz.
Modes AM, CW and SSB
Will sell for $75.00 plus shipping
Picture at:
http://www.gizba.com/x/sidevalve/imag/sw717_2.jpg

Globe HG-303 CW Transmitter 80 thru 10m. Has a 6146 final for about 90 Watts
maximum. Crystal control. Metering for plate & grid.
Near mint condition with original box - $150.00
plus shipping.
Picture at:
http://www.gizba.com/x/sidevalve/imag/globe_hg303.jpg

E_mail me to arrange purchase.

107. TVI filters (Low Pass Filters) FS

Yahoo group: hamstuff
Date: 2003-01-18 17:23:56 UTC
From: Ken Simpson, W8EK
Topic: 107 Message: 107

I have a variety of TVI filters For Sale:

Drake TV-42-LP
Low pass filter for the transmitter.
Rated for 100 W thru 30 MHz. It looks like
new, except for slight wear on the label. $ 15

Ameco Model LN-2 low pass filter
It says it is designed for 50 to 72 ohm coax.
Good for about 100 watts. It could be used between
an exciter and amplifier, if desired. SO-239 connector on
each end. Good shape. $ 12

B & W 425 "antique" low pass filter
I know most people are not going to think that a B & W 425
low pass filter is that old, but this one is. I never saw one
like it before. It appears that the case is made of copper,
or at least copper plated, and then painted. There are just
enough of the paint flakes coming off to see the copper
underneath. The weight of this filter is about twice that of
the more modern B & W 425 filters. In case any one does
not know, the 425 is rated to take full legal power, and cuts
off just above 10 meters. This one is $ 30.

TVI filter, made by Communications Power, Inc in the USA.
This appears to be a bandpass filter for use on 10 (or 11)
meters, and is rated at 600 watts. It has provisions for tuning
the input and output for maximum TVI reduction. SO-239
connector on each end. $ 30

Prices do not include shipping from Florida.

Thanks.

108. Larsen VHF and UHF mobile antennas FS

Yahoo group: hamstuff
Date: 2003-01-20 21:10:48 UTC
From: Ken Simpson, W8EK
Topic: 108 Message: 108

Larsen VHF and UHF mobile antennas For Sale:

UHF antennas:
LM-450 coil and whip - 5 db gain - new - $ 22

Two meter (VHF) antennas:
NMO-150 coil only - Gray color - new $ 18
NMO-150 coil only - Black color - new $ 18
MFJ NMO-150 equivalent - Black - like new - $15
LM-150 coil only - new $ 18
NLA-150 coil only - new - $18

Add a 49 inch whip available from Radio Shack. It is much easier
to get a whip locally than to ship the long box, but if you
need them, they are $8 each.

(LM is 5/16 inch stud, NMO is "Motorola" mount)

Parts:
HP-34 - Hole Plug for 3/4 inch hole (Black) - $ 1

Prices do not include shipping from Florida.

Thanks.

112. FS: Triplett Frequency Meter

Yahoo group: hamstuff
Date: 2003-01-22 01:31:54 UTC
From: Brian Carling
Topic: 111 Message: 112

FOR SALE:
Triplett Model 3256 Frequency Meter.
This appears to be an absorption wave meter.
Shaped very much like a grid dip meter.
Has two ranges. One band covers 80 and 40m and has
the calibration markings for these two bands.
Other band covers 14 through 30 Mc with markings for
20m, 15m and 10m bands.
Has a switch to select between the two ranges.
Neat little gadget measures 5-1/4" long X 2-1/4" X 2-1/4"
plus a coil extends 2-1/2" out the top.

Has a very nice Triplett 0-1 mA meter built in.
There is a headphone jack on the front for monitoring detected
signals. Signals are coupled into the unit by inductive coupling to the coil. Can be used for identifying, monitoring and tracing RF signals along transmission lines, in tank circuits etc.

Condition of the unit is very good. Gray hammertone finish over copper plated
steel chassis-cabinet.

Will sell for $18.00 plus shipping

From: Ken Simpson, W8EK
Topic: 117 Message: 117

For Sale:

MFJ 422 electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 60

MFJ-564 Deluxe Iambic Paddle.
This is the MFJ clone of the Bencher Paddle.
This model is the all chrome model, and is in very
nice shape. It will work with the MFJ 422 keyer above.
It looks close to new. With paper work for $ 45.

Both of the above for $100.

Prices do not include shipping from Florida.

Thanks.

132. FS: Swan 250 VHF station for 6m

Yahoo group: hamstuff
Date: 2003-02-20 20:32:11 UTC
From: Brian Carling
Topic: 132 Message: 132

FOR SALE:
Swan 250 with 117C power supply/speaker cabinet. Comes with all cables
The Swan 250 is a 6 meter transceiver which was first introduced in the spring of 1965.
With two 6146B tubes as the PA, this radio is rated at 240 watts PEP on SSB, 180 watts CW, and 75 watts on AM.
Band coverage is 50 to 54 Mc, and the pi network coupling provides for a wide range of antenna impedances.
The original selling price of the 250 was shown as $325.00 US.
A review of the 250 appears in the July 1967 issue of CQ.
All in good operating condition with manual. Cabinets look excellent.
The 117C power supply has two small holes in the front, easily filled.
Swan 250 available for $225.00
Swan 117C available for $75.00
Will sell for $275.00 plus shipping

Also have VX-2 VOX unit possibly available for additional $35.00
(Sale is pending with the 350 at present)

145. FS: Rare Globe Electronics VHF-62 Transmitter

Yahoo group: hamstuff
Date: 2003-03-01 14:48:14 UTC
From: Brian Carling
Topic: 145 Message: 145

FOR SALE:

Globe Electronics Hi-Bander model VHF-62 Transmitter.
RARELY seen. This rig runs 60 watts AM and CW on both
6 meters and 2 meters.
Equipment is in fairly good shape. The inside looks
VERY good.
Tubes: 6146 P.A. final and modulator type 6L6GB.
Has a built-in 120V AC power supply, modulator etc.
Provision is made for VFO input or crystal control.
Pilot lamps for power & plate.
Front panel controls are: AC off-Mic Gain,
Function switch for: AM/STBY/TUNE/STBY/CW,
Osc. Tune, Buffer Tune, Band selector 2m/6m,
Final Grid Tune, Antenna load, Final plate tune,
Meter switch for Osc./Buffer/PA Grid/PA Plate.
On the rear panel there are two fuses, Mic input,
Accessory plug, and SO-239 connectors
for 2m and 6m antennas.

This is a really cool piece of equipment and
they only sold a small number of them.
Must be one of a handful still in existence.
Will sell for $159.00 plus shipping

Picture and details at:
http://www.gizba.com/x/sidevalve/radios.htm

TenTec accessories For Sale:

TenTec 252 M power supply, 20 amp, 13 V DC supply.
Matches the Triton IV series of transceivers. It has an
ammeter on front. Good condition, with manual for $ 100

TenTec 262 power supply, 20 amp, 13 V DC
Cosmetics match the Triton I and II series (walnut wood grain
and eggshell), but can be used with almost any HF rig. It
originally had VOX built in to it, but the VOX has been
disconnected. Nice shape, with paper work for $95

TenTec 245 CW filter.
Fits any of the Triton series (I, II, IV, 540, and 544), and
has up to 3 levels of filtering (as narrow as 150 Hz).
With the paper work for $50

TenTec 645 electronic keyer
This keyer has built in iambic paddles, and features separate
dit and dah memories (switchable), and either automatic or
adjustable weighting. Speed control is on the front panel.
It is powered from 13 V DC, and also has a variable touch
control. This particular unit is in very nice shape. It works
100% and looks very nice. Paper work is included for $65

TenTec 705 desk microphone.
Four pin plug, matches most all of TenTec rigs. This is
the current desk microphone TenTec is selling.
In very nice condition, with paper work for $69

Prices do not include shipping from Florida.

Thanks.

For Sale:

Kenwood MC-80 desk microphone

This is the very nice "gooseneck" mic that also includes
an "up" and "down" switch, and nice windscreen. It is
wired with the 8 pin Kenwood connector. Looks and
works very nice, with paper work for $70 plus shipping
from Florida.

Thanks.

174. Midland SWR bridge FS

Yahoo group: hamstuff
Date: 2003-04-19 22:01:11 UTC
From: Ken Simpson, W8EK
Topic: 174 Message: 174

For Sale:

Midland 23-126 SWR bridge.

This is a nice standard SWR bridge to check the SWR
on your antennas. It has a meter that is switched
between forward and reverse power.

The paper work (included with it) says it covers from
3.5 to 150 MHz, so that means it can be used on 6
and 2 meters as well as the HF bands.

This particular meter works 100% and looks like it
just came out of the box.

$20 plus shipping from Florida.

Thanks.

For Sale:

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone
pad to a lot of rigs in the 70s and 80s. Normal
hand mic from the front, but had a touchtone pad
on the back. Four pin mic plug.

This particular unit has been used, but is in good shape and
includes paper work. $ 40 plus shipping from Florida.

Thanks.

digital mode controllers For Sale:

AEA/Heath HK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY,
Amtor, ASCII, CW, etc. This is the version that includes
the internal mailbox. I think the firmware is the latest,
although I never know when they might come out with
an upgrade. I can not find a scratch on it. With paper
work for $ 85

AEA PK-88, with the mailbox.
This unit will only do packet, and not all of the other
exotic modes, but it does packet really well. This one
also works 100%, and looks the same. $ 50

"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232 or PK-88. $ 20

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 180 Message: 180

CW Key For Sale:

This CW key is sort of a Japanese copy of J-38 key.
Not exactly, but sort of! There is no shorting switch,
as if we need that anyhow. But it has an oval base
that is brass colored. The key is mounted on a wood
base, that I think is cedar. Under the wood base is a
piece of lead to add weight, so the key will not "walk
around". There are also four fairly large rubber feet
to keep it from slipping.

$30 plus shipping from Florida.

Thanks.

183. FS: Hammarlund Super Pro (2)

Yahoo group: hamstuff
Date: 2003-06-14 21:42:49 UTC
From: Brian Carling
Topic: 183 Message: 183

FOR SALE:

Hammarlund Super Pro receivers needing restoration,
but basically almost all there, or use them as parts rigs.
I have two of these. Both are missing several tubes, but
the dials look good. You might put tubes into one or both
and find that they play OK.

No guarantee - one also needs a replacement antenna
trimmer cap installed, but useful as a project to build one
out of the two or as "parts rigs."
Rack-mount style with no covers.

These are not "pretty" radios, neither are they covered in crud!
They are NOT in working condition and will require some work.

I have two of these at $85.00 each, plus shipping.

184. FS: YAESU FL-1000 linear amplifier

Yahoo group: hamstuff
Date: 2003-06-14 22:46:27 UTC
From: Brian Carling
Topic: 184 Message: 184

FOR SALE:

RARE YAESU FL-1000 linear amplifier.
1000 watts input on 80 through 10 meters. Uses Four 6JS6C Tubes.

See:
http://www.alphalink.com.au/~gfs/yaesu/Yaesu2.htm
EARLY YAESU RADIOS

This was used with the early FL-100B and FR-100B series HF radios. Beige case.

Good working condition for its age - very rare item.

Set up for 120V AC operation - all original.
Will need some callsign stickers removed off the front
panel. Peel off and the panel will look almost like new.

Available for $250.00 plus shipping

The"Nashville Rebel"' owner of the Channel Masters CB Radio and Scanner Club invites all interested prospective members to sign up for the clubs email membership message board. Nashville Rebel validates the continued usefulness of CB radio and the commitment of the Channel Masters membership in his own extremly moving account, as follows: Last year I was contacted by a lady that was seeking help in locating her husband. He was a truck driver and she was trying to get a message to him and let him know that his mother had suffered a severe heart attack and had only hours to live. He was supposed to be in the Virginia area. I sent a message to all my members to attempt to locate the driver using his CB handle and name of the company he worked for.Many of the members got on their CB's and someone was able to contact the driver in Kentucky. He was able to make it home in time to kiss his mother goodbye before God took her away.

FOR SALE:

500 pF at 20 kV doorknob capacitor. QTY 1 only
Will sell for $5.00 plus shipping

BUD Company Neutralizing capacitors
Pair of excellent ceramic-mount variable caps. Classic type.
Great for stabilizing a final amplifier.
Dimensions: each is 2.5" tall and has 1" diameter plates.
Will sell the pair for $12.00 plus shipping.

RF Plate Choke 1
Pi-wound type with 6 sections. Has ceramic mounting and
solder terminals.
Good for approximately 400 watt final amplifier.
Dimensions: 3.5" tall X 2" diameter.
Available for $6.00 plus shipping

RF Plate Choke 2
Pi-wound type with ceramic mounting and solder terminals.
3 sections pi windings, and approximately 2 to 2.5 mH
Good for about 100 to 150 watts.
Dimensions: 2.75" tall X 0.5" diameter.
Available for $4.00 plus shipping

RF Plate Choke, Hammarlund
Pi-wound type new in box, with solder terminals.
Dimensions: 2.375" long X 1.125" diameter.
Looks like about 5 mH inductance.
Good for approximately 300 watt RF final amplifier.
Available for $8.00 plus shipping

Small Vacuum Variable Capacitor
Suitable for VHF applications OR as a neutralizing cap.
Rated for 10,000 V DC.
Dimensions: 3" long X 0.75" diameter.
Uncertain of rating but probably about 10 or 20 pF
Hence very reasonable selling price of $4.00 plus shipping

Barker & Williamson Type 3031 Coils
Two coils only. With original box. One of these appears to
have been used a little.
Dimensions: 2.5" diameter X 6" and 2.5" diameter X 4"
10 turns per inch
Will sell the pair for $15.00 total plus shipping

Pictures and details at:
http://home.cfl.rr.com/happysurfer/miscpart.htm

National NC-57M General Coverage Receiver Beautiful hammertone gray case in very good shape.
Very clean inside and out. All original knobs etc.
Superheterodyne set with 9 tubes.
Frequency coverage: LW: 190 - 410 kHz
MW: 560 - 1.55 MHz
SW: 1.55 MHz - 35 MHz
Has AVC, ANL, Bandspread, BFO for SSB and CW.
RF Gain, AF Gain, SEND-RECEIVE switching etc.
Built-in 5" speaker. Cabinet and chassis all in great shape.
Has no rust or grime. Receiver has been recapped and sounds great.
Supplied with a copy of the manual and schematic. Will sell for $99.00 plus shipping

RCA Victor Model 5X3 Tabletop
Shortwave superheterodyne receiver.
This antique radio is in good working condition for its age.
Covers AM broadcast band and shortwave. Dial is a little faded and case could use some work if you are a purist.
For everyone else it's just a fun old receiver with built-in rear facing speaker.
It originates from 1936, employs 5 tubes (6A7, 78, 75, 43 and 25Z5), has an IF of 460 kHz and covers two bands. Schematics and more information are available via the web.
Will sell for $35.00 plus shipping

Classic Radio Shack Patrolman portable transistor radio
in excellent shape $20.00 plus shipping

Regency Scanner with crystals - workls fine - $15.00

Midland CB walkie Talkie 4 watts with crystals - $15.00

BC-779 Super Pro, 1938 model - $85.00

SP-210X Super Pro also from 1938 - $85.00

207. TenTec filters FS

Yahoo group: hamstuff
Date: 2003-07-12 19:09:45 UTC
From: Ken Simpson, W8EK
Topic: 207 Message: 207

TenTec Filters For Sale:

TenTec 219 CW filter.
250 Hz, for the 9 MHz IF. Will work in the older Omni 546,
the newer Omnis in the 9 MHz IF, and in the Argonaut. Like
new, with all of the paper work for $69.

TenTec 285 CW filter
500 Hz, for the 6 MHz IF. Used in the Paragon, newer Omnis,
and others. Also like new, with paper work for $69.

TenTec 220, 2.4 KHz SSB filter.
This filter works in the 9 MHz IF, and is the 8 pole filter that
is used to replace the "standard" 4 pole filter in the Corsair I,
Argosy, etc. It can also be cascaded, and used in a slot for
a 218 filter for steeper skirts. This one is also like new. $75

TenTec 245 CW filter.
Fits any of the Triton series (I, II, IV, 540, and 544), and
has up to 3 levels of filtering (as narrow as 150 Hz).
With the paper work for $50

Prices do not include shipping from Florida.

Thanks.

Kenwood Microphones For Sale:

Kenwood MC-35 S hand microphone
This hand microphone is used with most all of the
older Kenwood rigs - TS-120, TS-180, TS-520, TS-820,
etc. It has a four pin plug on it to match these rigs.
Good shape for $40

Kenwood MC-80 desk microphone
This is the very nice "gooseneck" mic that also includes
an "up" and "down" switch, and nice windscreen. It is
wired with the 8 pin Kenwood connector. Looks and
works very nice, with paper work for $70

Prices do not include shipping from Florida.

Thanks.

212. FS: Cantenna style dummy load

Yahoo group: hamstuff
Date: 2003-07-19 11:45:26 UTC
From: Brian Carling
Topic: 212 Message: 212

FOR SALE:

52 ohm at 1 KW dummy load. Looks just like the
Heath Cantenna but can't say for sure as the label is gone.

Can has a small dent but this does not affect performance.
Has SO-239 connector on top for standard co-ax to attach.

Comes with "Tee" adapter for sampling RF.

Will ship without oil and you add mineral oil.

Available for $10.00 plus shipping.

213. REDUCED: Two Hammarlund Super Pros

Yahoo group: hamstuff
Date: 2003-07-19 12:52:17 UTC
From: Brian Carling
Topic: 213 Message: 213

REDUCED:

Hammarlund Super Pro receivers needing restoration.
I have two of these. Both are missing several tubes, but the dials, transformers, meters etc. all look good.

You might put tubes into one or both and find that they play OK.

Great for "parts rigs."
No covers.
You will need a power supply for these receivers.

eHam reviews:
Considering the 1938 design, the designer was brilliant. It is almost unbelievable radios like this existed 65 years ago. The radio has a so-so xtal filter, however the mechanical coupled I.F. bandwidth control actually works! The 15 watts of high-end quality PP audio using triode connected 6F6s driven by a 6F6 could 'fly' in a modern high-end tube type stereo system. Good sensitivity with a good audio amps equals picking out the signal you want to hear out of the three on top of one another. Some AMers swear by this radio. A SP-400 would perform about the same - N8FVJ

I am one of the AMers who swears by this radio... it has the rich, creamy smooth AM sound and warm tube overtones that you just don't get from most communications receivers. In terms of pleasant audio, I have put it up against an SX28 - and the Hammarlund won. - W1GFH

There were a lot of tire kickers, therefore:
Now reduced to only $65.00 each, plus shipping.

I am told that the models are as follows:
The first one appears to be either an SP-110X or SP-210X.

The second one is a military version of the SPR-210X, a.k.a. BC779.
It has been modifed to use miniature tubes in the RF section
100 kHz to 20 MHz in 5 ranges.

E-mail me for pictures.

Yahoo group: hamstuff
Date: 2003-08-13 15:16:10 UTC
From: Ken Simpson, W8EK
Topic: 223 Message: 223

For Sale:

Alinco DX-70, 160 thru 6 meter transceiver

The DX-70 covers 160 thru 6 meters, including the WARC bands,
and also has a general coverage receiver. Modes include SSB,
CW, FM, and AM. The narrow SSB filter is in it. Of course it
has memories, scan, dual VFOs, etc. It is a small unit, ideal for
mobile or use in a motor home, but its performance is fine for
a base station as well. A 13 V DC power supply at about 20
amps is needed in that situation.

This particular unit works 100% as best I can tell, and looks
close
to the same. It is in its original box, and includes all of the
things
that it came with originally -- hand microphone, power cord,
manual, etc.

$495 plus shipping from Florida.

Thanks.

Date: 2003-08-24 01:28:36 UTC
From: Ken Simpson, W8EK
Topic: 227 Message: 227

Accessory items for ADI HTs:

RBP-612 "High Power" 12 volt battery with a NiMH,
1000 mahr "rebuild". Like new, only charged 4 or
5 times. $ 40

Battery that fits ADI HTs.
It says "Standard" on it but is the same connections
as the ADI. 12 V 1000 mahr NiCad pack. $20

MFJ-1716 dual band rubber duck antenna
BNC connector. Works much better than most of the
antennas that come with the HTs. Like new. $15

Daiwa Boom mic and headset. Includes the boom mic and the
headphone, with a PTT switch. It has a 3.5 mm and a 2.5 mm plug,
so it fits many HTs. In great shape for $ 40.

Archer 20-210 A
These are smaller, and look like the kind the kids wear with a
boom box, but they are mono with a mono 1/8 inch connector.
Almost like new $ 12

Prices do not include shipping from Florida.

Thanks.

228. 2 meter xtals FS

Yahoo group: hamstuff
Date: 2003-08-26 23:13:47 UTC
From: Ken Simpson, W8EK
Topic: 228 Message: 228

Does anyone have an older two meter rig around
that still needs crystals?

I likely can help. I literally have 100s of both transmit
and receive 2 meter xtals. Most are in the 146 and 147
MHz band segments, with very few in the 145 MHz
segment.

These are all the small HC-25 xtals, like were used in
most of the solid state 2 meter mobiles and HTs.

If you need some, please e-mail the operating frequency
you need. I have them listed by operating frequency and
rig, and not by actual xtal frequency. Send the frequencies
you need (transmit or receive), and the rig that you have,
and I'll see if I can help. I have cross references for the
various rigs, so I will know what you need if you give the
rig. Crystals are $5 each, plus shipping from Florida.

Thanks.

231. Heath "Cantenna" Dummy Load FS

Yahoo group: hamstuff
Date: 2003-09-02 10:45:30 UTC
From: Ken Simpson, W8EK
Topic: 231 Message: 231

Heath HN-31 "Cantenna" RF Dummy Load For Sale:

This is the traditional Heath dummy load that will handle
up to 1000 Watts. It has a derating curve which is included.

I measured the resistor and it is about 48 ohms, so obviously
it is not fried, and is a good match for 50 ohms.

Paper work included for $40 plus shipping from Florida.

Thanks.

232. FS: Hustler 6BTV Vertical Antenna

Yahoo group: hamstuff
Date: 2003-09-09 02:06:51 UTC
From: Brian Carling
Topic: 232 Message: 232

FOR SALE:

HUSTLER 6BTV Vertical Antenna

Six Band coverage from 80 through 6m with excellent performance.
Covers 80, 40, 30, 20, 15, 10 and 6 meter bands.
VSWR 2:1 or better at band edges on 10-40 meters.
Up to 100 kHz. on 75/80 meters. Solid one inch fiberglass trap forms for optimum electrical and
mechanical stability. All sections 1.25" heavy wall, high strength aluminum.
Extra heavy duty aluminum mounting bracket with low loss, high strength insulators.
Easiest assembly and tuning of any multi-band vertical.
Feed with any length 50 ohm coax.

This antenna has only been used once to test it out and
circumstances have changed so that I can't use it.
Comes with the instructions. Read the full reviews on Eham at:
http://www.eham.net/reviews/detail/248

Complete details and pictures on Hustler's site:
http://www.new-tronics.com/main/html/base_hf_6_band.html

Comes with new instruction manual for $129.00 plus shipping

233. 1.8 to 525 MHz Wattmeter and SWR Bridge FS

Yahoo group: hamstuff
Date: 2003-09-16 13:55:06 UTC
From: Ken Simpson, W8EK
Topic: 233 Message: 233

For Sale:

Revex W-560 SWR and Power Meter

I know Revex is not a common name on a wattmeter, but this is a really great meter. It seems to be very similar to the Diamond SX-600. It covers from 1.8 to 525 MHz, so it will basically cover any band you would want to use it on. It will also measure average or PEP power. The ranges are a bit odd -- 3 W, 20 W, and 200 W -- so it would be good for QRP use also. It measures forward or reverse power, but also has a direct SWR measurement on it. There are 2 sets of connectors. Regular SO-239 connectors are used with a frequency range of 1.8 to 160 MHz. There is also a set of "N" connectors for use from 140 to 525 MHz. It is really a very nice versatile meter.

This particular meter looks very close to new. I can not find any scratches or imperfections. Of course it works 100%.

$100 plus shipping from Florida.
Thanks.

From: Ken Simpson, W8EK
Topic: 234 Message: 234

Electronic Keyer and Bencher Paddle For Sale:

MFJ 422 B electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 50

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the
black base, with chrome parts. It works 100 %, and
looks like new. $65

Both keyer and paddle above, purchased as one unit
for $105.

Prices do not include shipping from Florida.

Thanks.

Santec HTs and accessories For Sale:

Santec ST-144
Covers 142 to 150 MHz, with 3 power levels.
Approx 3.5 W, 1 W, and 0.1 W. It has 10
memories, including ability to program odd
offsets. 24 hour clock built in to the LCD
display. This unit also has the SS-32 sub-
audible tone encoder in it. Works fine, but
shows its use cosmetically. With both operating
and service manuals for $ 50.

Santec ST-7 T
This HT covers 440 to 450 MHz with thumbwheel
selection of operating frequency. It has 3 power
levels, and includes the SS-32 subaudible tone
encoder. Touchtone pad on front. $ 40

Santec speaker microphone
It has the small round plug (about 3/8 inch)
with 6 pins, as used on most Santec HTs, and
many Wilson and Yaesu HTs. $25

Leather case for most Santec HTs, including ST-7,
ST-142, ST-144, and HT-1200 and maybe others.
This is real Bianci (spelling) leather -- not vinyl. $ 20

DC cord for Santec HTs.
Cigarette lighter plug on one end has special voltage
dropping circuitry. $ 12

Prices do not include shipping from Florida.

Thanks.

Date: 2003-09-27 15:17:17 UTC
From: Ken Simpson, W8EK
Topic: 244 Message: 244

Larsen VHF and UHF mobile antennas For Sale:

UHF antennas:
LM-450 coil and whip - 5 db gain - new - $ 20

Two meter (VHF) antennas:
NMO-150 coil only - Gray color - new $ 16
NMO-150 coil only - Black color - new $ 16
MFJ NMO-150 equivalent - Black - like new - $12
LM-150 coil only - new $ 16
NLA-150 coil only - new - $16
"Q" - quarter wave whip for LM mount - can be cut for
2 m, 220 MHz, or 440 MHz - $ 5

Antenna mounts:
LM-MM - use with any "LM" mount antenna - $20
Special LM-MM - This LM-MM was modified for use on top
of a mobile home. It has the regular coax replaced
with about 40 feet of RG-8 X coax. $ 30
NLA-TLM - Trunk Lip Mount for any NLA antennas - $15

Add a 49 inch whip available from Radio Shack. It is much easier
to get a whip locally than to ship the long box, but if you
need them, they are $8 each.

(LM is 5/16 inch stud, NMO is "Motorola" mount)

Parts:
HP-34 - Hole Plug for 3/4 inch hole (Black) - $ 1

Other 2 meter mag mount antenna:
"Generic" 2 m mag mount $12

Prices do not include shipping from Florida.

Thanks.

Cox Electronics audio compressor. Great for AM ops.
Use with internal 3 X AA batteries or external 4.5V power
(Not supplied)
Very good condition - $45.00

Heathkit HS-24 speaker
This is the later version of this external speaker
with nice wrinlkle paint. The earlier ones were plain paint
and were not as pretty.
The HS-24 was used with a number of the mobile
transceivers such as the HW-12, HW-101, SB-101 etc.
With cable and is in excellent condition - $35.00

Heathkit SB-600 Speaker
Front looks nice. Case has a few paint chips and marks,
but will clean up nicely. Has a new speaker inside.
Available for $35.00

Heath HP-23 Power Supply
Works great with all of the old Heath radios such as HW-101,
SB-101 etc. Has a little surface rust on the top of transformer,
but otherwise in fairly decent shape. Works FB.
This may also work with some other radios like Collins etc.
Complete with all cables.
Will sell for $55.00

National Radio Company Model SOJ-1 Select-O-Ject
BOOSTS 38 db! REJECTS 38db! On any frequency.
Rare and hard-to-find accessory that is very desirable
for use with all models of National receivers.
http://www.io.com/~nielw/nat_list/selec.htm
(Picture and specifications)
Looks and works great with your National receiver.
A copy of the manual is included.
Available for $125.00 plus shipping

Barker and Williamson Model 426 Low Pass Filter.
Heavy duty construction like all of their equipment.
A top performer for your 1 KW class station with two SO-239 connectors.
Battleship gray color case.
Available for $25.00 plus shipping

Protax 5-position rotary antenna selector switch.
Also has grounding position.
Excellent condition - $45.00 plus shipping

National Radio Company SPP-3 ceramic tube plate caps.
Brand new in unopened bags.
QTY 2 available for $4.00 each

E.F. Johnson Low Pass Filter
This is the 1000 Watt in-line TVI filter. Great condition.
Ready to prevent all of those TVI headaches.
Available for $25.00 plus shipping.

Shipping additional on all items.

Date: 2003-10-04 17:53:29 UTC
From: Ken Simpson, W8EK
Topic: 252 Message: 252

13 Volt DC power supplies For Sale:

TrippLite PR-10 a
This is a 10 amp regulated supply, so it is
good for most 2 meter rigs, etc. $30

DYN, 3 amp
This is a regulated 3 amp supply. It would
be fine for smaller 2 meter rigs, or to eliminate
that tangle of a dozen wall worts that you have
plugged in all over the place. $ 18

Generic 1.2 amp
This is only 1.2 amps, but it is regulated. It would
work for HTs requiring 13 V DC, or to replace the
wall worts. However, it is regulated, which most
wall worts are not. $12

Prices do not include shipping from Florida.

Thanks.

258. Kenwood MC-85 "muti-rig" desk microphone FS

Yahoo group: hamstuff
Date: 2003-10-08 00:31:42 UTC
From: Ken Simpson, W8EK
Topic: 258 Message: 258

For Sale:

Kenwood MC-85 desk microphone

This desk mic has the 8 pin plug, and is made to work
with most all of the Kenwood rigs that take the 8 pin
plug. It is a very nice "gooseneck" type mic. This
desk mic is similar to the MC-80, but has provisions
for 3 separate cables, so that it can be used with 3
different radios. It also has a speech compressor built in.
This one is in good shape, no scratches that I can find,
with paper work, for $110 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

From: Brian Carling
Topic: 260 Message: 260

FOR SALE: Johnson Ranger Transmitter

75 watts CW and 65 watts phone on 160 through 10 meter bands.
Full metering of all functions, and built-in VFO.

Comes with the manual and an original sales literature.
Good condition. Front panel looks excellent.
I would repaint the case, but it is not dented or beaten up.

Has a new AC power cord. Needs the three long cabinet screws.
May require some additional repairs, but appears to be complete
and in pretty good shape.

Picture available at:
http://home.cfl.rr.com/happysurfer/radios.htm

Available for $325.00 plus shipping

261. FS; Station Accessories

Topic: 261 Message: 261

FOR SALE:

ICDI Military Speaker
For use with 600 ohm military radios.
This device is a powered speaker that has 600 ohm and
high impedance inputs. Has volume control to set level.
It was designed to be used with radios like the R-390 and other military sets.
Switchable input impedance for hi-z and 600 ohm lines.
Comes with AC adapter that provides the needed 48V DC to power
the built-in audio amplifier stage. Rack mountable design.
Tailored for voice communications. Excellent condition.
QTY 1 Available for $40.00 plus shipping

Footswitch
Heavy duty type. has cables attached for switching AC power line
but may be used with other arrangement for radio PTT line etc.
Switch is rated for 250V at 20 Amps.
Excellent coindition and top quality unit.
Qty 1 only available for $16.00 plus shipping.

Antenna Changeover relay 120V AC
Has SO-239 connector and two RCA connectors.
Good for up to 200 watts.
Available for $12.00 plus shippiing.

Radio Shack 12V DC power supply
OPerates on 120V AC line to power your 12v equipment
Rated for 2.5A continuous duty. Fused for protection
Binding posts terminals and fuse are in rear.
Has over-sized heatsink for trouble-free operation.
Will sell for $12.00 plus shipping

MARS SWR Meter
Has forward-reverse power meter that also shows percent.
reflected power. Switchable from 52 ohms and 75 ohms
Uses standard SO-239 connectors.
Very good condition
Will sell for $25.00 plus shipping

Antenna Elevation Rotator Motor
Satellite Ops take note!
This is a nice elevation rotor used for satellite operations.
I have used one of these before with 20 elements 435 MHz
and 10 elements on 144 MHz and they do a great job.
The cross-boom goes through the rotator to equally distribute
weight and support the balanced load.

I have NO CONTROLLER for this rotator.
It needs a Four (4) wire controller.
Appears to be in excellent shape.
Available for $6.00 plus shipping.

263. Hallicrafters Tuning Units For HT-4

Yahoo group: hamstuff
Date: 2003-10-18 12:16:46 UTC
From: Brian Carling
Topic: 263 Message: 263

FOR SALE
Hallicrafters Tuning Units For HT-4 / BC-610 Transmitter
A complete set of QTY 7 available with the carrying case.
These were used with the WW2 era Hallicrafters HT-4A through HT-4F.
They are selected from the front panel to cover three frequencies.
Cover all tuning ranges TU-47 through TU-53 cover 160 through 30m bands.
TU-47 Tuning unit, 2.0 to 2.5 MHz
TU-48 Tuning unit, 2.5-3.2 MHz
TU-49 Tuning unit, 3.2-4 MHz
TU-50 Tuning unit, 4-5 MHz
TU-51 Tuning unit, 5-6.35
TU-52 Tuning unit, 6.35-8 MHz
TU-53 Tuning unit, 8-12 MHz

These all have the original, unusual smooth (cool) Hallicrafters black knobs that look like miniature tires.
They all appear to be complete and have not had any parts removed or any 'mods' done.
Will sell for $30.00 each or all seven for $175.00 plus shipping

Actual shipping charges to US address will be added. E-mail me for more info. 73s KD5VD

266. FS: 1950s Novice Dream Station...

Yahoo group: hamstuff
Date: 2003-10-22 19:39:08 UTC
From: Brian Carling
Topic: 266 Message: 266

FOR SALE:
Transmitter, Receiver & Keyer.

Classic Heathkit DX-20 Transmitter.
Great little nostalgic CW rig in very good condition.
Crystal controlled, or use with an external VFO.
Uses 5U4 rectifier, 6CL6 oscillator tube and 6DQ6 sweep tube final.
50 watts input on the 80, 40, 20, 15, 11 and 10 meter bands.
Specifications at:
http://www.heathkit-museum.com/ham/dx-20.shtml

All of the knobs are original AND the rare crystal access hole hole cover is here.
Very clean internally. Still has a good, original AC power cord.
The case has no dings or dents. A few minor marks and scratches
here and there, but overall not bad. Has only a few tiny
rust spots. For its age, this is one of the better DX-20s
that I have seen.
Comes with a copy of the manual.
Will sell for $95.00 plus shipping

Now the receiver:
Collins R-388. This is the military version of the 51J3
superheterodyne receiver. Has 18 tubes.
is a 30 band receiver that covers 540 khz to 30.500 MHz The receiver will readout
out to 1 khz for extremely good dial accuracy.
The filter bandwidth ranges from 200 Hz to 6 kHz in 5 steps. The unit is extremely
stable.
Linear tuning, divided into thirty 1 MHz tuning bands.
Built-in crystal calibrator (100 KHz)
Has convenient 4 ohm and 600 Ohm audio outputs.
Power: 85 W at 115 or 230 VAC, 45 to 70 Hz
This unit comes with the top cover and is in excellent condition.
Shipping weight 40 pounds.
Available for $525.00 plus shipping.

And finally a Hallicrafters TO-keyer for Boatanchor CW.
Hallicrafters HA-1 'TO Keyer'
Great for use with tube type transmitters.
Will also work fine with the newer radios.
Excellent working condition - $115.00 plus shipping

283. Collins 51J 3/ R388

Yahoo group: hamstuff
Date: 2003-11-10 12:55:29 UTC
From: Brian Carling
Topic: 283 Message: 283

Buyer reneged so this is once again available:

Collins R-388 Receiver

Military version of the 51J3 superheterodyne receiver. Has 18 tubes.
Collins R-388 is a 30 band receiver that covers 540 khz to 30.500 MHz
The receiver will readout out to 1 khz for extremely good dial accuracy.
The filter bandwidth ranges from 200 Hz to 6 kHz in 5 steps. The unit is extremely stable.
Linear tuning, divided into thirty 1 MHz tuning bands.
Built-in crystal calibrator (100 KHz)
Has convenient 4 ohm and 600 Ohm audio outputs.
Power: 85 W at 115 or 230 VAC, 45 to 70 Hz
This unit comes with the top cover and is in very good condition.

Available for $525.00 plus shipping.

284. FS: LOT of 8 ROUND Crystals

Yahoo group: hamstuff
Date: 2003-11-10 16:28:16 UTC
From: Brian Carling
Topic: 284 Message: 284

FOR SALE:

Round BC3 Type Crystals - Some new in boxes.
These are all larger with standard 3/4" pin-spacing.
1775 kHz (slightly smaller case) New in Box
3581 kHz (slightly larger case)
3854 kHz new in box with data sheet.
7030 kHz
7039 kHz
7040 kHz
7283 kHz new in box
28776 kHz
These eight crystals are available for $12.00 each or I will sell all 8 of them for only $79.00 plus shipping.

First consideration will go to selling these as a group.

288. TVI filters FS

Yahoo group: hamstuff
Date: 2003-11-17 14:36:41 UTC
From: Ken Simpson, W8EK
Topic: 288 Message: 288

TVI filters For Sale:

Drake TV-1000-LP
Low pass filter for the transmitter
This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 W
below 30 MHz, and about 200 W up to 52 MHz. It is in
very nice shape, with the copper is still nice and shiny.
$ 35

E F Johnson low pass filter
52 ohms impedance, Catalog number 250-20. This is the
cylindrical filter, with an SO-239 connector on each end.
There is also a variable cap on each end, for precise adjustment
to cure your particular TVI problem. $30

B & W 425 "antique" low pass filter
I know most people are not going to think that a B & W 425
low pass filter is that old, but this one is. It appears that the
case is made of copper, or at least copper plated, and then
painted. There are just enough of the paint flakes coming
off to see the copper underneath. The weight of this filter
is about twice that of the more modern B & W 425 filters.
In case any one does not know, the 425 is rated to take full
legal power, and cuts off just above 10 meters. $30.

Drake TV-300-HP
High Pass filter for the TV. 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box, with an "RLD"
logo on it, and says "NEW TV-300 HP High Pass Filter,
Attenuates 0-52 MHz". A grounding strap is also
attached. $ 15

TVI filter, made by Communications Power, Inc in the USA.
This appears to be a bandpass filter for use on 10 (or 11)
meters, and is rated at 600 watts. It has provisions for tuning
the input and output for maximum TVI reduction. SO-239
connector on each end. $ 30

Prices do not include shipping from Florida.

Thanks.

294. TenTec Paragon HF xcvr and accessories FS

Yahoo group: hamstuff
Date: 2003-11-27 15:51:17 UTC
From: Ken Simpson, W8EK
Topic: 294 Message: 294

For Sale:

TenTec model 585 Paragon

This rig covers 160 thru 10 meters, including the
WARC bands, and the new 5 MHz band. It has a
general coverage receiver, so also makes a great
short wave receiver. It transmits SSB and CW, and
also has an AM receive mode. The receiver is fantastic,
and the transmitter is great also, with terrific audio.

Of course it has memories, scanning, and all of the
"bells and whistles" one expects. A speech processor
is built in, and it has full QSK on CW.

This particular unit is immaculate. I can not find a scratch
on it, although there is some wear (not scratches) on a
couple of the push button keypad switches, from use.
Of course it works 100%.

The original box, and original manual (with service
information) is included for $700.

TenTec model 961 power supply
This is a 20 amp, 13 V DC power supply, with speaker,
that matches the Paragon (above), plus other TenTec
rigs. It works great, and looks great also. No scratches
or wear that I can find. With paper work for $150.

TenTec 288 SSB filter.
1800 Hz, used for narrow SSB, or wide CW, for the 6 MHz IF.
Used in the Paragon, newer Omnis, and others.
Like new, with paper work for $69.

TenTec hand microphone
I think it is model 700, although it is not written on the
mic. It is an electret condenser mic, with 4 pin plug
that matches any of the TenTec rigs using the 4 pin
plug. Works great, and looks like new. $ 30

Prices do not include shipping from Florida.

Thanks.

299. HF, VHF and UHF mobile antennas FS

Yahoo group: hamstuff
Date: 2003-12-26 15:32:24 UTC
From: Ken Simpson, W8EK
Topic: 299 Message: 299

Hustler HF and Larsen UHF and VHF mobile antennas For Sale:

Hustler 54 inch mast:
MO-2 (folds about 28 inches above ball) $22

"Standard" Hustler resonators:
12 meter resonator RM-12 $ 12
10 meter resonator RM-10 $ 12

80 meter "Super" high power resonator RM-80 S $ 38
can be used to convert 4 BTV vertical to 5BTV also

Larsen UHF and VHF mobile antennas:

UHF antennas:
LM-450 coil and whip - 5 db gain - new - $ 20

Two meter (VHF) antennas:
MFJ NMO-150 equivalent - Black - 3 db gain - like new - $12
LM-150 coil only - 3 db gain - new $ 16
Add a 49 inch whip available from Radio Shack. It is much easier
to get a whip locally than to ship the long box, but if you
need them, they are $8 each.

"Q" - quarter wave whip for LM mount - can be cut for
2 m, 220 MHz, or 440 MHz - $ 5

Antenna mounts:
LM-MM - use with any "LM" mount antenna - $20
Special LM-MM - This LM-MM was modified for use on top
of a mobile home. It has the regular coax replaced
with about 40 feet of RG-8 X coax. $ 30

Other 2 meter mag mount antenna:
"Generic" 2 m mag mount $12

Prices do not include shipping from Florida.

Thanks.

305. FS: DX150A Receiver

Yahoo group: hamstuff
Date: 2004-01-24 12:54:39 UTC
From: Brian Carling
Topic: 305 Message: 305

Radio Shack Realistic DX-150A Receiver
This is a general coverage shortwave receiver.
Has bandspread dial for the ham bands too.
Covers 530 kHz to 30 MHz. Receives SSB, AM and CW.
Runs on 120V AC or 13.8V DC.
Excellent condition all around. Looks great and
works great too. Comes with manual.
This is the later model with the built-in speaker
and the superior FET front end.
Many extra features.
Available for $85.00 plus shipping.

Picture and details at:
http://s88932719.onlinehome.us/radios.htm

306. FS: Nice Gonset Communicator 6m Rig, white

Yahoo group: hamstuff
Date: 2004-01-24 20:15:40 UTC
From: Brian Carling
Topic: 306 Message: 306

FOR SALE:

GONSET Communicator III 6 meter AM transceiver
Comes with the manual and one crystal.
It has been used very little, and was in storage for many
years.
This radio is in excellent condition - the best looking
cabinet I have seen on one of these radios.
The rig transmits OK, but need minor work on the receiver.
All original knobs etc. No modifications.
Available for $85.00 plus shipping.

Shure 505C Microphone for the Gonset Comm III rig above.
This is a high impedance, controlled magnetic
microphone with a PTT button. It is wired for the Gonset
- used very little, and comes with original box.
Available for $35.00 or will sell with the Gonset for
$25.00

Picture and details at:
http://s88932719.onlinehome.us/radios.htm

307. FS: HALLICRAFTERS 'TO' KEYER

Yahoo group: hamstuff
Date: 2004-02-02 14:18:59 UTC
From: Brian Carling
Topic: 307 Message: 307

Hallicrafters "TO" Keyer
Great for keying high voltage tube rigs.
High speed relay output can handle cathode keying
and grid block keying so it's ideal for the great
'Boatanchor' rigs of yesteryear!
Excellent condition. Comes with the ORIGINAL manual.
Will sell for $75.00 plus shipping
Picture and details at:
http://s88932719.onlinehome.us/radios.htm

311. FS: Heathkit Power Supply

Yahoo group: hamstuff
Date: 2004-02-08 22:08:30 UTC
From: Brian Carling
Topic: 311 Message: 311

Boatanchor Mobile Accessory!

Heathkit GP-11 Mobile Power supply.
The GP-11 is rated at 250 VDC @ 100 mils with 6 or 12 VDC input.
That makes it perfect for running a Heath lunchbox rig in the car!
This is a rare item. This power supply was made
to power the Benton Harbor Lunchbox Transceivers (Twoer, Sixer, etc.)
that were made in the 1960s for use on the 2m, 6m, 10m and 11m bands.
It would also work well with other low powered tube radios.
This supply works on 12 Volts and was made for use while mobile.

Has connector for 12v cigar lighter outlet

Available for $39.00 plus shipping

312. FS: RME CONVERTERS ETC.

FS: RME CONVERTERS ETC.

All of these would be great with a matching RME 4350 Receiver.
I do not have the receiver, just these three accessories.

RME DB-22A PRESELECTOR - covers HF bands
Fairly good condition, complete but untested.
Dial in nice shape. No dents or dings, but case could use paint.
Available for $35.00 plus shipping.

RME HF 10-20 CONVERTER - covers 20, 15, 11 and 10m Bands.
Fairly good condition, complete but untested.
Has output at nominal 7000 kc/s i.f. and a tunable front end.
Dial in nice shape. No dents or dings, but case could use paint.
Comes with ORIGINAL manual.
Available for $35.00 plus shipping.

RME VHF-152A - covers 2m, 6m, 10m and 11m bands.
Fairly good condition, complete but untested.
Has output at nominal 7000 kc/s i.f. and a tunable front end.
Dial in nice shape. No dents or dings, but case could use paint.
Comes with ORIGINAL manual.
Available for $35.00 plus shipping.

RME 4350 Manual Copy - very nice condx.
Will sell for $4.00 plus shipping

314. FS: James Millen Q5er Set

Yahoo group: hamstuff
Date: 2004-02-16 15:16:42 UTC
From: Brian Carling
Topic: 314 Message: 314

Designed for Application.

James Millen Company Model 92101 Antenna Matching Preamplifier
Collector item in near mint condition. No scratches or marks.
Comes with plug-in modules for 20m, 15m and 10/11m ranges.
Tuning ranges:
Model 46920 covers 13.0 - 15.0 Mc.
Model 46915 covers 19.0 - 22.5 Mc.
Model 46910 covers 27.0 - 32.0 Mc.

The Millen 92101 is an impedance matching device and broad-band
preamplifier which is placed between a receiver and antenna system.
The design originally appeared in General Electric Ham News in 1946.
This device was known as the R-9'er or Q5'er. Several articles on
the R-9'er and its variants appeared in QST and CQ in the late
1940s and early 1950s.
The Millen 92101 uses a 6AK5 vacuum tube for the amplifier and has
plug-in tuning units which contains input and output matching coils.
Impedance matching is possible via front panel tuning capacitors,
which form parallel resonant circuits with the plug-in tuning coils.
This rare item is in immaculate condition.

Will sell for $65.00 plus shipping

315. FS: Crystal Calibrator and a Gonset 2m Converter

Yahoo group: hamstuff
Date: 2004-02-17 14:20:48 UTC
From: Brian Carling
Topic: 315 Message: 315

FOR SALE:

Palomar Engineers Crystal Calibrator.
This unit has switchable outputs on 5 kHz, 10 kHz,
25 kHz, 50 kHz and 100 kHz.
It requires 4.5V to 5.0V DC for operation and has
screw terminal outputs. Good working condition.
Dimensions approx. 4" X 3" X 1"
Will sell for $26.00 plus shiping

Gonset 2m Converter - Excellent condition.
The tunable front end covers 144 - 148 Mc.
Comes with a copy of the manual, including the schematic.
Will sell for $25.00 plus shipping

316. FS: Hallicrafters SX-110 and R-48

Yahoo group: hamstuff
Date: 2004-02-20 13:28:46 UTC
From: Brian Carling
Topic: 316 Message: 316

FOR SALE:

Hallicrafters SX-110 and R-48

This is a single conversion superheterodyne receiver
with bands covering the 80m, 40m, 20m, 15m and 10m
meter amateur bands, 11 meters citizen's band,
broadcast band 540 - 1680 kc plus 3 shortwave bands
covering 1680 kc - 34 Mc.
Features include a slide rule bandspread dial calibrated
for the amateur bands, separate bandspread tuning,
crystal filter, antenna trimmer, S-meter, one r-f and
two i.f. stages. It has seven tubes plus one rectifier.
Includes crystal filter, variable selectivity and
tone control.

Dimensions: 18 3/4" x 8" x 10 1/4"

Both the radio and speaker are in fairly good working
condition. All original knobs, no dents or dings.
Cabinets have some minor surface pitting and rust here
and there. The R-48 speaker is a match for the
Hallicrafters HT-37 transmitter and the SX-110 / SX-111
receivers. It has an eliptical shaped cone and an
Alinco V magnet.
There is a fidelity switch for music or voice,
and it has 3.2 ohm input impedance.
The dimensions are 6 1/2 x 13 1/4 x 8 1/4 inches.

Will sell the SX-110 for $125.00 plus shipping.
Will sell the R-48 for $60.00 plus shipping.
Will sell both together for $175.00 plus shipping.

FOR SALE

One new 811A from Richardson Electronics.
New in box for $25.00 plus shipping.

Amperex 6907 VHF Dual Beam Tetrodes - Up to 80 watts output.
Gold pins. Looks like a 5894 - See spec sheet at:
http://www.wps.com/archives/tube-datasheets/Datasheets/Amperex-CC-363/6.JPG
QTY 8 of these to sell. They are good used pulls.
They are routinely removed from service. All have
good emission.
Most places sell these from $40 to $60 each or more.
Will sell these for $12.00 each plus shipping.

EIMAC 4-65A used tube.
Good used condition. I might have a socket too - not sure.
Tube has been tested for emission.
Dealers sell these used for $75.00 to $95.00 each
New ones are around $125
QTY 1 available for $29.00 plus shipping

PAIR OF BRAND NEW 6L6 Metal Tubes in the boxes.
An extremely rare find.
Will sell the pair for $40.00 plus shipping.

Pair of 826 Gonset VHF Finals - Emission tested pulls.
These are the tubes used in the Gonset VHF linear amplifiers,
Models 3063, 3065 and 3067.
These tubes are getting very hard to find now.
I have a nice looking pair. Lightly used.
These typically sell for $40 to $50 each IF you can find them.
Will sell the pair for $39.00 plus shipping

3B28 Rectifiers
These make a great sub for the 866 in E.F. Johnson Amateur rigs
and others. No warm-up and a lovely bright orange glow.
QTY 6 available for $6.00 each.

Details and more tubes at:
http://s88932719.onlinehome.us/tubes.htm

329. Alinco DX-70, 160 thru 6 m xcvr FS

Yahoo group: hamstuff
Date: 2004-03-13 11:49:22 UTC
From: Ken Simpson, W8EK
Topic: 329 Message: 329

For Sale:

Alinco DX-70, 160 thru 6 meter transceiver

The DX-70 covers 160 thru 6 meters, including the WARC bands, and also has a general coverage receiver. Modes include SSB, CW, FM, and AM. The narrow SSB filter is in it. Of course it has memories, scan, dual VFOs, etc. It is a small unit, ideal for mobile or use in a motor home, but its performance is fine for a base station as well.

This particular unit works 100% as best I can tell, and looks close to the same. It is in its original box, and includes all of the things that it came with originally -- hand microphone, power cord, manual, etc.

$450 plus shipping from Florida.

Thanks.

331. KLM 2 meter amplifier FS

Yahoo group: hamstuff
Date: 2004-03-20 12:36:12 UTC
From: Ken Simpson, W8EK
Topic: 331 Message: 331

For Sale:

KLM 2 meter amplifier

If you put 25 Watts in to this amp, you will see
about 160 watts out. This amp is the linear model,
so it can be used on SSB, FM, or any mode you
choose. It covers the entire 2 meter band with
no tuning. Completely solid state.

This is an actual KLM amplifier, so it is made better
than some of the ones after they were "bought out."

This particular unit works 100% and looks the same.
It is even in its original KLM box.

$185 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

332. 120 V AC line monitor FS

Yahoo group: hamstuff
Date: 2004-03-20 12:54:34 UTC
From: Ken Simpson, W8EK
Topic: 332 Message: 332

For Sale:

RCA WV-120 A meter

This is a fairly large (about 5.5 inch) analog meter
that is used to accurately read AC line voltage. It has
an expanded scale, so that the entire meter reads
from 100 to 140 volts AC, with a large red "120"
right in the middle. Being it is analog, it can show
line voltage variations when different pieces of
equipment (such as motors) are started.

This particular unit works 100%, and compares very
closely to my DMM for accuracy. It looks fine also.

$45 plus shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 333 Message: 333

TenTec power supplies FS

TenTec 280 power supply
This supply will power most any of the TenTec rigs, or any other rig needing up to 20 amps at 13 V DC. It is quite heavy duty, and includes an ammeter on the front panel. It is the chocolate brown color that matches the early Omni or Delta rigs, but will work with most HF rigs. This one works 100%, and looks very nice as well. With paper work and original box for $130.

TenTec 262 G power supply
This supply is made to match the Triton IV series (Model 540 and 544) of rigs, but will work with most HF rigs. It will supply 13 V DC at up to 20 amps. It has a speaker built in, as well as VOX. It works fine and looks fine also. With paper work for $100.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

334. FS: 25 Panel Meters from $2.00 to $12.00

Yahoo group: hamstuff
Date: 2004-03-22 14:04:35 UTC
From: Brian Carling
Topic: 334 Message: 334

For sale - 25 Panel Meters.

1) Weston Center scale 'SWR' meter with green to the left and
red to the right. No other scale. 30 uA DC movement.
2-3/4" diameter. Needs approx. 2-1/8" hole.
Available for $3.00 plus shipping

2) Triplett 0-5mA DC meter - round type. Slightly cracked glass.
3-1/2" diameter. Needs approx. 2-3/4" hole.
Available for $3.00 plus shipping

3) Weston 0-1.5 mA DC meter - excellent.
Dimensions - 3-1/4" diameter. Needs approx. 2-1/2" hole.
Available for $3.00 plus shipping

4) Weston 0-100 mA DC meter. Round type.
Dimensions 3-1/4" diameter. Needs approx. 2-1/2" hole.
Available for $6.00 plus shipping

5) Military surplus 0-200 mA DC meter.
Dimensions - 4" diameter. Needs approx. 2-1/2" hole.
Available for $3.00 plus shipping

6) Westinghouse 0-500V DC meter. Type RX-35
Dimensions - 3" square face. Needs approx. 2-3/4" diameter hole.
Available for $8.00 plus shipping

7) Westinghouse 0 - +/- 3V DC Center zero meter.
Type SX-33 protruding design for surface mount.
Slightly cracked glass. Dimensions 2-1/2" diameter.
Available for $2.00 plus shipping

8) Westinghouse 0 - 2500 V DC meter. FSD = 0.001A.
Dimensions - 3-1/2" diameter. Needs approx. 2-3/4" diameter hole.
Available for $10.00 plus shipping

9) Weston RF Ammeter. For antenna current. 0 - 10 Amps.
Includes external thermocouple.
Dimensions 2-1/2" diameter. Needs approx. 2" diameter hole.
Available for $10.00 plus shipping

10) Surplus vertical edgewise meter 0-2500V DC.
Has 2 mA movement. There is a shunt resistor attached.
Dimensions 2-3/4" X 1". Needs approx. 2" X 3/4" hole.
Available for $5.00 plus shipping

11) Phastron +/- 5 mA DC meter with center zero.
Chrome trim - extra nice looking.

Face dimensions - 4-5/8" X 4-1/4".
Needs approx. 2-3/4" diameter. hole.
Available for $5.00 plus shipping

12) Aircraft meter. Reads plus and minus 20 degrees with
1 degree scale markings. Center zero.
Dimensions - 2-3/8" square. Needs approx. 2-1/8" diameter hole.
Available for $2.00 plus shipping

13) Stromberg-Carlson VU Meter!
Typical markings form minus infinity to +3dB.
Dimensions - 3" square face. Needs approx. 2-3/4" diameter hole.
Available for $12.00 plus shipping

14) Surplus 0-100 mA DC meter.
2-5/8" diameter face. Needs approx. 2-1/4" diameter hole.
Available for $4.00 plus shipping

15) G.E. Antenna Current meter 0- 10 Amps. Type DW-52
Dimensions - 2-1/2" diameter. Needs approx. 2-1/8" hole.
Available for $8.00 plus shipping

16) Burlington 0-1 mA DC square meter.
Dimensions - 3" square. Needs approx. 2-3/4" diameter hole.
Loose inside and may be sticking.
Available for $4.00 plus shipping

17) Weston 0- 200 uA meter. Model 301.
Dimensions - 3" square. Needs approx. 2-3/8" diameter hole.
Has two scales with markings for 0 - 3 and 0-15.
Available for $4.00 plus shipping

18) General Electric 0-500V DC meter. Model VNW19-2.
1000 ohms per volt. Comes with a shunt.
Dimensions - 3-1/2" diameter. Needs approx. 2-3/4" hole.
Available for $10.00 plus shipping

19) Westinghouse Filament Meter 0 - 7.5 V AC. Very sharp.
Dimensions - 3-1/2" diameter. Needs approx. 2-3/4" diameter hole.
Available for $10.00 plus shipping

20) Surplus RF Ammeter 0 - 3 Amps RF Antenna Current.
Glass slightly loose but works OK.
Dimensions - 3-1/2" diameter. Needs approx. 2-3/4" diameter hole.
Available for $9.00 plus shipping

21) Burlington VU meter. Great for audio applications.
Has the typical scale from minus infinity to + 3dB.
Dimensions 3" square. Needs approx. 2-3/4" diameter hole.
Available for $8.00 plus shipping

22) Small Surplus VU meter - New, old stock - never used.
DeJUA brand - military style VU meter.

Dimensions - 1-3/4" square. Needs approx. 1-1/2" diameter hole.
Available for $8.00 plus shipping

23) Edgewise vertical reading 0 - +/- 50 uA meter.
Center zero with scale markings for 50 - 0 - 50 uA.
Dimensions 1-3/4" X 3/4"
QTY 2 available for $2.00 each plus shipping

24) Westinghouse Filament Meter 0-10.
Not sure if this scale is for volts or amps.
Dimensions: 4" square with rounded corners.
Needs approx. 3-3/4" diameter hole.
Available for $6.00 plus shipping

335. FS: Transmitting Tubes

Yahoo group: hamstuff
Date: 2004-03-23 09:37:57 UTC
From: Brian Carling
Topic: 286 Message: 335

FOR SALE:

Pair of 4X250B Transmitting Tubes with sockets.
Silver plated sockets and hardware, teflon chimneys.
Marked as "4X250B Made In USA" but have ceramic seal,
the same as the 4CX250B. Mounted on a fiberglass board
with terminals. Ready to wire into your 1000 Watt
HF or VHF amplifier project.
Or use with Collins KWS-1 transmitter etc.
These are good tested used tubes and sockets that have
been pulled from old equipment. They both have full emission.
DATA:
http://hereford.ampr.org/cgi-bin/tube?tube=4X250B
These typically sell for $50 to $100 each without the sockets.
Available for $60.00 for the pair, plus shipping
Picture at:
http://www.af4k.com/tubes.htm

ALSO:
Brand new 811A Transmitting Tube
QTY 1 New In Box from Richardson Electronics.
Will sell for $25.00 plus shipping

ALSO: G.E. Tube Caddy - see web page.

73 & thanks for reading - AF4K

336. FS: New Roller Inductor

Yahoo group: hamstuff
Date: 2004-03-23 09:46:20 UTC
From: Brian Carling
Topic: 336 Message: 336

FOR SALE:

Roller Inductor - New in Box.
Silver plated wire. Has front mounting stand-offs (3)
Ceramic, fiberglas and silver plated construction.
This is a 6.8 uH roller that will easily tune
down to 3.5 MHz with a 350 pF variable capacitor.
Slotted end drive for rotary shaft. Ideal for antenna tuner,
medium power final or other RF project.
Dimensions: 5" X 2.25"
Available for $45.00 plus shipping

Picture at:
http://www.af4k.com/coils.htm

337. Kenwood YG-455-S-1 crystal filter FS

Yahoo group: hamstuff
Date: 2004-03-27 12:27:44 UTC
From: Ken Simpson, W8EK
Topic: 337 Message: 337

Kenwood Crystal filter For Sale:

Kenwood YG-455-S-1 For Sale
This is a "sharp" 2.4 KHz SSB plug in filter. It has
about a 1.3 to 1 shape factor, and is used to replace
the standard ceramic filter in rigs such as the TS-950
and others, with a filter that has much better skirts
(and therefore makes pass band tuning, etc. much
better).

Actual specs on it are
2.4 kHz at 6dB
3.0 kHz at 20dB
3.1 kHz at 60dB

With paper work and original box for $100
plus shipping from Florida.

Thanks.

341. FYI: ARRL video demonstrates BPL Catastrophe...

Yahoo group: hamstuff
Date: 2004-04-01 21:43:53 UTC
From: Brian Carling
Topic: 341 Message: 341

THIS is why it's important to let your voice be heard!
Please forward this to all of your ham friends, guys!

Time to speak out to the FCC and our Congress-critters.
Future generations will thank today's hams for having
the resolve to not give up on this issue.

Where is Barry Goldwater when we need him?

------- Forwarded message follows -------
From WB4UHH
wb4uhh@...

Subject: ARRL video audibly demonstrates
BPL-generated interference

This video clip (MPG format - approximately 27 MB) audibly
demonstrates the interference caused by broadband over
power lines (BPL), which effectively wipes out short wave
radio reception.

The video was made by the ARRL and reflects 'real-world'
(read unscientific) measurements of the BPL interference.

http://216.167.96.120/BPL_Trial-web.mpg

343. FS: Military KW Dummy Load Wattmeter for VHF and up.

Yahoo group: hamstuff
Date: 2004-04-01 22:43:08 UTC
From: Brian Carling
Topic: 343 Message: 343

FOR SALE:
MX-1785/U Dummy Load / Wattmeter.
Air-cooled UHF 52 ohm load.

Dummy load is good at any frequency. Wattmeter accurate above
20 Mega-sickles...

This is a large, heavy-duty, UHF 1000 watt rated dummy load.
Has built-in VHF-UHF wattmeter that covers 20 MHz to 1.4 GHz.
R.F. connector has protective cover. Also has hardline
connector plus silver-teflon adapter with protective
keeper/socket.
Use with Type 'N' to hardline adapter (silver/teflon) that
is supplied with the unit.
Meter movement has markings as both 'Hickock 468' and
Bird Electronic Corp. Excellent, clean condition.
Will sell for $250.00 plus shipping

Picture and details at:
http://www.af4k.com/testgear.htm

ONLY if they reverse many rules!

The RULES say that BPL is NOT protected from interference, that it MUST accept
interference and cannot protest to the contrary.

Your friend ASSUMES that the FCC is going to suddenly tell FEMA, RED CROSS,
VOA, CB, THE MILITARY, THE AIRLINERS and various
other legitimate HF spectrum users that they must shut down.

I don't think he is right. I do NOT think they are quite that stupid.
Close but not THAT stupid. It will never fly.

BPL will have to keep doing a a WHOLE lot of retries till it gets through, and will
lose throughput.

If BPL shows up in my town, I will PROMISE you that I will run
the legal limit on HF.

345. Yaesu VX-5 R, tri-band HT FS

Yahoo group: hamstuff
Date: 2004-04-03 11:32:37 UTC
From: Ken Simpson, W8EK
Topic: 345 Message: 345

For Sale:

Yaesu VX-5 R tri-band HT

The VX-5 will cover the 6m, 2m, and 440 MHz ham
bands, with receive almost from DC to light. Actually
receive starts at the AM broadcast band, and goes to
about 1000 MHz, so that means it includes all of the
public service bands outside of the ham bands, weather,
FM commercial, commercial TV, SW bands, and much
more. Power output is up to about 5 watts, in 4 steps.
Of course PL tones (encode and decode) are included,
plus much, much more.

This particular unit is almost like new. It is in its original
box, with all of the things that came with it originally,
including charger, Lithium Ion battery that seems to last
forever, belt clip, carrying strap, original manual, warranty
card, etc. All for $200 plus shipping from Florida.

Thanks.

347. FS: Panel Meters $2 to $16

Yahoo group: hamstuff
Date: 2004-04-05 14:31:29 UTC
From: Brian Carling
Topic: 347 Message: 347

I have another batch of meters for sale. Most of the first group
are gone./ See web site for details.

RF Type

201) Hallicrafters (?) S-meter, black face.
"Carrier Level" and "S UNITS."
Has red needle, and scales for typical S meter,
plus scale for 0 - 10,000 microvolts.
Dimensions: 3" square. Excellent condition.
Available for $16.00 plus shipping

202) Weston Type #425 0 - 1 Amps RF
Dimensions: 3" square.
Available for $12.00 plus shipping

203) Triplett Type #247 0 - 1.5 Amps RF.
Dimensions: 2-3/8" square.
Available for $12.00 plus shipping

204) RF Carrier Power meter Model 321.
Scales for 0 - 200 Watts and 0 - 100% Modulation.
Ruggedized type. . FSD = 200 uA DC.
Dimensions: 2-5/8" diameter.
Available for $9.00 plus shipping.

205) Phastron RF Meter Type 20-013705 reads 0 - 100 Watts
and 0 - 1000 Watts on two scales. FSD = 200 uA DC.
Ruggedized type. . Dimensions: 2-5/8" diameter.
Available for $12.00 plus shipping

206) A&M Instruments Type #265-108 reads 0-100 Watts
and 0 - 1000 Watts on two scales. FSD = 200 uA DC.
Ruggedized type. . Dimensions: 2-5/8" diameter.
Available for $12.00 plus shipping

207) Weston RF Meter Type 2521 reads 0 - 5KW.
Ruggedized type. FSD = 200 uA DC.
Dimensions: 2-5/8" diameter.
Available for $12.00 plus shipping

DC Current

208) Phastron 0 - 50 uA DC ruggedized meter.
Dimensions: 2-5/8" diameter.
Available for $5.00 plus shipping

209) Weston 0 - 50 uA DC.
Dimensions: 2-5/8" diameter.
Available for $4.00 plus shipping

210) Westinghouse Type #OX-33 0 - 200 uA DC.
Dimensions: 2-5/8" diameter.
Available for $4.00 plus shipping

211) General Electric 0 - 500 uA DC.
Dimensions: 2-5/8" diameter.
Available for $6.00 plus shipping

212) Phastron 0-1 mA DC.
Dimensions: 2-5/8" diameter.
Available for $6.00 plus shipping

213) Weston Type #506 0 - 1 mA DC
Dimensions: 2-5/8" diamter.
QTY 2 Available for $8.00 EACH plus shipping

214) Triplett 0 - 1 mA DC
Dimensions: 2-5/8" diameter.
Available for $8.00 plus shipping

215) Edgewise meter 0 - 1 mA DC with scales for:
"0 - 10 XMIT" and "1 - 5 RCV"
Dimensions: 1-3/8" X 5/8"
Available for $2.00 plus shipping.

216) Triplett type #221-7 0 - 50 mA DC.
Dimensions: 2-3/8" square.
Available for $8.00 plus shipping

217) Triplett Type #227PL 0-100 mA DC
Clear face. Dimensions: 2-5/8" square.
Available for $8.00 plus shipping

218) Weston Type 301 0-200 mA DC
Dimensions: 3" square.
Available for $9.00 plus shipping

219) Weston Type #301 0 - 200 mA DC
Dimensions: 3-1/4" diameter.
Available for $9.00 plus shipping

220) Supreme Instruments Co. 0 - 300 mA DC.
Dimensions: 3" square.
Available for $8.00 plus shipping

221) Weston Type #301 0 - 2 Amps DC.
Dimensions: 3-1/4" diameter.
Available for $9.00 plus shipping

222) Phastron 0 - 10 Amps DC.
FSD = 1 mA DC.
Dimensions: 2-5/8" diameter.
Available for $6.00 plus shipping

223) Lambda Instruments 0 - 10 Amps DC.
Clear face. Dimensions: 1-3/4" square.
Available for $5.00 plus shipping.

DC Voltage

224) Burlington 0 - 10V DC. FSD = 1V DC.
Dimensions:3" square.
Available for $6.00 plus shipping

225) Phastron 0 - 30V DC
Dimensions: 3-1/2" diameter.
Available for $6.00 plus shipping

226) Voltron Type #122 24 - 30V DC.
Dimensions: 2-5/8" diameter / 3" deep.
Available for $2.00 plus shipping.

227) Weston Type #301 0 - 300V DC.
Dimensions: 3-1/4" diameter.
Available for $9.00 plus shipping

228) Weston Type 301 0 - 600V DC.
FSD = 1mA DC.
Dimensions: 3-1/2" diameter.
Available for $9.00 plus shipping.

229) Weston Type #301 0 - 1500V DC.
FSD = 1mA DC. 1000 ohms per volt.
Dimensions: 3-1/4" diameter.
Available for $9.00 plus shipping

230) Triplett Type #327-T 0 - 3000V DC.
Dimensions: 3" square.
Available for $12.00 plus shipping

AC Voltage:

231) Weston Type #1524 0 - 5V AC
Dimensions: 2-5/8" diameter.
Available for $6.00 plus shipping

232)Burlington 0 - 10V AC. Glass loose, works OK.
Dimensions: 3-1/2" diameter
Available for $4.00 plus shipping

233) Triplett Type #232 0 - 10V AC.
Dimensions: 2-1/2" diameter.
Available for $5.00 plus shipping

234) General Electric Type DW-91 0 - 30V AC.
Dimensions: 2-5/8" square.
Available for $6.00 plus shipping

235) Westinghouse 0-30V AC. FSD = 1 mA
Dimensions: 3-1/2" diameter.
Available for $8.00 plus shipping

236) Wacline Model ADA 0 - 50V AC.
Dimensions: 2-5/8" diameter.
Available for $2.00 plus shipping.

237) Simpson 0-300V AC
Dimensions:3" square.
Available for $8.00 plus shipping

Misc. and center zero meters.

238) Simpson DC Meter with -50 / 0 / +50 uA DC.
Dimensions: 3" square.
Available for $4.00 plus shipping

239) Marion Electrical Instruments -100 / 0 / +100 mA DC.
FSD = 1mA DC. Center zero.
Dimensions: 3-1.2" diameter.
Available for $3.00 plus shipping

240) Weston Type #506 -50 / 0 / +50 uA DC.
Dimensions: 2-5/8" diameter.
Available for $2.00 plus shipping.

241) Small VU meter with the typical scales.
QTY 2 - these are not quite identical.
Dimensions: 1-1/2" square.
Available for $4.00 each.

242) Small military surplus meter -5 / 0 / +5 mA DC.
Left zero pointer at rest. Case looks just like R390A meters.
Dimensions: 1-3/4" square.
Available for $2.00 plus shipping. --

351. Cushcraft 4 element, 2 meter antennas FS

Yahoo group: hamstuff
Date: 2004-04-10 11:34:26 UTC
From: Ken Simpson, W8EK
Topic: 351 Message: 351

For Sale:

Cushcraft 147-4, 4 element, 2 meter beam

This beam is relatively small (about a 4 foot boom),
but still has about 10 db gain. It is made so that it
can be attached to a tower by the back of the boom.
This method permits easy side mounting for a fixed
direction, if so desired. It is drilled so it can be
mounted either vertically, or horizontally. It is
wideband, and will cover most of 2 meter band
with acceptable SWR.

I have two of these beams available.

One is almost like new. It has been in the garage
and in the attic. It is $50.

The other has been outside, and is still in good shape,
but not quite as nice as the first one. It is $45.

Prices do not include shipping from Florida.

Note that these were spoken for when I listed them
before, but no follow thru.

Thanks.

73,

Ken, W8EK

352. FS: FT243 Crystals

Yahoo group: hamstuff
Date: 2004-04-12 15:35:56 UTC
From: Brian Carling
Topic: 352 Message: 352

For Sale: FT243 Crystals

Price is $9.00 each plus $3.00 shipping regardless of quantity.

Crystals available for ordering now: 3880, 3885, 7040,
7050, 7290, 7295 and 8400 kHz. I also have one
available for 7035 kHz.
In the very near future you can also order: 3548, 3560 kHz.
Before very long I will offering production runs of some other popular frequencies
as suggested by amateurs. So long as
I can get QTY 12 - 15 crystals ordered for any given frequency,
then I will be able to put some together for you.
(Sorry , no 160m)

Lead time is approximately 6 weeks or possibly less
depending on number of orders received.
Depending on the success of these first few runs
I may soon offer some of the other frequencies that folks
have been asking me about. Keep in touch and let me
know your needs.

Thanks for reading & 73s - Brian, AF4K

353. FS: New 2 Watt Carbon Resistor Assortment

Yahoo group: hamstuff
Date: 2004-04-22 23:14:05 UTC
From: Brian Carling
Topic: 353 Message: 353

FOR SALE:

100 - OHMITE CARBON COMPOSITION 2 Watt RESISTORS - BRAND NEW

Brand new large assortment still in the case. Selection of
100 carbon resistors. These are a brand new, 5% tolerance,
top quality, 'LITTLE DEVIL' brand assortment, ranging from
10 ohms to 4.7 Megohms in 40 of the most popular, useful values.

These come in a handy OHMITE parts cabinet with drawers
clearly marked for each resistor value so you can easily find
the ones you are looking for when assembling your projects or
experimenting.

These resistors are so much better to use for radio applications
than using the modern carbon film types. They are from a fresh
production run and are within tolerance. These type resistors
typically sell for $0.72 to $1.00 each IF you can find them at all.

Buy the complete assortment with case for $32.00 plus shipping.

Picture and details at:
http://www.af4k.com/resistors.htm

356. BPL - Email the White House

Yahoo group: hamstuff
Date: 2004-04-28 03:19:26 UTC
From: Brian Carling
Topic: 356 Message: 356

------- Forwarded message follows -------

From: Mike Besemer (KG8L) [mailto:mwbesemer@...]

President Bush addressed BPL in a speech made on
26 April.
http://www.arrl.org/news/stories/2004/04/27/1/?nc=1

Now is the time to e-mail the White House, offer your opinion,
and ask for Mr. Bush's withdrawal of BPL support.

To e-mail the White House, use the following URL.

https://sawho14.eop.gov/PERSdata/intro.htm

Remember... Be specific, concise, credential yourself, offer technical
reasons for your position, and offer alternatives. Also... Be
polite... You don't want the Secret Service or the FBI knocking on
your door.

Below is a copy of what I sent forward.

<snip>

On 26 April 2004, you endorsed the development and deployment of a new
broadband delivery medium known as Broadband Over Powerline, or BPL.
While I understand the need for exploration of new broadband delivery
mediums, the concept behind BPL is technically flawed and could
represent a tremendous danger to the security of our nation in the
event of another 9/11 type terrorist act.

BPL utilizes our existing power grid to deliver broadband data. It
accomplishes this by inducing radio frequency energy onto the
powerline. This energy is then transmitted by the powerline from point
to point. Unfortunately, the radio frequency energy induced on these
powerlines represents a tremendous interference potential to licensed
radio services such as military, police, public safety, and amateur
radio. It is the very design and concept of BPL that causes potential
for interference; that is to say, BPL, by its very nature, must
radiate radio frequency energy.

My particular concern is for the amateur radio service. I am a
licensed radio amateur, Call Sign KG8L. I have held the highest class
of license available, Amateur Extra, for over 25 years and have
considerable experience in a variety of amateur radio operations.
Additionally, I am a 23-year veteran of the U.S. Air Force with a
background in radio communications and radar.

Amateur radio operators have served the public for decades to provide communications for public service and disaster relief when all other methods of communications have failed. I sincerely fear that in the event of another major attack upon our country, or in the case of a natural disaster or other event that impedes or disables our day-to-day communications mediums (police radio, television, broadcast radio, cell phone, etc.) the ability of amateur radio operators to provide critical backup communications would be severely hampered or eliminated by interference caused by the deployment of BPL technology. Current FCC regulations calling for mitigation of BPL interference are neither aggressive enough nor fully technically deployable to the extent required to eliminate the interference potential.

Other alternatives, such as Broadband Wireless Access, provide reasonable alternatives to BPL and present no potential for interference with licensed radio services and therefore no danger to the security of our nation. I urge you to reconsider your support for BPL and ask you to direct the exploration of other methods of broadband delivery.

<snip>

73 to all,

Mike

358. FS: 160m CW Crystal

Yahoo group: hamstuff
Date: 2004-05-05 11:36:18 UTC
From: Brian Carling
Topic: 358 Message: 358

FOR SALE:
Special 160m CW crystal in old 3-pin holder

This crystal is a one-only item available on 1825 kHz.
It's an authentic pre-war crystal in the CR-15/U case
and very hard to find. It has been tested on the air
and is still working. This is a major slab of quartz and
it will handle almost any power tube oscillator application
as well as working with small oscillators.

Will sell for $12.00 plus shipping.

Picture available on request

362. FT243 Crystals now on 78 Frequencies

Yahoo group: hamstuff
Date: 2004-05-11 02:54:35 UTC
From: Brian Carling
Topic: 362 Message: 362

Well I have exciting news, folks.

I can now offer you FT243 on 78 different ham frequencies
from 160m to 10m multipliers. Some of these are one-only, but
most will be freely available. Shipping on these will begin around June 18th, first
come, first served. Please get your orders in early.

Pricing is still $9.00 each plus shipping, incuding the
160m rocks which is a heck of a deal.

Here are the frequuencies that I can now offer:

1825 kHz
1850 kHz
1885 kHz
1900 kHz
1930 kHz
1945 kHz
1970 kHz
1985 kHz

3510 kHz
3520 kHz
3528 kHz
3530 kHz
3535 kHz
3548 kHz
3560 kHz
3615 kHz
3875 kHz
3880 kHz
3885 kHz
3890 kHz

7018 kHz
7030 kHz
7035 kHz
7037 kHz
7045 kHz
7050 kHz
7250 kHz (for 29.0 MHz)
7285 kHz
7290 kHz
7295 kHz

8400 kHz

10106 kHz
10112 kHz
10120 kHz
14060 kHz
14286 kHz

I also have a few "ONE ONLY" FT243 crystals available as follows:

1982 kHz

3609 (LG), 3655, 3703, 3713, 3729 (2), 3747, 3810, 3825, 3912.5, 3915, 3930,
3948, 3993 (2), 3996, 4000 (all available now.)

7000, 7025, 7050, 7054, 7075, 7100, 7107, 7125, 7139, 7150, 7173,
7174, 7175, 7200, 7207, 7225, 7237, 7250, 7273 (2), 7275, 7300 kHz
(All available now.)

8350, 8375, 8425, 8450, 8475, 8500 kHz (all available now.)

Again these are $9.00 each.

E-mail me to arrange purchase.

73s - Brian, AF4K

> here, do ya think?

Gary & Co - I WOULD copy this to GB but it would touch of a
long thread that would be off topic there.
Here we don't care so long as it is about amateur radio.
the thing is this:

Do you wonder why you cannot operate anywhere from 14095 to 14100?
All the frequencies, are already "owned" by Winlink!
They are using Pactor-III, developed for commercial communications, in the mode
that is 1500 Hz wide, and completely cover the
automatic subbands for own personal robot use.
Here are the frequencies they cover:

14095.3, 14096.8

95.5
97.0
98.0
99.5
101.0
102.5
101.0
102.5
102.0
103.5
103.5
105.0
106.0
107.5
108.5
110.0
108.4

109.9
109.2
110.7

We slept through it while the FCC was talked into
changing the rules to allow these robots to permanently
take these frequencies. I didn't even know about it until
recently but had wondered why I got so much heavy,
chirping QRM. It's far worse than that Russian Woodpecker
ever was!

Pactor-III is much less efficient than Pactor-II, because it
takes up to 5 times more bandwidth for only a 50% speed gain.

They can be presumed to OWN these frequencies, because:

1. They are published
2. They only respond to calls on those published frequencies
3. When called on those frequencies, they override anyone else
trying to use the frequency, because the mobile station does not care, and the
land station is a fully automatic robot what cannot listen for traffic because nobody
is there!

Below the official digi sub-band, just the Winlink stations in
North America (there are more farther away) the frequency
ranges their robots dominate by the same practices.

They are all over 14064 to 14115 Khz and often below that.
Note that the high end of the CW band is usurped and the
entire rest of the data segment until you reach the RTTY
segment. There is only a 2.5 Khz free space for PSK31 but there
is no interference-free space for PSK63 from 14072.5 to 14075.0.
I have heard them even intrude into the PSK31 segment at times.

It makes me a little angry and disappointed about the
"unhuman" future of amateur radio.

These unattended Pactor robot stations are mostly there to
give free internet e-mail to maritime stations, rather than for
real amateur radio type conversations.

From: Ken Simpson, W8EK
Topic: 365 Message: 365

For Sale:

Kenwood TS-711, multimode 2meter transceiver

This unit is an FM, SSB, and CW transceiver for
2 meters. It has 40 memory channels, and up to
25 Watts of output power, which is continuously
variable (no Hi or Low switch, but a front panel
control to continuously vary power). It has a
GASFET in the front end for one of the best
receivers I have ever used. The 120 V AC power
supply as well as 13 V DC, is built in. The case
looks very similar to a TS-440 or TS-450 HF rig.

This particular unit is as nice as you will find. No
dents, dings, or scratches. It is in its original
box, and includes the original manual as well.

$425 plus shipping from Florida.

Thanks.

367. FS: Surplus, Knight, GE, B&W etc. Test gear and Radio items

Yahoo group: hamstuff
Date: 2004-05-20 13:48:38 UTC
From: Brian Carling
Topic: 367 Message: 367

FOR SALE:

KNIGHT Impedance Bridge.
Also marked Allied radio Co. Unit is in very good shape and
has the original knob. Includes R and X scales with chart affixed
to the rear. A classic piece of Knight Kit equipment.
Available for $35.00 plus shipping

General Electric Tube Caddy - Bright Orange
Full sized model in great shape. Solidly built wooden case.
Tolex cover material is in great shape - better than most others
that I have seen. Has a very minor amount of surface rust on corners
but will clean up nicely and is in superb condition in every other way.
Internal fold-out drawers and snaps are in great shape too.
Will sell for $59.00 plus shipping

Barker And Williamson Model 600 Grid Dip Meter
This is the CATHEDRAL unit and is in beautiful shape.
This uses a 9005 Acorn tube, and operates on 120V AC.
Unit comes with all coils in their case and is in
excellent working condition.
Available for $65.00 plus shipping

Frequency Meter CKB-74028 - Military surplus.
Similar to LM-7 etc. Great for building a regenerative
or superhet receiver etc.
Similar design to the LM-7 and others. Comes with the
book.
Will sell for $45.00 plus shipping

TIC Tracer
AC signal tracer. It's in great shape and in the box.
It appears to be some kind of signal tracer.
Good deal for you if you know what to do with it.
Will sell for $20.00 plus shipping

Hickock/Bird 52 Ohm Dummy Load - air-cooled
Good for up to 200 watts of RF.
Designed for VHF but will also work fine on HF.
Has tap for wattmeter sampling. Uses Type 'N' connector.
Adapter included for use with BNC connectors.
Will sell for $49.00 plus shipping

http://www.af4k.com/testgear.htm

368. More Frequencies for FT243 Crystals FS

Yahoo group: hamstuff
Date: 2004-05-20 21:39:26 UTC
From: Brian Carling
Topic: 368 Message: 368

Some more FT243 Crystals For Sale:

1815, 1822, 3530, 3700, 3703, 3705, 3855, 3870, 3875, 3890,
7015, 7032, 7123, 7143, 7252.5, 7255, 7260, 7270, 7280, 7293 kHz

What additional frequencies would be useful?
Note that four of the 40m phone crystals are intended as
multipliers for 10 meter AM usage. 7143 = multiplier for 20m AM.

I am now taking orders for the above for delivery in mid-July.
Plenty of each of the above will be available. they are installe dwith robust new
HC49 crystals inside and will work with all
popular circuits. Have been used successfully in many rigs,
including DX35, DX60, DX100, Globe 500, HT40 etc.
Will not work in an 813 power oscillator.

Again the price is $9.00 each plus $3.00 for USA shipping
(regardless of quantity)

All of the other crystal orders that have been placed will be
shippng out soon. For delivery schedule updates see:
http://www.af4k.com/crystalorders.htm

E-mail me and let me know what other frequencies you would like.

It's Antenna Season... FOR SALE:

Leather Tower Climbing Belt - by Klein Tools.
Excellent condition. has loops etc. for holding tools while
working on a tower.
In my opinion this is the best type of belt. I have used the
nylon webbing ones and the harness types. I find the old
fashioned leather clinmbing belt to be FAR more comfortable
to use and you can lean into it so that it supports your
back better.

Has the regular adjustable buckle and two
large steel rings for attaching lanyard (not included) that goes
around the tower. New cost around $76.00
Available for $36.00 plus shipping

Picture and details at:
http://www.af4k.com/miscpart.htm

373. FS: Air-core inductors & Roller

Yahoo group: hamstuff
Date: 2004-06-03 11:03:02 UTC
From: Brian Carling
Topic: 373 Message: 373

FOR SALE:

AIR-CORE RF COILS - 2-3/4" diameter.
7 TPI with 14 gauge wire. Both are in excellent condition.

First one is 3" long with 21 turns.
QTY 1 Available for $10.00

Second one is 6.5" long with 39 turns.
QTY 1 Available for $15.00

Roller Inductor - New in Box.
Silver plated wire. Has front mounting stand-offs (3)
Ceramic, fiberglas and silver plated construction.
This is a 6.8 uH roller that will easily tune
down to 3.5 MHz with a 350 pF variable capacitor.
Slotted end drive for rotary shaft. Ideal for antenna tuner,
medium power final or other RF project.
Dimensions: 5" X 2.25"
Available for $45.00 plus shipping

Pictures & details at:
http://www.af4k.com/coils.htm

374. FS: Knight RF Impedance Bridge

Date: 2004-06-09 01:07:19 UTC
From: Brian Carling
Topic: 380 Message: 380

FOR SALE:
VOMAX RF Speech Processor - by Maximilian Associates.
A much-coveted outboard device that will give any transmitter
far greater transmitted talk power. Unit is in excellent shape.
Front panel has a 1/4" jack (3 circuit) for Mic/PTT.
There is also a GAIN control, IN/OUT switch and two LEDs
to show POWER and Transmit.
Connections on rear are marked for PTT, mic out etc.
Needs power supply and comes with the 6 pin Jones plug
for cabling connections.
Available for $59.00 plus shipping

Picture and details at:
http://www.af4k.com/miscpart.htm

381. FS: KENWOOD TS-820S / IMMACULATE

Yahoo group: hamstuff
Date: 2004-06-09 11:05:27 UTC
From: Brian Carling
Topic: 381 Message: 381

FOR SALE:
Kenwood TS-820S HF transceiver with the original manual
and AC power cord. A real beauty - It's hard to tell from a
new one. The digital dial works great. Of course the knobs are all original. Front
panel is immaculate.
Covers 160m thru 10m bands on USB, LSB, FSK and CW.
Many extra features: Compressor, VOX, noise blanker,
I.F. shift, fixed crystal channels, noise blanker, signal monitor etc.
AGC OFF, FAST, SLOW. Great for CW. Analog metering of
five functions. The receiver sensitivity is .25 uV which puts it equal to many radios
of today, and there is no digital noise to contend with. Complete with a hand mic
(non-kw) and the manual.

Available for $350.00 plus shipping

391. Alinco DX-70, 160 thru 6 m xcvr FS

Yahoo group: hamstuff
Date: 2004-07-24 11:05:58 UTC
From: Ken Simpson, W8EK
Topic: 329 Message: 391

For Sale:

Alinco DX-70, 160 thru 6 meter transceiver

The DX-70 covers 160 thru 6 meters, including the WARC bands,
and also has a general coverage receiver. Modes include SSB,
CW, FM, and AM. The narrow SSB filter is in it. Of course it
has memories, scan, dual VFOs, etc. It is a small unit, ideal for
mobile or use in a motor home, but its performance is fine for
a base station as well.

This particular unit works 100%, and looks close to the same.
It is in its original box, and includes all of the things that it
came with originally -- hand microphone, power cord, manual, etc.

$450 plus shipping from Florida.

Thanks.

392. TenTec Paragon 585 HF xcvr FS

Yahoo group: hamstuff
Date: 2004-07-31 16:00:58 UTC
From: Ken Simpson, W8EK
Topic: 392 Message: 392

For Sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC bands. It has a general coverage receiver, and includes SSB, CW, and AM. An optional FM adapter is available for it. Of course it has digital readout, memories, scan, dual VFOs, PBT, notch filter, etc. 100 Watts output. This particular unit works 100% and looks really great also. Front panel is great. It does have a scratch on the heat sink in the rear. Big inch thick manual is included, as is the original box. TenTec sells these used for $795. This one is just as nice for $650.

Giehl Chip Firmware upgrade for Paragon 585.
This is a new EPROM that essentially upgrades the 585 Paragon to a Paragon II. $60

TenTec 961 Power Supply / Speaker
This matches the Paragon, and also the Corsair II and other TenTec rigs. 13 V DC at 20 amps.
This one is in great shape, and includes manual and original box. $160

TenTec 214 desk microphone with stand
This is the "banana" electret microphone with 4 pin connector. Good shape, with paper work, for $70.

TenTec 288 crystal filter - 1800 Hertz
This is the narrow SSB filter used in the Paragon, Corsairs, Omni V and VI, etc. With paper work, like new, for $70.

TenTec 251 power supply
This is the power supply that was made to go with the Argonaut when used with the 405 linear amp. It is somewhat rare. The 251 will supply 13 V DC at up to 9 amps. It was also used with the Triton I (the 50 W output model), and could be used with any rig needing 13 V DC at up to 9 amps. This styling matches the 505 or 509 Argonaut, the 405 amp, the Triton I and II and others that are the walnut wood grain and eggshell white. This particular one works fine and includes the paper work for $65.

Prices do not include shipping from Florida.

Thanks.

394. FS: Non-Inductive resistors 1000 Watt

Yahoo group: hamstuff
Date: 2004-08-20 20:43:23 UTC
From: Brian Carling
Topic: 394 Message: 394

FOR SALE:

CES-WID type non-inductive resistors.

I have QTY 4 of them at 380 ohms / 1000 Watts.
I also have QTY 1 that is 200 ohms at 1000 Watts.

First come, first served...
Price for these is $45.00 each plus shipping.

395. Roller inductor antenna tuner / wattmeter / antenna switch FS

Yahoo group: hamstuff
Date: 2004-08-21 13:24:46 UTC
From: Ken Simpson, W8EK
Topic: 395 Message: 395

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new, still in its box.
It was removed once from the box for testing
purposes. There is not a mark on it. Of course
the paper work is included. You can pay about
$200 from MFJ, or buy this one for $150 plus
shipping from Florida.

Thanks.

398. FS: YAESU HF TWINS FL101 / FR101

Yahoo group: hamstuff
Date: 2004-08-27 21:48:28 UTC
From: Brian Carling
Topic: 398 Message: 398

FOR SALE:
Nice pair of older HF rigs. the FR-101 digital
receiver is all complete.
These cover 160m through 10m amateur HF bands.
The FL-101 needs a 20 uF at 450V cap replaced.
Otherwise its all there, and the internal electronics
etc. look good.
The FR-101 digital dial works fine. All the controls work
fine.
I couldnt get any audio out of it. It does have all of the
bands from AM broadcast through the ham bands 160m - 10m
and tues them fine.
Cabinets are in nice shape. Front panels are immaculate
and they still have the original plastic cover.
I am sure it would take very little to get it all going.
Will sell FL-101 for $175.00 plus shipping.
Will sell FR-101 for $275.00 plus shipping.
Or both for $395.00 plus shipping.

See:

405. 7 MHz Crystals

Yahoo group: hamstuff
Date: 2004-09-11 10:00:01 UTC
From: Brian Carling
Topic: 405 Message: 405

FOR SALE:

Grind them upward, pen them downward, use them as-is for
markers, converters or whatever you wish.
These are good FT243 crystals at a great price. I have several of
each available:

7000 kHz
7200 kHz
7300 kHz

These are $5.00 each plus shipping= = =
Radio crystals available in FT243 and HC49 type holders.
For a complete list or to check on existing orders, see:
http://www.af4k.com/crystals.htm

406. TenTec Paragon 585 HF xcvr and accessories FS

Yahoo group: hamstuff
Date: 2004-09-11 11:43:42 UTC
From: Ken Simpson, W8EK
Topic: 406 Message: 406

For Sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, and includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. 100 Watts output.
This particular unit works 100% and looks really great
also. Front panel is great. It does have a scratch on
the heat sink in the rear. Big inch thick manual is
included, as is the original box. TenTec sells these
used for $795. This one is just as nice for $650.

Giehl Chip Firmware upgrade for Paragon 585.
This is a new EPROM that essentially upgrades the
585 Paragon to a Paragon II. $60

TenTec 961 Power Supply / Speaker
This matches the Paragon, and also the Corsair II
and other TenTec rigs. 13 V DC at 20 amps.
This one is in great shape, and includes manual
and original box. $160

TenTec 214 desk microphone with stand
This is the "banana" electret microphone with
4 pin connector. Good shape, with paper work,
for $70.

TenTec 251 power supply
This is the power supply that was made to go with the
Argonaut when used with the 405 linear amp. It is
somewhat rare. The 251 will supply 13 V DC at up to
9 amps. It was also used with the Triton I (the 50 W
output model), and could be used with any rig needing
13 V DC at up to 9 amps. This styling matches the 505
or 509 Argonaut, the 405 amp, the Triton I and II and
others that are the walnut wood grain and eggshell white.
This particular one works fine and includes the paper
work for $65.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

407. FS: Yaesu FR-101 Receiver

Yahoo group: hamstuff
Date: 2004-09-14 08:10:18 UTC
From: Brian Carling
Topic: 407 Message: 407

FOR SALE:
Yaesu FR-101 digital display receiver, all complete.
Covers 160m through 10m amateur HF bands.
The internal electronics look good. The digital dial
works fine. All the controls work fine.
I couldn't get any audio out of it. It does have all of the
bands from AM broadcast through the ham bands 160m - 10m
and tunes them fine. Cabinet is in fairly nice shape.
Front panel is immaculate and still has the original plastic cover.
I am sure it would take very little to get it going.
Will sell for $275.00 plus shipping.

Picture at:
http://www.af4k.com/radios.htm

409. REDUCED: Yaesu FR-101 Receiver

Yahoo group: hamstuff
Date: 2004-09-20 12:08:13 UTC
From: Brian Carling
Topic: 409 Message: 409

REDUCED PRICE:

YAESU FR-101 Receiver.
Nice older HF radio. Receiver is all complete and unmodified.
Covers the 160m through 10m amateur HF bands.
The digital dial works fine. All the controls work fine.
It does have all of the bands from AM broadcast through the ham bands.
160m - 10m and tunes them all just fine.
Front panel is immaculate and still has the original plastic cover.
The rear apron is immaculate. There are no modifications.
Receiver case has some minor rust on side, but everything else
including the interior is in fine shape. Very clean inside.
I couldnt get any audio out of it. May need some minor repair.

Will sell for $229.00 plus shipping.

http://www.af4k.com/radios.htm

410. ARRL Digital Committee and PACTOR QRM

Yahoo group: hamstuff
Date: 2004-09-22 11:26:04 UTC
From: Brian Carling
Topic: 410 Message: 410

Ken, I am forwarding this to every ham I know. I am asking them all to pass it on.
BPL has overshadowed the Pactor QRM issue, but I see
Pactor as a FAR greater danger to ham radio.

I am very unhappy about this UNATTENDED PACTOR!
In my opinion, it forces hams to buy a $1500.00 plus modem
for a mode that is no better than the worst digital mode that
uses a $39 sound card.

HF Pactor has QRM'd me NUMEROUS times when I am on
CW, PSK31 and MT63 modes and there is NOTHING you can
do about it.

I have tried repetedly to bring this to the attention of
ARRL officials in my area and at the League HQ and
it has fallen on deaf ears. It is time for hams to speak out, send some e-mails and
let our voices be heard!

I heard rumors that there were one or two dissenters on the ARRL HF Difgital
committee who dio dNOT want PACTRO selected as the mode of choice for ham
radio but they were probably over-ruled and run out of town.

When you have tens of thousands of hams who must buy a $2000 modem and
free goiverenment money available to ARES/RACES groups to help buy it, then
that changes everything! Try multiplying say, 20,000 times $1500.00 each and
what do you get?
$30 MILLION
That's right!
What a GOOD PRICE for GIVING AWAY our ENTIRE HF
spectrum to unattended robots that provide free internet
access to sailors at sea via our HF bands!

We can SAY that we are helping national security.
In reality, I think some other digital modes are better
suited to the emergency comms task than Pactor.
They would get the traffic through faster and cause a LOT
less QRM than these UNATTENDED stations.

MOST hams do not know that ARRL/FCC sneaked in this
provisiion for unattended stations on HF a few years back.
Now thae stations proliferate, and they OWN any frequency
they want. If you are already having a weak signal
QSO there, too bad!

With $Millions to be gained by a few people,
so WHAT if we can't have a decent QSO any more?

In my opinion It is a MONEY GRAB and a SPECTRUM GRAB

413. 6L6 Transmitter Article in CQ Magazine

Yahoo group: hamstuff
Date: 2004-09-30 23:13:03 UTC
From: Brian Carling
Topic: 413 Message: 413

If anyone follows Dave Ingram's column in CQ Magazine,
he has a great article about an old style 6L6 transmitter
and lists me as a source for the crystals...

The article is on Page 54 of the October 2004 issue,
"6L6 RESURRECTION - 2004 STYLE" by Dave Ingram K4TWJ

I just got the magazine and it looks like a neat old
one tube rig. He has tried it out using my crystals on
30m CW and had great results.

What's really unusual is the COIL design. Just wait
until you see THAT part!

You can find my FT243 crystals for 30m and all of the
other ham bands at:

http://www.af4k.com/crystals.htm

Brian. I don't have access to CQ. Is there anyway that you can get me a copy of that article? I am trying to my first few stations back on the air, at least by copies. My first on the air rx was a super genny on 40 (30 would be fine) and I had cobbled together a 6l6 xtal tx.

Thanks Bob

416. Ham Loop antenna for restricted space FS

Yahoo group: hamstuff
Date: 2004-10-02 11:35:24 UTC
From: Ken Simpson, W8EK
Topic: 416 Message: 416

For Sale:

MFJ 1786 Super High-Q Loop Antenna

Ideal for restricted spaces. This antenna is a loop about
3 feet in diameter that can be mounted outside on a pole,
or put in an attic, or other restricted places. It works from
10 thru 30 MHz (that means it covers 30, 20, 18, 15, 12,
an 10 meter bands), and handles 150 watts. A "Super
Remote Control" (MFJ's name for it) is in the shack and
controls the antenna. This controller includes a cross
needle wattmeter/SWR bridge. It will not perform like a
big beam, but is fairly efficient for small spaces.

MFJ sells these for about $380. This one is in good shape
and includes both the loop and controller, and the paper
work for $280 plus shipping from Florida.

Thanks.

422. Kenwood dual band mobile xcvr FS

Yahoo group: hamstuff
Date: 2004-10-16 14:55:09 UTC
From: Ken Simpson, W8EK
Topic: 422 Message: 422

For Sale:

Kenwood TW-4000 dual band mobile FM transceiver

Covers 2 m and 440 MHz FM. 25 Watts output, or 5 W
in low power. Of course it has memories, scan, etc.
It has a GASFET front end, giving it a really great
receiver. This would make a great packet rig,
which is what it has been used for. All solid state
switching makes silent packet operation. Since it has
been used on packet, it does not have a mic or mobile
bracket with it, although it takes a standard 8 pin
round mic connector, like most Kenwood rigs. It
needs 13 V DC at 7 or 8 amps to operate. It works
fine, and is good cosmetically, although there are a
few scratches. Manual is included for $125 plus
shipping from Florida.

Thanks.

73,

Ken, W8EK

FOR SALE:
HALLICRAFTERS SX-28 or SX-28A Speaker.
Extra nice. Best one I have seen - looks like it was hardly
ever used. Original speaker inside and it''s in good
working condition too.

Available for $79.00 plus shipping

ALSO:

Hallicrafters R-48 Speaker
Companion to the SR-150, SX-117, HT44 etc.
Very good condition. This is the model that
has the red tone switch in the back.
Not scratched up like some but has a
very slight bend in the top that needs pulled.
Available for $49.00 plus shipping

I will post photos of both tomorrow at:
http://www.af4k.com

428. FS: Military HT Radio

Yahoo group: hamstuff
Date: 2004-10-26 13:11:32 UTC
From: Brian Carling
Topic: 428 Message: 428

FOR SALE:
Military Distress Radio Type ACR-B/3
This handie-talkie type radio set runs on 243 MHz and 282.8 MHz.
Serial number 4849. COntract Number N00019-68-C-0312.
Manufacturer: ACR Electronics Corp. New York.
Controls: PTT / Lever Transmit, Tone ON/OFF, Channel Selector Switch.
Has built-in speaker, microphone and telescopic antenna, all in good shape.
Runs on batteries, not included.
One only available for $45.00 plus shipping.
Picture and details at:
http://www.af4k.com/radios.htm

430. FS: Crystal Calibrator

Yahoo group: hamstuff
Date: 2004-10-27 00:09:38 UTC
From: Brian Carling
Topic: 430 Message: 430

FOR SALE: Crystal Calibrator
Nice little homebrew solid state unit with the large 100 kHz
"Tall HC6/U" crystal inside. Has digital dividers for marker
signals
at either every 100 kHz, every 50 kHz or every 25 kHz.
A rotary switch selects the various markers. Uses either an
internal
9V battery or external DC source. Internal trimmer allows you
to adjust
the calibration source against a laboratory standard or WWV.
Hammertone gray case looks great - small hole in lid could
allow
for adding and L.E.D. pilot light.
Available for only $19.00 plus shipping.

431. Some VERY good news for ham radio in G-land and DXers

Yahoo group: hamstuff
Date: 2004-10-30 12:36:40 UTC
From: Brian Carling
Topic: 431 Message: 431

Hey guys - with all of the bad news about ARRL's abject failure
on WINLINK and BPL, and with the son of our Sec of
State, FCC Chairman Powell selling out the amateur radio
service to the power companies, HERE is a bit of VERY,
VERY good news:

==>BRITISH AMATEURS GET ADDITIONAL 100 kHz ON 40 METERS OCTOBER 31

Starting at 0100 UTC October 31, the 40 meter band in the British Isles
will effectively double in size when radio amateurs there gain access to
7100 to 7200 kHz. Ofcom, the UK telecommunications regulatory authority,
announced the Notice of Variation October 26.

The change, in the works since last year, is a result of actions taken
during World Radiocommunication Conference 2003, where conferees agreed
to
move broadcasters out of 7100 to 7200 kHz in Regions 1 and 3 to make
room
for the Amateur Service. Coincidentally, the UK band expansion, which
also
includes independently governed regions where Ofcom regulates
telecommunications, will occur just about halfway through the CQ World
Wide Contest (SSB) this weekend. Contesters take note!

The Ofcom NOV makes the segment available on a secondary basis, and
amateur stations in the UK and affected regions may not cause
interference
to stations operating in other radio services inside or outside the UK.

The UK and Ofcom-administered regions join the Republic of
Ireland--which
reportedly gained access October 20--as well as Croatia, Norway and San
Marino among Region 1 countries that have authorized access to the
additional spectrum on a secondary basis. The WRC-03 change does not
formally go into effect until 2009.-thanks to Lawrence Woolf, GJ3RAX;
RSGB

432. Vectronics PM-30, 160 thru 6 m peak reading wattmeter FS

Yahoo group: hamstuff
Date: 2004-10-30 13:07:51 UTC
From: Ken Simpson, W8EK
Topic: 432 Message: 432

For Sale:

Vectronics PM-30 Wattmeter

This meter has the dual cross needle meter that
will read both forward and reverse power at the
same time. It covers from 1.8 to 60 MHz, so it
is great for the newer rigs that cover from 160 thru
6 meters. It will read either peak or average power
with 300 or 3000 Watts full scale, and is powered
by 12 V DC. Input and output connectors are
SO-239, with a 2.1 mm coaxial connector for the
12 V DC.

This particular meter works 100% and looks very
close to new.

Manual is included for $60 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

From: Brian Carling
Topic: 433 Message: 433

FOR SALE -
6.3V 100 Amp (50 + 50) transformer:
Will run FOUR 4cx1000A tubes or 3cx1200D7 tubes.

This transformer has two 12V CT at 50 Amp
windings.
Can be run seperately or in series or parallel
for the desired results.
Use for either 6.3V at 100 Amps, 2 X 6.3V at
50 Amps or as 2 X 12V at 50 Amps etc.

Has multitap primaries.
Primary taps are for 105V, 115V and 125V AC.

Dimensions are: 7" X 6.5" X 5.5" tall
Weighs 35lbs

Looks excellent and is clean - black glossy
painted finish.

The shipping weight is going to be around 40
pounds.

QTY 1 available for $49.00 plus shipping.

434. TenTec Pegasus 550 HF xcvr FS

Yahoo group: hamstuff
Date: 2004-10-31 21:39:13 UTC
From: Ken Simpson, W8EK
Topic: 434 Message: 434

For Sale:

TenTec Pegasus Model 550 HF transceiver

Covers 160 thru 10 meters, although it can be used
with a transverter for 6 and 2 meters, and will display
the 6 or 2 meter frequency on the screen.

It will transceive SSB, CW, FM, or AFSK, and receive
AM. Of course it is also ideal for digital modes such
as PSK31, pactor, etc. It has 2 VFOs and 1000s of
Memories, and full break-in on CW.

This rig is very close to a "software definable" rig, in
that most of the rig is controlled from the computer and
computer program. There are no knobs on the rig.
Everything is on the computer screen. It makes for
a rig that can be changed by changing the software.
DSP filtering is provided, that is quite effective, so
no crystal filters are needed. Bandwidths go from
300 Hz to 8 KHz, with 1.5 to 1 shape factors, or better.

This particular unit is in excellent condition, with latest
firmware. It looks and performs almost like new. No
scratches, dents, or dings. TenTec operating control
software is included in both 16 bit and 32 bit operating
systems, so you can use an older version of Windows
or the latest version. Of course it has the power cord
and complete manual with it. It needs 13 V DC at
about 20 amps to operate.

$600 plus shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 392 Message: 439

For Sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC bands. It has a general coverage receiver, and includes SSB, CW, and AM. An optional FM adapter is available for it. Of course it has digital readout, memories, scan, dual VFOs, PBT, notch filter, etc. 100 Watts output. This particular unit works 100% and looks really great also. Front panel is great. It does have a scratch on the heat sink in the rear. Big inch thick manual is included, as is the original box. TenTec sells these used for $795. This one is just as nice for $650.

Giehl Chip Firmware upgrade for Paragon 585.
This is a new EPROM that essentially upgrades the 585 Paragon to a Paragon II. $60

TenTec 251 power supply
This is the power supply that was made to go with the Argonaut when used with the 405 linear amp. It is somewhat rare. The 251 will supply 13 V DC at up to 9 amps. It was also used with the Triton I (the 50 W output model), and could be used with any rig needing 13 V DC at up to 9 amps. This styling matches the 505 or 509 Argonaut, the 405 amp, the Triton I and II and others that are the walnut wood grain and eggshell white. This particular one works fine and includes the paper work for $65.

Prices do not include shipping from Florida.

Thanks.

440. Re: [Ham Stuff] Digest Number 262

Yahoo group: hamstuff
Date: 2004-11-14 17:36:33 UTC
From: Bob
Topic: 440 Message: 440

Hi Ken.

You did a very fine job of describing the Pegasus. How about a comparison? Older, newer. Computer accessable? etc. I have a Scout, an Argonaut II, and the Pegasus. It would be nice to have one base station rig that is 100 watt and not necessarily computer dependent. I haven't run more that 100 watts for the last 40 years. I may put back a KW in the closet, probably on 20 meters, for hurricane duty. That would be the only exception.

Would the Paragon fit the pattern?Is it spoken for?

What is the total cost? Would I be better off waiting for another Pegasus or a Jupiter or ?

I am mostly a CW nut but very rusty from 6 years of illness.

Thanks, Bob KG4ECA

TenTec Items For Sale:

TenTec 546 Omni D, series C, HF CW / SSB xcvr.
This is the latest of the Omni D series rigs. It is all
solid state, with up to 100 W output. The ALC can
also be turned back with a front panel control for QRP
operation. Covers 160 through 10 meters, including
the 10 MHz WARC band. The 18 and 24 MHz WARC
bands can be added with optional crystals (see below).
Full QSK on CW, and a fantastic receiver. Terrific
audio quality on SSB also. Built in audio CW filter.
Digital read out. This one is in very, very nice shape,
with manual and power cord for $335.

Optional crystals to add WARC bands to 546 Omni series C.
Simply plug in to the rig to add the bands.
Crystal for 18 MHz (17 meter) WARC band. $15
Crystal for 24.5 MHz (12 meter) WARC band $15

TenTec 705 desk microphone.
Four pin plug, matches most all of TenTec rigs.
This is the current desk microphone TenTec is
selling. It works 100% and looks very close to
new, with paper work for $79.

TenTec 251 power supply
This is the power supply that was made to go with the
Argonaut when used with the 405 linear amp. It is
somewhat rare. The 251 will supply 13 V DC at up to
9 amps. It was also used with the Triton I (the 50 W

Date: 2004-11-21 16:46:17 UTC
From: Ken Simpson, W8EK
Topic: 445 Message: 445

Antenna tuner For Sale:

MFJ 949 E antenna tuner

This tuner has a "cross needle" SWR bridge built into it, so you can read both forward power and SWR at the same time. The meter has a back light. It will read either 30 W or 300 W full scale. It will also read either peak or average power. It needs 13 V DC for the backlight, and to read peak power.

An antenna switch will switch between either balanced line, two coax antennas, or a built in dummy load. All antennas can be operated thru the tuner, or the tuner can be bypassed for each.

This tuner will operate on 160 thru 10 meters, including the WARC bands.

This particular unit works 100%. It looks very close to new. Manual is included for $ 100 plus shipping from Florida.

Thanks.

450. Loop antenna for restricted space FS

Yahoo group: hamstuff
Date: 2004-11-25 14:08:50 UTC
From: Ken Simpson, W8EK
Topic: 450 Message: 450

For Sale:

MFJ 1786 Super High-Q Loop Antenna

Ideal for restricted spaces. This antenna is a loop about
3 feet in diameter that can be mounted outside on a pole,
or put in an attic, or other restricted places. It works from
10 thru 30 MHz (that means it covers 30, 20, 18, 15, 12,
an 10 meter bands), and handles 150 watts. A "Super
Remote Control" (MFJ's name for it) is in the shack and
controls the antenna. This controller includes a cross
needle wattmeter/SWR bridge. It will not perform like a
big beam, but is fairly efficient for small spaces.

MFJ sells these for about $380. This one is in good shape
and includes both the loop and controller. The controller
looks close to new. The antenna itself shows some minor
weathering, but is really in quite good shape. The
aluminum even shines in places.

With the paper work for $280 plus shipping from Florida.
Of course pick up would be even better.

Thanks.

Can possibly be used in some other models.
This unit comes with the complete instructions and
schematic. May possibly have a bad transistor.

Will sell for $19.00 plus shipping.

454. FS: Robot Research SSTV Converters

Yahoo group: hamstuff
Date: 2004-12-01 14:17:31 UTC
From: Brian Carling
Topic: 454 Message: 454

FOR SALE:
ROBOT 400 SSTV Unit in good condition. Great for
video buffs.
The Robot 400 converts picture information in the
standard
format with conventional fast scan TV to and from
the format
used for Slow-scan TV around the world by radio
amateurs and
others. The model 400 performs this conversion in
either
direction, to and from SSTV.

This famous piece of retro gear was and still is
used for Slow Scan Television with amateur radio.
Hook up
your camera, radio etc. and you are off and
running.
Uses RCA phono plugs and BNC plugs for external
connections.
120V AC Operation. Comes with the original
instruction book
and schematic.
Will sell for $29.00 plus shipping.

Robot 530 SSTV Unit - commercial type. QTY 2
Similar to the Robot Research 400, but this is the
commercial
version that was sold to non-amateur users.
Camera in, Camera Out, Frame Grab control,
telephone
interface etc. Many extra features and same
size/style
case as the Robot 400.
Will sell for $15.00 each plus shipping.

Robot 510 SSTV Unit - Commercial type. QTY 1
Has lesser features and same size/style case as
the Robot 400.
Will sell for $10.00 plus shipping.

E-mail me to arrange purchase.

Rare find. These have never been used. Still in
the original EIMAC boxes.
Available for $120.00 each plus shipping.

ALSO:
JAN 4-250 Tube - may be used, but low hours
and still in excellent working condition.
Will sell for $45.00 plus shipping.

457. FS: Non-inductive Resistors

Yahoo group: hamstuff
Date: 2004-12-03 19:40:16 UTC
From: Brian Carling
Topic: 457 Message: 457

FOR SALE

CES-WID SERIES 8005P Non-inductive Resistors.

I have QTY 4 of them at 380 ohms / Rated for 1000
Watts continuous.
I also have QTY 1 that is 200 ohms at 1000 Watts.
Rated for up to 350 degrees C. WOnderful power
handling capability right up into the GHz ranges.

NOTE:
Two of the 380 ohm resistors in series will make a
great far-end
load for a RHOMBIC antenna, which requires
approximately 800 ohms.

Available $49.00 each plus shipping.

Picture and details at:
http://www.af4k.com/miscpart.htm

458. FS: Johnson Viking Mobile

Yahoo group: hamstuff
Date: 2004-12-06 11:47:58 UTC
From: Brian Carling
Topic: 458 Message: 458

FOR SALE:
E. F. JOHNSON Viking Mobile Transmitter

This is an excellent E. F. JOHNSON Viking Mobile
Transmitter covering the 80, 40, 20 and 10 Meter
bands,
and running up to 60 watts input with plate
modulated AM.
The Viking Mobile is crystal controlled, and was
sold as a an under-dash mobile transmitter in the
1950s.
It uses seven vacuum tubes with an 807 final
amplifier, modulated by a pair of push-pull 807s.
It uses an external dynamotor power supply,
and yes, the rare companion dynamotor is included
with
this transmitter. It supplies 400V and 800V DC
for the transmitter. This unit is either factory
wired,
or it was done as a kit by an expert.
It looks great inside, both above and below the
chassis.
The front panel is EXCELLENT, with all of the
original knobs, and a perfect silk screen.
The cabinet is generally very nice, with excellent
original paint. The paint is original;
the unit has NOT been repainted. Chassis looks
very clean inside and out, as it has been unused
and has been in storage for the past 40 years.
All tubes are included. It comes with a partial
manual, including the schematic.
Also supplied are the following four crystals with
this transmitter:
Popular AM frequencies... 3870, 3880, 3885 and
7290 kHz.
Optional WW2-era mobile microphone with PL-68
connector ready for this rig.
Available for $275.00 plus shipping.
Mobile chest microphone with correct plug (WW2
style) available for $45.00

Pictures and details at:
http://www.af4k.com/radios.htm

From: Ken Simpson, W8EK
Topic: 176 Message: 462

Shure 444 Desk Microphones For Sale:

Shure 444 desk microphone.
The Shure 444 has voice shaping built in to it, with PTT switch
on the base. Under the base is a switch for VOX or PTT. This
mic is the gray color, works fine, and is in very good shape.
It has paper work with it for $ 50.

Shure 444 D dynamic desk microphone.
The 444 D has voice shaping built in to it, with PTT switch
on the base. Under the base are switches for High or Low Z,
and PTT or VOX. This mic is the black color, and is in very
nice shape for $ 65.

Prices do not include shipping from Florida.

Thanks.

463. Misc Kenwood items FS

Yahoo group: hamstuff
Date: 2004-12-18 19:11:16 UTC
From: Ken Simpson, W8EK
Topic: 463 Message: 463

Misc Kenwood items for sale:

Kenwood SP-40 mobile speaker
This is a small (about 3 inch) speaker designed for
communications use, and ideal for mobile. It has a
magnet in the base, so it will stick to a metallic
dashboard. This one works fine, and looks like it
just came out of the box. $20

Kenwood MC-85 desk microphone
This desk mic is similar to the MC-80, but has provisions
for 3 separate cables, so that it can be used with 3
different radios. It also has a speech compressor built in.
This one works 100% and looks very close to new.
With paper work, for $110.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood
rig taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often
used on the 2 m and 440 MHz rigs that do not have
touchtone built in, but can also be used on HF rigs for
TT on 10 m FM. It works fine and looks great also. $ 55

Kenwood PC-1 A phone patch.
This is the model with the 8 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK. This particular
unit works fine, and looks very close to new, with original
paperwork, for $ 55.

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It has the standard 4 pin plug
wired for Kenwood. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $30

Prices do not include shipping from Florida.

Thanks.

http://www.af4k.com/miscpart.htm

477. FS: Extra Nice Tube Audio Mixer-Preamp etc.

Yahoo group: hamstuff
Date: 2005-01-14 21:50:13 UTC
From: Brian Carling
Topic: 477 Message: 477

FOR SALE:

Custom Audio Mixer-Preamp - 3 channels.
Has XLR input jacks and transformer input preamp
stages.
The four transformers are by Chicago (CTS) and
UTC.
Uses the following tubes: QTY 3 X 6072 and QTY 2 X
12AX7.
As you can see this is a beautifully built piece
of audio
equipment that was probably used in a radio
station or
a recording studio in the 1950s or the 1960s.
Built with great engineering expertise.
All the wiring looks professional and the
transformers
and parts are of the highest quality.

Available for $45.00 plus shipping.

Pictures and details at:
http://www.af4k.com/miscpart.htm

ALSO:

CHALLENGER AC10 Monaural Audio Amplifier
Excellent condition. 15 watts from a pair of
6BQ5/EL84 tubes
for that amazingly warm tube sound. Has inputs for
115V AC
operation. Excellent condition.
Available for $29.00 plus shipping.

Pictures and details at:
http://www.af4k.com/miscpart.htm

479. FS: National / Heath BA Station

Yahoo group: hamstuff
Date: 2005-01-14 22:10:17 UTC
From: Brian Carling
Topic: 479 Message: 479

FOR SALE:
Excellent Heath HT-37 and National NC-300 Station in excellent
condition. Both the transmitter and receiver work 100% fine in all
modes. You get 100 watts of beautiful hi-fi phasing SSB,
AM (25W) and CW transmitter with great sounding audio,
and a general coverage plus ham bands receiver that is in a class
of its own with fabulous push-pull 6V6 audio enough to fill a
medium size hall with dulcet shortwave tones. Has crystal
filter / phasing controls, BFO, AVC-MVC, CWO, phono input,
tone control, front headphone jack, RF and AF gain,
limiter, selectitivity control and many other features.
Everything works fine on both the transmitter and receiver.
Both are 9 out of 10 pieces that will please.

Will sell the pair for $400.00 plus shipping.

Pictures available on request.

From: Ken Simpson, W8EK
Topic: 333 Message: 489

TenTec Power Supplies For Sale:

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 110

TenTec 280 power supply, 20 amps at 13 V DC.
This supply is one that is not as fancy as some (no speaker)
but is quite heavy duty electrically. It has 2 pass transistors,
instead of the one that some have. It does have an ammeter
on it, but is usually used where the supply is put on the floor,
out of the way. This one works fine, and looks very nice as
well. With paper work for $125.

Prices do not include shipping from Florida.

Thanks.

From: Brian Carling
Topic: 494 Message: 494

Kenwood TS-700SP ALL-MODE 2m TRANSCEIVER.
Does SSB, FM, AM and CW from 144 to 148 MHz.
Has extra fixed channels for commonly used
frequencies. Has a microphone. Looks excellent.
Comes with the remote VFO, but no cable.
Will supply the connectors and information so you
can easily make the cable.
I just never have had the time to do it.
Cabinets look nearly perfect. Hard to tell
from new.
Transmits and receives perfectly in all modes and
all functions.
Main tuning cap needs bearings cleaned as it jumps
frequency occasionally
like most older Kenwoods. Very easily corrected
with spray cleaner.
No disassembly required - instructions provided.
Comes with a copy of the manual.

TS-700SP Available for $185.00 plus shipping
VFO-700S Available for $75.00 plus shipping
BOTH available as a set for $245.00 plus shipping.

495. Antenna Baluns FS

Yahoo group: hamstuff
Date: 2005-02-13 23:22:43 UTC
From: Ken Simpson, W8EK
Topic: 495 Message: 495

Antenna Baluns For Sale:

A Balun is designed to match an unbalanced coaxial
cable, to a balanced antenna, such as a beam or dipole.

Hy-Gain BN-86 (1 to 1 ratio)
It is a broadband 50 Ohm ferrite balun, and is usable
from 3 to 30 MHz. It is recommended for all HF Yagi beam
antennas and provides improved front-to-back ratio. It can
also be used as the center insulator for a dipole. It uses an
SO-239 connector. This one is "pre-MFJ", made by HyGain,
and is in nice shape. These cost $80 new, but you can have
this one for only $45.

Bencher ZA-1 A
This is a 1 to 1 balun that can be used as the center insulator
for a dipole, or can be attached to a beam. It is in very
nice condition. $30

W2AU Balun (1 to 1 ratio)
Information from their web site:
The W2AU is the preferred Balun of Amateurs worldwide.
W2AU's operate at 1.1:1 or less VSWR from 1.8 to 40 mHz,
and handle powers up to 2 KW PEP (at SWRs of less than 3:1).
W2AU Baluns are transformer designs with ferrite cores to
provide 95% minimum coupling efficiency. Each has a built-in
lightning arrestor, hang up hook, and 600 lbs of pull-apart
strength in a weatherized, rugged package using only stainless
steel hardware and quality materials. The 1:1 matches 50 or 75
ohm unbalanced coax to 50 or 75 ohm balanced dipoles.
This one is new, in its box, with paper work for $20.

Hi-Q Balun (4 to 1 ratio)
Similar to above, but with 4 to 1 ratio, so 75 ohm coax is
matched to 300 ohm balanced line. This one has not been
Used. $18

Prices do not include shipping from Florida.

Thanks.

502. FS: AM-494 Tube VHF Power Amplifier

Yahoo group: hamstuff
Date: 2005-02-19 13:36:09 UTC
From: Brian Carling
Topic: 502 Message: 502

FOR SALE:
AM-494 VHF Linear Amplifier - Make your voice heard on
2 meters.
This is a surplus unit that originally covered 150 to 160 MHz.
It will probably do fine on the 2m ham band as-is, with no circuit changes. Uses a pair of 4X150 tubes (included) and
a silver, strip-line tuned tank resonator circuit. Has tuned input also.

It is basically the same kind of circuit hams have used for decades to get 1000 Watts input on 2m. Requires an external power supply of 1500V to 2000 V DC
for max input, plus filaments. Not sure if the original circuit used fixed bias or not. HAs handles
Regulated screen supply required for SSB linear operation.
Near design has two VELVET VERNIER DIALS for the tuning up.
This unit is in excellent condition inside and out.
Dimensions: 15.5" X 9" deep X 9.75" tall.

Available for $150.00 plus shipping.

Picture available on request.

Astatic D-104 desk microphone for sale

This is the nice chrome "lollipop" microphone that
has been used with many rigs over the years. This
one has the T-UG8 gray hammertone base with it.

It works fine and is in very nice shape.

$60 plus shipping from Florida.

Thanks.

514. FS: Variable Transformers

Yahoo group: hamstuff
Date: 2005-02-27 12:59:36 UTC
From: Brian Carling
Topic: 514 Message: 514

FOR SALE:

Several 120V and 240V VARIAC-type Variable Transformers...

1) LARGE POWERSTAT 0-250V AC VARIABLE TRANSFORMER.
Heavy duty enclosed type variac with screw
terminals for input and output.
Rating says 8 amps, but looks like it is capable
of considerably more.
Comes with the knob and dial scale plate.
Available for $75.00 plus shipping.

2) POWERSTAT Top Quality BENCH TYPE Enclosed
VARIAC
Rated 12 Amps. Looks to be new. Has heavy three
wire cord on the primary side and fuse.
The outlet is a three prong type wioth switch
and fuse for safety.
This is a full enclosed USA MADE bench type
with a solid cast housing.
Available for $95.00 plus shipping.

3) NEW STACO 501 Open Frame type Variable XFMR.
This is an open frame type "variac."
Brand new in the box with instructions.
Rated 0 - 140V AC at 5 Amps or 700VA maximum.
Comes with the knob and dial scale plate.
Available for $36.00 plus shipping.

4) Powerstat Panel-mount 0-140V AC Rated 420 Watts
variable transformer.
For use with 120V AC input and will provide
anywhere
from zero to 140 Volts AC at 3 Amps continuous.
This is an open frame type variable transformer.
Has screw terminals for connection.
The unit is in good working condition with the
knob. Fairly large so is probably good for
around 4-5 amps, although it is marked for 3 amps.
Available for $39.00 plus shipping

Pictures and details available at:
http://www.af4k.com/variacs.htm

518. Kenwood dual band xcvr FS

Yahoo group: hamstuff
Date: 2005-03-05 12:27:12 UTC
From: Ken Simpson, W8EK
Topic: 518 Message: 518

For Sale:
-
Kenwood TW-4000 dual band mobile FM transceiver
-
Covers 2 m and 440 MHz FM. 25 Watts output, or 5 W
in low power. Of course it has memories, scan, etc.
It has a GASFET front end, giving it a really great
receiver. This would make a great packet rig, which
is what it has been used for. All solid state switching
makes silent packet operation. Since it has been
used on packet, it does not have a mic with it, although
it takes a standard 8 pin round mic connector, like
most Kenwood rigs. Mobile bracket is included. It
needs 13 V DC at 7 or 8 amps to operate. It works
fine, and is good cosmetically, although there is
some wear. Manual is included for $135 plus
shipping from Florida.
-
Thanks. 73,
Ken Simpson, W8EK

Date: 2005-03-06 09:55:03 UTC
From: Brian Carling
Topic: 519 Message: 519

Guys - I have just received two solicitations in the U.S. mail
from ARRL to renew my membership.

I could easily afford it...
In fact I have been an ARRL member since 1975...
Here is why I will NOT be renewing after THIRTY YEARS:

In my opinion the ARRL leadership team has been selling
us down the river and refusing to listen to good reason.
MANY radio amateurs have contacted our officers and
representatives on this issue only to be met with a stone
wall.

I am so very sorry to have to give up on the organization that
I have loved and believed in for over 30 years.

They had their chance, but they ignored sound advice.
They refused to even discuss it in most cases.

Here is my explanation:
http://www.af4k.com/Ham/dissent.htm

521. Coaxial antenna switches FS

Yahoo group: hamstuff
Date: 2005-03-13 18:59:28 UTC
From: Ken Simpson, W8EK
Topic: 521 Message: 521

Coaxial antenna switches for sale:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors,
with the coax coming out like spokes of a wheel.
It is in good condition and works fine. $ 30

B & W 593 coax switch
This one switches 3 antennas, and is in a rectangular
Box with all 4 SO-239 connectors coming out the
back of the box. Unused antennas ARE grounded.
This one works fine and is in very nice condition. $30

Generic 3 position Coax Switch
This is in a small rectangular box, with the
3 switched SO-239 connectors coming out
the rear, and the common coming out the front. Unused
positions are NOT grounded. It is in very nice condition
for $ 14.

Coaxial antenna transfer relay for sale:

This is not the normal SPDT DowKey antenna transfer relay,
but it serves the same function. This is an Allied Controls
relay. It says 55476 K-101 on it, and has a 24 Volt DC
coil, although it picks up fine at 18 Volts. It will not pick
up at 12 V DC. It is relatively small, so I doubt it would
handle a KW, but would be fine for 100 or 200 watts.
Its construction looks like it should be good at VHF.

This relay has two SO-239 connections (one is the
common), and a length of RG-58 for the third connection.
It is a bit different than the DowKey relays, but if you
need an antenna transfer relay for the separate transmitter
and receiver in your vintage station, this should do the
job nicely. $30

Prices do not include shipping from Florida.

Thanks.

525. TenTec HF xcvr and other equipment FS

Yahoo group: hamstuff
Date: 2005-03-19 15:51:28 UTC
From: Ken Simpson, W8EK
Topic: 525 Message: 525

TenTec items for sale:

TenTec 555 Scout transceiver
This is a 50 watt HF transceiver, primarily designed
for mobile use, but also nice inside the house. It
has the TenTec variable bandwidth "Jones filter" in
it that is really effective. CW keyer is built in.
This one has the 40 and 20 meter modules with it,
along with power cord and manual. It works fine, and
looks like it just came out of the box. I can not find a
scratch any where on it. $320

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $79

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 110

TenTec 280 power supply, 20 amps at 13 V DC.
This supply is one that is not as fancy as some (no speaker)
but is quite heavy duty electrically. It has 2 pass transistors,
instead of the one that some have. It does have an ammeter
on it. This one works fine, and looks very nice as well.
With paper work for $125.

Prices do not include shipping from Florida.

Thanks.

526. Bird Wattmeter elements and leather case FS

Yahoo group: hamstuff
Date: 2005-03-19 17:23:47 UTC
From: Ken Simpson, W8EK
Topic: 526 Message: 526

For Sale:

Bird Model 43 wattmeter elements and leather cases

All work fine and are in very nice condition.

Element 10 B - 10 Watts - 50 to 125 MHz
Element 5 C - 5 watts - 100 to 250 MHz
Element 25 C - 25 watts - 100 to 250 MHz
Element 50 C - 50 watts - 100 to 250 MHz
Element 100 C - 100 watts - 100 to 250 MHz
All of the above are $55 each.

Element 430-107 - 100 mW - 800 to 900 MHz
Element 800-1 - 1 Watt - 800 to 950 MHz
These elements are $80 each

CC-1 BLACK (or Dark Gray, if your prefer)
leather case holds Model 43 wattmeter
and 6 slugs - nice silver lettering - $105

RFDC - Dummy Load with "N" connector
I can not find specs on these, but basically they
are terminations. They look to be good for
maybe 3 watts, but look like they should be
good up into the UHF frequencies. $18

Prices do not include shipping from Florida.

Thanks.

528. FS: sets of vhf & uhf radios.

Yahoo group: hamstuff
Date: 2005-03-31 08:28:29 UTC
From: goshawk
Topic: 528 Message: 528

hello list,
I have 2 sets of handheld radios to clear out as follows.

set of 6 Icom 2 channel VHF handheld radios, plus a single charger, 1 case, and 1 spare battery.
5 of these radios talk to each other, the other 1 doesn't.
can't remember the model of these radios, so will try and include as much other info on them as possible.
they can take headset or speaker mics, and there aerials use a standard BNC fitting, so that you can use other aerials or hook them up to vehicle aerials if required, and spare or replacement aerials should be really easy to get.
these radios are christol controlled, so changing there frequency is not as easy as just getting them programmed, this is why one of them doesn't talk to the other 5, and why the price for all this kit is so low.
I will also include 2 spare aerials for the radios, and a headset & mic.
only asking £95 for this whole lot of kit.

set of 6X SMC 10 channel UHF radios, all with aerials, batteries and cases.
also included are 6X extra batteries, and a mains charger which can take up to 6 batteries, and can be wall mounted.
these radios have seen very little use, and are in extremely good condition.
the aerials have BNC connecters, so can be changed easily, or radios can be connected to mobile aerials if you so wish, and spare or replacement aerials should be very easy to get.
I have never used these radios, so don't really know any more about them, and can't remember the model number of them.
batteries seem to hold charge quite well, don't know about the 6 extra ones, but as the ones on the radios were ok they should be as well.
I also don't know if these radios are programmable or christol controlled, at a guess, I would say programmable, but please don't quote me on that.
this is why the price for all this kit is so low, at only £145 for this whole lot of kit.

if someone wants to take both sets of radios off my hands, I will let them go for only £200.
all prices given do not include carriage if applicable, preferred payment methods are paypal, nochex, direct bank transfer, and cash is also fine if collecting your purchase.

if interested in one or both sets of radios, please either call, 02084785841, or e-mail to,
goshawk@...on.co.uk

Simon

537. Low Pass TVI filters FS

Yahoo group: hamstuff
Date: 2005-04-23 21:51:22 UTC
From: Ken Simpson, W8EK
Topic: 537 Message: 537

Low Pass (TVI) filters For Sale:

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is
only 100 Watts. Use this one after your rig, and before
your amplifier. Nice shape for $ 15.

Para Dynamics Corp PDC-98 low pass filter
This filter is a really heavy duty, high power filter.
It starts to cut off just above 10 meters, and
has a notch about 90 db deep on TV channel 2
and 3, and then about 80 db above that. SO-239
connectors on each end. Great condition for $40.

Prices do not include shipping from Florida.

Thanks.

538. TenTec HF xcvr and other TenTec items FS

Yahoo group: hamstuff
Date: 2005-04-24 17:03:58 UTC
From: Ken Simpson, W8EK
Topic: 538 Message: 538

TenTec Pegasus HF transceiver and many misc TenTec
accessories For Sale:

Ten-Tec Pegasus Model 550 HF transceiver

Covers 160 thru 10 meters, although it can be used
with a transverter for 6 and 2 meters, and will display
the 6 or 2 meter frequency on the screen.

It will transceive SSB, CW, FM, or AFSK, and receive
AM. Of course it is also ideal for digital modes such
as PSK31, pactor, etc. It has 2 VFOs and 1000s of
Memories, and full break-in on CW.

This rig is very close to a "software definable" rig, in
that most of the rig is controlled from the computer and
computer program. There are no knobs on the rig.
Everything is on the computer screen. It makes for
a rig that can be changed by changing the software.
DSP filtering is provided, that is quite effective, so
no crystal filters are needed. Bandwidths go from
300 Hz to 8 KHz, with 1.5 to 1 shape factors, or better.

This particular unit is in excellent condition, with latest
firmware. It looks and performs almost like new. No
scratches, dents, or dings. TenTec operating control
software is included in both 16 bit and 32 bit operating
systems, so you can use an older version of Windows
or the latest version. Of course it has the power cord
and complete manual with it. It needs 13 V DC at
about 20 amps to operate. In its original box for $625

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $79

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 110

TenTec 280 power supply, 20 amps at 13 V DC.
This supply is one that is not as fancy as some (no speaker)
but is quite heavy duty electrically. It has 2 pass transistors,
instead of the one that some have. It does have an ammeter
on it. This one works fine, and looks very nice as well.

With paper work for $125.

Prices do not include shipping from Florida.

Thanks.

542. Kenwood accessories FS

Yahoo group: hamstuff
Date: 2005-05-08 11:28:14 UTC
From: Ken Simpson, W8EK
Topic: 542 Message: 542

Accessories for Kenwood transceivers For Sale:

Kenwood MC-35 S hand microphone
This hand microphone is used with most all of the
older Kenwood rigs - TS-120, TS-180, TS-520, TS-820,
etc. It has a four pin plug on it to match these rigs.
Good shape for $40

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It has the standard 4 pin plug
wired for Kenwood. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $35

YK-88 C, CW filter for Kenwood TS-120/130/430/440, and
many others.
This is a 500 hertz CW filter for the 8.8 MHz IF used in many
of the Kenwood rigs. Actual center frequency is 8830.7 MHz.
It is the solder in type filter, with steep skirts. $70

Kenwood heavy DC power cord for HF rigs
This is the actual Kenwood cord, and not a third party
make over. It fits all of the Kenwood (and Icom and Yaesu
and Alinco) rigs that take the standard 6 pin "Molex"
power plug. $ 20

I have a cable that is used to go between a Kenwood
transceiver, and a linear amplifier, to switch the amp
from transmit to receive. One end has a DIN connector
on it, as is used with most Kenwood rigs. The other end
has an RCA phono plug on it, as used by most linear
amplifiers. Before using this cable, please check to be
certain that the voltages and currents needed by your
amplifier match the switching capabilities of your transceiver.
This cable has only one coax between the rig and amp.
It provides only the relay control, and NOT the ALC control.
Many amps do not need the ALC, so this cable would
work fine. $ 12

Prices do not include shipping from Florida.

Thanks.

and complete manual with it. It needs 13 V DC at
about 20 amps to operate. In its original box for $625

TenTec 555 Scout transceiver
This is a 50 watt HF transceiver, primarily designed
for mobile use, but also nice inside the house. It
has the TenTec variable bandwidth "Jones filter" in
it that is really effective. CW keyer is built in.
This one has the 40 and 20 meter modules with it,
along with power cord and manual. It works fine, and
looks like it just came out of the box. I can not find a
scratch any where on it. $320

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $75

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 105

TenTec 280 power supply, 20 amps at 13 V DC.
This supply is one that is not as fancy as some (no speaker)
but is quite heavy duty electrically. It has 2 pass transistors,
instead of the one that some have. It does have an ammeter

From: Ken Simpson, W8EK
Topic: 550 Message: 550

For Sale:

Bird Model 43 wattmeter elements and leather case

All work fine and are in very nice condition.

Element 10 B - 10 Watts - 50 to 125 MHz
Element 5 C - 5 watts - 100 to 250 MHz
Element 25 C - 25 watts - 100 to 250 MHz
Element 50 C - 50 watts - 100 to 250 MHz
Element 100 C - 100 watts - 100 to 250 MHz
All of the above are $50 each.

Element 430-107 - 100 mW - 800 to 900 MHz
Element 800-1 - 1 Watt - 800 to 950 MHz
These elements are $75 each

CC-1 BLACK (or Dark Gray, if your prefer)
leather case holds Model 43 wattmeter
and 6 slugs - nice silver lettering - $100

RFDC - Dummy Load with "N" connector
I can not find specs on these, but basically they
are terminations. They look to be good for
maybe 3 watts, but look like they should be
good up into the UHF frequencies. $18

Prices do not include shipping from Florida.

Thanks.

Date: 2005-05-21 12:35:33 UTC
From: Brian Carling
Topic: 555 Message: 555

FOR SALE:
Weller Pyropen JR Soldering Iron.
This is a butane soldering iron. Has gas guage, adjustable flame
intensity etc.
Capable of doing all kinds of portable and outdoor soldering jobs.
Great for working on antennas. This one is excess to my needs.
It's used but in excellent shape.
List price is around $85.00 to $120.00

Available for $15.00 plus shipping

556. Roller inductor 160 thru 6 m antenna tuner FS

Yahoo group: hamstuff
Date: 2005-05-21 13:19:50 UTC
From: Ken Simpson, W8EK
Topic: 556 Message: 556

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new. There is not
a mark on it. Of course the paper work is
included. You can pay about $200 from MFJ,
or buy this one for $145 plus shipping from Florida.

Thanks.

558. FS: Box of FT241A Crystals

Yahoo group: hamstuff
Date: 2005-05-22 18:17:50 UTC
From: Brian Carling
Topic: 558 Message: 558

FOR SALE:

Boxes of 80 FT241A Crystals in the box in their original government package.
Marked with channel numbers that correspond to LF fundamental frequencies
mostly in the range of about 300 to 600 kHz.
These have the same size 3/32" pins and 1/2" spacing as FT243 crystals but
the cases are slightly wider, as shown below:

Examples: Channel 0 - Channel 8 - Channel 68 - Channel 306 -
Channel 355
Frequencies 370.4 kc. - 385.2 kc. - 496.3 kc. - 425.0 kc. -
493.0 kc.
Will sell each box of 80 for $20.00 plus shipping.

Also Box of 120 crystals on Channel 54 = 470.4 kc.
Will sell this box for $30.00 plus shipping.

(I also have several other frequencies - no 455 kc., sorry!)

559. Yaesu items FS

Yahoo group: hamstuff
Date: 2005-05-23 17:15:05 UTC
From: Ken Simpson, W8EK
Topic: 559 Message: 559

Yaesu items For Sale:

Yaesu "Landliner" speaker and phone patch
This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as
well as controls for both transmit and receive gain.
This particular unit works fine, and looks very nice
as well. $75

Yaesu HT accessories:

All of these items fit the Yaesu FT-23/73/411/470/530/811
series of HTs and many others as well.

Yaesu MH19A2B ear bud and mini-mic.
This can be used with the above HTs, plus most any of the
HTs that take a 3.5 mm and a 2.5 mm for the speaker
mic plug. It works fine and looks fine. $18

Yaesu Boom Microphone and single headset
I can not find a model number on this, but it works with the
above listed HTs, and most that take the 2.5 mm and 3.5
mm speaker mic connections. It works fine, but the single
"speaker" portion of the headset could use a new foam
pad. $18

Speaker microphone for HT
It says Densei SM-505 on it, but it will work with the
Yaesu HTs that need the 3.5 mm and 2.5 mm plug.
Very nice condition for $18.

Yaesu NC-28 B wall charger
This unit produces 8.7 V DC at 60 ma. It has a 2.5
mm plug on it. This is the charger for the Yaesu
FT-23/33/73, FT-411, FT-470, FT-530, FT-811,
and probably others. This one works and looks fine.
$10

Prices do not include shipping from Florida.

Thanks.

560. FT243 Crystals in the 8 MHz Ranges - Last Call

Yahoo group: hamstuff
Date: 2005-05-23 18:53:28 UTC
From: Brian Carling
Topic: 560 Message: 560

FOR SALE: 8 MHz Crystals.
These crystals will soon been converted over to other frequencies
if no one wants them. Please order now. They will not last.
Most are QTY 1 only:

8000, 8006.7, 8016.6*, 8030*, 8040, 8042 (2), 8050 (2) kHz
8041.7 (2), 8050 (2), 8075, 8100 (2), 8103.75, 8110, 8125, 8131.5, 8150,
8166.6 *, 8175 kHz
8180, 8183.3, 8200, 8225, 8250, 8275, 8298, 8300 (4), 8320, 8325 (2) kHz
8334, 8335, 8336, 8337, 8339, 8340, 8342, 8348, 8350 (4), 8351, 8352,
8353 8354, 8355, 8356, 8357 kHz
8361, 8362, 8366*, 8367, 8369, 8375 (4), 8378, 8386, 8392, 8400 (12),
8411, 8414, 8417, 8420 kHz
8423, 8425 (6), 8438, 8440, 8450 (4), 8460, 8475 (6), 8483, 8500 (2),
8525 kHz
8542, 8550 (2), 8570, 8575 (2), 8582, 8583, 8590, 8600 (3), 8615, 8617,
8620 kHz
8630, 8650 (2), 8667, 8681, 8683, 8700, 8717, 8730, 8740, 8745, kHz
8750 (2), 8760, 8820, 8845, 8865, 8885, 8889, 8910, 8929.4 kHz

Available for $9.00 each plus shipping

Latest list updated frequently at:
http://www.af4k.com/8MHz_crystals.htm

561. FS: Wire Marker Set

Yahoo group: hamstuff
Date: 2005-05-23 20:58:42 UTC
From: Brian Carling
Topic: 561 Message: 561

FOR SALE:

BRADY STOCK B-500 Wire Marker Set.
Cat No. WM-AZ09 ideal for marking wiring in harnesses inside any piece of electronic equipment. Great for audio mixing consoles, computer systems etc.
Consists of 25 cards, each with 36 wire markers, for a total of 900 wire makers.
number A to Z and then 0 to 9. New, unopened box set. QTY 1 only.

Will sell the set for $15.00 plus shipping

562. FS: KW Tank, Crystal Calibrator, DIAL

Yahoo group: hamstuff
Date: 2005-05-25 21:25:38 UTC
From: Brian Carling
Topic: 562 Message: 562

FOR SALE:

KW Rated Tank Circuit - heavy duty 250 pF variable and coil.
Inductance of 1.5 uH using 8 turns of 3/16" copper, 2.5" diameter
and 5.5" long.
Split stator type variable capacitor has 125 + 125 pF = 250 pF total.
The tank circuit will tune as-is from below 14 to 30 MHz.
Variable cap rated for 3 KV final. Comes with mounting hardware and nice
ceramic standoffs.
Available for $18.00 plus shipping.

Frequency standard / Crystal Calibrator - by Data Engineering Co.
Has switchable output markers on 5, 10, 25, 50, 100, 200 and 400 kHz.
This is the BEST calibrator I have seen. Great for boatanchor receivers
and other applications requiring a precision frequency source.
Runs on internal 9V Battery. Output is via RCA phono jack in the rear.
QTY 1 only available for $35.00 plus shipping.

James Millen Company DIAL Assembly, Brand New.
Never used - has 6 dial scales and beautiful silky-smooth reduction drive.
Ideal for homebrew receivers and converters or as a VFO dial.
Has that "just right" feel for vintage equipment.
Available for $35.00 plus shipping.

Pictures and details of all the above are found at:
http://www.af4k.com/miscpart.htm

563. FS: Delay Relays

Yahoo group: hamstuff
Date: 2005-05-27 13:37:47 UTC
From: Brian Carling
Topic: 53 Message: 563

FOR SALE:
DELAY RELAYS - AMPERITE - Great for military radios, or for amp builders, experimenters.
All are new and in the boxes.
5N020 (Octal Base, 4-6V, 20 sec.) - QTY 4 - $4.00 each.
26C5 (Octal Base, no box, 24-28V, 5 sec.) - QTY 4 - $3.00 each.
26NO60T (9-pin mini base, 24-28V, 60 sec.) - QTY 20 - $3.00 each.
26C10T (9-pin mini base, 24-28V, 10 sec.) - QTY 1 - $3.00 each.
NO = Normally open. C = Normally closed.

115NO2 = 2 seconds, normally open contacts.
(octal socket, 115-120V) - Available for $10.00

115N10 = 10 seconds, normally open contacts.
(octal socket, 115-120V) - Available for $10.00

Details at:
http://www.af4k.com/miscpart.htm

564. Diode, Transistor, SCR, IC and other solid state manuals FS

Yahoo group: hamstuff
Date: 2005-05-28 17:37:33 UTC
From: Ken Simpson, W8EK
Topic: 564 Message: 564

Manuals For Sale:

RCA Solid State Hobby Circuits Manual
RCA Technical series HM-91 - 1970
368 pages of electronics circuits useful to hams
and others. A section on theory is also included.
$6

Zener Diode Handbook by Motorola
First edition - 1967
Everything you wanted to know about zener diodes
and their use. A large number of specs of various
zeners is also included. $ 6

Semiconductor Power Circuits Handbook by Motorola
First edition - 1968
Theory plus practical circuits for using higher power
transistors. Circuits for inverters, power amps,
regulated power supplies, etc. $6

Silicon Rectifier Handbook by Motorola
1966
Theory and construction of various circuits. It has
a fairly comprehensive listing of specs of various
silicon rectifiers, plus cross references. $ 6

Practical Transistor Servicing
1968 - 2nd edition - Sams Book
191 pages of good information for servicing
solid state devices. $ 5

Linear Integrated Circuits by RCA
Technical Series IC-42 - 1970 - 416 pages
Specs, theory, and practical circuits.
Binding is loose. $ 5

SCR Experimenter's Manual by RCA
1967 - 136 pages
Theory and circuits. $ 4

GE SCR Manual
4th edition - 1967 - 513 pages
Theory, circuits, and specs. $ 7

Semiconductor Diode Laser
First edition - 1972 - Sams Book
192 pages $ 4

Calculator Decision Making Sourcebook
1977 - Texas Instruments book
Facts, examples, and information $3

All books are in good shape unless noted otherwise.
Prices do not include shipping from Florida, but
shipping via "Media Mail", is cheap, and should be
about $2 for one book, and $3 for 2 or 3 books,
depending upon the weight of the book.

Thanks.

565. 2 m and 440 MHz mobile antennas and mounts FS

Yahoo group: hamstuff
Date: 2005-05-29 13:20:26 UTC
From: Ken Simpson, W8EK
Topic: 565 Message: 565

Larsen Mobile Antennas For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $14
Used, but in very good shape - $12
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $18
Used, but nice shape - $16
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Larsen "Q", quarter wave whip for Larsen LM mount.
Can be cut for 2 m, 220 MHz, or 440 MHz
Includes mounting nut for LM mount.
Close to new condition - $ 5

Mobile antenna mounts for sale:

HyGain TLM
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Prices do not include shipping from Florida.

Thanks.

566. Texas Instruments Data Books FS

Yahoo group: hamstuff
Date: 2005-05-30 15:04:15 UTC
From: Ken Simpson, W8EK
Topic: 566 Message: 566

The following Texas Instrument Data Books are available.
All are in very nice condition, with very little use.

Analog/Mixed Signal Products - Aug 2000 - $ 3

Amplifier and Comparators - 2000 - $ 3

High-Speed Amplifiers (Analog and Mixed Signal)
2000 - $ 3

BiCMOS Bus Logic Interface - 1988 - $ 2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 - $ 3

CBT (5 V) and CBTLV (3.3 V) Bus Switches
Dec 1998 - $ 3

LVDS Application and Data Handbook - 2003 - $ 3

Audio Power Amplifiers (huge book) - 2000 - $ 6

Analog/Mixed Signal Products Designer's Guide
June 2001 - $ 3

The Voltage Regulator Handbook - 1977 - $ 6

All of the above are by Texas Instruments, and all are
in very nice condition.
Prices do not include shipping from Florida, but
shipping via "Media Mail", is cheap, and should be
about $2 for one book, and $3 for 2 or 3 books,
depending upon the weight of the book.

Thanks.

567. FS: Ameco PLF2 preamplifier

Yahoo group: hamstuff
Date: 2005-06-03 15:33:00 UTC
From: Brian Carling
Topic: 567 Message: 567

FOR SALE: Ameco PLF2 preamplifier
Covers 1.8 to 54 MHz, tunable.
Has inputs and ouputs for RCA type connectors and added SO239
sockets in back for standard coax cables.
115V AC operation.

Available for $22.00 plus shipping.

568. TenTec Pegasus HF xcvr FS

Yahoo group: hamstuff
Date: 2005-06-04 11:45:27 UTC
From: Ken Simpson, W8EK
Topic: 568 Message: 568

For Sale:

Ten-Tec Pegasus Model 550 HF transceiver

Covers 160 thru 10 meters, although it can be used
with a transverter for 6 and 2 meters, and will display
the 6 or 2 meter frequency on the screen.

It will transceive SSB, CW, FM, or AFSK, and receive
AM. Of course it is also ideal for digital modes such
as PSK31, pactor, etc. It has 2 VFOs and 1000s of
Memories, and full break-in on CW.

This rig is very close to a "software definable" rig, in
that most of the rig is controlled from the computer and
computer program. There are no knobs on the rig.
Everything is on the computer screen. It makes for
a rig that can be changed by changing the software.
DSP filtering is provided, that is quite effective, so
no crystal filters are needed. Bandwidths go from
300 Hz to 8 KHz, with 1.5 to 1 shape factors, or better.

This particular unit is in excellent condition, with latest
firmware. It looks and performs almost like new. No
scratches, dents, or dings. TenTec operating control
software is included in both 16 bit and 32 bit operating
systems, so you can use an older version of Windows
or the latest version. Of course it has the power cord
and complete manual with it. It needs 13 V DC at
about 20 amps to operate. In its original box for $625

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $75

Prices do not include shipping from Florida.

Thanks.

569. Low Pass TVI filters FS

Yahoo group: hamstuff
Date: 2005-06-04 12:08:36 UTC
From: Ken Simpson, W8EK
Topic: 537 Message: 569

Low Pass (TVI) filters For Sale:

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is
only 100 Watts. Use this one after your rig, and before
your amplifier. Nice shape for $ 15.

Para Dynamics Corp PDC-98 low pass filter
This filter is a really heavy duty, high power filter.
It starts to cut off just above 10 meters, and
has a notch about 90 db deep on TV channel 2
and 3, and then about 80 db above that. SO-239
connectors on each end. Great condition for $40.

Prices do not include shipping from Florida.

Thanks.

Yahoo group: hamstuff
Date: 2005-06-07 03:22:41 UTC
From: Brian Carling
Topic: 571 Message: 571

FOR SALE:

LAFAYETTE HA410 10m AM TRANSCEIVER
30 watts of AM from a 2E26 and push-pull 6BQ5 plate modulator.
Has built-in 120V AC power supply. Built-in speaker.
Covers 28 to 29.7 MHz.
Many excellent features for the 10m AM enthusiast.
I have two of these - one is complete. The other is a parts rig.
Will include a copy of the HA460 manual with schematic. It is almost
identical.
Main rig is available for $65.00
Parts rig is available for an additional $25.00
Shipping additional.

Picture and details will be posted tomorrow at:
http://www.af4k.com/radios.htm

576. Diawa automatic antenna tuner FS

Yahoo group: hamstuff
Date: 2005-06-11 12:41:52 UTC
From: Ken Simpson, W8EK
Topic: 576 Message: 576

Diawa CNA-1001 automatic antenna tuner for sale.

This is an automatic antenna tuner that covers the HF bands from 80 thru 10 meters, including the WARC bands. Although it is completely automatic (push a button, and it tunes), there are also "fine tuning" controls if you want to touch up what the automatic part does for you. It says on the front panel that it is rated at 500 Watts PEP. There is a built in dummy load (although I would not want to put 500 watts in to it), plus an antenna switch for two antennas. A large cross needle wattmeter reads both forward and reflected power simultaneously. This is a very rugged unit.

This particular tuner works fine, and looks close to perfect. I can not find a scratch on it. Power cord and paper work are both included for $195 plus shipping from Florida.

Thanks.

579. Large 2 m beam antenna FS

Yahoo group: hamstuff
Date: 2005-06-12 11:18:11 UTC
From: Ken Simpson, W8EK
Topic: 579 Message: 579

Large 2 meter beam antenna for sale:

Cushcraft 147-22 beam

This is a pair of 11 element 2 meter beams stacked
to give a total of 22 elements.

Each 11 element beam is about 12 feet long, and the
two are separated by a 5 foot boom. To put it another
way, the antenna occupies a 12 by 5 foot rectangle.

Because of the size, this is pickup only in the Ocala, FL
area. For transportation, it can easily be disassembled
into each beam by itself, and the boom, and then easily
carried on top of a minivan, or whatever.

Paper work and all hardware, coax phasing lines, etc.
are included for $200.

Thanks.

Yahoo group: hamstuff
Date: 2005-06-21 15:36:05 UTC
From: Brian Carling
Topic: 585 Message: 585

FOR SALE: Drake TR3 HF Transceiver
Covers 80 through 10 m SSB, AM and CW. 260 watts.
All original knobs. Front panel and cabinet are a 7. No bad scratches
or gouges. Everything else looks very good. Rear apron looks great.
Not tested but it is all there. No rust. RF Finals test OK.
This is just the radio by itself. You will need an AC3 or
AC4 supply or similar to power it. Fair to good condition.
Will include manual on disk.
Available for $85.00 plus shipping.

587. FS: ANTENNA SWITCHES

Yahoo group: hamstuff
Date: 2005-06-24 12:39:00 UTC
From: Brian Carling
Topic: 587 Message: 587

FOR SALE:
Two antenna switches.

The first is a Daiwa CS-201, which is a two position switch. has three
SO-239 connectors.
Very popular and familiar switch. KW rated.
Will sell for $16.00 plus shipping.

The second is an MFJ 6-position switch. This on has a lot of paint chips
and is not
pretty but it works fine. Has some extra holes too. If you don't care
about cosmetics
this will do fine for you. Available for $10.00 plus shipping.

E-mail me to arrange purchase.
Thanks for reading & 73 - Brian, AF4K

589. EBC 144 Jr, 2 meter FM xcvr FS

Yahoo group: hamstuff
Date: 2005-06-25 13:22:41 UTC
From: Ken Simpson, W8EK
Topic: 589 Message: 589

For Sale:

EBC 144 Jr., 2 meter FM transceiver

This Emergency Beacon Corporation 2 meter FM
transceiver was considered to be the "Cadillac" of 2
meter rigs in the 1970 and 80's. It has two sets of
thumbwheel switches for frequency selection, covering
the entire 2 meter band. There are provisions for odd
splits, although the rig automatically selects the correct
offset for repeaters. Of course it can be used on simplex
also. Scan provisions are included, along with a priority
channel watch. The receiver sensitivity is exceptional.
Power output is rated at 20 watts, and it uses real
transistors, instead of a "module."

This particular unit works fine, and looks very, very good.
Along with the regular paper work, an advertising brochure
is included. These sold for about $500 in the 70's, so you
know they were the real "Cadillac." $75 plus shipping from
Florida.

Thanks.

590. 160m Crystals Available Now

Yahoo group: hamstuff
Date: 2005-06-28 13:05:27 UTC
From: Brian Carling
Topic: 590 Message: 590

I have a new list of available FT243 crystals. Some of these are
original old FT243s, and others have the
newer crystals mounted inside. All work fine with older tube rigs, as
described in May 2005
Electric Radio and October 2004 CQ Magazines.

Top Band FT243 crystals available for ordering now:

1815, 1820, 1822, 1825, 1830, 1840, 1843, 1850, 1860, 1862 kHz
1880, 1885, 1900, 1930, 1945, 1970, 1977.5, 1985, 1994.5 kHz
Several of each are on hand.

Available for $9.00 each plus $5.00 shipping (regardless of QTY)
Others available for 80m, 40m, 30m and 20m.

http://www.af4k.com/crystals.htm

591. REDUCED: Electrolytic Capacitors

Yahoo group: hamstuff

From: Brian Carling
Topic: 591 Message: 591

NEW Mallory 516 uF at 400V DC Electrolytic Capacitors

New USA MADE - Cornell Dubilier 400v 560uf Radial Mount Capacitors.
Temperature rating for -40C to 105C.
Dimensions: 1.375" diameter X 2.75" tall.

Five of these in series will give you 100 uF at 2000V DC.
Ten of these in series will give you 50 uF at 4000V DC.

NOW ONLY $4.00 each if you buy 10.
Otherwise $5.00 each plus shipping!

592. Reduced: SWAN 175 TRANSCEIVER

Yahoo group: hamstuff
Date: 2005-06-30 13:06:02 UTC
From: Brian Carling
Topic: 592 Message: 592

REDUCED:

SWAN 175, A 80m monobander transceiver - in very good working condition.
The Swan 175 is the 80 meter version of a series of Swan SSB transceivers
known as "mono-banders" because of their single band design. Uses 15
tubes and a
crystal filter. Final RF power input is 240 watts P.E.P. using 6DQ5 tube.
It will also run AM with about 30 watts. Transceiver only, no power supply.
Available now for $95.00 plus shipping.

Picture and details at:
http://www.af4k.com/radios.htm

Thanks for reading - 73, Brian AF4K

Date: 2005-07-04 13:38:08 UTC
From: Brian Carling
Topic: 593 Message: 593

For Sale:

4-wire antenna rotor control box

This control box will work with most of the antenna rotors
that require a 4-wire control box, which includes the Alliance
rotors and many others.

This is a brown, upright control box, designed for
the U-100. It works fine, and looks good.

Available for $15.00 plus shipping.

Thanks & 73 de AF4K, Brian

594. AEA PK-88 Packet TNC FS

Yahoo group: hamstuff
Date: 2005-07-04 23:14:20 UTC
From: Ken Simpson, W8EK
Topic: 594 Message: 594

For Sale:

AEA PK-88, with the mailbox.
Packet Terminal Node Controller
This unit is a hardware interface between your computer
and your rig. It has actual hardware, instead of using
computer software to generate and decode the signal.
Using the PK-88 is like using a real modem, as opposed
to a "WinModem" for internet access.
This one works fine. With manual for $ 50.

AEA "Wall cube" 12 V DC power supply at 1 amp.
It can be used with the PK-232, PK-88, or others. $ 20

AEA "Wall cube" as above, but only 1/2 amp rating,
which is enough for the PK-88. $12

Prices do not include shipping from Florida.

Thanks.

595. Kenwood dual band mobile FM xcvr FS

Yahoo group: hamstuff
Date: 2005-07-09 11:50:36 UTC
From: Ken Simpson, W8EK
Topic: 595 Message: 595

For Sale:

Kenwood TW-4000 dual band mobile FM transceiver

It covers 2 m and 440 MHz FM.
I has about 25 Watts output, or 5 W in low power.
Of course there are memories, scan, etc.
It has a GASFET front end, giving it a really great
receiver. This would make a great packet rig, which
is what it has been used for. All solid state switching
makes silent packet operation. Since it has been
used on packet, it does not have a mic with it, although
it takes a standard 8 pin round mic connector, like
most Kenwood rigs. Mobile bracket is included. It
needs 13 V DC at 7 or 8 amps to operate. It works
fine, and is good cosmetically. Manual is included
for $130 plus shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 565 Message: 596

Larsen Mobile Antennas For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $14
Used, but in very good shape - $12
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip combination
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $18
Used, but nice shape - $16
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Larsen "Q", quarter wave whip for Larsen LM mount.
Can be cut for 2 m, 220 MHz, or 440 MHz
Includes mounting nut for LM mount.
Close to new condition - $ 5

Mobile antenna mounts for sale:

Larsen LM-TLM
This trunk lip mount has a 5/16 inch stud and
takes the Larsen LM series of antennas. It is
in very, very good condition. With coax for $20

HyGain TLM
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna. With coax for $14

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Prices do not include shipping from Florida.

Thanks.

598. FS: Isolation Transformer

Yahoo group: hamstuff
Date: 2005-07-10 17:39:17 UTC
From: Brian Carling
Topic: 598 Message: 598

FOR SALE:
Isolation Transformer 120-120V AC, 1000 watts.
Has heavy duty 3 wire cord, and 4 IEC outlets.
1 output cable supplied. Rated for 10-12 Amps all day.
Cabinet is a heavy 12-gauge metal case with circuit breaker type
switch. Like new, but has slight bend in front of cabinet.
Dimensions: 11" 10" 8"
Available for $39.00 plus shipping

599. FS: Tube Type Power Supply

Yahoo group: hamstuff
Date: 2005-07-10 18:23:09 UTC
From: Brian Carling
Topic: 599 Message: 599

FOR SALE: Tube Type Power Supply.
This is a Homebrew 120V AC supply designed to power a transmitter.
Actually two power supplies on one chassis. Each has a full-wave rectifier
and choke input filter. The first has 850V CT to pduce around 400V DC at
250 mA.
The second produces around 250V at 150 mA. Both supplies have filament
voltages
of 6.3V AC and 5V AC sufficient for powering the typical tube gear.
There may be some other ancillary voltages too. I have not checked it
out all
that thoroughly, but it seems to be well made and working.
Included are two 5U4 tubes and one 5Y3 tube.
All of the connectiopns are brough t out to a nice large barrier strip
and two cable-end octal plugs. Dimensions: 13" X 12" X 10"
Will sell for $29.00 plus shipping.

600. FS: Ohmite Little Devils 1 Watt Resistors

Date: 2005-07-10 18:32:42 UTC
From: Brian Carling
Topic: 600 Message: 600

FOR SALE: Ohmite Little Devils Resistor Cabinet - full of One Watt
resistors.
This cabinet contains about QTY new carbon composition resistors.
from 10 ohms to 10 megohms, with many popular values.
Great for homebrewers and experimenters.
There must be around 300 new resistors here.
Will sell for $25.00 plus shipping.

601. FS: Drake TR3, AC3, MS3 HF Station

Yahoo group: hamstuff
Date: 2005-07-15 21:31:38 UTC
From: Brian Carling
Topic: 601 Message: 601

FOR SALE:
DRAKE TR3 HF TRANSCEIVER - in fairly good shape for its age.
This unit has not been restored or tested out. It was working when last put into storage about 8 or 9 years ago, so it may work fine.
It's all there and the dial works smoothly as it should.
Meter and knobs, dial, bandswitch etc. all look fine and work smoothly.
Has a few scratches here and there but nothing serious. The front panel looks fine. The knobs are all original. The Drake MS-3 power supply-speaker unit
is here along with the connecting cables.. selling as-is. NOT in collector condition!
You will need to replace the electrolytics in the power supply at a minimum.
Drake TR3, AC3 and MS3 all available for $145.00 plus shipping.

604. Antenna tuner FS

Yahoo group: hamstuff
Date: 2005-07-16 16:02:34 UTC
From: Ken Simpson, W8EK
Topic: 604 Message: 604

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new. There is not
a mark on it. Of course the paper work is
included. You can pay about $200 from MFJ,
or buy this one for $145

Other MFJ items For Sale:

MFJ 286 speaker microphone
This speaker mic can be used on most Kenwood
HTs. It is a standard size speaker mic -- not one
of the little sub-miniature types. It has not been
used. With paper work for $15.

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used
to power such things as keyers, lights on tuners, and
many other misc. applications. Of course it can power
many things other than MFJ items, but this one is an
actual MFJ. $10

Prices do not include shipping from Florida.

Thanks.

608. TVI filters FS

Yahoo group: hamstuff
Date: 2005-08-20 13:23:54 UTC
From: Ken Simpson, W8EK
Topic: 288 Message: 608

TVI filters For Sale:

Low Pass filters for the transmitter:

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is
only 100 Watts. Use this one after your rig, and before
your amplifier. Nice shape for $ 15.

B & W 415 low pass filter
This is a very heavy duty filter. It is almost twice the size of
most 1500 Watt low pass filters. It appears to be an older
filter, in a copper enclosure that has been painted at the
factory. $30

B & W Low Pass filter
Designed for 75 ohm systems. Very heavy duty. $30

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W below 30 MHz, and
about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts.
It has the copper case. It is approaching antique status,
as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP above,
but with one tenth of the power ratings. $ 15

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
Length of coax and PL-259 on the other end. $30

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line,
and reduce TVI. It is rated at 2000 watts, with
over 65 db of attenuation above 57 MHz.
This one is in very nice shape for $30.

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of
about 30 MHz, and more than 90 db of attenuation
between 90 and 300 MHz. It will handle 1000 watts,
and has an SO-239 connector on each end. It is in
extremely nice condition, with paper work for $35.

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached.
$ 15

Prices do not include shipping from Florida.

Thanks.

609. Yaesu FT-747 GX, HF xcvr FS

Yahoo group: hamstuff
Date: 2005-08-21 19:56:49 UTC
From: Ken Simpson, W8EK
Topic: 609 Message: 609

For Sale:

Yaesu FT-747 GX, HF transceiver

Covers 160 thru 10 meters, including the WARC bands,
with general coverage receiver. 100 Watt output, with a
nice amber LCD display. This rig is an all solid state
modern rig, but is easier to operate that most. A CW
filter is included. Two VFOs, plus memories are there
if you want to use them.

This particular unit looks like it just came out of the box,
and works the same. Both operator and service manuals
are included on a CD ROM. $300 plus shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 610 Message: 610

Desk Microphones For Sale:

Shure 450 desk microphone
This desk mic looks like a Shure 444, and functions
basically the same. There is a switch on the bottom
for high or low impedance, so it can be used with most
any rig. This one works fine and looks fine also. $50

Heath Desk Microphone
This is the brown Heath desk microphone that was
sold with the later Heath rigs, which is an HDP-121.
It has the black Heathkit label, and a PTT bar. The
actual stand is 100% OK, and is in almost perfect
condition. No scratches, dings, or even paint wear on
it. There is very slight wear on the Heathkit name
plate. The mic works great. $70

EV Desk Microphone
Basically this is the same as the Heath brown desk
microphone (above), but it does not have the Heath
name on it. It says EV. Hi Z. One small paint spec off,
about the size of a pin head. It works fine. $65

Dynamic Desk Microphone
This microphone is still in its original box, and unused
as far as I can tell. It is 600 ohm impedance, and is
the "gooseneck" type mic. It looks very similar to the
Icom SM-6, although the head is just a bit bigger. It has
unidirectional pickup, so background noise is reduced.
In its original box, with paperwork, for $55.

Prices do not include shipping from Florida.

Thanks.

CW items for sale:

Autek MK-1 programmable keyer
This keyer has four programmable memories, with the
ability to link the last two to make a larger memory. The
speed and the volume of the sidetone are controlled
from the front panel. It can be power by either 120 V AC
or from 12 V DC. This one looks nice, and works fine. $60

MFJ 422 electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 40

Bencher BY-1 Paddle
Standard Bencher with black base, with chrome parts.
In very nice condition for $ 65.

Generic straight key
This is a generic CW straight key with a plastic
base. The key is nothing fancy, however, it is
mounted on a very nice piece of Oak wood, that
makes it look very nice. Cable included for $30.

"Knock off" J-38 key on nice base
This is one of the J-38 "clones". It really looks great
on a nice plexiglass base, complete with cable. $40

MFJ 557 code practice oscillator
with straight key. Just like new. $ 20

Prices do not include shipping from Florida.

Thanks.

612. Roller Inductor antenna tuner FS

Yahoo group: hamstuff
Date: 2005-08-28 11:32:03 UTC
From: Ken Simpson, W8EK
Topic: 612 Message: 612

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new. There is not
a mark on it. Of course the paper work is
included. You can pay about $200 from MFJ,
or buy this one for $145

Other MFJ items For Sale:

MFJ 285 speaker microphone
This speaker mic is the smaller "slim line", and
has the 2.5 mm and 3.5 mm plugs on it, so it fits
most Icom and Yaesu HTs that have the 2 plugs,
plus some others. It works fine and is in nice
shape. $17

MFJ 286 speaker microphone
This speaker mic can be used on most Kenwood
HTs. It is a standard size speaker mic -- not one
of the little sub-miniature types. It has not been
used. With paper work for $15.

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used
to power such things as keyers, lights on tuners, and
many other misc. applications. Of course it can power
many things other than MFJ items, but this one is an
actual MFJ. $10

Prices do not include shipping from Florida.

Thanks.

Heathkit HW-16 Transceiver - with manual
This is a 3 band CW transceiver, which was manufactured from 1967 to 1976.
It actually has a transmitter, crystal controlled, and receiver in the same case.
Features FULL BREAK-IN on CW which is very helpful. It was supposed to be THE novice station,
and really did meet the requirements. The receiver covers the lower 250hz of 80, 40, and 15 meters,
with an adjustable power of 50 to 90 watts.
Comes with original manual and two crystals for 7028 kHz and 7045 kHz.
Available for $105.00 plus shipping.

FOR SALE:

Heathkit HW-101 Transceiver - very good condition.

The HW-101 is an HF (80 to 10 meter) amateur band
SSB transceiver. Transmitter finals are a pair of
6146 tubes.
Power input 180 watts p.e.p. with up to 100 watts
output.
The HW-101 was one of the most successful of all
the Heathkit amateur products. It was manufactured
from 1970 to 1983, and it seemed that in those
days, almost everyone was running a "HOT WATER
101.
It has an excellent receiver and enough power to
do what most amateurs need.
It is packaged very attractively, compact and user
friendly. Comes with the interconnect cable for
HP23B.

Heath HW-101 - $125.00 plus shipping.
HP23B Power Supply - $65.00 plus shipping.
Manual - $15.00 plus shipping.

All of the above for $175.00 plus shipping

618. FS: EXCEPTIONAL YAESU FTDX560 TRANSCEIVER

Yahoo group: hamstuff
Date: 2005-08-30 01:55:55 UTC
From: bcarling@cfl.rr.com
Topic: 618 Message: 618

FOR SALE:

YAESU FTDX560 IN EXCELLENTCONDITION.
Comes with the original manual and Yaesu Desk
Microphone.
This is a heavy duity radio and is in
exceptionally fine condition.
This is the Star of the old-time Yaesu rigs with
plenty of power.
Collector quality. I have never seen one that is
in this clean of a condition.
Has a whopping 560 watts p.e.p. input power on SSB
on the ham bands from 80 through 10m.

The Yaesu FTdx560 is a 20 tube transceiver with
the exception of 4 transistors used in the vfo
and the crystal calibrator circuits and a solid
state AC power supply.
The AC power supply is built in and not seperate
like some of the early transceivers making it
a favorite for portable and field day operations.
It is rated at 560 watts input on SSB and 500
watts on CW.
It uses two 6KD6's as the final amplifiers. The
bands covered are 80 through 10 meters (no warc
bands)
as well as WWV and two aux positions which could
be used for CB or addition of a warc band.
The rig features 100khz and 25khz calibrators as
well as R.I.T. and the capability to use an
external vfo (FV400) for crossband operation.
These transceivers were manufactured in Japan
in the early 1970s.

Yeasu FTDX560 Transceiver - $345.00 plus shipping.
Original Yaesu FTdx560 Manual - $25.00 plus
shipping.
UD-844 Desk Microphone - $85.00 plus shipping.

623. Kenwood dual band xcvr FS

Yahoo group: hamstuff
Date: 2005-09-03 13:53:11 UTC
From: Ken Simpson, W8EK
Topic: 518 Message: 623

For sale:

Kenwood TW-4000 dual band mobile FM transceiver

It covers 2 m and 440 MHz FM.
It has about 25 Watts output, or 5 W in low power.
Of course it has memories, scan, etc.
It has a GASFET front end, giving it a really great
receiver. This would make a great packet rig, which
is what it has been used for. All solid state switching
makes silent packet operation. Since it has been
used on packet, it does not have a mic with it, although
it takes a standard 8 pin round mic connector, like
most Kenwood rigs. Mobile bracket is included. It
needs 13 V DC at 7 or 8 amps to operate. It works
fine. Manual is included for $110 plus shipping from
Florida.

Thanks.

624. Coaxial antenna relay and antenna switches FS

Yahoo group: hamstuff
Date: 2005-09-04 00:28:24 UTC
From: Ken Simpson, W8EK
Topic: 624 Message: 624

Coaxial antenna switches For Sale:

Dow Key type antenna relay
This is similar to the antenna relay like we used
in the 1960's to switch between transmit and receive.
It has a 120 V coil, but no auxiliary contacts. It is not
DowKey, but functions the same. It seems slightly
heavier than a Dow Key. $35

2 position coax switch
These are a bit odd. They look close to what a Dow Key
antenna relay looks like, but no relay coil to switch. It is a
manual switch instead. There is a SO-239 connector at the
top coming out of each side, with the common at the bottom.
In the middle is a bar that slides back and forth to select the
antenna. It is in a very rugged sealed metal box. Three
switches available for $25 each.

Workman CX-3, 3 position Coax Switch
This is in a small rectangular box, with the 3 switched
SO-239 connectors coming out the rear, and the
common coming out the front. Unused positions are
NOT grounded. Rated at 1000 watts. It is in very nice
condition for $ 14.

Goldline 2 position Coax Switch
Small rectangular box, with SO-239 connectors on the
end and the back. Rated at 1000 watts. $10

Prices do not include shipping from Florida.

Thanks.

Yahoo group: hamstuff
Date: 2005-09-05 13:03:29 UTC
From: Ken Simpson, W8EK
Topic: 626 Message: 626

For Sale:

MFJ 422 B electronic keyer complete with Bencher Paddle

This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. It can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply.

Included with it is a Bencher paddle. This is a true Bencher,
and is not the MFJ clone.

The keyer is mounted on the back of the Bencher paddle, so
it makes one nice single compact unit.

This particular unit works 100% and looks great as well.
It is in its original box, with paper work for $110 plus
shipping from Florida.

Thanks.

HT accessories For Sale:

These items fit the HTs that use a 2.5 mm and a
3.5 mm plug for the speaker mic, which is most HTs,
including Icom, Yaesu, Alinco, and some Kenwood.

Yaesu MH19A2B ear bud and mini-mic.
It works fine and looks fine. $ 18

Densei SM-505 Speaker microphone
Very nice condition for $ 18.

Yaesu Boom Microphone and single headset
It works fine. $ 18

MFJ 285 speaker microphone
"Slim" size. Nice shape. $ 18

Cable to connect audio to HT
This is a cable that has a 2.5 mm and a 3.5 mm plug
together in a molded plug. This fits most of the HTs
that take this sort of plug -- Icom, Yaesu, and many
others. The other end has bare wires. This would be
useful if you needed a cable to make your HT function
on packet, APRS, Echolink, or whatever.
It is in nice condition for $8.

MFJ 286 speaker microphone
This speaker mic can be used on most Kenwood
HTs. It is a standard size speaker mic -- not one
of the sub-miniature types. It has not been used.
With paper work for $15.

Prices do not include shipping from Florida.

Thanks.

633. Wattmeters FS

Yahoo group: hamstuff
Date: 2005-09-10 14:48:53 UTC
From: Ken Simpson, W8EK
Topic: 633 Message: 633

Wattmeters For Sale:

MFJ 815 B HF wattmeter
This wattmeter covers the entire HF bands, plus 6 meters
with coverage from 1.8 to 60 MHz. This means it is great
for some of the newer HF rigs where 6 meters is included.
It has a large 3 inch cross needle meter that reads
200/2000 Watts forward and 50/500 Watts reverse. It will
read either peak or average power.
This particular meter works fine, and looks great. The
manual is included, if one can call a single sheet of paper
a manual. $60

Daiwa CN-540
This cross needle meter is good for 50 to 150 MHz, so it
covers the 6 and 2 meter bands. It is 200W or 20 W for
forward power, and 40 W or 4 W on reflected. It is in
very nice condition for $45.

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and
reflected power with either 100 W or 10 W full scale. It
is relatively small, making it great for mobile operation.
Of course with a 10 W scale, it would be useful for QRP
operation as well. $18

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 634 Message: 634

Heath items For Sale:

Heath HDP-21 desk microphone
This is the older style with more chrome and no
brown on it, like was used with the earlier SB line
(SB-100, 101, 400, 401). Of course it can be used
any place a high impedance microphone is needed.
With paper work for $65.

EV Desk Microphone
Basically this is the same as the Heath brown desk
microphone, but it does not have the Heath name
on it. It says EV. Hi Z. One small paint spec off,
about the size of a pin head. Works fine. $65

Heath IP-2728 bench power supply
This power supply is good for up to 15 V DC at up to
500 ma. The voltage is variable down to about half a
volt. It has current limiting that is adjustable as well.
It is really a very versatile power supply. It is in the
Heath blue color scheme. This one works fine, looks
great, and includes paper work for $45.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are in very, very nice condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

635. FS: 600 Watt HF Linear (Military Conversion)

Yahoo group: hamstuff
Date: 2005-09-11 22:54:22 UTC
From: bcarling@cfl.rr.com
Topic: 635 Message: 635

FOR SALE:
600 Watt HF Linear (Military Conversion) in a TU-5B Tuner Case.
This is one beautiful amp, MASTERFULLY built into a
NEAR MINT
General Electric Company TU-5B made of the U.S. Army
Signal Corps
BC-191 transmitters of WW2.
Everything inside this cabinet is wonderful. The wiring is all
done
with silver-plated copper busbars. It was done by a pro, silent-
key
op who clearly took great care building it.
Grounded grid circuit, with a bifilar choke on the filaments.
Has three SO-239 connectors. Reduction drive tuning.
Covers 4 bands 80, 40, 20, and 15m. Has variable antenna
coupling
and plate tuning controls which have very nice vernier
reduction drive and 0-100 scale for logging purposes.
Requires 1500V DC at 200 mA (400 mA peak) for the plate
supply and 6.3v AC at 8 amps for the filament supply.
Dimensions: 19" X 7.5" X 9" deep.
Available for $150.00 plus shipping.

Pictures and details at:
http://www.af4k.com/radios.htm

From: Ken Simpson, W8EK
Topic: 637 Message: 637

Kenwood HT accessories For Sale:

W09-0334 Wall charger for TH-21 / 31 / 41 series HTs
Like about 95% of these chargers, this one has the "ear"
on it broken, but can be used fine with a rubber band. $12

Wrist strap for TH-21 / 31 / 41 and likely other HTs $ 2

RA-8 Stubby Rubber duck antenna
This is for a TH-21 series 2 meter HT, with the threaded
connector. Good condition for $10

Antenna adapter to fit the connector on the TH -
21 / 31 / 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. $6

Kenwood EP-1 ear phone
Used on almost all Kenwood HTs. Like new. $4

Prices do not include shipping from Florida.

Thanks.

638. FS: SWAN CUBIC 103 TRANSCEIVER

Yahoo group: hamstuff
Date: 2005-09-17 18:39:50 UTC
From: bcarling@cfl.rr.com
Topic: 638 Message: 638

FOR SALE: CUBIC 103 HF TRANSCEIVER
This is the last of the great radios made by SWAN ELECTRONICS
In Oceanside, CA
It is also the pinnacle of Swan engineering with more features than
any of their other radios.
Features dual PTOs, digital readout. Adjustable bandwidths for
each PTO with
digital indicators. Many extra features including:
True variable AGC, Notch filter, passband tuning, RF, IF and AF
gain.
Many extra-ordinary features, some found on no other radios.
This was the high point of Swan-Cubic engineering and was their
last
amateur radio transceiver built before going to a strictly military
format.
Also, there is the power supply/speaker unit, model PSU6 with
cables.
Unmodified other than the addition of the 400 Hz filter which may
or may not have been factory installed.
Comes with manual and service notes, schematics etc. etc.
Cubic 103 with manual for $450.00 plus shipping.
Power Supply available for $125.00 plus shipping
400Hz narrow CW filter $200.00
Will sell all above items together for $675.00 plus shipping.

Pictures and details at:
http://www.af4k.com/radios.htm

FOR SALE: Shure 444 Desk Microphone.
A Classic desk mic in very good condition, with locking
push-to-talk bar.
Has three circuit 1/4" metal plug - wired for Swan.
Highly rated by most hams. A great communications microphone with increase in response around 2000-3000 Hz.
Great intelligibility, along with undeniable quality.
Best mic for SSB. Top of the pack for communications
grade audio.
See: http://www.eham.net/reviews/detail/9

Data Sheets available included with purchase.
Will sell for $39.00 plus shipping.

Picture and details at:
http://www.af4k.com/mics.htm

Topic: 641 Message: 641

FOR SALE:

Longines Symphonette Model 4597-B Shortwave Set

This receiver has AM, FM and two shortwave bands,
1.7 to 4.9 MHz and 4.9 to 12 MHz.
Has built-in telescopic antenna in good shape.
Dual rate tuning for badspread, with all original
knobs. Lighted slide rule type dial with
on/off switch. Volume and tone controls.
Earphone jack for quiet listening. Operates on
internal batteries or external power source
(not included) I was told that this works but
I have not tested it.

Available for $16.00 plus shipping.

Picture and details at:

642. Larsen mobile antennas and mounts FS

Yahoo group: hamstuff
Date: 2005-09-18 12:30:42 UTC
From: Ken Simpson, W8EK
Topic: 642 Message: 642

Larsen Mobile Antennas and Mounts For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $13
Used, but in very good shape - $11
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $16
Used, but nice shape - $15
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Larsen "Q", quarter wave whip for Larsen LM mount.
Can be cut for 2 m, 220 MHz, or 440 MHz
Includes mounting nut for LM mount.
Close to new condition - $ 5

Mobile antenna mounts for sale:

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Larsen TLM Trunk Lip Mount
This is the LM series from Larsen. Any Larsen
LM series antenna or the "Q" above can be used.
5/16 inch stud. With coax for $18.

Prices do not include shipping from Florida.

Thanks.

Topic: 646 Message: 646

FOR SALE:

ANTRON A99 Vertical Antenna.
Designed for 10 meter band but can be used
on all HF bands with a remote tuner.
Fiberglass Omnidirectional Base Station Antenna.
Power handling capacity is up to 2000 watts.
The A99 is a half wave over a quarter wave.
Comes in three sections, easy to assemble
Entire antenna radiates - 9.9 dB Gain.
18 Foot Long Base Station Antenna.
Fiberglass construction with four small
radials. An excellent performer.

Available for $35.00 plus shipping.

Fiberglas Mast Sections.
These are UV protected 2" diameter mast sections
that connect end to end.
I have four sections, and each one is 4 feet long
for a total of 16 feet.
Great for mounting antennas, supporting wire
antenna
ends or other ham radio applications.
These are green in color and very strong.

QTY 4 available for $6.00 each.

TenTec items For Sale:

TenTec 1202 combination HF and VHF wattmeter
This wattmeter will permit a ham to connect both an HF rig and a VHF rig to the wattmeter at the same time. A switch on the front of the meter selects whether HF or VHF is being measured. HF covers 1.8 to 54 MHz, so it includes 6 meters as well as HF. VHF is really the 2 meter band, covering 140 to 150 MHz. Full scale reading is 200 W or 20 W. It can be powered from an internal 9 V battery, or from external 9 to 14 volts DC. Of course one can measure SWR as well as forward and reflected power.
This particular unit looks very close to new. I can not find a scratch on it. Of course it works fine also. Paper work is included for $60.

TenTec 546 Omni D, series B, HF CW / SSB xcvr.
All solid state, with up to 100 W output. The ALC can also be turned back with a front panel control for QRP operation. Covers 160 through 10 meters. This one also includes transmit and receive on the 10 MHz band. Full QSK on CW, and a fantastic receiver. Terrific audio quality on SSB also. Built in audio CW filter. Digital read out. This one is in very nice shape, both electrically and cosmetically. With manual for $235.

TenTec 218, 1800 Hz crystal filter
This crystal filter is for the 9 MHz IF in TenTec rigs. This includes the Omnis and Argosy, and maybe others. It can also be used as a roofing filter in the Orion. It is in good condition, and includes paper work with it for $69.

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes speaker, ammeter, and trim ring. Dual pass transistors similar to the heavy duty 280 power supply. It is good for 20 amps at 13 V DC, and includes over voltage protection. This one looks fine, and works the same.
With manual for $ 135.

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Has ammeter on front. Matches the Omni series, but of course can be used with any rig needing a 20 amp power supply, which includes most TenTec rigs. This unit has the optional over voltage protection unit mounted inside. It is in great condition, with manual for $ 110.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power
supply to the amp. It has a heavy duty 9 pin molex
type connector on both ends, and either #12 or #14
wire, and is about 6 feet long. It is in good shape. $18

Prices do not include shipping from Florida.

Thanks.

655. TVI filter FS

Yahoo group: hamstuff
Date: 2005-10-09 13:27:37 UTC
From: Ken Simpson, W8EK
Topic: 655 Message: 655

TVI filters For Sale:

Low Pass filters for the transmitter:

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W below 30 MHz, and
about 200 W up to 52 MHz. With paper work for $ 30

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts.
It has the copper case. It is approaching antique status,
as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP above,
but with one tenth of the power ratings. $ 15

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
Length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

For the TV receiver:

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer

blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached.
$ 15

Prices do not include shipping from Florida.

Thanks.

662. Wattmeters FS

Yahoo group: hamstuff
Date: 2005-10-15 10:29:39 UTC
From: Ken Simpson, W8EK
Topic: 633 Message: 662

Wattmeters For Sale:

TenTec 1202 combination HF and VHF wattmeter
This wattmeter will permit a ham to connect both an HF rig and a VHF rig to the wattmeter at the same time. A switch on the front of the meter selects whether HF or VHF is being measured. HF covers 1.8 to 54 MHz, so it includes 6 meters as well as HF. VHF is really the 2 meter band, covering 140 to 150 MHz. Full scale reading is 200 W or 20 W. It can be powered from an internal 9 V battery, or from external 9 to 14 volts DC. Of course one can measure SWR as well as forward and reflected power.
This particular unit looks very close to new. I can not find a scratch on it. Of course it works fine also. Paper work is included for $60.

Daiwa CN-540
This cross needle meter is good for 50 to 150 MHz, so it covers the 6 and 2 meter bands. It is 200W or 20 W for forward power, and 40 W or 4 W on reflected. It is in very nice condition for $45.

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and reflected power with either 100 W or 10 W full scale. It is relatively small, making it great for mobile operation. Of course with a 10 W scale, it would be useful for QRP operation as well. $18

Prices do not include shipping from Florida.

Thanks.

665. NEED: 512k x 8 RAM Memory for SCS PTC-II TNC PACTOR Modem

Yahoo group: hamstuff
Date: 2005-10-16 08:23:57 UTC
From: Michael Hatzakis
Topic: 665 Message: 665

The SCS PTC-II uses 512k x 8 RAM for its 2mb upgrade

It uses HM628512, TC554002, KM684000 or any low power <70ns, 32pin DIP memory chips. They used to be garden variety RAM modules.

Does anyone have a handle on where I can get a few of these? I have three modems I'd like to upgrade.

Thanks, Michael K3MH

666. FS: Tube Test Adapters

Yahoo group: hamstuff
Date: 2005-10-16 11:32:57 UTC
From: bcarling@cfl.rr.com
Topic: 666 Message: 666

FOR SALE:
Test Adapters by CBS Hytron and GC Electronics.

These are three TUBE test socket adapters made for
troubleshooting electronic equipment. The first two
are for 9-pin and 7-pin tubes and they extend the
tube socket so that probes may be attached to
the side for measuring voltages or attaching an oscilloscope etc.
to each pin. One each for 7-pin miniature and 9-pin miniature
tube sockets. The third adapter is for testing NUVISTOR
tubes in older type tube testers. It provides a 5-pin
nuvistor socket oin top and has an OCTAL type plug on
the bottom. GC Part number 36-532.

For the three test adapters, I would like $15.00 plus shipping.

667. CW items FS

Date: 2005-10-16 12:21:13 UTC
From: Ken Simpson, W8EK
Topic: 611 Message: 667

Keyers and other CW items For Sale:

Autek MK-1 programmable keyer
This keyer has four programmable memories, with the
ability to link the last two to make a larger memory. The
speed and the volume of the sidetone are controlled
from the front panel. It can be power by either 120 V AC
or from 12 V DC. This one looks nice, and works fine. $60

MFJ 422 B electronic keyer complete with Bencher Paddle
This is the keyer that uses the Curtis chip as the keyer,
includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. It can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply.
Included with it is a Bencher paddle. This is a true Bencher,
and is not the MFJ clone.
The keyer is mounted on the back of the Bencher paddle, so
it makes one nice single compact unit.
This particular unit works 100% and looks great as well.
It is in its original box, with paper work for $105.

Bencher BY-1 Paddle
Standard Bencher with black base and chrome parts.
In very, very nice condition for $ 65.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

MFJ 557 code practice oscillator
with straight key. Just like new. $ 20

Prices do not include shipping from Florida.

Thanks.

668. Coax antenna switches FS

Yahoo group: hamstuff
Date: 2005-10-22 11:33:57 UTC
From: Ken Simpson, W8EK
Topic: 300 Message: 668

Coaxial antenna switches For Sale:

Waters 335 Coax switch
This is basically the same as the B & W Model 375
coax switch, except the unused antennas are NOT
grounded. This will switch up to 6 antennas, with
SO-239 connectors, with the coax going out the back.
This one is good condition, and works fine. $ 40

2 position coax switch
These are a bit odd. They look close to what a Dow Key
antenna relay looks like, but no relay coil to switch. It is a
manual switch instead. There is a SO-239 connector at the
top coming out of each side, with the common at the bottom.
In the middle is a bar that slides back and forth to select the
antenna. It is in a very rugged sealed metal box. Three
switches available for $22 each.

Workman CX-3, 3 position Coax Switch
This is in a small rectangular box, with the 3 switched
SO-239 connectors coming out the rear, and the
common coming out the front. Unused positions are
NOT grounded. Rated at 1000 watts. It is in very nice
condition for $ 14.

Prices do not include shipping from Florida.

Thanks.

678. FS: B&W Jackbar Coil

Yahoo group: hamstuff
Date: 2005-11-11 02:14:41 UTC
From: bcarling@cfl.rr.com
Topic: 678 Message: 678

FOR SALE:
Barker & Williamson plug-in ceramic jack-bar coil for 6m.
This is a center tapped coil with three prongs.
Total number of turns is 4. Looks to be #10 or #12 wire
about 1.5" diameter. Model number is 5B.

Spacing between outer banana pins is 3-1/8"
Excellent condition.
Available for $15.00 plus shipping.

679. FS: Variable Capacitors

Yahoo group: hamstuff
Date: 2005-11-12 11:37:32 UTC
From: bcarling@cfl.rr.com
Topic: 679 Message: 679

FOR SALE: Variable Capacitors.

100 pF at 3000V transmitting variable capacitor
Excellent for linear amplifier or tuner project.
Standard 1/4" shaft.
Available for $25.00 plus shipping.

E.F. Johnson 100 pF at 2500V transmitting variable
capacitor. 1/4" shaft.
Split stator type with knob.
Available for $25.00 plus shipping.

140 pF variable, with 120:1 reduction drive and
1/2" long mini-shaft.
Available for $5.00 plus shipping.

45 pF variable capacitors. Look like new.
Dimensions: 1.25" X 1.25" 1.25"
Nice bearings - 1/4" shaft X 5/8" long.
Available for $4.00 each plus shipping.

25 pF Variable Capacitor by "H.I. Co."
1/4" shaft is 1" long. Like new.
Available for $6.00 plus shipping.

Unusual 4 section cap with padders.
Looks to be 25 pF per section. Will require
shaft coupling.
Available for $2.00 plus ship.

For details and pictures see:
http://www.af4k.com/variable_caps.htm

680. 2 m and 440 MHz mobile antennas and antenna mounts FS

Yahoo group: hamstuff
Date: 2005-11-12 13:39:06 UTC
From: Ken Simpson, W8EK
Topic: 680 Message: 680

Larsen Mobile Antennas and Mounts For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $13
Used, but in very good shape - $11
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $16
Used, but nice shape - $15
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Mobile antenna mounts for sale:

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Larsen TLM Trunk Lip Mount
This is the LM series from Larsen. Any Larsen
LM series antenna or the "Q" above can be used.
5/16 inch stud. With coax for $18.

Prices do not include shipping from Florida.

Thanks.

Date: 2005-11-12 14:05:03 UTC
From: bcarling@cfl.rr.com
Topic: 682 Message: 682

FOR SALE:
New EIMAC 4-400A Tube (QTY 1 available only)

Same as the one shown here:
http://www.mhzelectronics.com/ebay/eimac_4-400a_tube.gif

Specifications:
Amplification Factor (μ): 5.1
Anode Voltage (V) Maximum: 4,000
Recommended Chimney: SK-406
Recommended Socket: SK-400 Series
Recommended Heat-Dissipating Connectors: Plate - HR-6
Cooling: Radiation and forced air
Base: Special 5-pin
Brand: Eimac
Filament Current (A): 14.700
Filament Voltage (V): 5.000
Frequency (MHz) Maximum: 110
Peak Anode Voltage (kV): 4.000
Plate Dissipation (W): 400
Typical Anode Current (A): 0.590
Typical Anode Dissipation (kW): 0.400
Typical Anode Voltage (V): 4,000
Typical Power Out (kW): 1.540

Available for $99.00 plus shipping
(Retail $149 to $199 or more)

683. FS: LINEMAN'S AC Multirange Voltmeter

From: bcarling@cfl.rr.com
Topic: 684 Message: 684

FOR SALE:

NOS AEROVOX Electrolytic CAN Capacitors.
Excellent for homebrew or repair of radio
equipment. All shiny and new looking.

AFH1-55 which has one section of 80 uF at 450V DC
working voltage.
QTY 2 Available for $8.00 each plus shipping.

AF4H-18-45 which has FOUR sections of 40 uF at
450V DC working voltage.
QTY 1 Available for $12.00 plus shipping.

PYRAMID TM-4089 has Two sections of 30 uF at 450V
DC and two sections of
125 uF at 25V DC.
QTY 1 available for $5.00 plus shipping.

685. TenTec power supplies and amp cable FS

Yahoo group: hamstuff
Date: 2005-11-12 23:17:43 UTC
From: Ken Simpson, W8EK
Topic: 685 Message: 685

TenTec items For Sale:

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes speaker, ammeter, and trim ring. Dual pass transistors similar to the heavy duty 280 power supply. It is good for 20 amps at 13 V DC, and includes over voltage protection. This one looks fine, and works the same.
With manual for $ 135.

TenTec 252 MO power supply, 20 amp, 13 V DC supply. Has ammeter on front. Matches the Omni series, but of course can be used with any rig needing a 20 amp power supply, which includes most TenTec rigs. This unit has the optional over voltage protection unit mounted inside. It is in great condition, with manual for $ 110.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power supply to the amp. It has a heavy duty 9 pin molex type connector on both ends, and either #12 or #14 wire, and is about 6 feet long. It is in good shape. $18

Prices do not include shipping from Florida.

Thanks.

686. Heath items FS

Yahoo group: hamstuff
Date: 2005-11-13 12:35:20 UTC
From: Ken Simpson, W8EK
Topic: 634 Message: 686

Heath items For Sale:

Heath AM-2 SWR bridge
This unit was made to match the older transmitters such as the DX-35 and DX-40. Everything is original. There are a few scratches on it. It works fine. A schematic is included for $18.

Heath IP-2728 bench power supply
This power supply is good for up to 15 V DC at up to 500 ma. The voltage is variable down to about half a volt. It has current limiting that is adjustable as well. It is really a very versatile power supply. It is in the Heath blue color scheme. This one works fine, looks great, and includes paper work for $45.

Heath parts For Sale:

Cover for Heath Wattmeter
This is the inverted "U" cover that fits the Heath HM-102 and HM-2102 wattmeters, and maybe other units. It is in nice shape, however, it has been painted black to match Drake gear. It is no longer Heath Green. $12

Lever type knob used on many units of the SB line, often to switch CW and SSB filters, or for loading control. $10

Heath SSB Crystal Filter
This came from an SB-400, but it can be used in any of the SB line. It is part number 404-200 and is 2.1 KHz wide. $20

Mu Metal shield for 3 inch CRT
>From the SB-614, but the same one is used for the SB-610, and other units. It should fit most 3 inch CRTs. $10

I still have a fair number of parts from an SB-614 monitor scope, including focus controls, position controls, and the main circuit board. Please let me know what you might need.

ORIGINAL Heath manuals. These are the manuals only. They are all originals, and not copies, and all are in very, very nice condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

From: bcarling@cfl.rr.com
Topic: 687 Message: 687

FOR SALE:

Heathkit HD19 Phone Patch. Matches the Apache,
Marauder and other two-tone rigs.
Nice accessory to round out your vintage Heath
collection. Very good condition.
Available for $15.00 plus shipping.

Heathkit Narrow SSB Crystal Filter 404-283
New in box - Characteristics: 2.2Khz bandwidth at
-6dB,
Center Frequency: 3395.10 kHz.
See:
http://www.qsl.net/k5bcq/102/102.html
Used with the SB-101, SB-102 and some other
Heathkit rigs that use a 3.395 MHz i.f.
New in the box - Now Reduced to $25.00 plus
shipping.

Hamtronics VHF converter.
Comes with the 42.5 MHz crystal type HC50. Not
sure
which band this is for.
Unfinished kit still has the parts needed to
complete
it. Looks about 95% finished. Great project with
some quality shielded i.f transformers and coils.

Available for $6.00 plus shipping.

697. FS: Dual 4-400A LINEAR AMP 2KW

Yahoo group: hamstuff
Date: 2005-11-20 21:08:22 UTC
From: Brian Carling
Topic: 697 Message: 697

FOR SALE:
Beautiful Homebrew 4-400A Pair Linear Amplifier -
excellent shape.
Here is a self-contained desktop 2000 watt linear amplifier for
80-10m.
Uses the tried and true combination of TWO 4-400A EIMAC
tubes.
Comes with complete documentation and the original article
from which it was built.
Has VACUUM VARIABLE plate capacitor. Full metering of
BOTH TUBES grid current
(switchable.) Also has meters for 3000V Plate Supply Voltage,
plate current,
and RF output. Needs AC fuse holder replaced and one
resistor is broken.
Everything else checks good and the power supply is tested
OK.
Cabinent is thoroughly shielded inside and out. Hinged lid for
easy access.
Comes with a schematic, notes, and the complete, detailed
construction article.
Wired for 120V AC operation and comes with locking power
cord.
Spare (NEW) Eimac 4-400A available with amplifier purchase
for $50.00
New tube alone for $75.00 plus shipping.
Available for $350.00 plus shipping (Heavy)

See:
http://www.af4k.com/radios.htm
Additional photos on request.

698. FS: DENTRON GLA1000 HF LINEARS

Yahoo group: hamstuff
Date: 2005-11-20 21:12:21 UTC
From: Brian Carling
Topic: 698 Message: 698

FOR SALE:

DENTRON GLA1000 LINEAR AMPLIFIERS - Have
Two For Sale.
1000 Watts p.e.p. desktop linear amplifier is self-contained,
and
covers the ham bands from 80 through 10 meters. Great for
SSB and CW.
Outer cosmetic condition is excellent. Both may need minor
attention.
Both have good working power supplies, and good tested
tubes. All of the RF
components are there and look fine. No major damge to
anything - should be
easy to restore. I just don't have the time. One has an
intermittent contact on
the T-R relay during receive. Probably just needs a relay. Has a
tiny switch added to
front panel, easy to remove and fill. One looks better outside
and its tubes look newer.
Other is a little dirty inside. Both are untested and sold as-is,
but I have every
reason to believe they can be easily made to work 100%. Four
good tested finals
in each amplifier. These are bringing $350.00 to $375.00 or
more on eBay.
Each amplifier will be sent with the schematic and a copy of
the manual.
QTY 2 Available for $175.00 and $150.00 each plus shipping.

See:
http://www.af4k.com/radios.htm

Additional pictures available on request.

699. Drake items FS

Yahoo group: hamstuff
Date: 2005-11-24 13:50:43 UTC
From: Ken Simpson, W8EK
Topic: 699 Message: 699

Drake items For Sale:

Cover for Heath Wattmeter - Drake color
This is the inverted "U" cover that fits the Heath HM-102
and HM-2102 wattmeters, and maybe other units. It is
in nice shape. It has been painted black to match
Drake gear. It is no longer Heath Green. $12

Drake hand microphone
This is like the hand mic that came with the Drake TR-72
and TR-22 C. It has the standard 4 pin plug wired for
Drake/Kenwood, and is a 500 ohm mic. No model
number on it, but it looks close to new, and works fine. $30

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four pin
mic plug. This particular unit has been used, but is in
good shape and includes paper work. $ 40

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W AM below 30 MHz
(which would be over 3000 Watts PEP SSB), and
about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts AM.
It has the copper case. It is approaching antique status,
as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP above,
but with one tenth of the power ratings. $ 15

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.

This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached. $ 15

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

700. FS: OIL-FILLED CAPS, RECHARGEABLE BATTERIES

Yahoo group: hamstuff
Date: 2005-11-27 18:24:14 UTC
From: Brian Carling
Topic: 700 Message: 700

FOR SALE:

OIL-FILLED CAPACITORS-High Voltage types.

These are mostly used, tested capacitors. No
shorts, no leakage.
6 uF at 2500V DC Aerovox QTY 1 - $8.00
1 uF at 4000V DC Sangamo QTY 1 - $6.00
30 uF at 1000V DC No name QTY 1 - $8.00
12 uF at 1000V DC Cornel Dubilier QTY 1 - $8.00
6 uF at 2000V DC Sangamo QTY 1 - $6.00
2 uF at 4500V DC Sprague VitaminQ QTY 1 - $6.00
10 uF at 1500V DC Sangamo QTY 1 - $6.00
Shipping additional.

COMPUTER GRADE ELECTROLYTIC CAPACITORS
These are mostly used, tested capacitors. No
shorts, no leakage. Shipping additional.
525 uF at 450V DC Sprague QTY 3 - $4.00 each.
800 uF at 450V DC Sangamo QTY 10 - $5.00 each.
11,500uF at 18V DC Sprague QTY 1 - $3.00
7,500 uF at 25V DC Mallory QTy 1 - $2.00
40,000 uF at 25V DC QTY 3 - $3.00 each.
4000 uF at 40V DC Mallory QTY 1 - $3.00

Combine some of the above to save on shipping.

REDUCED:
Several Rechargeable batteries. These are sealed
lead-acid batteries and do not require any kind
of fancy charging system. Great for field day
or operating ham gear etc. These are lightly used
but have plenty of life left in them.
Shipping additional.

QTY 1 - Ohmeda - 12V at 2.3 AH - $5.00
QTY 2 - UNIPOWER 6 V at 2.8 AH - $4.00 each
QTY 1 - UNIPOWER 12 V at 7.5 AH - $8.00
QTY 4 - Werker - 12 V at 5 AH - $6.00 each

701. FS: B&K Compressor Amplifier

Yahoo group: hamstuff
Date: 2005-11-27 18:29:08 UTC
From: Brian Carling
Topic: 701 Message: 701

FOR SALE:

B&K Model CA-300 Compressor-Amplifier -
transistorized.
Neat little package great for processing AM speech
envelope for greater talk power.
I think this may also be a limiter.
Has two adjustment controls on the front panel for
compression, level,
and on-off switch. Neat little green cabinet with
rubber feet.
Input jack uses a large 4-pin female connector and
the output is via a shelded cable with a male 4-
pin connector. Uses 9V Battery.
Available for $25.00 plus shipping.

702. FS: BNC Cables

Yahoo group: hamstuff

710. looking for Kenwood TMD700

Yahoo group: hamstuff
Date: 2005-12-10 12:38:08 UTC
From: goshawk
Topic: 710 Message: 710

hello list,
I am looking for a Kenwood TMD700 radio please.
am looking for this radio as it is about the only one of its type that the menu can be made to speak on, this is a feature I need, as I am totally blind.
would prefer one with the voice board already fitted, but will take one with out if not possible.
would prefer to get it in the UK, as that is where I am.
please call or email if you have one to sell, or know where there is one going for a reasonable price, please don't say ebay, as stuff on there tends to go for very high prices in my experience, and as I am not working, I don't have that sort of money.

call on 02084785841, or email to,
goshawk@...

Simon

711. Kenwood SP-820 speaker and other Kenwood items FS

Yahoo group: hamstuff
Date: 2005-12-11 01:37:46 UTC
From: Ken Simpson, W8EK
Topic: 711 Message: 711

Kenwood Items For Sale:

Kenwood SP-820 speaker with filters
This speaker will take an input from up to two rigs,
and has a built in filter in it. It can be set for low, high,
High 2, or combinations. If desired, the bandpass of
the speaker can be narrowed to about 500 to 1000 hz,
which means that it is in effect a CW filter. Of course
it can be broader, if desired.
Although this speaker was designed to physically match
the TS-820, it can be used any place an 8 ohm speaker
is desired. Electrically, it is the same as the SP-230,
SP-930, SP-950, and others with the filters built in.
This particular speaker is in excellent shape. It works
fine, and I can not find a scratch on it. $ 75

Kenwood MC-47 Hand Microphone
This is the microphone that came with the TS-50, but can
be used on other rigs.. It has a round 8 pin connector, has
up and down buttons, plus 4 "extra" buttons on the front.
This one works fine, and is very nice shape for $45.

Kenwood MB-13 mobile bracket
This is the "quick disconnect" mobile bracket used for the
TS-50 transceiver and also the AT-50 antenna tuner.
This one is in nice shape for $35.

Kenwood MC-30 S hand microphone
This hand microphone is used with most all of the
older Kenwood rigs - TS-120, TS-180, TS-520, TS-820,
etc. This is a noise canceling mic. It has a four pin
plug on it to match these rigs. Good shape for $35

Small hand mic that came with the Drake TR-72
and TR-2200 A. It has the standard 4 pin plug wired
for Drake/Kenwood, and is a 500 ohm mic. This one says
Drake on it, but it is the same as the Kenwood microphone.
No model number on it, but it looks close to new, and
works fine. $30

Kenwood SMC-25 speaker mic
Fits TR-2500 series of HTs, and maybe others. $20

Kenwood DC-21
This unit is used on the TH-21 / 31 / 41 series of HTs. It has
an adapter that slides on in place of the battery, plus a
conversion unit that plugs into the cigarette lighter on one end

and the battery adapter on the other. $25

W09-0334 Wall charger for TH-21 / 31 / 41 series HTs
Like about 95% of these chargers, this one has the "ear"
on it broken, but can be used fine with a rubber band. $12

Wrist strap for TH-21 / 31 / 41 and likely other HTs $ 2

RA-8 Stubby Rubber duck antenna
This is for a TH-21 series 2 meter HT, with the threaded
connector. Good condition for $10

Kenwood full size 2 meter rubber duck antenna
BNC connector $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. $5

Kenwood EP-1 ear phone
Used on almost all Kenwood HTs. Like new. $4

Prices do not include shipping from Florida.

Thanks.

712. Palomar R X noise bridge FS

Yahoo group: hamstuff
Date: 2005-12-11 20:57:24 UTC
From: Ken Simpson, W8EK
Topic: 712 Message: 712

For Sale:

Palomar R - X Noise Bridge

This unit is used to find the resistance and reactance of
your antenna. It measures from 1 to 100 MHz, so it is
good for HF and six meter measurements, but not 2
meters. The resistive component will measure between
0 and 250 ohms, and reactance from 0 to 70 ohms. It
will also show if the reactance is inductive or capacitive.
You can also determine the length of feedline, and many
other things. It is powered by a 9 volt battery.

This particular unit works fine and appears to never
have been used. It is in its original box, and has the
paper work with it.

$50 plus shipping from Florida.

Thanks.

713. ARRL Bandwidth Proposal

Yahoo group: hamstuff
Date: 2005-12-12 04:10:36 UTC
From: Brian Carling
Topic: 713 Message: 713

Some interesting discussion on the ARRL Bandwidth Proposal
that they have sent over to the FCCwithout having first
properly consulted with radio amateuirs on the matter.

http://www.ad4mg.org/bandplan.htm

The Survey POLL in particular is VERY telling about how
most radio amateurs feel about the rash step that the
ARRL leadership is attempting.

717. TVI filters FS

Yahoo group: hamstuff
Date: 2005-12-17 16:27:51 UTC
From: Ken Simpson, W8EK
Topic: 288 Message: 717

Low Pass filters for the transmitter for sale:

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your
transmitter and antenna, and has been optimized to
have more attenuation in the 40 MHz region, where
many TVs have their IF. According to the manual it is
good for 1000 Watts "average", which would be about
2000 watts PEP, and has over 80 db attenuation at
41 MHz. SO-239 connectors on each end. This one
looks close to new, and also has the single page
"manual" with it. $ 30

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W AM below 30 MHz
(which would be over 3000 Watts PEP SSB), and
about 200 W up to 52 MHz. With paper work for $ 30

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line,
and reduce TVI. It is rated at 2000 watts, with
over 65 db of attenuation above 57 MHz.
This one is in very nice shape for $30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $25

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts AM.
It has the copper case. It is approaching antique status,

as I would guess it must be 30 years old, but still works fine. Basically it is the same as the TV-1000-LP above, but with one tenth of the power ratings. $ 15

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power. This one has an SO-239 on one end, and about a 2 foot length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239 connector on each end. $12

For the TV receiver:

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead. This filter is collectable, and is unused as best I can determine. It is still in its original box (not the newer blister pack), with an "RLD" logo on it, and says "NEW TV-300 HP High Pass Filter, Attenuates 0-52 MHz". A grounding strap is also attached.
$ 12

Prices do not include shipping from Florida.

Thanks.

720. REDUCED: New 450V Electrolytic Can Capacitors Deal

Yahoo group: hamstuff
Date: 2005-12-28 20:56:04 UTC
From: Brian Carling
Topic: 720 Message: 720

FOR SALE:

Group of FOUR 450V Can Capacitors...

NOS AEROVOX Electrolytic CAN Capacitors.
Excellent for homebrew or repair of radio equipment.
All shiny and new looking. Two are still in boxes.

AFH1-55 which has one section of 80 uF at 450V DC
working voltage.
QTY 2 Available for $8.00 each plus shipping.

AF4H-18-45 which has FOUR sections of 40 uF at
450V DC working voltage.
QTY 1 Available for $12.00 plus shipping.

PYRAMID TM-4089 has Two sections of 30 uF at 450V
DC and two sections of 125 uF at 25V DC.
QTY 1 available for $6.00 plus shipping.

REDUCED - was $33.00 for all.

BUY ALL 4 OF THESE FOR $20.00 for shipping

721. FS: Ladderline (Real open wire)

Yahoo group: hamstuff
Date: 2005-12-31 01:22:39 UTC
From: Brian Carling
Topic: 721 Message: 721

FOR SALE:

Two rolls of 600 ohm ladder line. This is the real feedline that has coppper wire and plastic spacers, unlike the plastic twinlead stuff with windows that is 450 ohm and cracks etc. This feedline can take it.

Each roll is approximately 100 feet long. I am not going to unroll them and measure, but it is 60 turns coiled up and each is about 8" diameter average - so I figure there must be at least 100 feet here on each roll.

I will sell the two rolls for $40.00 plus $8.50 for shipping

722. Touchtone (DTMF) microphones FS

Yahoo group: hamstuff
Date: 2005-12-31 14:47:00 UTC
From: Ken Simpson, W8EK
Topic: 722 Message: 722

Microphones with touchtone (DTMF) pad for sale:

Kenwood MC-53
This mic has the touchtone pad, but also has an additional
four buttons for tasks such as VFO or memory selection,
memory recall, calling a priority frequency, and a programmable
button, along with up and down buttons. It has the modular
connector similar to a LAN cable or phone line. This one
is in very nice shape, and works fine. $50

Icom HM-14
This mic has the 16 digit touchtone pad, but also has the
up and down switches. It has the round 8 pin connector,
and is in good shape, and works fine. $45

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone pad on it, plus a normal
low impedance microphone. Like new. $40

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone
pad to a lot of rigs in the 70s and 80s. Normal
hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug.
This particular unit has been used, but is in good
shape and includes paper work. $ 40

Prices do not include shipping from Florida.

Thanks.

723. Wattmeters and SWR Bridges FS

Yahoo group: hamstuff
Date: 2005-12-31 16:50:39 UTC
From: Ken Simpson, W8EK
Topic: 723 Message: 723

Wattmeters For Sale:

HyGain Model 412 B, HF wattmeter
This meter will measure your HF power in three ranges --
2000 Watts, 200 Watts, and 20 Watts. Of course it will
measure forward and reflected power, and SWR. It is
in nice shape, and works fine. $ 50

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and
reflected power with either 100 W or 10 W full scale. It
is relatively small, making it great for mobile operation.
Of course with a 10 W scale, it would be useful for QRP
operation as well. $18

SWR Bridges For Sale:

Dual meter SWR Bridge:
Swan SWR-1
This unit has two meters on it. The meter on the left
reads forward power and the meter on the right reads
reflected power. It is in a heavy metal enclosure with
two SO-239 connectors. It works fine and looks great. $ 20

SWR Bridge
This is the standard HF SWR bridge in a gray crinkle box
about 6 inches long and a couple inches square, with SO-239
connectors coming out of each end. It works fine. $12

Prices do not include shipping from Florida.

Thanks.

724. Coaxial antenna switches FS

Yahoo group: hamstuff
Date: 2005-12-31 20:06:05 UTC
From: Ken Simpson, W8EK
Topic: 521 Message: 724

Coaxial antenna switches for sale:

B & W Model CS-6 G (595) coax switch
This is the switch that is in a rectangular box about 9 inches long, with seven SO-239 connectors coming out of the back. It will switch 6 antennas, grounding the antennas that are not in use. It works fine and is in good shape. $ 40

B & W Model 550 G coax switch
This model will switch up to 5 antennas, and DOES ground unused antennas. It has SO-239 connectors on the sides, with the coax coming out like spokes of a wheel. It is in good condition and works fine. Mounting bracket is included for $ 30.

Waters (B&W) 335 coax switch
This is basically the same as the B & W Model 375 coax switch, except the unused antennas are NOT grounded. This will switch up to 6 antennas, has 7 SO-239 connectors, with the coax going out the back. This one is good condition, and works fine. $ 38

MFJ 1702, Two position Coax switch
Actually, the switch has 3 positions. One for each of the 2 antennas, and a third to ground both antennas. Constant impedance type design in heavy die cast enclosure for low loss, even into VHF and UHF frequencies. Like new. $20

2 position coax switch
These are a bit odd. They look close to what a Dow Key antenna relay looks like, but no relay coil to switch. It is a manual switch instead. There is a SO-239 connector at the top coming out of each side, with the common at the bottom. In the middle is a bar that slides back and forth to select the antenna. It is in a very rugged sealed metal box. Two switches available for $18 each.

B & W 551 A "Transfer" Coax Switch
This switch is designed to switch an auxiliary piece of equipment in and out (For example, bypass a linear amplifier, transverter, preamp, etc.). It has four SO-239 connectors. It is still in its original box, with the original paper work, and appears unused. $45

Prices do not include shipping from Florida.

Thanks.

726. 2 meter amplifier / receive preamp FS

Yahoo group: hamstuff
Date: 2006-01-01 19:48:03 UTC
From: Ken Simpson, W8EK
Topic: 726 Message: 726

For Sale:

Tokyo High Power HL-35 V power amplifier / receiver preamp

This unit is designed for use with a 2 meter HT. It will take from
1 to 5 watts input, and produce from 15 to 35 watts output. In
addition, it has a good GASFET preamplifier on it to help your
receive if you need it. The amp and the preamp both have
separate on-off switches, so you can use one independent of
the other.

This particular unit produced 17 watts out with about 1 watt input,
so about 2 watts should produce 35 watts.
It looks fine also. $45 plus shipping from Florida.

Thanks.

FOR SALE - Quantity 30 plus RF coils. Including AIRDUX air core
and military surplus ceramic core types.
From $2.00 to $14.00 - great for homebrew transmitters, receivers,
linear amplifiers and crystal sets.

Examples:

Group of smaller Airdux coils. New in Boxes.
4 boxes, three coils. If I can find the fourth
coil
I will throw it in at no additional charge.
816T - 1" diameter X 3". Has 25 turns of 18
gauge
wire - 4.8 uH
508T - 5/8" diameter X 2" long. 16 turns of 18
gauge
wire - 1.5 uH
416T or 432T - 5/8" diameter X 2" has 32 turns of
20 gauge wire - 3.4 uH
Will sell all of these small coils for $10.00 plus
shipping.

Wilcox ceramic core transmitting coil.
2-1/2" diameter X 3-3/4" long coil on a 5" long
form.
Has 26 turns of 14 gauge wire. Inductance is 21.1
uH.
Available for $9.00 plus shipping.

I will be adding more coils as time permits.

http://www.af4k.com/miscpart.htm

733. Kenwood items FS

Yahoo group: hamstuff
Date: 2006-01-07 14:40:21 UTC
From: Ken Simpson, W8EK
Topic: 733 Message: 733

Kenwood items for sale:

Kenwood MC-47 Hand Microphone
This is the microphone that came with the TS-50, but can
be used on other rigs.. It has a round 8 pin connector, has
up and down buttons, plus 4 "extra" buttons on the front.
This one works fine, and is very nice shape for $45.

Kenwood Extender feet
These are the extra feet that can be used on the front of
most Kenwood rigs to tilt the unit so that it is raised in the
front. They screw in to the standard feet. These are in
very nice shape. $15

Small hand mic that came with the Kenwood TR-7200
and TR-2200 A. It has the standard 4 pin plug wired
for Drake/Kenwood, and is a 500 ohm mic. This one says
Drake on it, but it is the same as the Kenwood microphone.
No model number on it, but it looks close to new, and
works fine. $30

Kenwood DC-1
This is the unit that slides on to the HT in place of a battery.
It permits one to operate off of 12 Volt DC, such as from a
car. It is used with the TH-75, TH-77, TH-25, TH-26 and
maybe others. Still in its original box with paper work, NOS $20

Kenwood PG-2 V
This is a cable that is used with many Kenwood HTs to charge,
operate off of 12 V DC, etc. Still sealed in its bag, NOS $ 12

Special Rubber Duck antennas for Kenwood TH-21 / 31 / 41
series HTs with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $10
Kenwood regular, 6.6 inches long $10

Kenwood full size 2 meter rubber duck antenna
BNC connector $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. $5

Antenna adapter to fit the connector on the TH -
21 / 31 / 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

740. REDUCED: Powercon Vibrator Power Supply

Yahoo group: hamstuff
Date: 2006-01-13 19:13:41 UTC
From: Brian Carling
Topic: 740 Message: 740

REDUCED:

POWERCON Vibrator Power Supply - Converts 12V DC
to 110V AC.

This is how we did it in the old days before
transistors!
Could probably be easily set up with a bridge
rectifier,
fullwave, doubler or whatever to produce
something useful like 400-700V DC for your
boatanchor projects.

Comes in a heavy duty metal case with handle.
It has output voltage selector
settings for LOW-MED-HIGH-MAX!
It is designed to produce 110V AC from 12V DC
at 300 Watts continuous.

If anyone would enjoy experimenting with
vibrator power supplies this is just
what you would enjoy a lot. May be easily
adapted to providing higher DC voltage for
tube plate supply by using diode doubler circuit.

Available for $8.00 plus shipping

Picture and details at:
http://www.af4k.com/miscpart.htm

741. Drake items FS

Yahoo group: hamstuff
Date: 2006-01-14 22:43:48 UTC
From: Ken Simpson, W8EK
Topic: 699 Message: 741

Drake items for sale:

Case for Drake TR-22 C
This is the black case that fits the Drake TR-22 C, and
has a pocket for the microphone, plus cutouts in the
back for antenna, power, etc. It is good shape, except
that the Drake Logo is not near as brilliant as it once
was. $12

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad
to a lot of rigs in the 70s and 80s. Normal hand mic
from the front, but had a touchtone pad on the back.
Four pin mic plug. This particular unit has been used,
but is in good shape and includes paper work. $ 40

Drake hand microphone
This is like the hand mic that came with the Drake TR-72
and TR-22 C. It has the standard 4 pin plug wired for
Drake/Kenwood, and is a 500 ohm mic. No model
number on it, but it looks close to new, and works fine. $30

Cover for Heath Wattmeter - Drake color
This is the inverted "U" cover that fits the Heath HM-102
and HM-2102 wattmeters, and maybe other units. It is
in nice shape. It has been painted black to match
Drake gear. It is no longer Heath Green. $12

I have a NOS 6JB6 available. I only have one, but that
may be enough to help someone. $20

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. If anyone has any
additional information on it, I would appreciate hearing. $30

Drake TV-300-HP high pass filter
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says

"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached. $ 15

Prices do not include shipping from Florida.

Thanks.

745. SSB ops clear down to 7000 kHz on 40m, Grrrr

Yahoo group: hamstuff
Date: 2006-01-19 11:05:30 UTC
From: Brian Carling
Topic: 745 Message: 745

Mark & fellow CW ops...

I did not do anything about it in the case of this CQWW contest.
I am not against contesters at all, but THIS went too far.

I think we need a co-ordinated effort among CW ops the next
time this happens.

Here is the idea. MOst of these gung ho contesters have e-mail.

What about if we LOG all of their activity that is BELOW the IARU
edge (i.e. 7050 kHz)
or is oit 7030 kHz?
Anyway, we LOG it nad send a copy of the WHOLE LOG to CQ
Magazine with a letter of complaint.

ALSO, and most importantly, we send an e-mail or a
"QSL CARD" or letter to each of these stations (mostly outside
USA so
an e-mail will be cheaper) and let them know that we are not too
happy about the situation and that we have lodged a complaint with
CQ Magazine.

If a guy gets 40 or 50 such QSL cards, letters and e-mails from his
peers
he might think again before causing such careless and wanton
QRM to the CQ sub-band.

What think you all?

Maybe we need an informal "Uh Oh!" organization.
O-O = Official Observers
Uh-Oh = Unofficiual Observers

Or we can sit on our butts and do nothing and the blighters will
take more and more of the CW segments away!

Brian, AF4K

P.S. PLEASE forward to OTHER CW-related lists!

746. REDUCED MORE: Rechargeable batteries

Yahoo group: hamstuff
Date: 2006-01-19 12:14:55 UTC
From: Brian Carling
Topic: 746 Message: 746

REDUCED:

Several Rechargeable batteries. Great for Field /
QRP ops
and experimenters. These are sealed lead-acid
batteries
and do not require any kind of fancy charging
system.
Great for field day or operating ham gear etc.
These are lightly used but have plenty of life
left in them.

QTY 1 - Ohmeda - 12V at 2.3 AH - $4.00
QTY 2 - UNIPOWER 6 V at 2.8 AH - $3.00 each
QTY 1 - UNIPOWER 12 V at 7.5 AH - $7.00
QTY 4 - Werker - 12 V at 5 AH - $5.00 each

Shipping additional.

Good point about ARRL too - SURELY there are some CW ops
working at HQ who are being bothered by that too????

Are we living in some daydream world and the only ham
employees left at Newington are guys who only work
VHF-UHF FM and digital on HF?

I am beginning to think that is a serious possibility. If there
ARE any exceptions I wonder if they are speaking up??

750. FS: Curtis EK-38 KEYER

Yahoo group: hamstuff
Date: 2006-01-21 14:36:28 UTC
From: Brian Carling
Topic: 750 Message: 750

FOR SALE:

Curtis EK-38 Keyer - Great for working CW with
paddles.
It looks like a good one. Adjustable from 8 to 50
wpm.
Very stylish, wrap-around cabinet. Has controls
for
sidetone volume, speed in WPM, tune switch for
key-down.
On the rear there are jacks for your paddles,
xmtr,
straight key in, and a fuse. Importantly - it also
has
a SWITCH for RELAY - TRANSISTOR, so that you can
use it
to key TUBE TRANSMITTERS!
Requires 120V AC. Power cord is missing but easily
replaced. Sold as-is and untested. May work fine.
Available for $25.00 plus shipping.

Picture and details at:
http://www.af4k.com/miscpart.htm

751. FS: Two Straight Keys

Yahoo group: hamstuff
Date: 2006-01-21 14:27:14 UTC
From: Brian Carling
Topic: 751 Message: 751

FOR SALE: Two Straight Keys.

The first key is a J-37 in excellent shape, all complete and
mounted on a type J-47 base. Available for $35.00 plus shipping.

The second is a generic straight key with shorting bar.
Also in great shape. Available for $25.00 plus shipping.

Pictures and details at:
http://www.af4k.com/miscpart.htm

752. REDUCED: Collins & Hallicrafters knobs etc.

Yahoo group: hamstuff
Date: 2006-01-21 15:01:41 UTC
From: Brian Carling
Topic: 752 Message: 752

REDUCED PRICES:

Knob Collection #1 - Collins etc.
Unsure which models of radios these five knobs go to.
They are all in good shape and come with the set screws.
Sizes are: 3", 2-5/8", 2-3/8", 1-7/8" and 1-1/2" diameter.
Available for $19.00 plus shipping.

Knob Collection #2 - Hallicrafters etc.
Looks like some of these three knobs and two dial skirts
are for SX101 etc.
All in good shape with set screws. Sizes are: all 2-11/16" diameter.
Available for $12.00 plus shipping.

Pictures at:
http://www.af4k.com/miscpart.htm
(about 1/3 way down the page.)

Thanks for looking! 73 - Brian

plus $5 for shipping.

756. FS: Jones Micromatch QRP SWR-Wattmeter

Yahoo group: hamstuff
Date: 2006-02-01 21:36:13 UTC
From: Brian Carling
Topic: 756 Message: 756

FOR SALE:
Jones Micromatch MM563 QRP SWR System.
This is an exceptionally nice VHF/UHF type
reflectometer
in excellent shape.
One of the nicest I have seen. Comes with N type
connectors and BNC adapters.
RANGES: 4 Watts, 12 Watts and SWR. Also has
continuously variable CAL adjustment and FORWARD
range adjustment so that SWR is read accurately
at any power. The coupler is made of solid brass
and
is still shiny and new looking. Has gold letters
raised
up on the name plate.

Available for $45.00 plus shipping.

Picture and details at:
http://www.af4k.com/miscpart.htm

758. Wattmeters and SWR Bridge FS

Yahoo group: hamstuff
Date: 2006-02-04 13:01:21 UTC
From: Ken Simpson, W8EK
Topic: 758 Message: 758

Wattmeters and SWR Bridge For Sale:

Heath HM-102 wattmeter
Covers 1.8 to 30 MHz, with 200 W and 2000 W full
scale. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter,
or separated from the actual meter by about 3 feet.
SO-239 connectors in and out. This particular meter
is in nice shape, with no scratches. Paper work
included for $40.

HyGain Model 412 B, HF wattmeter
This meter will measure your HF power in three ranges --
2000 Watts, 200 Watts, and 20 Watts. Of course it will
measure forward and reflected power, and SWR. It is
in nice shape, and works fine. $ 50

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and
reflected power with either 100 W or 10 W full scale. It
is relatively small, making it great for mobile operation.
Of course with a 10 W scale, it would be useful for QRP
operation as well. $18

SWR Bridge
This is the standard HF SWR bridge in a gray crinkle box
about 6 inches long and a couple inches square, with SO-239
connectors coming out of each end. It works fine. $12

Prices do not include shipping from Florida.

Thanks.

759. Hand microphones FS

Yahoo group: hamstuff
Date: 2006-02-04 15:46:37 UTC
From: Ken Simpson, W8EK
Topic: 759 Message: 759

Hand Microphones For Sale:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72
and TR-22 C. It has the standard 4 pin plug wired for
Drake/Kenwood, and is a 500 ohm mic. $30

Heath hand microphone
This mic says "Heath" on the front of it. The most
important part is that it is high impedance, and that
it has the 2 pin Amphenol connector on it, as used
by the HW and SB lines, and most other Heath rigs.
To put it another way, it is ready to use by plugging
it in to your HW-100, SB-100, or whatever. It works
fine, although its original white color is somewhat
faded in some places. $ 30

ElectroVoice 210 E
Hi Z mic for the older rigs. It is in nice shape. $30

Kenwood MC-53
This mic has the touchtone pad, but also has an additional
four buttons for tasks such as VFO or memory selection,
memory recall, calling a priority frequency, and a programmable
button, along with up and down buttons. It has the modular
connector. This one is in very nice shape, and works fine. $50

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone pad on it, plus a normal
low impedance microphone. Like new. $40

Prices do not include shipping from Florida.

Thanks.

760. TenTec Triton IV HF xcvr and 228 antenna tuner FS

Yahoo group: hamstuff
Date: 2006-02-04 17:17:56 UTC
From: Ken Simpson, W8EK
Topic: 760 Message: 760

TenTec items for sale:

TenTec Triton IV (Model 540) HF transceiver
Covers 80 thru 10 meters, but not the WARC bands.
Fully solid state, with approximately 100 Watts output power.
Of course it has the great QSK on CW that TenTec is famous
for, along with really great audio. This one is in good shape.
It works 100%. Cosmetically, it is very, very good. No
scratches that I can find. All original knobs, as well as the tilt
up front feet. With paper work for $ 190.

TenTec 228 antenna tuner, switch and SWR Bridge
This tuner is a 200 watt tuner that includes an antenna switch,
and SWR bridge. The tuner itself is the "T" type tuner with two
capacitors, and a 47 turn inductor, with taps at each turn. This
gives about the same flexibility as a roller inductor, without the
associated problems. The antenna switch will switch between
"Dummy Load", Antenna 1, 2, and 3. In other words it could
switch up to four antennas. A balun is also included. The meter
can be switched between forward and reflected power.
This unit works fine, and looks very nice. Paper work is
included for $100.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power
supply to the amp. It has a heavy duty 9 pin molex
type connector on both ends, and either #12 or #14
wire, and is about 6 feet long. It is in good shape. $18

Prices do not include shipping from Florida.

Thanks.

761. OPPOSE RM-11306

Yahoo group: hamstuff
Date: 2006-02-05 23:01:42 UTC
From: Brian Carling
Topic: 761 Message: 761

Guys please read this. My greatest concern with the absurd
ARRL Proposal RM-11306 is not just about the AM restrictions
but ALSO about the annoying WINLINK PACTOR robot stations
that are already devastating communications on the CW and
digital sub-bands, being allowed to then spread their trash all
over the phone bands too. I am not against digital on HF.

This is a very important issue and one of ARRL's worst blunders
in our lifetime. Please distribute this note widely:

= = =

I am writing to make sure you know about a Petition the FCC
is considering that would apply restrictions to AM that we
have never faced before. Please take the time to read the
Petition, which can be seen at the link below.

I personally want to ask you to file a formal COMMENT in
opposition to
it. There is an internet-based system the FCC uses to accept
comments,
but it's cumbersome, so I am stepping forward to take your
comments as
an email and file them on your behalf, under your name, callsign
and
callbook address.

This is a very serious matter for our part of the hobby, and a strong
turnout in opposition will influence the FCC's ultimate decision
whether
to allow or reject the Petition. Would you please also reply to this,
to let me know that you will help?

All we need is a reason why you oppose this Petition. I am certain
you
will find several points to comment on. Pick as many as you can
spare
the time to fight against in your response.

After I file it in the FCC database, I will reply to you with the FCC
confirmation number as your record of having participated. All of us
will really appreciate anything you can say.

Here are the links if you wish to file on your own behalf.

To observe comments:

http://gullfoss2.fcc.gov/prod/ecfs/comsrch_v2.cgi

In the proceeding box just type in the RM number your are
interested
in.

'and this link for filing your comments:

http://gullfoss2.fcc.gov/prod/ecfs/upload_v2.cgi

When referring to 11306 you must type it in as RM-11306

If you do not understand the system or feel uncomfortable with the
filing site please fire off your comments to - - - -

stoprm11306@.... .

Include your comments, a paragraph or two and your legal name,
address
with your call as listed in the QRZ Database. I will file your
comments
for you.

In my opinion there is something more important going on that we
all
must take action on. We (the amateur community) have been left
out of
the decisoin making process. Whether we are pro or con on the
proposals
we need to show that we have concerns and this can only be
accomplished
thru numbers of participation.

Considering the time and money we put into our hobby we need to
take
just 5 minutes of our time and send a message to the ARRL and
the FCC.

It is time to take back our hobby and the only way this will happen
is
to show those that are dictating our direction that we are part of the
process and will except nothing less.

Regards,
Gary/W2INR

762. FS: Beautiful Kenwood Grid Dip Meter

Yahoo group: hamstuff
Date: 2006-02-05 23:24:04 UTC
From: Brian Carling
Topic: 762 Message: 762

FOR SALE:

KENWOOD DM-81 GRID DIP METER, excellent
Looks brand new. This is one of the best dip
meters I have seen.
Solid state of course, since it is a fairly new
type meter.
The aluminum case slides open to reveal a drawer
holding all of the plug-in coils!
Comes with the original box and manual. Looks like
it has never been used.
Available for $125.00 plus shipping.

From: Brian Carling
Topic: 765 Message: 765

FOR SALE: SEMCON RC115 CAPACITANCE / IMPEDANCE METER - very nice. This is a combined Capacitor Analyzer, impedance bridge and transformer analyzer. This is the most comprehensive capacitor analyzer I have ever seen. Checks capacitor value, leakage etc. at up to 600 Volts DC. It is also an impedance meter. Analyzes transformers. Measures POWER FACTOR, etc. etc. Also works as a megger to check insulation resistance. Excellent working condition. For 120V AC 60 Hz operation. Available for $59.00 plus shipping.
CORNELL-DUBILIER CDA-5 Decade Capacitance Box. - excellent
This substitution box is in a beautiful bakelilte case, and it covers 0.0001 uF to 0.0199 uF.
All capacitance setting rated for up to 600V DC. A great addition to any shack or experimenter's lab. Excellent condition.
Available for $20.00 plus shipping. ME-82/U Wattmeter and Dummy Load VHF-UHF, military surplus. Measures power from 50 to 600 MHz. Load is 52 ohms. Meter movement is the same as on Jones Micromatch equipment. Wattmeter scale shows RF power in the range of 0 - 120 Watts. Has Type N connector. Handy carrying handle swings out of the top. Has large heatsink. Excellent working condition. Available for $45.00 plus shipping. Pictures and details at: http://www.af4k.com/testgear.htm

766. Coaxial antenna switches FS

Yahoo group: hamstuff
Date: 2006-02-12 14:10:56 UTC
From: Ken Simpson, W8EK
Topic: 521 Message: 766

Coaxial antenna switches for sale:

Waters (B & W) 336 "transfer" coax switch
This switch is designed to switch an auxiliary piece of
equipment in and out (For example, bypass a linear
amplifier, transverter, preamp, etc.). It has four SO-239
connectors. It is in nice shape. $40

Heath HD-1234 Coax Switch
Four position, with coax coming out like spokes of a
wheel. It does ground unused antennas, and also
has a switch position to ground all antennas. $ 25

Diawa CS-201 Coax Switch
Switches 2 antennas. Unused position IS grounded.
This coaxial antenna switch is in a heavy diecast
housing that utilizes "stripline" construction to keep
the impedance very close to 50 ohms. It also
permits good operation at higher frequencies.
This one works 100% and looks great also. $ 22

2 position coax switch
These are a bit odd. They look close to what a Dow Key
antenna relay looks like, but no relay coil to switch. It is a
manual switch instead. There is a SO-239 connector at the
top coming out of each side, with the common at the bottom.
In the middle is a bar that slides back and forth to select the
antenna. It is in a very rugged sealed metal box. $20

Prices do not include shipping from Florida.

Thanks.

Topic: 772 Message: 772

Audio Filter For Sale:

Autek QF-1 A Audio Filter
This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.
This particular unit looks very close to new, and works 100%.
With paper work for $ 50 plus shipping from Florida.

Thanks.

774. TenTec items FS

Yahoo group: hamstuff
Date: 2006-02-18 22:13:38 UTC
From: Ken Simpson, W8EK
Topic: 543 Message: 774

TenTec items For Sale:

TenTec 546 Omni D, series C, HF CW / SSB xcvr.
All solid state, with up to 100 W output. The ALC can
also be turned back with a front panel control for QRP
operation. Covers 160 through 10 meters, including the
10 MHz WARC band. Full QSK on CW, and a fantastic
receiver. Terrific audio quality on SSB also. Built in audio
CW filter. Digital read out. This one is in good shape,
but has some wear around the audio gain control. With
manual for $275.

25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. I am not positive if TenTec made this, or if it
is homebrew to look like TenTec. If it is homebrew, it
certainly is very professionally done. $120

TenTec 299 Voice synthesized frequency counter
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically
it has some slight wear, especially close to the button that is
Pushed to activate it. $ 190

WARC band crystal for 24.5 MHz for Omni C $20

TenTec 289 noise blanker for the Delta 580 transceiver
This very effective noise blanker can be added the 580 Delta

to help get rid of ignition noise, and is especially effective for mobile use. It is a rare item! $100

TenTec 225 power supply
This supply is made to match the Argosy transceiver. It supplies 13.8 volts at up to 9 amps. This one is in very nice shape. I can not find a scratch on it. Paper work included for $95.

Prices do not include shipping from Florida.

Thanks.

776. TVI filters

Yahoo group: hamstuff
Date: 2006-02-19 13:50:44 UTC
From: Ken Simpson, W8EK
Topic: 776 Message: 776

Low Pass TVI filters For Sale:

B & W 425 low pass filter
B & W TVI filter, 52 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the older 425, which is much heavier, and has
the copper case. This one has just enough of the paint
coming off to show the copper case underneath.
With paper work for $ 30.

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W AM below 30 MHz
(which would be over 3000 Watts PEP SSB), and
about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your
transmitter and antenna, and has been optimized to
have more attenuation in the 40 MHz region, where
many TVs have their IF. According to the manual it is
good for 1000 Watts "average", which would be about
2000 watts PEP, and has over 80 db attenuation at
41 MHz. SO-239 connectors on each end. This one
looks close to new, and also has the single page
"manual" with it. $ 30

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line,
and reduce TVI. It is rated at 2000 watts, with
over 65 db of attenuation above 57 MHz. $30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot

length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

High Pass TVI filter for the TV set:
Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached. $ 15

Prices do not include shipping from Florida.

Thanks.

This is not a real J-38, but is a Japanese copy.
It has a shorting switch and ball bearings and works
great. $18

Generic key
This is a generic CW straight key with a plastic
(phenolic ??) base. It is nothing fancy, but it will do
the job. $12

Cable for straight key
It has a mono 1/4 inch phone plug on it, as is used
with most rigs with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

Topic: 791 Message: 791

FOR SALE:Longines Symphonette Portable Transistor
Radio Receiver.

This Model 4597-B Receiver has AM, FM and two shortwave
bands, 1.7 to 4.9 MHz and 4.9 to 12 MHz.
Has built-in telescopic antenna in good shape.Dual
rate tuning for bandspread, with all original knobs.
Lighted slide rule type dial with on/off switch.
Volume and tone controls. Earphone jack for quiet listening.
Operates on internal batteries or external power source
(not included) I was told that this works but
I have not tested it.

Reduced to $9.00 plus shipping

Picture and details at:
http://www.af4k.com/radios.htm

792. FS: TEMPO ONE HF TRANSCEIVER

Yahoo group: hamstuff
Date: 2006-03-04 13:56:38 UTC
From: Brian Carling
Topic: 473 Message: 792

TEMPO ONE HF TRANSCEIVER. With Power Supply.

The Tempo is a 5 band 80m thru 10m HF transceiver rated
300 watts SSB and 240 watts CW input. Features VOX, AGC,
built-in calibrator and RIT. LOOKS GREAT.
These were imported by HENRY RADIO in the late 1970s
and feature tubes in the RF final amplifier.
Many advanced features. Highly stable VFO.
Comes with the matching power supply - speaker unit and
all necessary cables.
Has had VERY little use, and the protective plastic was
just recently removed off the face panel to reveal an
immaculate black front panel! Works fine on all bands.
The only thing this rig needs is there uis a slight
scratch sound in the function switch. Simply spray it
and you have a showroom condition radio.
Looks almost like new. No scratches or dents etc.
All original with no modifications.
Comes with the power supply and a copy of the manual.

Will sell for $225.00 plus shipping.

Pictures and details at:
http://www.af4k.com/radios.htm

793. 2 meter omnidirectional antenna FS

794. TenTec items FS

Yahoo group: hamstuff
Date: 2006-03-05 13:58:22 UTC
From: Ken Simpson, W8EK
Topic: 543 Message: 794

TenTec items For Sale:

TenTec 289 noise blanker for the Delta 580 transceiver
This very effective noise blanker can be added the 580 Delta
to help get rid of ignition noise, and is especially effective for
mobile use. This is a rare item! $100

TenTec 299 Voice synthesized frequency counter
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically
it has some slight wear, especially close to the button that is
Pushed to activate it. $ 190

WARC band crystal for 24.5 MHz for Omni C $20

TenTec 225 power supply
This supply is made to match the Argosy transceiver. It supplies
13.8 volts at up to 9 amps. This one is in very nice shape. I can
not find a scratch on it. Paper work included for $95.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 800 Message: 800

AEA items For Sale:

AEA DL-1500 "dry" dummy load
This dummy load is rated to work from 1 to 650 MHz,
and handle up to 1500 watts. It has a derating curve
right on the load itself, so one can't loose it that way!
Since it will cover virtually all of the ham bands, it is
very useful.
This one has never had over 100 watts to it (well,
maybe 105 watts) as far as I can remember. It looks
very good as well. These sold for about $90 new.
This one is only $60.

"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232. $ 18

AEA "Wall cube" as above, but only 1/2 amp rating,
which is enough for the PK-88. $10

Cable to connect AEA packet interface to computer
I think this cable was originally used with the AEA CP-1,
to interface it to a Commodore computer. One end has
the 5 pin plug on it that AEA uses. The other end has an
edge connector with 12 position on each side, although
only 6 of these are in use. It is in close to new condition. $10

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

Astron power supplies For Sale:

Astron RS-35 M
This supply produces 13.8 V DC at 25 amps continuous,
and 35 amps intermittent. It has both an ammeter and a
voltmeter, and is very heavy duty. This one works 100%
and looks like it just came out of the box. $140

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter, although the ammeter has been
replaced. Of course it works fine. $95

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps
intermittent duty. It works fine and looks fine also. $60

Prices do not include shipping from Florida.

Thanks.

Hustler HF mobile antennas for sale:

80 meter "Super" high power resonator RM-80 S
This is the "high power" resonator for 80 meters that
can be used mobile to give larger bandwidth, or can
also be used on top of a Hustler 4BTV to make it in
to a 5BTV vertical. Almost like new for $ 38

"Standard" Hustler resonators:
40 meter resonator RM-40, still in original packaging $22
20 meter resonator RM-20 $ 15
.......RM-20 still in the original packaging $20
15 meter resonator RM-15 $ 14

"Super" Hustler resonators (high power version):
80 meter RM-80 S $ 38
40 meter RM-40 S $ 25
20 meter RM-20 S $ 20
15 meter RM-15 S $ 18
10 meter RM-10 S $ 16

Hustler mobile mast:
MO-3 straight, 54 inch long standard length mast $ 20
MO-4 Short mast (22 inches) $15

Prices do not include shipping from Florida.

Thanks.

808. FS: icom R10 scanner with accessories

Yahoo group: hamstuff
Date: 2006-03-28 15:23:29 UTC
From: goshawk
Topic: 808 Message: 808

hello list,
I have an Icom R10 handheld scanner to sell.
The Icom IC-R10 is a compact, rugged and high performance receiver.
All mode (FM, WFM, SSB, CW, AM) receiver
Newly designed 'busy catch scan'
Wide-band coverage with all mode receive capability (0.5 MHz to 1300 MHz)
Real-time bandscope
(a first for handhelds) making it easy to bind busy frequencies and see the propogation conditions of frequency bands.
Ample memory channels with memory name function
1000 memory channels are available in the IC-R10, and 8-character memory names are storable for each channel and each bank for easy recognition. In addition, a maintenance free EEPROM is employed for memories.
Improved receiver characteristics
Tuneable bandpass filters are employed in the IC-R10 to provide good image and intermodulation
rejection characteristics, these are Programmable from a PC as well as receiver
Useful scanning functions
Scan types include programmed, memory, bank, modes as well as a new scan type, 'BUSY CATCH'
scan for FM mode. The 'BUSY CATCH' scan searches for the next busy frequency using a 'para' receiver circuit while the actual receiver circuit is detecting a signal (scan pauses) Then, the actual receive frequency jumps to the next busy frequency when scan resumes. This speeds up the total scan speed.
VSC Function
Icom's original VSC (Voice Scan Control) is available - the first time on a handheld receiver. This function pauses during scan only when modulated signals are received.
Multi function dot-matrix LCD
A multi function dot-matrix LCD is employed in the IC-R10 to display a great variety of information, such as receive frequency, mode, real-time band scope and memory names, etc.
Full computer access capability
The IC-R10 can be connected to your home computer for cloning, downloading and receiver control. With an optional CS-R10, memory contents, frequency, mode and memory names, etc. can be programmed or downloaded quite simply. The receiver control system, Cl-V, is employed in the IC-R10 to control receive frequency, mode and signal strength, etc. In addition, the IC-R10 has 2 separate connectors for cloning and Cl-V connection.
EDIT
switch provides easy editing or revision of memory contents.
Memory copy
Auto Mode and Tuning Step for simplified operation.
36 mm internal speaker for ample power output and clear audio.
AA Battery Power
4 AA size dry cells (or Ni-Cad batteries) can be installed or a 4.5-16V external power supply can be connected.

100 Hz frequency resolution.
Built-in 20 dB attenuator.
AFC function
Noise blanker and Auto Noise limiter
Receiving System
SSB, CW, FM Triple superheterodyne
IF Frequencies
1st - 266.70MHz / 429.10MHz
2nd - 10.7MHz

Dimensions
48.5(w) x 130(h) x 31.3(d) mm

as well as the scanner and mains unit, I also have the computer cable and software, these have never been used, but that is not all!
I will also include an all purpose preamp, this is brand new, and has never been out of its box, it is fitted with BNC connections, so just right for the scanner. I will top this package off by including a portable desktop aerial, this has 2 telescopic aerials, 4 sucker feet, and a good length of cable with BNC plug, so is also just right for the scanner and preamp, again, the aerial has seen no actual use at all.
the actual scanner has only seen about 20 mins of use.
am looking for £200 for this whole package, but will consider sensible offers.
if interested, either call on 02084785841, or email,
goshawk@...

812. MFJ antenna tuner and other items FS

Yahoo group: hamstuff
Date: 2006-04-01 11:50:53 UTC
From: Ken Simpson, W8EK
Topic: 812 Message: 812

For Sale:

MFJ 949 B antenna tuner

This antenna tuner is rated by MFJ to handle 300 Watts,
although I really feel the standard 100 Watt rig is pretty
much the limit. This unit has an SWR bridge built in,
along with a wattmeter that reads 300 W and 30 W full
scale. It also will handle two coax antennas, which can
be used direct, or thru the tuner. It also includes a balun
and separate antenna switch position for use with open
wire line. It has an internal dummy load that MFJ rates
at 300 Watts, but again, 100 W is the practical limit.

This particular unit works fine, and looks good, although
it does have scratches around the ground post on the rear,
plus a small barely visible scratch under the meter. $65

Tuning capacitors for MFJ tuners
These are exact replacement tuning capacitors as used
in the 949 antenna tuner. I think most of the MFJ antenna
tuners in the 300 watt class use the same capacitor. As
far as I know, these are unused. Two are available for $15 each.

Other MFJ items:

MFJ 286 speaker microphone
This speaker mic can be used on most Kenwood
HTs. It is a standard size speaker mic -- not one
of the sub-miniature types. It has not been used.
With paper work for $15.

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is an
actual MFJ. $10

Prices do not include shipping from Florida.

Thanks.

813. 20 meter dipole antenna with coax FS

Yahoo group: hamstuff
Date: 2006-04-01 21:39:47 UTC
From: Ken Simpson, W8EK
Topic: 813 Message: 813

Dipole antenna for 20 meters for sale:

This is a standard 20 meter dipole (about 33 feet long),
complete with the heavy duty HyGain center insulator,
which is worth about $20 in itself, the wire making up
the dipole, and end insulators. Also included is about
50 feet of RG-58 coax cable, with a PL-259 attached
to the radio end. It is in good shape. $35 plus shipping
from Florida.

Thanks.

815. 2 meter base station antennas FS

Yahoo group: hamstuff
Date: 2006-04-08 11:27:19 UTC
From: Ken Simpson, W8EK
Topic: 815 Message: 815

For Sale:

Antenna Engineering 6 element 2 meter beam
This is a relatively small 2 meter antenna on an 8 foot
boom. It is presently tuned for about 146.5 MHz. It is
in good shape for $50.

Cushcraft AR-2 Ringo Vertical Omni Directional Antenna
For 2 meters, although it can be tuned to cover commercial
frequencies either side of the amateur 2 meter band (about
130 to 170 MHz). It is rated to have 3.75 db gain.
This one is in very good shape. No weathering or corrosion
that I can find. Of course the paper work is included. $40

Shakespeare Model 4616 omni directional antenna,
suitable for use on a 2 meter repeater. This is equivalent
to a super station master. It is large -- about 22 feet long,
and very, very heavy duty. Gain is rated at 9 db, and it has
an internal choke. It has an "N" connector, but I also have
a 6 foot pigtail to go from the "N" connector to a SO-239.
This antenna is NEW. It has never been in the air, and
has been stored inside. Because of its size, this must be
pick up only in the Ocala, FL area, close to I-75. $ 250

Cushcraft 147-22 beam
This is a pair of 11 element 2 meter beams stacked to
give a total of 22 elements.
Each 11 element beam is about 12 feet long, and the
two are separated by a 5 foot boom. To put it another
way, the antenna occupies a 12 by 5 foot rectangle.
Because of the size, this is pickup only in the Ocala, FL
area. For transportation, it can easily be disassembled
into each beam by itself, and the boom, and then easily
carried on top of a minivan, pickup truck, or whatever.
Paper work and all hardware, coax phasing lines, etc.
are included for $200.

Prices do not include shipping from Florida.

Thanks.

820. FS: microset 13.8V 50A power supply.

Yahoo group: hamstuff
Date: 2006-04-11 00:32:59 UTC
From: goshawk
Topic: 820 Message: 820

here is a Microset PT-50A 13.8V 50 Amp Power Supply. In excellent condition and fully working, the 50A output is continuous, not peak as on some other units. is quite large, dimentions are, 180 x 240 x 380mm. Cost new was £250. the unit has seen only a bit of use, but has only ever had 100W output radios used with it, so has not been totally hammered, has a set of connections for the 50A output, and a cigarette lighter type socket, which I think has a 15A output. the high output of this supply makes it ideal for a lot of applications. This is a very heavy item at 15kg (not switch mode) and has a large heatsink, so if possible I would recommend collection, as the postage is going to be £20 with proper ensurance cover. if possible, I am looking for £150 for this, but will consider sensible offers.
I will not post outside the UK, as it would be far too expensive.

if interested, please either call on 02084785841, or email to,
goshawk@...

Simon

826. Human-buttons

Yahoo group: hamstuff
Date: 2006-04-24 13:47:10 UTC
From: SoCalFedC5@un.unhcr.biz
Topic: 826 Message: 826

This campaign is about Human beings, Democracy, UNHCR, Refugees, The Iraqis, Islam, Kurds, Human rights, Respect, Money, Donations, Angelina Jolie, Pavarotti, Giorgio Armani, Donors, Peace, History, Campaigns and about you if you care about these words.

Hi there,

I am SAM, an Iraqi refugee living in Lebanon at the moment; I have spent the last 10 years of my life as a refugee registered with the UNHCR in Beirut. The last 4 years, I have spent as an activist for peace and human rights (especially refugees and asylum seekers) on the Internet; I'm also books author and ebooks publisher. I have launched many campaigns to improve our situation as refugees in Lebanon and hopefully bring more understanding to our problems worldwide. I helped make many changes and improvements at the UNHCR office in Beirut; I used the Internet as the field for my activities (you can read more about that in my free ebook 'MY CAMPAIGNS'). All my ebooks are free and could be download from my sites.

This is my newest campaign, it's about the illegal and humiliating actions of the UNHCR, who using photos of refugees as banners and human-buttons to collect money. This is an abuse of the dignity and humanity of the refugees and must stop immediately and a clear public apology present by The United Nations High Commissioner for Refugees. My friends, I am talking about the pictures you can see here:
http://members.fortunecity.co.uk/unhcrlebanon/human-buttons.htm

Also you can read my new campaign 'Urgent, we need smile' here:
http://web.1asphost.com/lebanon2/email_me.htm

For more info about UNHCR and life of refugees you can read my free ebooks. I invite you as fellow humans and members of the world community to support my campaign by reading my article on my site and see the human-buttons. The campaign is to support and improve the UNHCR http://www.unhcr.org especially after the last scandals in the UN and UNHCR, just for example: http://www.mizzima.com/archives/news-in-2005/news-in-april/12-April05-22.htm

"We make demonstration and fast because the UNHCR office in Cairo did nothing for our problem..." http://news.bbc.co.uk/2/hi/africa/4440730.stm

Together we will build better world.

You could reach me fast via this form: http://freewebs.com/unhcrlebanon/email_me.htm
and if you like to know more about me, you can google for my name 'osam altaee'.

Thanks

828. FS: FT241 CRYSTALS

Yahoo group: hamstuff
Date: 2006-04-27 10:44:09 UTC
From: Brian Carling
Topic: 828 Message: 828

FT241 CRYSTALS FOR SALE:

These are the LF crystals in the 300 - 500 kHz range.

I got more of these than I needed... so:
Will sell 25 for $10.00 untested - some will work, and
it's possible that some will not.

CHANNELS - 14, 19, 60, 68, 317, 320
For example, Channel 68 = 496.3 kc.

There used to be the N4JVP calculator online but
I can't get it to work now. It was at:
http://www.subdevo.com:82/FT241/FT241.aspx

Picture and details at:
http://www.af4k.com/FT241_crystals.htm

829. Johnson phone patch and microphone FS

Yahoo group: hamstuff
Date: 2006-04-29 11:30:41 UTC
From: Ken Simpson, W8EK
Topic: 829 Message: 829

For Sale:

Johnson Viking Phone Patch - Model 250-46

This phone patch is made to be mounted vertically beside the rig. It is about 6 inches high, 2 inches wide and 3 inches deep. It is possible that the face plate can be removed, and it made to be mounted horizontally, but I have not done that. The reason I say this is that there are feet on the bottom, and on the left side. Maybe the feet on the left side are to protect the rig. In any case, it has 3 pots on the front for Null, Receive Volume, and transmit gain, along with a switch for phone patch or microphone. On the back is a terminal strip for speaker and phone line. The microphone input has the 2 pin Amphenol connector like used by Johnson and many others in that era.

Cosmetically, it is extremely good. Paint is nice and lettering close to perfect. There is a very minor scratch by the switch that switches between microphone and phone patch. $45

Johnson High Impedance hand microphone

This hand mic is dark gray in color, and has the Johnson Logo in the middle on the front, with Johnson written out toward the bottom of the front. It is a high Z crystal mic, like was used on most of the Johnson boat anchor rigs. Stripped leads on the end of the coiled cord. It has very good output, and looks nice as well. $30

Prices do not include shipping from Florida.

Thanks.

830. Several CW keys FS

Yahoo group: hamstuff
Date: 2006-04-29 13:57:26 UTC
From: Ken Simpson, W8EK
Topic: 830 Message: 830

CW keys for sale:

Birnal Electric Manufacturing Co. solid brass key
This key has a rectangular base, similar to the Nye
Viking Speed-X 320-001, but somewhat larger, thicker,
and heavier duty. It is all brass, in every part, except for
the nice Navy Knob. The contacts are about 3/16 inches
in diameter, instead of just points as some keys have.
The action on this key is the finest I have ever used.
Really superb. Cosmetically, I have not cleaned it, as I
do not want to destroy the "patina" of the brass. It is in
nice, 100% working condition. $100

Speed-X chrome key with rectangular base
I can not find the Nye Viking model number for this one.
It looks like the Nye Viking 320-001, except it is chrome
plated, instead of black crinkle. It might be the 320C-003
as shown at http://www.goofus.org/kk4dw3.html#MASTER
except this one does not have a shorting switch. It is
similar to the key at the extreme right shown at
http://hedspeth.home.mindspring.com/cwkey.jpg except it
is chrome on both the base and mechanism. It has a nice
Navy knob, and very nice action. Being chrome plated, it
looks very nice. $75

Military J-38 key
This is the "standard" straight key that has been used by
the military for years and years. Shorting switch is included,
along with many adjustments, so it can suit your fist. The
black bakelite base is in good shape, as is the key itself.
Everything works fine for $38.

Speed-X Nye-Viking 310-003
The Speed-X 310-003 is the classic oval design (similar
to a J-38), in black crinkle. It has a shorting switch. It
looks really great, and of course works fine. $35

Generic straight key
This is a generic CW straight key with a plastic
base. The key is nothing fancy, however, it is
mounted on a very nice piece of Oak wood, that
makes it look very nice. Cable included for $30.

Generic brass colored, oval base key
This is similar to a J-38 (without the bakelite base), but is
a Japanese copy. It is brass colored, but is not real brass.

No shorting switch. It works fine and looks fine. $15

Other CW items:

Bencher BY-1 Paddle
Standard Bencher with black base and chrome parts.
In very, very nice condition for $ 65.

MFJ 422 B-X electronic keyer
This keyer includes sidetone, and has adjustments for
volume, tone frequency, and weighting, as well as speed.
It will key either positive or negative voltages, and is
powered by an internal 9 V battery, or external 5 to 9
volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%, and looks great also. With paper
work for $45.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

4CX300A Power Tetrode Tube.
QTY 1 Available for $9.00 plus shipping.

TUBE PLATE CAP.
Made for a plate cap that is 1/2" diameter. Overall dimensions
are 1-5/16" diameter X 1-5/16" tall.
QTY 1 available for $8.00 plus shipping.

ANTIQUE RADIO TERMINALS. Spring loaded type.
Four for $5.00 plus shipping.

Antique Resistor 11.65 K-ohms on bakelite board. $2.00

Group of 5 large heatsinks. These are $2.00 each.

ANTIQUE KNIFE SWITCHES - Large and small.
from $3.00 to $12.00 each

Two HORN Speakers. Very good working condition.
Now reduced to only $4.00 each plus shipping.

AIRACO 3715 kHz crystals - never seen any quite like these!
Beautiful white ceramic and chrome construction.
QTY 4 Available for $8.00 each

300 OHM Clip-on Connectors, NEW. $3.00 each.

Set of SHOCK MOUNTS - Brand new. Barry Electronics.
Set of 4 available for $22.00 total, plus shipping.

Old Headset with boom mic.
This is a very nice old headset with cloth cord and adjustable
boom microphone.
All in good shape. Available for $15.00 plus shipping.

AC Power Switch with Circuit Breaker
Rated 7.5 amps at up to 250V AC. DPDT configuration.
QTY 2 available for $2.00 each plus shipping

For pictures and more details see:
http://www.af4k.com/miscpart.htm

832. HT speaker microphones FS

Yahoo group: hamstuff
Date: 2006-05-06 11:29:58 UTC
From: Ken Simpson, W8EK
Topic: 782 Message: 832

HT speaker microphones For Sale:

Pryme Speaker mic
Fits Yeasu VX-1, 2, 5, 6, 7, FT-60, and others that take
the single pin connector with 4 conductors.
Close to new condition for $25.

Speaker microphone for most HTs
It says Densei SM-505 on it, but appears to be the same
as the Icom HM-46 speaker-mic. It fits Icom, Yaesu, and
others that take the 2.5 mm and 3.5 mm connectors.
Very nice condition for $18.

Yaesu MH19A2B ear bud and mini-mic.
With 2.5 mm and 3.5 mm connections.
It works fine and looks fine. $18

Santec SM-3 speaker microphone
It has the small round plug (about 3/8 inch) with 6 pins,
as used on most Santec HTs, and many Wilson and
Yaesu HTs. $20

Santec ST-HA-1 boom mic / headset
Can be used with ST-144 and most other Santec HTs.
It uses the small 6 pin plug. Separate PTT switch will
mount on your belt, if desired. $22

Prices do not include shipping from Florida.

Thanks.

833. Wattmeter / SWR Bridges FS

Yahoo group: hamstuff
Date: 2006-05-07 18:32:20 UTC
From: Ken Simpson, W8EK
Topic: 833 Message: 833

Wattmeter / SWR Bridges For Sale:

Daiwa CN-520 "Cross needle" Wattmeter
This wattmeter does it all. It covers from 1.8 to 60 MHz, which means this one meter will measure power on all HF ham frequencies, plus six meters. It would be ideal for some of the new multiband rigs that have 1.8 to 55 MHz coming from one antenna connector, and 2 meters and 440 MHz from a separate connector. It has 2 power scales of 2000, and 200 watts on forward power, and 400 or 40 watts reflected, and uses a nice cross needle meter to read both forward and reflected power at the same time, with a cross scale for SWR. It works fine, and looks fine also. With paper work for $65.

Dual meter SWR Bridge:
Calrad 65-287 (same as Swan SWR-1 A)
This unit has two meters on it. The meter on the left reads forward power and the meter on the right reads reflected power. It is in a heavy metal enclosure with two SO-239 connectors coming out of the ends. It covers all HF frequencies, plus six meters, and also 2 meters with reduced accuracy and power. It works fine and looks like new. Not a scratch on it. It even still has the protective caps on the coax connectors. $ 25

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and reflected power with either 100 W or 10 W full scale. It is relatively small, making it great for mobile operation. Of course with a 10 W scale, it would be useful for QRP operation as well. $18

Prices do not include shipping from Florida.

Thanks.

836. Kenwood TS-130 S, HF xcvr FS

Yahoo group: hamstuff
Date: 2006-05-13 13:09:52 UTC
From: Ken Simpson, W8EK
Topic: 836 Message: 836

For Sale:

Kenwood TS-130 S, HF transceiver.

Operates SSB and CW, on 80 thru 10 meters and
includes the WARC bands. Effective speech
processor is also built in, as is the fan on the
solid state finals. It is a fairly small unit that would
work great for mobile use. Nominal 100 Watts
out, with digital readout. This one is as close to
100% electrically as I can tell, and looks OK also.

Manual included for $325 plus shipping from Florida.

Thanks.

Date: 2006-05-14 00:40:33 UTC
From: Ken Simpson, W8EK
Topic: 804 Message: 843

Astron power supplies For Sale:

Astron RS-35 M
This supply produces 13.8 V DC at 25 amps continuous,
and 35 amps intermittent. It has both an ammeter and a
voltmeter, and is very heavy duty. This one works 100%
and looks like it just came out of the box. $135

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter, although the ammeter has been
replaced. Of course it works fine. $90

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps
intermittent duty. It works fine and looks fine also. $55

Prices do not include shipping from Florida.

Thanks.

Hand Microphones For Sale:

All work 100%, and have coiled cords with stripped leads,
unless stated otherwise.

High Impedance (over 500 K ohms)

Regency Hand mic
Cream colored body, Hi Z hand mic, with black PTT button
and black mic grill. $20

Mura DX-115 C
All black Hi Z hand mic. $20

Johnson High Impedance hand microphone
This hand mic is dark gray in color, and has the Johnson
logo in the middle on the front, with Johnson written out
toward the bottom of the front. It is a high Z crystal mic,
like was used on most of the Johnson boat anchor rigs.
It has very good output, and looks nice as well. $30

Low Impedance (500 to 600 ohm)

Drake hand microphone
This is like the hand mic that came with the Drake TR-72
and TR-22 C. It has the standard 4 pin plug wired for
Drake/Kenwood, and is a 500 ohm mic. $30

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. Like new. $40

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Prices do not include shipping from Florida.

Thanks.

$5.00
LARGE 3715 kHz crystals, New In Box - $8.00 each.
11 Pin Octal style Plugs - $4.00 each
Antique Headset with boom microphone - $15.00
Language Lab Communications Control Center - $9.00
Pye Radio Company CTCSS Decoder - now $4.00
EIMAC 4-400 Tube Duct-bases - pair for $15.00
2N3641 Power Transistor NPN - $2.00 each.
2N1489 Power Transistor NPN - $2.00 each.
2N1724 Power Transistor - $4.00 each.
AC Power Switch with 7.5A Circuit Breaker - $2.00
each
600 ohm to 600 ohm transformers - I have two
types.
Larger ones rated 1 watt from 250 to 6000 Hz -
$15.00 each.
Smaller ones rated 0.5 watt, 300 - 3500 Hz -
$12.00 each.

850. WANTED: Belt Clip For Icom IC-32AT

Yahoo group: hamstuff
Date: 2006-05-17 11:54:19 UTC
From: Will Sperling
Topic: 850 Message: 850

I'm still looking for the metal belt clip and retention screws for my Icom IC-32AT dual-band HT (NOT the W32AT!). If you have this clip and wish to part with it (and the screws), please advise. Thank you!

Will Sperling, K9WSS

Topic: 851 Message: 851

Sunn Battery Co. sells a rotary belt clip they say will fit several radios including Icom.

http://www.sunnbattery.com/

Then click on "Online Catalog", then "Radio Accessories", then "Rotary Belt Clip". You might have to call them to confirm it will fit your model.

Good Luck,
Pete

853. TenTec items FS

Yahoo group: hamstuff
Date: 2006-05-20 12:20:02 UTC
From: Ken Simpson, W8EK
Topic: 543 Message: 853

TenTec Items For Sale:

TenTec Delta 580 HF transceiver
This transceiver will cover from 160 thru 10 meters with 100 Watts output. It has a nice red LED digital readout. Notch filter is built in. Of course it has the CW QSK that TenTec is famous for. It needs 13 V DC at about 20 amps to operate. This particular Delta works 100%, and looks very good also. The PTO has been rebuilt in the last couple years, so it works really great. Original manual is included for $300.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C, some Argonauts, Corsair, and others. It will work with other rigs (such as the Triton), with minor mods to get the right connections.
The 299 is used primarily for blind hams who can not read the frequency readout on the transceiver. By pushing a button, it will "speak" the frequency (to tenth of a KHz). A front panel switch permits selection of the entire frequency, or you can eliminate the MHz, and give only the KHz. There is also a volume control on the front panel.
Of course it can also be used to give a "voice digital readout" to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically it has some minor wear. $ 190

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. I am not positive if TenTec made this, or if it is homebrew to look like TenTec. If it is homebrew, it certainly is very professionally done. $150

Prices do not include shipping from Florida.

Thanks.

854. FS: NEW Rackmount Chassis

Yahoo group: hamstuff
Date: 2006-05-20 17:19:27 UTC
From: Brian Carling
Topic: 854 Message: 854

FOR SALE:

Homebrewer's 19" Rack-mount Chassis, Brand New...

This is a top quality 17" X 11" X 3" aluminum box chassis
and includes the bottom cover plate. All parts of it are
brand new and in excellent shape.

It comes with the mounting hardware brackets already
attached for mounting it with four screws to a set of
standard 19" rack brackets.

The chassis ALSO comes with a used set of side brackets
for mounting it in a standard 19" rack. These brackets are
6" high but will accomodate this chassis and one other
rack mount item just fine. They are painted black and are
in excellent, used condition. Great for any homebrew project!

Available for $24.00 plus shipping.

855. FS laptop.

Yahoo group: hamstuff
Date: 2006-05-21 21:39:59 UTC
From: goshawk
Topic: 855 Message: 855

hello list,
up for grabs is my laptop, it has seen some use, but has never been travelled, so hardware wise, should be in very good condition.
specs are, 2.6GHZ processor, 512MB memory, 30GB hd, (partitioned in to a 10GB C and a 20GB d drive) dvd reader/cd writer drive, 2 USB ports (not sure if 2.0 or 1.1), both modem and Ethernet ports, parallel port, PS2 port, monitor port, and another one that I don't know what it is for.
at the moment it is running win98SE, with all available security updates, and an older version of window-eyes, I think it is 4.2.
unfortunately, this machine does tend to lock up quite a bit, but can work well when it feels like doing so, it could probably benefit from a good reformat, and should be able to cope with XP ok, but as I have never run it on this machine, please don't quote me on that, also battery may need replacing.
comes with case, driver cd, power supply and modem lead with UK phone line plug, those are just the basics, but that is far from all!
I will also include the following kit with this package,
PS2 trackball (this will also work from serial port), USB number keypad with built in 2 port hub, 3 fan USB powered cooler pad, extra USB cd rom drive (with its software and manual), USB to serial converter (has single 9pin serial port and appears to also have a PS2 port), 2 powered 4 port USB hubs, and a new unopened original windows 2000pro sp4 disk.
will leave this open to sensible offers, and will only ship to the UK.
this could be a very nice machine when setup properly.
if interested or for anymore info, please either call on 02084785841, or email, goshawk@...
but please do not ask for the make or model, as I do not know.

Simon

858. FS: POWER SUPPLY FOR KENWOOD TS511s

Yahoo group: hamstuff
Date: 2006-05-22 10:08:19 UTC
From: Brian Carling
Topic: 858 Message: 858

Hello TRIO fans... I have FOR SALE:

500 Watt Kenwood PS-510 AC Power Supply. - very
nice condx.

This husky 120V AC supply matches the Trio-Kenwood
TS511S
HF Transceiver. As featured on Page 5 of QST for
September 1972. Has built-in speaker.
Great condition - Very sharp looking. This supply
puts
out 800V DC at 625 mA P.E.P. along with all of the
filament, bias and other lower voltages needed.
This is a pretty hard piece to find nowadays.
Complete, untested and sold as-is, but will
guarantee
the transformer is OK. Great for other rigs or
even for homebrew projects. Excellent condition.

Available for $150.00 plus shipping

Picture and details at:
http://www,af4k.com/radios.htm

Heath items for sale:

Heath HD-15 phone patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as an
interface to your sound card for PSK31, etc. It is in good
shape. Paper work included for $ 25.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 "Cantenna" Dummy Load
No check marks in book. $8

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Heath parts For Sale:

Cover for Heath Wattmeter
This is the inverted "U" cover that fits the Heath HM-102 and
HM-2102 wattmeters, and maybe other units. No scratches,
dents, or dings that I can find. $12

Parts from Heath HW-202, 2 meter crystal control transceiver
Note: These parts may also work with an HW-2036 trnasceiver
Front Panel - $5
Chrome bezel for front - $ 5
Rear panel w/ heat sink, and final PC Board assembly $10
S meter - $ 5

SB-400 meter switch - $5

Mu Metal shield for 3 inch CRT
From the SB-614, but the same one is used for the SB-610,

and other units. It should fit most 3 inch CRTs. $10

I still have a few parts from an SB-614 monitor scope,
including focus controls, position controls, etc. I do NOT
have the power transformer or high voltage caps.
Please let me know what you might need.

Prices do not include shipping from Florida.

Thanks.

862. Wattmeter / SWR Bridges FS

Yahoo group: hamstuff
Date: 2006-05-29 12:02:55 UTC
From: Ken Simpson, W8EK
Topic: 833 Message: 862

Wattmeter / SWR Bridges For Sale:

Daiwa CN-520 "Cross needle" Wattmeter
This wattmeter does it all. It covers from 1.8 to 60 MHz, which means this one meter will measure power on all HF ham frequencies, plus six meters. It would be ideal for some of the new multiband rigs that have 1.8 to 55 MHz coming from one antenna connector, and 2 meters and 440 MHz from a separate connector. It has 2 power scales of 2000, and 200 watts on forward power, and 400 or 40 watts reflected, and uses a nice cross needle meter to read both forward and reflected power at the same time, with a cross scale for SWR. It works fine, and looks fine also. With paper work for $65.

Dual meter SWR Bridge:
Calrad 65-287 (same as Swan SWR-1 A)
This unit has two meters on it. The meter on the left reads forward power and the meter on the right reads reflected power. It is in a heavy metal enclosure with two SO-239 connectors coming out of the ends. It covers all HF frequencies, plus six meters, and also 2 meters with reduced accuracy and power. It works fine and looks like new. Not a scratch on it. It even still has the protective caps on the coax connectors. $ 25

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and reflected power with either 100 W or 10 W full scale. It is relatively small, making it great for mobile operation. Of course with a 10 W scale, it would be useful for QRP operation as well. $18

Prices do not include shipping from Florida.

Thanks.

865. FS: VERNIER REDUCTION DRIVES

Yahoo group: hamstuff
Date: 2006-06-01 13:53:26 UTC
From: Brian Carling
Topic: 865 Message: 865

FOR SALE:

REDUCTION DRIVES by JACKSON BROTHERS.
Brand new dial drives for 1/4" shaft. Extra nice brass construction.
These appear to be Jackson Brothers units with a 5:1 or 6:1 tuning ratio.
These are the same as used in the Heathkit HW-101, some Swan models and
other rigs.
Two hole mounting for front panel is on 1-1/4" centers.
The brass shaft is 1" long and overall dimensions are:
1-1/2" across the mounting ears. Drive body is 1" diameter.
Accomodates any normal 1/4" shaft on tuning device.
Several are available for $13.00 each plus shipping.

Picture and details at:
http://www.af4k.com/miscpart.htm

866. FS: REALISTIC DX150 and DX160 RECEIVERS

Yahoo group: hamstuff
Date: 2006-06-01 13:45:34 UTC
From: Brian Carling
Topic: 866 Message: 866

FOR SALE:

REALISTIC DX150 and DX160 SHORTWAVE RECEIVERS.

This is a general coverage Shortwave and AM band receiver covering
535 kHz to 30 MHz in several bands, with bandspread tuning for the
ham bands etc. Single conversion design produces extra clean signals.

The DX160 model includes the 150-400 kHz LF (longwave) band.
The DX150 does not. Made in Japan 1975-1980,
Voltages: 120 V AC OR 12 VDC.
Coverage: 150-30000 kHz Readout: Analog, Modes: AM, SSB & CW,
Selectivity 4 kHz, Single Conversion Superhet.
Bands: 150 - 400 kHz,
535 - 1600 kHz, 1550 - 4500 kHz, 4.5 - 13 MHz, and 13 - 30 MHz.
Bandspread bands: 3.5-4, 7-7.3, 14-14.35, 21-21.4 and
28-29.7 MHz plus CB channels 1-23. Headphone jack, S-Meter, Mute Line
ANL, Dial Lamp, Standby, Bandspread, Antenna Trimmer, AVC.
New Price: $160 Used Price: $90 - 145
Dimensions: 14.5" wide X 6" high X 9" deep.

I have several of these receivers available for sale. Three are DX150 models.
The rest are all DX160 models. Some of them have all of the original knobs.
Some have one or two that are different. All of the receivers are being sold
as-is. They are complete unless otherwise noted. At this point they are all
untested and might work fine. Most of these need a new AC line cord.
The antenna connections have all been changed to BNC receptacles but that is
no big deal and it's very easy to change one of these to an SO-239 if desired.
Some of these may have an extra sticker or two.

Most of these sets look a little used, and show some wear, but they would be great for a restoration project or to use as is if you are not looking for a collector's model, beauty queen receiver.

First come, first served means you will get the best choice up front if you buy now. I do not know if they work. I have not tested them,but since they were all removed from service from an active company when they were shut down, there is good reason to think that most of them work fine as-is. If you want them tested, then the price is going to go up a little, naturally.

These sets typical sell used in the range of $95.00 to $125.00.

I have ONE with no case for $25.00 plus shipping.
I have one with a slightly dented case for $30.00 plus shipping.
The others are all available for $45.00 each plus shipping.

Pictures and details at:
http://www.af4k.com/radios.htm

867. FS: NEW CRYSTAL FILTERS 1650 kHz

Yahoo group: hamstuff
Date: 2006-06-01 13:41:29 UTC
From: Brian Carling
Topic: 867 Message: 867

FOR SALE:

NEW SSB Crystal Filters. 1650 kHz center
frequency.
I have no technical data on these.
They are brand new and in great shape. Simple
connection with IN, OUT and
SHIELD. Labelled as NETCOM Center Frequency 1650
kHz MDL. 1435.
Will sell for $5.00 each or 5 for $20.00 plus
shipping.

Picture and details at:
http://www.af4k.com/miscpart.htm

868. Phone patches FS

Yahoo group: hamstuff
Date: 2006-06-03 13:54:04 UTC
From: Ken Simpson, W8EK
Topic: 868 Message: 868

Phone patches For Sale:

Johnson Viking Phone Patch - Model 250-46

This phone patch is made to be mounted vertically beside the rig. It is about 6 inches high, 2 inches wide and 3 inches deep. It is possible that the face plate can be removed, and it made to be mounted horizontally, but I have not done that. The reason I say this is that there are feet on the bottom, and on the left side. Maybe the feet on the left side are to protect the rig. In any case, it has 3 pots on the front for Null, Receive Volume, and transmit gain, along with a switch for phone patch or microphone. On the back is a terminal strip for speaker and phone line. The microphone input has the 2 pin Amphenol connector like used by Johnson and many others in that era.

Cosmetically, it is extremely good. Paint is nice and lettering close to perfect. The only scratch is a very, very minor scratch near the switch that switches between mic and phone patch. $45

Heath HD-15 phone patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to your sound card for PSK31, etc. It is in very good shape. Paper work included for $ 25.

Prices do not include shipping from Florida.

Thanks.

870. VHF and UHF mobile antennas and mounts FS

Yahoo group: hamstuff
Date: 2006-06-10 14:51:28 UTC
From: Ken Simpson, W8EK
Topic: 870 Message: 870

VHF and UHF Mobile Antennas and Mounts For Sale:

VHF (2 meter) antennas:

Larsen NLA-150 coil only
For use with a 5/8 wave (approx 4 foot) antenna
Fits the Larsen NLA mount and has about 3 db gain when
used with a 5/8 wave whip. In very good shape. $11

Larsen NMO-150 coil only
Fits the NMO mount made by many different companies
(including Larsen), and provides about 3 db gain, when
used with a 5/8 wave (about 4 foot) whip. $18

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $6 each if you need them.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna
(about 19 inches on 2 meters, but can be cut for 220 or 440
MHz). Good condition for $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Antennas for 450 MHz:

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain on
the 70 cm band. Stacked whip is included. In nice shape. $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax. It does
not require a ground plane, so is useful on sailboats, and
other places where a ground plane is not available.
OM-450 - For 70 cm band. Includes "stacked" whip for 5 db gain.
Good condition for $20.

Mobile antenna mounts for sale:

Larsen NLA-MM
Magnetic mount for use with Larsen NLA mount antennas, such
as the NLA-Q, NLA-150, and NLA-450. It includes coax with a
PL-259 connector, and is in good shape. $22

Larsen NMO-MM
Magnetic mount for use with MNO-Q, NMO-150, and NMO-450
antennas made by Larsen and others. Coax is included, with a
PL-259 connector. Very nice condition for $25

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

873. For Sale: TUBE RF FINAL PARTS

Yahoo group: hamstuff
Date: 2006-06-11 12:00:57 UTC
From: Brian Carling
Topic: 873 Message: 873

For Sale: TUBE RF FINAL PARTS

Pair of EIMAC 4-125A Tubes with ceramic sockets
and plate caps.

Rated for maximum plate voltage of 3000V at
200 mA each. Great for a homebrew 600-800 Watt
class linear amplifier. These are good,
used RF power tubes that look like they have
very low hours. The paint is still red.
Will sell the pair for $50.00 plus shipping.

RFC plate choke - special pile-wound choke,
great for the ham bands, and just right for
these tubes, although it wlll handle up to
1 amp plate current. Available for $22.00

TRIAD 120V filament transformer for these two
tubes - first quality. $20.00

Barker & Williamson FC15 filament choke for these
tubes $20.00

See PICTURE and more details at:
http://www.af4k.com/miscpart.htm

882. Astron power supplies FS

Yahoo group: hamstuff
Date: 2006-06-17 14:55:00 UTC
From: Ken Simpson, W8EK
Topic: 804 Message: 882

Astron power supplies For Sale:

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter, although the ammeter is not
original. Of course it works fine. Cosmetically, I can not
find any scratches. $90

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps.
It works fine and looks fine also. $55

Prices do not include shipping from Florida.

Thanks.

883. How To Master The Art Of Making Money Online

Yahoo group: hamstuff
Date: 2006-06-18 03:21:35 UTC
From: Mino Cagen
Topic: 883 Message: 883

Yeah!! A home business, that is, where I can easily make the extra money, a second income or even create a full time job. Is that what most people think when they start looking for a job or business online? Guess what, they are not even wrong. The only problem is, it takes a lot of work to find out how to actually achieve the easy money.

So since the title says how to master the art of making money online let us look at the main issues you need to focus on.

http://money-investment-guide.blogspot.com/2006/06/how-to-master-art-of-making-money.html

884. FS - Radio DIALS / Verniers

Yahoo group: hamstuff
Date: 2006-06-20 12:14:23 UTC
From: Brian Carling
Topic: 884 Message: 884

FOR SALE: Vernier reduction drives etc.
(Pictures - see below)

First is a silver plated 5:1 ratio vernier drive with knob.
It has a scale of 0-200 on a 360 circle. Dimensions are
4-1/8" diameter with comfortable 2" diameter fluted knob.
Accepts standard 1/4" shaft.
Available for $10.00 plus shipping

Large, newer style 9:1 ratio vernier drive with knob.
It has a scale of 0-100 on a 180 degree arc.
Dimensions are 4" diameter with comfortable
2" diameter fluted knob. Accepts standard 1/4" shaft.
Available for $10.00 plus shipping

NATIONAL Velvet Vernier Reduction Drive.
This is the standard velvet vernier reduction drive
with 4 mounting screws. Has 0 - 150 scale on
270 degrees of vernier skirt which is 3" in diameter.
Accepts standard 1/4" shaft. Excellent shape.
Has paint on the unused side - works fine.
Available for $10.00 plus shipping

JACKSON BROTHERS VERNIERS
Brand new dial drives for 1/4" shaft. Extra nice brass construction.
These appear to be Jackson Brothers units with a 5:1 or 6:1
tuning ratio. These are the same as used in the Heathkit
HW-101 transceiver and other rigs.
Two hole mounting for front panel is on 1-1/4" centers.
The brass shaft is 1" long and overall dimensions are:
1-1/2" across the mounting ears. Drive body is 1" diameter.
Accomodates any normal 1/4" shaft on tuning device.
A few left at $13.00 each plus shipping.

Pictures and details at:
http://www.af4k.com/miscpart.htm

885. FS: Pair of CR1A 40m CW Crystals

Yahoo group: hamstuff
Date: 2006-06-20 21:03:11 UTC
From: Brian Carling
Topic: 885 Message: 885

FOR SALE:

Two type CR-1A/AR military crystals for 40m CW.
For use with military or homebrew rigs etc.

7010 kHz and 7105.5 kHz
These are working fine and have the thicker pins
spaced 1/2 inch apart and about 1/8" diameter.

Will sell the pair for $15.00 plus $6.00 shipping.

886. FS: Isolation Transformer

Yahoo group: hamstuff

FOR SALE:

1000 watt Isolation Transformer. for 120V AC.
by Northlake Engineering Co.

Has four IEC outlets and heavy duty industrial
power cable. Heavy gauge, light gray metal case
with rubber feet. Like new condition.

Has a nice breaker switch for power ON/OFF.

Available for $45.00 plus shipping

887. HF Preamp / preselector FS

Yahoo group: hamstuff
Date: 2006-06-24 17:38:27 UTC
From: Ken Simpson, W8EK
Topic: 887 Message: 887

For Sale:

Preamp / Preselector for 40 thru 10 meters

This is a preamp / preselector using a dual gate MOSFET,
and requiring about 9 V DC to operate. It has a tuned
circuit in it that can select 40 thru 10 meters, and tune out
some of the "crud" from images, strong broadcast stations,
etc., as well as giving additional amplification for receivers that
have marginal gain, especially on the higher HF bands, such
as many of the older receivers. It is housed in a very nice
enclosure about 5 1/4 inches wide, 3 inches high, and 6
inches deep. The on-off switch will also bypass the unit,
when turned off.

It is in nice shape for $20 plus shipping from Florida.

Thanks.

889. Free Items and FS: PLATE TRANSFORMER

Yahoo group: hamstuff
Date: 2006-07-03 16:26:38 UTC
From: Brian Carling
Topic: 889 Message: 889

I have several give-away items and a large
plate transformer for sale.

FREE:
Realistic speaker switching box - let's you connect
your stereo, computer or other sound systems to
multiple speakers. Will connect the left and right
channel of stereo amplifier to THREE different sets of
stereo speakers. Free for shipping.

FREE:
Language Lab Communications console.
5 way intercom with switching and speaker built into a
high quality sloping front cabinet. Free for shipping.

FREE:
300 OHM Clip-on Connectors. These are the ones
you use to connect 300 ohm twinlead to antenna
terminals, or to quickly conect any cable to
a dual screw-terminal type connection.
QTY 5 available free for shipping.

PLATE TRANSFORMER:
QRO Plate transformer with 120V AC primary.
Secondary is 2500V CT at 500 mA. Terminals are on a
ceramic plate on top. Dimensions: 8" X 7 " X 10" tall
Quantity 1 only. I need the space, so it is
available for $20.00 plus shipping.

890. HT speaker microphones FS

Yahoo group: hamstuff
Date: 2006-07-04 14:05:16 UTC
From: Ken Simpson, W8EK
Topic: 782 Message: 890

HT speaker microphones For Sale:

Pryme Speaker mic
Fits Yeasu VX-1, 2, 5, 6, 7, FT-60, and others that take
the single pin connector with 4 conductors.
Close to new condition for $25.

Speaker microphone for most HTs
It says Densei SM-505 on it, but appears to be the same
as the Icom HM-46 speaker-mic. It fits Icom, Yaesu, and
others that take the 2.5 mm and 3.5 mm connectors.
Very nice condition for $18.

Wilson speaker-microphone
The color matches the Mark II and Mark IV Wilson HTs, but
it can be used on others as well. Stripped and tinned leads.
It works fine, and looks very, very nice. $18

Yaesu MH19A2B ear bud and mini-mic.
With 2.5 mm and 3.5 mm connections.
It works fine and looks fine. $18

Prices do not include shipping from Florida.

Thanks. 73,

893. 2 meter crystals FS

Yahoo group: hamstuff
Date: 2006-07-08 22:03:00 UTC
From: Ken Simpson, W8EK
Topic: 893 Message: 893

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter xtals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 xtals, like were used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have cross
references for the various rigs, so I will know what you need
if you give the rig.

I also have 224.94 xmt for Midland 13-509 and most other xtal rigs

440 MHz for SBE-450, and maybe others:
444.20 receive
449.20 xmt

Crystals are $5 each, plus shipping from Florida.

I have special crystals that are used in the Kenwood TS-700
to give crystal control when needed (more stability than the VFO)
146.19
146.64
These are special cut crystals, so they are $10 each.

Thanks.

895. FS: E.F. Johnson 6N2 VFO

Yahoo group: hamstuff
Date: 2006-07-15 18:22:48 UTC
From: Brian Carling
Topic: 895 Message: 895

FOR SALE:

E.F. Johnson 6N2 VFO. - very good condition.

This VFO unit comes with an 8-pin (octal) power
supply plug and a 1/4-inch phone jack
for the signal output. It was used until a few
years ago with an old AM rig on
the two meter band and it was very stable and
accurate, typical of wonderful
E.F. Johnson equipment from the old days.
This VFO will cover both the six and two meter
bands and will make a great addition
to your vintage station for these bands.
Available for $65.00 plus shippping.

For picture and details see:
http://www.af4k.com/radios.htm

Please reply only via private e-mail, not to the
list.

with 1/4" X 1/2" shaft.

Assortment of 10 high voltage ceramic
capacitors, 3 to 6 kV.

Superstar mobile microphone, with good coil cord, 4-pin plug, used

FT101E style microphone with 8-pin connector. Not sure what rig, used.

Kenwood HT battery charger type WO9-0315, used.

Computer PCI card with one parallel and 1 serial port.

All of the above items are $5.00 each plus shipping.
Combine items to save on shipping.

897. VHF and UHF antennas and mounts FS

Yahoo group: hamstuff
Date: 2006-07-22 12:04:59 UTC
From: Ken Simpson, W8EK
Topic: 897 Message: 897

VHF and UHF Mobile Antennas and Mounts For Sale:

VHF (2 meter) antennas:

Larsen NLA-150 coil only
For use with a 5/8 wave (approx 4 foot) antenna
Fits the Larsen NLA mount and has about 3 db gain when
used with a 5/8 wave whip. In very good shape. $11

Larsen NMO-150 coil only
Fits the NMO mount made by many different companies
(including Larsen), and provides about 3 db gain, when
used with a 5/8 wave (about 4 foot) whip. $18

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $6 each if you need them.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave (about 19
inch) antenna. Good condition for $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Antennas for 450 MHz:

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain on
the 70 cm band. Stacked whip is included. In nice shape. $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax. It does
not require a ground plane, so is useful on sailboats, and
other places where a ground plane is not available.
OM-450 - For 70 cm band. Includes "stacked" whip for 5 db gain.
Good condition for $20.

Mobile antenna mounts for sale:

Larsen NMO-MM
Magnetic mount for use with NMO-Q, NMO-150, and NMO-450
antennas made by Larsen and others. Coax is included, with a
PL-259 connector. Very nice condition for $25

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

898. TenTec remote VFO and other items FS

Yahoo group: hamstuff
Date: 2006-07-22 15:00:05 UTC
From: Ken Simpson, W8EK
Topic: 898 Message: 898

TenTec items for sale:

TenTec 243 remote VFO for Omni 545 and 546
This remote VFO is designed to operate with the early
Omni series to provide a second VFO for operating "split".
In addition to offering the normal split operations, it also
permits one to receive on two frequencies simultaneously.
Its styling matches the Omni, including the extruded ring
around the bezel.

This particular VFO looks like it just came out of the box
from TenTec. There is not a scratch, dent, ding, or wear
mark on it. It looks perfect. All bulbs work as well, and
the PTO is nice and smooth. Of course it operates fine
also.

Manual is included for $140.

Other TenTec items:

TenTec 217 narrow CW 500 hz Crystal Filter
It can be used in the Omni 546 (series B and C), Omni V, VI,
Argosy, or as roofing filters in the Orion I. It is for the 9 MHz IF.
Like new with paper work for $75.

TenTec 218 narrow SSB / wide CW filter
1800 Hz, for the 9 MHz IF. Will work in the older Omni
546 (series B and C), the newer Omnis in the 9 MHz IF,
and in the Argosy, and can also be used as a roofing
filter in the Orion I. Like new, with the paper work
for $75.

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 110

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a

volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically
it has some very minor wear. $ 190 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

Picture and details at:
http://www.af4k.com/radios.htm

900. FS: RADIO SHACK DX150A and DX150B Receivers

Yahoo group: hamstuff
Date: 2006-07-22 22:38:14 UTC
From: Brian Carling
Topic: 900 Message: 900

FOR SALE: RADIO SHACK DX150A and DX150B Receivers
in fairly good condition
This is a general coverage Shortwave and AM band receiver
covering 535 kHz to
30 MHz in several bands, with bandspread tuning for the ham
bands etc.

Made in Japan, Voltages: 120 V AC OR 12 VDC.
Readout: Analog, Modes: AM, SSB & CW, Selectivity 4 kHz,
Single Conversion Superhet
Bands: 535 - 1600 kHz, 1550 - 4500 kHz, 4.5 - 13 MHz, and
13 - 30 MHz.
Bandspread bands: 3.5-4, 7-7.3, 14-14.35, 21-21.4 and 28-29.7
MHz plus CB channels 1-23
Headphones jack, S-Meter, Mute Line, ANL, Dial Lamp, Standby,
Bandspread, Antenna Trimmer, AVC.
New Price: $160 Used Price: $75 - 95
Dimensions: 14.5" wide X 6" high X 9" deep.

I have three of these receivers available for sale.
There are 2 DX150A models, ONE DX150B (with mechanical
filter.)
Some have one or two knobs that are different. A couple of these
have the AF gain pot removed. All of the receivers are being sold
as-is.
They are complete unless otherwise noted.
Each of these needs an AC line cord. The antenna connections
have been
changed to BNC receptacles but that is no big deal and it's very
easy to change one
of these to an SO-239 if desired. Some of these may have an extra
sticker or two.

Most of these sets look a little used, and show some wear, but they
would
be great for a restoration project or to use as is if you are not
looking for a
collector's model, beauty queen receiver.

I do not know if they work. I have not tested them.
They will need an AC cord and some need a volume pot.

NOTES:
DX-150A manufactured 1969 - 1971 - has FET front-end.
DX-150B manufactured 1972 - 1974 - has Five FETs AND
mechanical filter.

I will supply a copy of the operators manual AND the service manual with each
of these radios. The manuals include the schematic diagrams etc.

The DX150B receiver is available for $45.00 plus shipping.
Two radios (DX150A) are available for $39.00 each plus shipping

907. Coaxial cable FS

Yahoo group: hamstuff
Date: 2006-08-12 13:55:56 UTC
From: Ken Simpson, W8EK
Topic: 907 Message: 907

Coaxial cable for sale:

I have some lengths of coaxial cable available. Most have
PL-259 connectors on each end. Most are either 50 or 100
feet long. The coax is mainly Belden 8214, which is RG-8
low loss foam. Some lengths may be other equivalent brands.
All will be checked for loss before shipping, and will be within
10% of published specs (that is as close as I can check).

100 feet, with PL-259 on each end - $44

50 feet with PL-259 on each end - $ 24

Other lengths may be available, and I have a few with a PL-259
on only one end. Most of the shorter lengths are now gone, but I
do have a few left. Please let me know what you need, and I will
see what I can do.

Coaxial cable jumpers with N connectors

These jumper cables are made with solid (not foam)
dielectric RG-213 type cable, and were intended to be
used at the top of the tower to connect the antenna.

Two feet long, Male N to Female N. Female end has a
weatherproof rain boot. $8

Ten feet long, with Male N connector on each end. $10

Eight feet long, with Male N on one end, and an SO-239
connector on the other end, with rain boot. $12

Prices do not include shipping from Florida.

Thanks.

911. Ham Rotors and accessories FS

Yahoo group: hamstuff
Date: 2006-08-19 11:20:33 UTC
From: Ken Simpson, W8EK
Topic: 911 Message: 911

Ham Rotors and accessories For Sale:

Ham IV Rotor and Control Box
The Ham IV is rated for 15 square feet of antenna, up to a 40 foot boom, and has a newer, heavier duty brake. It has a turning power of 800 lbs and a brake power of 5000 pounds. There are 96 dual race ball bearings. It has the newer black control box. This one is in very nice shape, and includes all of the stainless steel hardware, along with the paper work. These go for about $550 new. Get this one for half price -- $275.

Ham III Rotor and Control Box
The Ham III is similar to the Ham IV, but an earlier version. It is for up to a 30 foot boom on the antenna. Other specs are similar to the Ham IV. The control box has a metal enclosure. This one is in good shape, with all of the stainless steel hardware, for $ 200.

Ham M Rotor and Control Box
The Ham M is a bit older than the Ham IV, but still a very healthy rotor. It is rated for up to a 24 foot boom antenna. This one is in good shape, but has had a couple modifications to the control box, to make it similar to the Ham II and Ham III control box. Two knobs have been added at the lower left and lower right, below the meter. One is an on-off switch, and the other is the calibration control, brought out to the front so one does not need to reach behind the control box, as was done originally. In addition, a zener diode has been added to stabilize the voltage for the position indicator. With paper work and stainless steel hardware for $185.

Ham M control box only
This is a series 4 control box only, and is in nice condition. Paper work is included for $70.

Lower mast support
Heavy duty type, made to go with the Ham IV. I do not think this one has been used, as it is still in the plastic. It includes all of The stainless steel hardware. New, these go for about $90. Get this one for $50.

Lower mast support
This is also the heavy duty type, as used on a Tail Twister rotor. It is heavier duty than the Ham IV lower mast bracket. This one has been used. It includes the clamps to clamp to the mast, and one stainless steel U bolt and hardware. One U bolt is

missing, but can easily be obtained locally. $45

Prices do not include shipping from Florida.

Thanks.

From: Brian Carling
Topic: 915 Message: 915

FOR SALE:
DVI to DVI DUAL LINK Video Cable
DVI is one of the latest interconnection technologies which
provides one of the highest quality
Digital Video connections available. Because the signal remains
digital from source to display
there is no loss from analog conversion.

When used with compatible equipment this cable will give you the
best possible picture from your
Projector, Plasma etc. Suitable for High Definition image
resolutions such as 480p, 480i, 720p and 1080i.

These are Very High Quality DVI Cables. Compare our prices and
shipping rates with the competition,
These are the best value around! These high quality DVI cables
offer the best quality cable and features
at the best value.

These cables are used with some of the newer flat panel monitors
and were never used.
Use a DVI cable to connect your computer to a digital monitor or
LCD/Plasma television.
This item is a brand new standard DVI to DVI video cable. Connect
that DVI input on your monitor to your
DVI video card output. This cable will do the trick... Guaranteed to
work.

Color: Black
Length: 6 feet
Condition: Brand new

Check around, you'll find it hard to get a DVI cable with Ferrite
chokes for such a low price.
The stores like Office Depot and Staples sell them for $65.00 or so.
I have plenty of these available for $4.00 each plus shipping

Picture and details, see:
http://www.af4k.com/miscpart.htm

916. FS: Reduction drives

Astron power supplies For Sale:

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter. Of course it works fine. $90

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps
intermittent duty. It works fine and looks fine also. $55

Prices do not include shipping from Florida.

Thanks.

919. 2 m and 440 MHz mobile antennas and mounts FS

Yahoo group: hamstuff
Date: 2006-09-02 12:59:37 UTC
From: Ken Simpson, W8EK
Topic: 565 Message: 919

VHF and UHF Mobile Antennas and Mounts For Sale:

VHF (2 meter) antennas:

Larsen NLA-150 coil only
For use with a 5/8 wave (approx 4 foot) antenna
Fits the Larsen NLA mount and has about 3 db gain when
used with a 5/8 wave whip. In very good shape. $11

Larsen NMO-150 coil only
Fits the NMO mount made by many different companies
(including Larsen), and provides about 3 db gain, when
used with a 5/8 wave (about 4 foot) whip. $18

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $6 each if you need them.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave (about 19
inch) antenna. Good condition for $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Antennas for 450 MHz:

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain on
the 70 cm band. Stacked whip is included. In nice shape. $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax. It does
not require a ground plane, so is useful on sailboats, and
other places where a ground plane is not available.
OM-450 - For 70 cm band. Includes "stacked" whip for 5 db gain.
Good condition for $20.

Mobile antenna mounts for sale:

Larsen NMO-MM
Magnetic mount for use with NMO-Q, NMO-150, and NMO-450
antennas made by Larsen and others. Coax is included, with a
PL-259 connector. Very nice condition for $25

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

920. FS: Western Electric 416B Tube

Yahoo group: hamstuff
Date: 2006-09-03 17:44:13 UTC
From: Brian Carling
Topic: 920 Message: 920

FOR SALE:

Western Electric 416B Planar Triode Tube in excellent
condition. Appears to be new, but no box.
Equivalent to 6280... 416B; Vp=200V, Ip=30ma.
Suitable for making a small transmitter at up to 4 GHz.
Prized in Japan for hi-fi-audio.
Typical retail is $36.00 to $40.00

E-mail me for photo.

QTY 1 Available for $12.00 plus shipping

921. TenTec Paragon 585 HF xcvr FS

Yahoo group: hamstuff
Date: 2006-09-04 14:56:10 UTC
From: Ken Simpson, W8EK
Topic: 392 Message: 921

TenTec items for sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, and includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. Up to 100 Watts output,
that can be adjusted down to mw. This particular unit works
100% and looks fine also. Big inch thick manual is included.
TenTec sells these used for $795. This one is $650.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically
it has some very minor wear. $ 190

Prices do not include shipping from Florida.

Thanks.

924. EUROPEAN AMPLITUDE MODULATION AMATEUR RADIO GROUP

Yahoo group: hamstuff
Date: 2006-09-08 17:51:50 UTC
From: gvastianos
Topic: 924 Message: 924

EUROPEAN AMPLITUDE MODULATION AMATEUR RADIO GROUP

NEW YAHOO GROUP: http://groups.yahoo.com/group/eamarg/

This is a group for licenced amateur radio operators (HAMs) who are interested in the AMPLITUDE MODULATION (AM) mode of communications. The group exists to promote the AM operation in the HAM bands and provide information about operating events and technical matters.

EAMARG encourages regional AM activity insuring there is AM available somewhere on the amateur bands. Based on the fact that the majority of the AM calling frequencies in USA belong outside the european HF bandplans... one of the EAMARG main goals is to help in the establishment of AM calling frequencies that will be compatible with the HF bandplans of the european countries.

EAMARG future plans including the sponsorship of operating events and contests that will promote the use of Amplitude Modulation.

In order to join this group you must be a licenced radio amateur.

925. FS: Gonset Commander Mod Xfmr

Yahoo group: hamstuff
Date: 2006-09-10 18:01:33 UTC
From: Brian Carling
Topic: 925 Message: 925

T2 Modulation Transformer for Gonset Commander.
Works with Push-pull 7C5 or 6V6 tubes for about 15-20 watts,
using simple cathode bias.

Tested, and working fine, good condition with
mounting hardware.

Available for $22.00 plus shipping

926. FS: Terminal Boards

Yahoo group: hamstuff
Date: 2006-09-13 23:10:54 UTC
From: Brian Carling
Topic: 37 Message: 926

FOR SALE:

Terminal Boards, new.
Excellent fiberglass boards for homebrewing radios
or guitar amps etc. Each section has ten solder turrets in
two rows of five. There are five sections but these can
easily be broken down into five pieces each with four
mounting holes and measuring 2.625" X 1.5"
Overall dimensions: 13.125" X 1.5"
Have QTY 6 available for $5.00 each plus shipping.

FIVE-way turret type terminal strips - great for homebrewing.
Has two mounting holes and 5 turrets for mounting parts.
2.6" long. Multiple wires may be soldered directly to each turret.
These are top quality, new stock bakelite strips, great for building
classic homebrew tube radio or audio equipment etc.
Selling for $1.25 each or buy 10 or more for $1.00 each.
Shipping additional.

SIX-way terminal strips - great for homebrewing.
Has center mounting tab for ground connection. 2.6" long.
These are top quality, new stock bakelite tag strips, for
constructing homebrew tube radio and audio equipment etc.
Other sizes available. Inquire.
Selling for $1.25 each or buy 10 or more for $1.00 each.

Screw Terminal Board.
Excellent fiberglass board for homebrewing radios, test
equipment etc.Single terminal strip has a row of 8 screw terminals
with solder tags on the inside. Brand new, and never was used.
Dimensions: 4.25" X 0.625"
Have QTY 1 available for $5.00 plus shipping

For pictures and details see:

927. Hand microphones FS

Yahoo group: hamstuff
Date: 2006-09-16 15:06:55 UTC
From: Ken Simpson, W8EK
Topic: 759 Message: 927

Hand Microphones For Sale:

All work 100%, have coiled cords with stripped leads, and are low impedance (500 to 600 ohms) unless stated otherwise.

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a normal low impedance microphone. Like new. $40

Icom HM-8 touchtone microphone
The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones. Of course it also has the normal PTT switch. $35

Kenwood hand microphone
This mic originally came with the TR-7400. It is a nice small Kenwood hand mic. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Prices do not include shipping from Florida.

Thanks.

928. Misc Kenwood accessories FS

Yahoo group: hamstuff
Date: 2006-09-16 21:48:22 UTC
From: Ken Simpson, W8EK
Topic: 928 Message: 928

For Sale:

Misc. small accessory items for Kenwood rigs

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion
and the UHF (440 MHz) portion. It plugs in to the TW-4000
to provide the tones. No adjustments are normally needed.
This one is in its original box with paper work, hardware, etc.
$60

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert" in it. $15

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $3

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $12
Kenwood regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $25

Kenwood 2 meter BNC rubber duck, as originally furnished with
TR-2500 or TR-2600 HTs - $12

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

929. looking for Icom IC-F4 radios and accessories please.

Yahoo group: hamstuff
Date: 2006-09-18 13:58:27 UTC
From: goshawk
Topic: 929 Message: 929

hello list,
I am looking for Icom IC-F4 radios please.
these must be the version with the full keypad, and must be in good condition and full working order.
I am also looking for accessories for the same radios, such as cases, belt clips, extra batteries, chargers, and particularly multi chargers.
if possible, I would really also like to get hold of the software to program the radios, I already have the cable, but just can't get hold of the software anywhere!
I would prefer to buy from with in the UK, but will consider offers from outside the UK, as long as the items are sent by fast, insured, and trackable delivery services.

if anyone out there can help, please either call on 02081417811, or email to, goshawk@...
thanks in advance.

Simon

930. Vintage ham radio recordings and preservation

Yahoo group: hamstuff
Date: 2006-09-18 12:01:49 UTC
From: Brian Carling
Topic: 930 Message: 930

W5AMI has a great idea here folks:
ars.w5ami@...

It would be good if several of us could begin copying to MP3
files and preserving old tape recordings of ham QSOs.

Can anyone help supply some recordings?

------- Forwarded message follows -------

There are bound to be some folks out there who have possession of
vintage on-the-air recordings from the 60', 70' and 80's, maybe even
earlier. I know at one time Otis (K5SWK) had many, and some dating
back into the 50's. If these exist, they should not be allowed to
deteriorate or be overwritten before first getting them on digital for
preservation, either on the web or CD/DVD.

I propose that if you know of any such recordings, we somehow get
these copied. I would be willing to do some of them myself. Any
other takers?

It would be nice to have such a nostalgic and historic resource for
QSOs forgotten placed on a website or available on CD. Gary at
amfone.net might be willing to utilize space for such media, or I
would be willing to dedicate webspace for the project...gigs if
needed.

Let's get together on this and try to gather what we can for now and the future!

Anyone have contact with Otis lately? John/BXO? I know he used to
mention on the air that he had quite a library of tapes, however that
has been a long time ago.

I have also posted a message similar to this on amfone.net...

Brian / w5ami
E-mail: ars.w5ami@...

931. FWD: Vintage recordings and preservation

Yahoo group: hamstuff
Date: 2006-09-19 13:24:25 UTC
From: Brian Carling
Topic: 931 Message: 931

W5AMI writes:

------- Forwarded message follows -------
Within the next week, I will create a an upload system on the web that will allow those who already have MP3's or WAV recordings of vintage QSOs to send the file directly to an archive so that we can start getting all these in one place for playback.

I've developed a MySQL database system that was for use in scientific analysis and observations that I can modify to work more along the lines of this project, allowing users to categorize and/or filter the recordings they want to see listed, such as date range, mode, call-sign, region, etc., all dynamically. It would be a start at least, and I wouldn't have to code a a new system from scratch. So, the bottom line is this; soon after we start collecting enough MP3 files in the archive to make it worthwhile, they will be available for anyone to listen to.

Some of you have mentioned that you already have some audio files, so hang on to them and I will inform the group as soon as the upload section is complete and how you can access it.

With John's (KB6SCO) contribution in the media transfer/conversion and needed clean-up, I truly think this project could develop into a wonderful resource in amateur radio history.

I want to openly thank all of those who have expressed interest in this project so far. The amount of email I've received already has been an eye opener for me to see this through. My time is limited, however I will do as much as I can to keep things interesting. John's gracious offer to convert the media for anyone has added to the reality of this concept.

Remember, regardless of the media you have, John can most likely convert it, and return your original. John and I will work together on centralizing the archives so that the audio can be accessed in one place by means of browsing or search-able database queries. All you will need is a player for your operating system, Windows, Linux, etc. that will support MP3 media files.

Thanks Again!

Brian / w5ami
PS: Don't forget to spread the word that we are in search of vintage recordings of actual QSO's!

935. Many misc Kenwood accessory items FS

Yahoo group: hamstuff
Date: 2006-09-23 12:29:30 UTC
From: Ken Simpson, W8EK
Topic: 935 Message: 935

Many misc Kenwood accessory items for sale:

Kenwood MC-48, touch tone microphone
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector (TM-201, TM-211, TM-221,
TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440,
TS-570, TS-850, TS-870,TS-930, TS-940, TS-950,
TW-4000, etc.). Has UP and DOWN switches and PTT,
along with 16 digit touch tone pad. $ 50

Kenwood MC-46, touch tone microphone
Round, 6 pin connector, will go with any Kenwood rig
taking this kind of connector (TR-7600, TR-7730, TR-7800,
TR-7900, TR-8400, TR-9000, TR-9130,and others). Has
UP and DOWN switches and PTT, along with 16 digit
touch tone pad. $ 45

Kenwood MC-42 S hand microphone
This is the "standard" microphone that came with many
of the rigs such as the TS-430, TS-440, TS-930, and others
that take the round 8 pin mic connector that this one has
on it. It has "up" and "down" switches, as well as the
normal PTT switch. This particular MC-42 is in very nice
condition. $ 35

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $30

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood MA-4000 duplexer
Combines (or splits) 2 meter and 440 MHz signals into a
single coax cable. 2 m and 440 MHz connections are
about 8 inches of coax with a PL-259 on the end. The
common connection is an SO-239. In nice shape for $25.

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion
and the UHF (440 MHz) portion. It plugs in to the TW-4000

to provide the tones. No adjustments are normally needed.
This one is in its original box with paper work, hardware, etc.
$60

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert" in it. $15

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $3

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $12
Kenwood regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $22

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Service manual for Kenwood TR-2600 HT - $10

Service manual for Kenwood TW-4000 - $15

Operators manual for Kenwood TW-4000 - $15

Operators manual for Kenwood TR-2400 - $15

Prices do not include shipping from Florida.

Thanks.

938. Kenwood TR-2400, 2 m HT FS

Yahoo group: hamstuff
Date: 2006-09-30 11:45:49 UTC
From: Ken Simpson, W8EK
Topic: 938 Message: 938

For Sale:

Kenwood TR-2400, 2 meter FM HT

The TR-2400 covers the 2 meter band with about 1.5
watts of power. It has memories, scan, etc. Compared
to some of the newer HTs, this one is very easy to operate.

This particular TR-2400 works fine. It looks good, but not
mint. The battery pack has been replaced with NiMH
batteries, which seem to hold a charge fine, although
one never knows when they may need to be replaced.
The LCD display is clear, with no defects.

The TR-2400 had a place to install an optional PL subaudible
tone encoder. I have a new, still in the original package,
encoder that I will include with the HT. I planned to install it,
but never did.

Charger, rubber duck antenna, and paper work are included
for $60 plus shipping from Florida.

Thanks.

939. Vectronics VC-300 DLP antenna tuner FS

Yahoo group: hamstuff
Date: 2006-09-30 11:53:40 UTC
From: Ken Simpson, W8EK
Topic: 939 Message: 939

For Sale:

Vectronics VC-300 DLP HF antenna tuner

This is NOT the Viewstar VS-300 antenna tuner, but is a much more sophisticated unit. The VC-300 DLP has a fairly large cross needle meter for reading both forward and reverse power simultaneously, and hence the SWR. It will read either average or peak power, with scales of 30 Watts and 300 Watts. In addition, a dummy load is included inside, as is a 4 to 1 balun. The meter can be back lighted if you apply 12 V DC. The tuner also has an antenna switch built in, that will switch between "tuned" and "straight thru" operation, in addition to various antennas. It will tune 160 thru 10 meters.

These units sell for about $170 new. This one is in extremely nice condition, both electrically and cosmetically. The manual is included for $135, plus shipping from Florida.

Thanks.

Date: 2006-10-07 15:53:20 UTC
From: Ken Simpson, W8EK
Topic: 942 Message: 942

For Sale:

Icom R-71 A communications receiver

The R-71 A is a deluxe communications receiver covering
100 KHz to 30 MHz. Of course it is all solid state, and has
a 6 digit digital read out. The power supply is built in. It has
a 10 key pad for entering frequency, if you do not want to use
the normal knob. There are 32 memories that can be scanned
if desired. It will also scan the entire band, and has wide and
narrow filters, Pass Band Tuning, and many other features.

This particular R-71 A works 100% and looks very close to
new. No scratches, dent, or dings.

Paper work and the original box are included for $350 plus
shipping from Florida.

Thanks.

Date: 2006-10-15 19:04:03 UTC
From: Ken Simpson, W8EK
Topic: 946 Message: 946

Code practice oscillators for sale:

Nye Viking code practice oscillator
This includes the Nye 310-001 oval key on a nice base,
with a tone oscillator mounted on the same base. It is
powered by a 9 volt battery. Suggestion: Get the entire
code practice oscillator, then when you get your code
speed up, and need a nice key, remove the key from the
base (2 screws), and use it on the air.
This one works 100%, and looks really great. Not a scratch
on it. Just the key normally sells for $40 used, but get the
entire unit for only $50.

MFJ 557 code practice oscillator
This is a traditional code practice oscillator, with
adjustable volume and tone. It includes a straight key
on a nice base. Just like new. It operates from a 9 volt
battery. With paper work for $ 25.

Prices do not include shipping from Florida.

Thanks.

949. Heath SB-200 HF linear amplifier and other Heath items FS

Yahoo group: hamstuff
Date: 2006-10-21 17:32:42 UTC
From: Ken Simpson, W8EK
Topic: 949 Message: 949

For Sale:

Heath SB-200 HF linear amplifier

The SB-200 uses a pair of 572B tubes, and operates on
80 thru 10 meters. It may be used on SSB, CW, or digital
modes.

This particular amplifier puts out about 750 watts on 20 meters,
and has been tested for operation on all bands. Info on power
output on each band is available.

Cosmetically, it is in extremely nice condition. I can not find a
scratch on the case, although there is some very slight wear
near the on-off switch. Paper work is included for $370.

Other Heath items:

Heath HM-102 HF wattmeter.
Covers 1.8 to 30 MHz, with 200 W and 2000 W full
scale. It can also be used to check SWR, and has
a remote sensor that can either be left inside the meter,
or separated from the actual meter by about 3 feet.
SO-239 connectors in and out. This particular meter
is in very good shape. Paper work is included for $40.

Heath HD-15 phone patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as an
interface for PSK31, etc. It is in very nice shape. I can
not find a scratch on it. Paper work included for $ 25.

Heath Parts:

Heath Knobs for SB line
These are the knobs used on most all of the SB line, and
are the size with the 1 1/8 inch skirt. They are close to perfect,
with no defects that I can find. Five available for $5 each.

Heath outer cabinet for SB-600, SB-610, SB-630, etc.
This is the outer cabinet that matches the SB line that is about
10 inches wide, and 10 1/2 inches deep, with the rounded
corners. This one is in very nice shape, with no scratches,
dents, or dings. $20

Heath "Riser" Feet for SB line
This is a set of four feet for the SB line. It includes the two

"riser" feet to raise the front, plus the two regular feet for the
back. Hardware, including the long screws, is included.
Original Heath. $15

Parts for any of the SB line
LMO dial hardware - This is the hardware that goes above
the LMO. It includes the black "background" and the white
dial pointer, along with the dial lights at each end, plus the
bracket that holds all of this together. Bulbs included. $8

Parts from SB-400 xmtr (likely will also work with SB-401)
meter switch - $5
Mic/CW level control (dual pot) - $ 7
Pilot bulb mounting hardware, w/#47 bulb - $2

Parts from Heath HW-202, 2 meter crystal control transceiver
Note: Some of these parts may also work with an HW-2036 transceiver
Front Panel - $5
Chrome bezel for front - $ 5
Rear panel w/ heat sink, and final PC Board assembly $10
S meter - $ 5

I still have a few parts from an SB-614 monitor scope,
including position and other controls. I do NOT have
the power transformer, high voltage caps, or chassis
parts. Please let me know what you might need.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

953. MFJ switches and other misc items FS

Yahoo group: hamstuff
Date: 2006-10-28 13:18:37 UTC
From: Ken Simpson, W8EK
Topic: 953 Message: 953

MFJ items for sale:

MFJ 1272 switches to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-232, or the Kantronics KAM, etc. The small box has
a socket to plug your microphone into on the front, along with a
switch to switch between mic or TNC. There are two cables
coming out of the back, with one going to the mic jack on your
rig, and other going to your TNC. There is also provisions for
receive audio in, and an external speaker. No power is required.
Inside the box is a series of jumpers, so that it can be configured
for any rig. Paper work is included that shows how to set the
jumpers for most of the common rigs (Kenwood, Yaesu, Icom,
Alinco, etc.).

I have three of these boxes available. All are in A-1 shape, and
work 100%. They are $30 each.

MFJ 1272 MX - Designed for the newer 8 pin RJ-45 mic
connectors (like on a computer network) and the AEA PK-232

MFJ 1272 BX - Designed for the round 8 pin microphone connector
and the AEA PK-232

MFJ 1272 BYV - Designed for the round 8 pin microphone connector
and the Kantronics TNCs (with DB-9 connector)

MFJ 557 code practice oscillator
This is a traditional code practice oscillator, with adjustable
volume and tone. It includes a straight key on a nice base.
It operates from a 9 volt battery. Just like new, with paper
work for $ 25.

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used to
power such things as keyers, lights on tuners, and many
other misc. applications. Of course it can power many
things other than MFJ items, but this one is an actual MFJ. $10

MFJ 704 low pass filter
This filter is made to go on the output of your rig to help get
rid of TVI and harmonic interference. It is rated at 1500
Watts, even with a 2:1 SWR, and is in a very study black
metal case with SO-239 connectors on each end. Operating
frequency is listed as 1.5 to 30 MHz. It is a 50 ohm filter.
This one works fine, includes paper work, and looks very

close to new. These are $50 new, but you can have this one
for $35.

Prices do not include shipping from Florida.

Thanks.

957. CW keys FS

Yahoo group: hamstuff
Date: 2006-10-29 12:51:24 UTC
From: Ken Simpson, W8EK
Topic: 957 Message: 957

CW keys for sale:

Military J-37 "Mae West" key with cord
This J-37 key is mounted on an "I" shaped bakelite board,
such that the approximate 8 foot long cord can be wrapped
around the middle of the key. This particular key looks as
perfect as can be. The only "defect" is the fact that some
of the knurled nuts are not as shinny as they were 60 years
ago. There is no paint missing. $50

Military J-37 "Leg Key"
This J-37 leg key has the hinge on it so that it can be used
on a regular table, or on the leg. The actual key is a Winslow
Tele-tronics, Inc., 64150. Although this seems hard to believe,
it looks very close to new. There are no defects. All paint
looks like new. $75

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the black
base, with chrome parts. It looks like new (no scratches or
blemishes of any sort), and works the same. $65

J-38 Japanese copy
This is not the real thing, but is a Japanese copy.
The metal is simply brass colored , but it does
have a shorting switch and ball bearings. $20

Prices do not include shipping from Florida.

Thanks.

Uniden President HR-2600 ten meter ham transceiver with Chipswitch modification. This radio has the high-output transistor, and last time I put a wattmeter on the output it was at 40 watts. There is a mini-cooling fan attached to the rear heat sink that runs when you transmit. This radio operates AM-FM-CW-LSB-USB, and uses the Chipswitch mod. Here are some of the features that the Chipswitch employs: 30 MEMORY CHANNELS WITH TEMPORARY CHANNEL LOCKOUT AND REPEATER OFFSETS, PROGRAMMABLE SCAN/SEEK FUNCTION, PROGRAMMABLE CHANNEL UP/DN BUTTONS, PROGRAMMABLE MICROPHONE CHANNEL UP/DN BUTTONS, SPLIT FREQUENCY OPERATION, PROGRAMMABLE TRANSMITTER TIMEOUT, This radio has been my personal mobile for a year, and I am parting with it only because I'm going to put another low-band rig in the car. The radio comes with microphone, +12VDC power cord, mic clip, instructions for both the radio and Chipswitch functions. Sorry, no mobile bracket. I will only ship to CONUS, no foreign countries, no Alaska nor Hawaii. $245 shipped, & insurance included. Prefer PayPal, but will accept certified check or money order.

959. FS: KENWOOD VFO-180, LIKE NEW

Yahoo group: hamstuff
Date: 2006-11-01 21:42:25 UTC
From: Brian Carling
Topic: 959 Message: 959

FOR SALE: KENWOOD VFO-180, LIKE NEW.

This is the matching VFO for the TS-180 transceiver.
Allows you to work split for DX or to have
an extra 'memory' position etc. All original
and unmodified. Appears like it was never
used. Comes with the connecting cable to
plug and play with your TS-180S
Available for $95.00 plus shipping

Picture and details are at:
http://www.af4k.com/radios.htm

Reply via direct e-mail, please.

960. Low Pass TVI filters FS

Yahoo group: hamstuff
Date: 2006-11-04 13:44:29 UTC
From: Ken Simpson, W8EK
Topic: 537 Message: 960

Low Pass TVI filters For Sale:

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of
about 30 MHz, and more than 90 db of attenuation
between 90 and 300 MHz. It will handle 1000 watts,
and has an SO-239 connector on each end. It is in
extremely nice condition. These are $65 new; get
this one, with paper work for $35.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. These are about $60 new;
this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your
transmitter and antenna, and has been optimized to
have more attenuation in the 40 MHz region, where
many TVs have their IF. According to the manual it is
good for 1000 Watts "average", which would be about
2000 watts PEP, and has over 80 db attenuation at
41 MHz. SO-239 connectors on each end. This one
looks close to new, and also has the single page
"manual" with it. $ 30

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W below 30 MHz, and
about 200 W up to 52 MHz. With paper work for $ 30

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 25.

MFJ 704 low pass filter
This filter is made to go on the output of your rig to
help get rid of TVI and harmonic interference. It is

rated at 1500 Watts, even with a 2:1 SWR, and is in a very study black metal case with SO-239 connectors on each end. Operating frequency is listed as 1.5 to 30 MHz. It is a 50 ohm filter. This one works fine and looks very close to new. These are $50 new, but you can have this one for $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power. This one has an SO-239 on one end, and about a 2 foot length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239 connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

961. TenTec Paragon 585 HF xcvr FS

Yahoo group: hamstuff
Date: 2006-11-11 12:37:32 UTC
From: Ken Simpson, W8EK
Topic: 392 Message: 961

TenTec items for sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, that includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. Up to 100 Watts output,
that can be adjusted down to mw. This particular unit works
100% and looks fine also. Big inch thick manual is included.
TenTec sells these used for $795. This one is $650.

TenTec 299 voice synthesized frequency read out/counter

This unit is used as a voice read out of operating frequency
with the TenTec Omni 545 or 546 series A, B, C, some
Argonauts, Corsair, and others. It will work with other rigs,
with minor mods to get the right connections.

The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. Volume control on
the front panel.

It can also be used as a frequency counter. Of course it can
be used to give a "voice digital readout" to a rig with an analog
dial.

This particular unit works 100%. Cosmetically it has slight
minor wear. $190

Prices do not include shipping from Florida.

Thanks.

962. Many Kenwood items FS

Yahoo group: hamstuff
Date: 2006-11-11 15:13:10 UTC
From: Ken Simpson, W8EK
Topic: 962 Message: 962

Kenwood items For Sale:

Kenwood TH-225 HT for 2 meters
This HT includes DTMF touch tone pad, multiple memories,
scan, and sub-audible (PL) tone encode. Power output is
about 5 watts in high power, or .7 W in low. It will receive up
in to the weather frequencies (162 MHz). It includes the
Kenwood PB-12 high capacity 12 volt battery, which is in
good condition.
This particular unit works 100% and looks extremely nice.
Paper work is included, along with charger and rubber
duck antenna for $80

Kenwood TR-2400, 2 meter FM HT
The TR-2400 covers the 2 meter band with about 1.5
watts of power. It has memories, scan, DTMF Touch tone
pad, etc. Compared to some of the newer HTs, this one
is very easy to operate.
This particular TR-2400 works fine. It looks good, but not
mint. The battery pack has been replaced with NiMH
batteries, which seem to hold a charge fine.
The LCD display is clear, with no defects.
The TR-2400 had a place to install an optional PL subaudible
tone encoder. I have a new, still in the original package,
encoder that I will include with the HT. I planned to install it,
but never did.
Charger, rubber duck antenna, and paper work are included
for $60.

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $30

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion
and the UHF (440 MHz) portion. It plugs in to the TW-4000
to provide the tones. No adjustments are normally needed.

This one is in its original box with paper work, hardware, etc.
$60

Kenwood SMC-25 speaker microphone
Fits TR-2500 HT and others. This one looks fine and works
fine. $20

Power cord for TR-9000, and other rigs that have the 2 pin
connector that looks a bit like a TV set cheater cord. It is
a rectangular connector about 1/2 inch long and 1/4 inch
wide, with a notch on one side. $8

Power cord for many of the newer 2 meter and 440 MHz rigs
that take the "T" 2 pin connector. This fits many rigs other
than Kenwood rigs. $12

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert" in it. $15

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $3

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $12
Kenwood regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $22

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Service manual for Kenwood TR-2600 HT - $10

Service manual for Kenwood TW-4000 dual band transceiver - $15

Operators manual for Kenwood TW-4000 - $15

Prices do not include shipping from Florida.

Thanks.

Date: 2006-11-18 11:01:55 UTC
From: Brian Carling
Topic: 967 Message: 967

FOR SALE:

I have a single tube 117V "transmitter" / oscillator for sale.
Made by BUD RADIO Company with a 117L7GT tube.
Hammertone black finish. Plugs right in to 120V AC wall
power.

This was intended as a crystal calibrator, but could
readily be used as a QRPl ham band transmitter

Comes with the AC cable built in, and a 2000 kc. crystal
at present.

Available for $29.00 plus shipping

Brian, AF4K

968. Coaxial cable FS

Yahoo group: hamstuff
Date: 2006-11-27 00:23:47 UTC
From: Ken Simpson, W8EK
Topic: 907 Message: 968

Coaxial cable for sale:

I have some lengths of coaxial cable available. Most have PL-259 connectors on each end. The coax is mainly Belden 8214, which is RG-8 low loss foam, slightly under 1/2 inch in diameter. Some lengths may be other equivalent brands.

All lengths over 25 feet will be checked for loss before shipping, and will be within 10% of published specs (that is as close as I can check). Lengths shorter than 25 feet are almost impossible to measure loss accurately, but they will be checked with an ohmmeter.

Lengths vary from a couple feet to about 100 feet. Although most have a PL-259 on each end, I have a few with a PL-259 on only one end, and some with no connectors. Please let me know what you need, and I will see what I can do.

Belden 8214 is presently selling for about $1.35 a foot in 500 foot coils. My price is basically 40 cents a foot, plus $2 per installed PL-259 connector.

Coaxial cable jumpers with N connectors

These jumper cables are made with solid (not foam) dielectric RG-213 type cable.

Two feet long, Male N to Female N. Female end has a weatherproof rain boot. $8

Two feet long, with Male N connector on each end, with rain boot. $10

Four feet long, with Male N on one end, and nothing on the other end. $5

Prices do not include shipping from Florida.

Thanks.

969. Coaxial antenna switches FS

Yahoo group: hamstuff
Date: 2006-12-03 13:25:36 UTC
From: Ken Simpson, W8EK
Topic: 521 Message: 969

Coaxial antenna switches for sale:

B & W 595 coax switch
This one switches 5 antennas, and is in a rectangular box with all 6 SO-239 connectors coming out the back of the box. Unused antennas ARE grounded. It works fine. With paper work for $40

B & W ??? Coax switch
This coax switch will switch up to 5 antenna. It is round, and has six SO-239 connectors on the back, so the coax comes out the back in a large bundle. Unused connections are not grounded. Face plate is missing, and I do not remember the model number. It is in a round sealed can for excellent shielding, with a very large black knob. It is in great condition, for $35.

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT ground unused antennas. It has SO-239 connectors, with the coax coming out like spokes of a wheel. It is in good condition and works fine. $ 35

Heath HD-1234 coaxial switch
This coax switch has SO-239 connectors arranged so the coax comes out like the spokes of a wheel. It will switch up to 4 antennas, and also ground all of the antennas. It works fine and looks fine also. With mounting bracket for $ 25.

HD-1234 coax switch
As above, but has an "N" connector instead of an SO-239 for the common input connector. The remaining connectors are SO-239. $25

AmComm JV-104 coax switch
Switches 3 antennas, with SO-239 connectors. It is in a nice black rectangular box about 4 x 3 x 3 inches in size. Very nice condition. $25

B & W 591 A Coax "Transfer" Switch
This switch is designed to switch an auxiliary piece of equipment in and out (For example, bypass a linear amplifier, transverter, preamp, etc.). It has four SO-239 connectors. It works fine and is in great shape for $ 35.

Prices do not include shipping from Florida.

Thanks.

ARRL Handbooks for sale:

These are in the smaller format (6 1/2 by 9 1/2 inch size).

1964 - 41st edition
Extremely good condition. Close to new. Pages are NOT yellowed,
cover and spine are in great shape, and all pages are intact. $35

1969 - 46th edition
Spine taped, and cover is worn. Pages are intact and good. $18

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some
pages have yellowed, and some have not. $ 15

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 15

1977 - 54th edition
Slight crease on cover $ 13

1978 - 55th edition
Extremely nice condition. $ 15

The following are in the larger 8 1/2 by 11 inch format:

1981 - 58th edition
Spine is faded, and there is a bit of dirt on the cover.
Otherwise it is in great shape. $14

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have
yellowed slightly. $18

1988 - 65th edition - Hardbound
Like new, with a very slight yellowing of some pages. $20

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

1996 - 73rd edition
Like new, with disk. $18

2000 - 77th edition
Like new. $20

Prices do not include shipping from Florida.

Thanks.

973. HT speaker mics and ear buds FS

Yahoo group: hamstuff
Date: 2006-12-17 18:46:41 UTC
From: Ken Simpson, W8EK
Topic: 973 Message: 973

HT speaker microphones / ear buds For Sale:

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the
early Icom HT, including the IC-2 AT, IC-02-AT, IC-2G AT,
and many others. It also works with many non Icom HTs.
It has a 2.5 mm and 3.5 mm plug. It works fine and looks
good also. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; fits most Radio Shack
HTs, but also many Icom, Kenwood and Yaesu HTs. $18

Yaesu "Ear-Mic"
Fits Yaesu VX-1, VX-2, VX-5, VX-6, VX-7, and others
that take the 3.5 mm 4 conductor plug. It has a little
earphone, plus a built in microphone. There is a PTT
switch that can clip on. Works and looks like new. $20

Yaesu MH19A2B ear bud and mini-mic.
With 2.5 mm and 3.5 mm connections, which fits most
HTs. It works fine and looks fine. $18

Kenwood SMC-24 speaker microphone
Fits the Kenwood TR-2400, and maybe others.
It works fine and looks fine. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

MFJ 287 speaker microphone
Small compact, efficient speaker mic that fits the
Kenwood TH-225 HT, plus many others that take
the 2.5 mm and 3.5 mm plug. This one works fine,
and looks like new. $18

Santec speaker microphone
It has the small round plug (about 3/8 inch)
with 6 pins, as used on most Santec HTs, and
many Wilson and Yaesu HTs. Works and looks
great.$20

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $20

Prices do not include shipping from Florida.

Thanks.

975. Heath items FS

Yahoo group: hamstuff
Date: 2006-12-23 16:27:46 UTC
From: Ken Simpson, W8EK
Topic: 634 Message: 975

Heath items for sale:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter.
SO-239 connectors in and out. This particular meter
works great, looks great and includes paper work for $ 40.

Heath HM-2102 VHF Wattmeter
As above, but cover had been painted black, and is no
longer Heath green on the top and sides. Front panel
is original. $ 40

Heath Amateur Radio Novice License Training Course
This is really great for nostalgia. Course includes study
material and code tapes to get up to 5 WPM. Actually,
the code tapes would be useful today for Extra class!
All in a large 2 inch notebook. $15

Astatic 527 High Impedance hand microphone
This hand mic is Hi Z and has the 2 pin Amphenol connector
on it, as used by the Heath SB and HW line, and others. $30

Heath Parts:

Power cord for Heath HP-23 power supply
This is the cord that goes between the HP-23 power
supply, and the transceiver. It has an 11 pin connector
on each end, with the protective shells. This one is heavy
duty, using a size larger wire than most I have seen. It is
in nice shape for $20.

Meter from SB-630
This is the same size meter that is used on almost all of the
SB line, including the SB-100, 300, 400, etc. The scale on
this meter reads "VU" and "SWR", but the scale could be
changed with your present meter if you have one that is
burned out. The meter works fine, and it fine cosmetically
as well. $10

I have other SB-630 parts as well. Most of the chassis
parts are available, but no clock. Please let me know
what you need.

Parts from SB-400 xmtr (likely will also work with SB-401)
meter switch - $5
Mic/CW level control (dual pot) - $ 7
Pilot bulb mounting hardware, w/#47 bulb - $2

Parts from Heath HW-202, 2 meter crystal control transceiver
Note: Some of these parts may also work with an HW-2036 transceiver
Front Panel - $5
Chrome bezel for front - $ 5
Rear panel w/ heat sink, and final PC Board assembly $10
S meter - $ 5

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

976. FS: Industrial TIMER

Yahoo group: hamstuff
Date: 2006-12-28 19:00:02 UTC
From: Bry Carling
Topic: 976 Message: 976

FOR SALE:

Heavy Duty Industrial TIMER rated up to 1000 Watt loads.
120V AC operation, adjustable from Zero to 60 Minutes.
Has a really cool looking red knob and pointer with
0 - 60 min. scale. Front panel is 4.5" X 3.5"
Works like a delay relay with SPDT contacts for both
"Normally Open" AND "Normally Closed" operations.

Made by INDUSTRIAL TIMER CORPORATION of Newark, NJ.

Type TDAF - Brand new in box with instruction sheet.

Only one available for $10.00 plus shipping.

FREE:
(no strings)

Kenwood AC Charger Model WO9-0315, wall wart style.
Looks new. I believe that this was used with the old TR-2400
2m HT, but I could be wrong. The connector is a round coaxial
plug about 3/16" diameter.
Puts out 10.15V at 42.5 mA and is marked as:
"For Trio-Kenwood transceiver."

Free to a good home, just pay $4.00 shipping and it is yours.

982. Telescoping and rubber duck antennas for your HT FS

Yahoo group: hamstuff
Date: 2006-12-30 14:39:50 UTC
From: Ken Simpson, W8EK
Topic: 982 Message: 982

For Sale:

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, with BNC connectors, unless
stated otherwise.

Larsen "Half Wave" KulDuck Gain antenna
Rubber duck antennas do not really have gain, but
compared to a standard rubber duck, this one has
about 3 db gain. About 10 inches long. $15

Larsen KD4-VHF2 Standard KulDuck antenna
Regular size about 7 inches long. $14

Telescoping 1/4 wave whip
Telescopes to 5 inches long, and extends to full 19
inches. $10

AEA "Hot Rod" Full 1/2 wave telescoping antenna
Actual gain antenna. It has a very good SWR, and
really appreciable gain. $18

AEA "Hot Rod" as above for 440 MHz. $18

VoComm 5/8 wave gain telescoping antenna
4 + feet long when extended, but does have
considerable gain when you need it. $18

BNC stubby for 440 MHz - 3 inches long - $10

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 6.7 inches long
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-8 stubby, 4 inches long - $12
Kenwood regular, 6.6 inches long - $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $25

Prices do not include shipping from Florida.

Thanks.

983. Icom HT and many accessories FS

Yahoo group: hamstuff
Date: 2006-12-30 15:45:57 UTC
From: Ken Simpson, W8EK
Topic: 983 Message: 983

For Sale:

Icom IC-04 AT, 2 meter HT
The IC-04 AT covers the 440 MHz band.
It includes a DTMF touch tone pad, and subaudible (PL)
tones. Of course it has memories, scan, and all of the
normal bells and whistles. It transmits with about 5 Watts
in high power and about 1/2 watt in low power. It can be
powered with 13 V DC for about 5 W power output, or
used with various batteries for slightly lower power output.
This particular unit includes a good BP-8 battery, which is
standard power, but high capacity. It includes rubber duck
antenna, belt clip, and both operating and service manuals
on CD. $70

BP-8 battery pack
These are used on the Icom IC-2AT, 3 AT, 4 AT, 02AT,
03AT, 04AT, 32, and many other of the earlier Icom HTs.
It is the larger, heavy duty NiCad pack, and can be charged
with the BC-30 or BC-35 desk charger, a wall wart charger,
or 13 V DC.
This one is in very good shape. It holds a charge well,
seems to have full capacity, and looks great. $40

BP-7 Battery pack
This pack is used on the Icom IC-02AT, 03AT, 04AT, 32,
and many other of the earlier Icom HTs. It is the larger size,
heavy duty NiCad pack, that produces about 13 V DC, so
can give the HTs the same power output as if they were
plugged in to 13 V DC. It can be charged with the BC-30
or BC-35 desk charger, a wall wart charger, or 13 V DC.
This one is in very good shape. It holds a charge well,
seems to have full capacity, and looks great. $40

"Dead" BP-7 battery
This battery is basically dead, although you might be able to
get a bit more life from it. It is being sold so that you can put
a new "insert" in to it, to give a fresh battery. $12

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the
early Icom HT, including the IC-2 AT, IC-02-AT, IC-2G AT,
and many others. It also works with many non Icom HTs.
It has a 2.5 mm and 3.5 mm plug. It works fine and looks
good also. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; it will work fine with the Icom IC-2AT, 02 AT, other Icom HTs, Radio Shack HTs, plus many other HTs. $18

Yaesu MH19A2B ear bud and mini-mic.
I know it says Yaesu, but it has 2.5 mm and 3.5 mm connections, which works fine with the Icom HTs above. $18

Prices do not include shipping from Florida.

Thanks.

984. 2 meter power amplifier FS

Yahoo group: hamstuff
Date: 2006-12-31 18:40:29 UTC
From: Ken Simpson, W8EK
Topic: 984 Message: 984

VoComm 2C 100 - 25 amplifier for 2 meters for sale:

This is an amplifier made to give you additional power on
2 meter FM. It will take a rig with about 25 Watts, and
produce an output of about 100 watts. Of course it is
completely solid state, and has automatic RF switching
built in. The frequency range is 140 to 150 MHz, with
the center frequency tuned for 146 MHz. It runs off of
13.6 V DC, and needs about 10 to 12 amps of current.

This particular amp works fine, and looks fine as well.

Paper work is included for $75 plus shipping from Florida.

Thanks.

From: Bry Carling
Topic: 986 Message: 986

For sale: Variable Transformer

0-120V AC. Rated for 1.25 Amps.
Someone wired this into a box with two AC outlets.
Box is now a little rusty, but control looks fine.
Needs standard 1/4" knob.
Can't read the brand name but it says Newark, NJ.

QTY 1 available for $6.00 plus shipping

987. Low Pass TVI filters FS

Yahoo group: hamstuff
Date: 2007-01-01 16:06:36 UTC
From: Ken Simpson, W8EK
Topic: 537 Message: 987

Low Pass TVI filters For Sale:

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end.
I have two of these available. One is a fairly new model and
is in nice condition for $25.
The second is a much older model that seems much heavier
duty. It weighs almost twice as much, and looks like it would
take more power. It likely was made in the days that plate
modulated AM was the rule. $35

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of
about 30 MHz, and more than 90 db of attenuation
between 90 and 300 MHz. It will handle 1000 watts,
and has an SO-239 connector on each end. It is in
extremely nice condition. These are $65 new; get
this one, with paper work for $35.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. These are about $60 new;
this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

MFJ 704 low pass filter
This filter is made to go on the output of your rig to
help get rid of TVI and harmonic interference. It is
rated at 1500 Watts, even with a 2:1 SWR, and is
in a very study black metal case with SO-239
connectors on each end. Operating frequency is
listed as 1.5 to 30 MHz. It is a 50 ohm filter. This
one works fine and looks very close to new. These
are $50 new, but you can have this one for $30

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot

length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

Large 250 yard spool suitable for hand-wiring of electronic
equipment - for the tidy, professional appearance.

Great for wiring harnesses in homebrew equipment
or restoration of older radio and electronic
equipment. Should last for a long time.
Available for $12.50 per spool plus shipping.

989. Complimentary crystals for new 80m AM band

Yahoo group: hamstuff
Date: 2007-01-08 21:58:21 UTC
From: Bry Carling
Topic: 989 Message: 989

Freebie:

I have free HC6U crystals on 3742 kHz this month to anyone who orders any ham band FT243 crystals from me. Even one.

Later this spring I will offer another complimentary crystal of use to the AM community. Probably on the new low part of 40m.

Several guys already have these 80m crystals and I expect that it will put a lot more of us on the same spot where we can readily find one another.

73 & happy new year to everyone - de AF4K, Brian

990. MFJ items FS

Yahoo group: hamstuff
Date: 2007-01-13 13:39:44 UTC
From: Ken Simpson, W8EK
Topic: 990 Message: 990

MFJ items for sale:

MFJ 704 low pass filter
This filter is made to go on the output of your rig to help get rid of TVI and harmonic interference. It is rated at 1500 Watts. It is a 50 ohm filter. This one works fine, includes paper work, and looks very close to new. $35.

Cables to connect transceiver to TNC

MFJ 5024 - connects Icom, Yaesu, and other HTs that use the 3.5 mm and 2.5 mm plug to a TNC that uses a 5 pin DIN plug, such as the MFJ 1214. 1270 B, 1270 BT, 1271, 1274, 1274 T, 1278, 1278 T, and others, as well as TNC-2s. This one is still in its original plastic bag, with paper work, for $12.

MFJ-5084 - connects most Icom radios that use the round 8 pin mic plug to a TNC that uses a 5 pin DIN plug, such as the MFJ 1214. 1270 B, 1270 BT, 1271, 1274, 1274 T, 1278, 1278 T, and others, as well as the TNC-2s. With paper work for $12.

MFJ 287 speaker microphone
This was used on a Kenwood TH-225 HT, but will fit many others as well. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used to power such things as keyers, lights on tuners, and many other misc. applications. Of course it can power many things other than MFJ items, but this one is an actual MFJ. $10

Prices do not include shipping from Florida.

Thanks.

991. TenTec HF xcvr FS

Yahoo group: hamstuff
Date: 2007-01-13 22:43:37 UTC
From: Ken Simpson, W8EK
Topic: 991 Message: 991

TenTec items for sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, that includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. It has an extremely
effective "Jones filter" to allow varying the passband,
and its location in the spectrum. It has up to 100 Watts
output, that can be adjusted down to milliwatts for QRP
use, if desired. This particular unit works 100% and looks
really great. Big inch thick manual is included. TenTec
sells these used for $795. This one is just as nice, but
is only $650.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to any rig with an analog dial, or used a normal frequency counter.
This particular unit is in great shape electrically. Cosmetically
it looks very nice, but has some very minor wear. $ 190

Prices do not include shipping from Florida.

Thanks.

Radio Communications theory and reference books, antenna book, and VHF manuals for sale:

Radio Communication Handbook by Radio Society of Great Britain (RSGB) - Fifth edition - both Volume 1 and 2
Two hardback books. This is basically equivalent to the ARRL Handbook, but published by RSGB, with some ideas not found in the ARRL book.
These books are in close to new condition, complete with their dust covers. $20

Electronic Communication by Robert Shrader - 3rd edition
This text book is used in many community colleges, and is an exceptionally thorough, yet easy to understand book covering all aspects of communications, from Ohm's Law on up. 800 page hardback in close to new condition. $20

Modern Electronic Communication by Gary Miller
Similar to Shrader (above), but slightly more advanced.
578 page hardback. $18

Building and using Baluns and Ununs
Practical Designs for the Experimenter
By Jerry Sevick, W2FMI - 1996 - CQ Publishing
The title explains it all! Like new condition. $12

1974 ARRL Antenna book
13th edition of this classic antenna book includes chapters on antenna fundamentals, transmission lines, long wire antennas, multiband antennas, dipoles, and beams for HF and VHF/UHF, along with a lot of other information -- some of it not found in the newer antenna books.
This particular book is in very nice condition, with no torn pages, fading, etc. The covers are nice and are intact. $7

Six Meters - A Guide to the Magic Band
By Ken Neubeck, WB2AMU - 1998 by Worldradio Books
It covers most every aspect of 6 meters, and includes pictures of various 6 meter rigs, as well as a band chart.
Like new. $8

The VHF Amateur by Robert Brown, K2ZSQ/W9HBF
First Edition - 1968 by Editors and Engineers
A lot a information, including schematics and details for

making rigs, and many antenna projects. $4

ARRL "FM and Repeaters for the Radio Amateur"
1972 - First Edition - $ 5

Ham Notebook Volume 1 by Jim Fisk, W1DTY
Many practical hints and projects published by Ham
Radio Magazine. $7

Prices do not include shipping from Florida.

996. Kenwood 2 m mobile, HT and many accessories FS

Yahoo group: hamstuff
Date: 2007-01-27 14:42:45 UTC
From: Ken Simpson, W8EK
Topic: 996 Message: 996

Kenwood 2 meter rigs, plus other Kenwood accessories for sale:

Kenwood TM-241 A, 2 meter FM transceiver
This 2 meter FM rig will receive from about 138 to
174 MHz, while transmitting on the entire 2 meter
band. It has memories, as well as VFO and "Call"
channel, with scan, and the normal bells and whistles.
Subaudible tone (PL) encoder is built in.
Output power is up to about 50 Watts, or about 5 watts
in low power.
This particular unit works 100%, and looks fine as well.
It was used for packet so I no longer have the microphone
or mobile bracket for it. It includes the rig, power cord,
and paper work for $75.

Kenwood TR-2400, 2 meter FM HT
The TR-2400 covers the 2 meter band with about 1.5
watts of power. It has memories, scan, DTMF Touch tone
pad, etc. Compared to some of the newer HTs, this one
is very easy to operate.
This particular TR-2400 works fine. It looks good, but not
mint. The battery pack has been replaced with NiMH
batteries, which seem to hold a charge fine.
The LCD display is clear, with no defects.
The TR-2400 had a place to install an optional PL subaudible
tone encoder. I have a new, still in the original package,
encoder that I will include with the HT. I planned to install it,
but never did.
Charger, rubber duck antenna, and paper work are included
for $60.

Kenwood MC-35 S hand microphone
This hand microphone is used with most all of the older
Kenwood rigs - TS-120, TS-180, TS-520, TS-820, etc.
It has 50 K ohm impedance, and is a noise canceling
mic. It has a four pin plug on it to match these rigs, and
is in good shape for $35.

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion

and the UHF (440 MHz) portion. It plugs in to the TW-4000
to provide the tones. No adjustments are normally needed.
This one is in its original box with paper work, hardware, etc.
$60

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert" in it. $15

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $12
Kenwood regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $22

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Prices do not include shipping from Florida.

Thanks.

999. Hand microphones, touchtone mics, and HT speaker mics FS

Yahoo group: hamstuff
Date: 2007-02-03 14:49:25 UTC
From: Ken Simpson, W8EK
Topic: 999 Message: 999

Hand microphones for sale:

All work 100%, and look very nice.

Touchtone (DTMF) mics

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad
to a lot of rigs in the 70s and 80s. Normal hand mic
from the front, but has a touchtone pad on the back.
Four pin mic plug. It is in good shape and includes
paper work. $ 40

KDK TM-2 touchtone microphone
12 digit DTMF pad on the front, with up and down switches
I think this came from a KDK 2033, but am fairly certain it
will work with all of the KDK rigs with a 6 pin mic plug,
which is on this microphone. $40

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touchtone microphone
With 8 pin plug wired for Kenwood. $40

Regular hand microphones for sale:

Yaesu hand microphone
I don't know the number on this one, but it is the microphone
that was used with the FT-101 series of HF transceivers. It
has a 4 pin connector on it, works fine, and looks extremely
good. $35

Yaesu YM-40, 600 ohm impedance hand microphone
This one has a round 8 pin connector, and has up and
down buttons on it, in addition to a lock button on the
back, and the normal PTT switch.
It works fine and looks fine also. $35

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

HT speaker microphones For Sale:

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the
early Icom HTs, including the IC-2 AT, IC-02-AT, IC-2G AT,
and many others. It also works with many non Icom HTs.
It has a 2.5 mm and 3.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; fits most Radio Shack
HTs, but also many Icom, Kenwood and Yaesu HTs. $20

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

Topic: 1009 Message: 1009

FOR SALE:

100 kHz Crystal Calibrator.

This marker generator is homebrew, but works very nicely,
since it has outputs on both 100 kHz and 500 kHz.
(switchable). The output is via a BNC connector.
Comes in a small black cabinet, measuring 6" X 4" X 2"

Power requirements - two C cells or external 3V DC power
supply.

Available for $21.00 plus shipping.

1012. ARRL Handbooks FS

Yahoo group: hamstuff
Date: 2007-02-17 13:25:22 UTC
From: Ken Simpson, W8EK
Topic: 970 Message: 1012

ARRL Handbooks for sale:

Condition varies, and is described as accurately as possible.

These are in the smaller format (6 1/2 by 9 1/2 inch size).

1947 - 24th edition
This one is very used, as it should be at 60 years old. The spine is taped, and the cover is partially loose from the binding. This is a very good, usable handbook, but it is not collector quality. There are 150 pages of ads in the back, which show a lot of vintage equipment, tubes, parts, etc. $20

1964 - 41st edition
Extremely good condition. Close to new. Pages are NOT yellowed, cover and spine are in great shape, and all pages are intact. Collectable quality for sure. $35

1968 - 45th edition
Spine is taped, and cover is worn. It shows use, but all pages are intact and good. $10

1969 - 46th edition
Spine taped, and cover is worn. Pages are intact and good. $15

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some pages have yellowed, and some have not. $ 14

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 14

1977 - 54th edition
Nice condition. Slight crease on cover $ 10

1978 - 55th edition
Extremely nice condition. $ 12

The following are in the larger 8 1/2 by 11 inch format:

1981 - 58th edition
Spine is faded, and there is a bit of dirt on the cover. Otherwise it is in great shape. $14

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have
yellowed slightly. $18

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

1996 - 73rd edition
Like new, with disk. $18

2000 - 77th edition
Like new. $20

Prices do not include shipping from Florida.
Shipping via "Media Mail" is inexpensive.

Thanks.

From: Ken Simpson, W8EK
Topic: 1013 Message: 1013

For Sale:

Rubber Duck and telescoping antennas for your HT.

All are for 2 meters, with BNC connectors, unless
stated otherwise.

Larsen "Half Wave" KulDuck Gain antenna
Rubber duck antennas do not really have gain, but
compared to a standard rubber duck, this one has
about 3 db gain. About 10 inches long. $15

Larsen KD4-VHF2 Standard KulDuck antenna
Regular size about 7 inches long. $14

AEA "Hot Rod" Full 1/2 wave telescoping antenna
Actual gain antenna for 440 MHz. It has a very good
SWR, and really appreciable gain. $18

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 6.7 inches long
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-8 stubby, 4 inches long - $12
Kenwood regular, 6.6 inches long - $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $25

Prices do not include shipping from Florida.

Thanks.

1023. THE FINAL AMATEUR RADIO CW TEST (Very sad in many ways...)

Yahoo group: hamstuff
Date: 2007-02-24 13:13:50 UTC
From: Bry Carling
Topic: 1023 Message: 1023

THE FINAL AMATEUR RADIO CW TEST

For every one of us that loves CW and cut our teeth on it,
this is bloody sad to read!

= = =

From: Cliff Cheng, KI6CM

Hi Everyone:

Young Will Campbell made history, last night - ham radio history at
least, when some of my Santa Barbara ham friends gave the very
last code exam. The story does not say this but the background
story is that 3 people took the test, including a friend of mine.
Only young Will passed. Kudos Will!
Will however I am told did not pass the theory.
My friends in Santa Barabara were scrambling trying to find
anyone to take the last test. They too wanted to make history too.
Had it not been for the distance and working late, I would have
driven up and VE'd with them.

Please read the news story below.

Cliff

= = =

A test that was good to the last dot: Ham operator passes what may
be FCC's last Morse exam

SCOTT STEEPLETON, NEWS-PRESS ASSOCIATE EDITOR

Will Campbell learned Morse code on this "key."

February 23, 2007 7:14 AM

Will Campbell spent a month studying for the exam, using a pencil
in the early stages before advancing to a specialized piece of
equipment.

A junior at Dos Pueblos High School, he went over lessons in
his mind during class and researched pertinent material on the
internet at home, hoping to master the subject matter.
Then, at one second before 9 Thursday night, he became perhaps
one of the last people in the United States tested on the Morse
Code,
the 170-year-old series of dits and dahs -- dots and dashes to the

rest of
us -- that changed the way man communicates.

"I'm pretty confident," said Will, leading up to the test. "It's
like learning music."

The Federal Communications Commission today ended the
requirement that people applying for amateur radio -- also known
as ham radio -- licenses know the alphabet of dots and dashes.
So, as a nod to the past and as acknowledgement that people
around
the world still communicate via the system developed by Samuel
Morse,
the Santa Barbara Amateur Radio Club held what it sees as the
last official test of the code.

"The FCC says it's slow, says there are better ways to send data,"
said Darryl Widman, contact person for the club's volunteer
examiner
team.

And after years of debate, commissioners decided in December
2006 to
drop the requirement.

That sparked action on the part of the radio club, whose members
identify themselves as much by name as call sign. "Hundreds of
thousands of hams all over the world absolutely love the code,"
said
Mr. Widman, who learned it as a Boy Scout in 1952 and earned his
first ham license in 1956.

"At midnight Eastern Standard Time on Thursday, that's when it
(came) to a screeching halt, so we figured we could squeeze it in
there
and give the last Morse code test in the United States of America,
one
second before," said Mr. Widman, whose call sign is KF6DI.

As of Thursday afternoon, Will Campbell was among three people
who
signed up for test. It was administered at the Santa Barbara County
Health Auditorium on North San Antonio Road by club volunteers
and
amateur radio operators Michael Jogoleff (WA6MBZ),
Tom Saunders (N6YX) and Carl Stengel (W6JEO), who in
essence conduct
the tests on behalf of the FCC.

Will became interested in Morse code when a friend of his returned
to his native India.

"We thought it'd be a fun way to talk," said Will. "At first, I just used a pencil, just tapping it out. Then my dad got me a Morse code key, a little thing with a battery that you use to practice. It makes the sounds you hear in the movies."

Those sounds -- or character rhythms -- each stand for a different letter. The first telegraph transmission was "What hath God wrought?" sent from Morse, in Washington, to an assistant in Baltimore, MD, on May 24, 1844. It was in the form of raised marks on paper that could be translated by the recipient.

Today, all you need is a computer to translate code, a service Stephen Phillips, a research engineer in the IT Innovation Center at the University of Southampton in England, makes available on his Web site, http://www.morsecode.scphillips.com

All you do is type in the word or sentence you want translated into Morse code and let computer code do the rest. "I got interested in Morse code back in 1994 when someone sent me an e-mail with some dots and dashes in," Mr. Phillips said via e-mail. "Back then the Web had only just started to get going and I looked for a page showing what Morse code was but couldn't find one. I went to the library and copied the Morse code from an encyclopedia onto one of my Web pages." His first translator was operational approximately a year later.

"I wrote it because it presented an interesting programming challenge," said Mr. Phillips. "Creating a sound file programmatically and sending it back to the user along with a Web page: Both quite tricky."

Mr. Phillips' most recent rewrite involves the Java version of the translator, which runs on the user's computer. "I just rewrote that in the last couple of weeks to make it look a lot more attractive and also to provide more features of use to people learning Morse code."

Despite the code being known around the world, with cell phones, Internet and other communications technology, why would anyone learn it today?

"The code gets through noise, it gets through interference. The ear is attuned to it," said Mr. Widman. "Voice is very clear and easy to understand, but when you're trying to communicate through bad conditions, voice doesn't work well. That's where the code shines." And in times of disaster, he added, Morse code can be used by hams

to get information to the outside world.

Thursday's test consisted of listening to a recorded Morse code conversation and writing down everything the test-takers heard.

To pass, they needed to answer 10 questions about the conversation
correctly or get 25 words in a row correct.

And, while the results might go unnoticed by the FCC, Will said he was proud to pass.

"I got a certificate, and I'm going to file it away to prove that I was the last person to take it."

1033. Icom IC-229 H, 2 m FM xcvr FS

Yahoo group: hamstuff
Date: 2007-03-03 13:08:19 UTC
From: Ken Simpson, W8EK
Topic: 1033 Message: 1033

Icom IC-229 H, 2 meter FM transceiver For Sale:

The IC-229 H has about 50 Watts output, down to about 5 W
in 4 steps, and a good receiver. Of course it has memories,
scan, and all sorts of bells and whistles, including a subaudible
tone (PL) encoder built in. It uses the same heavy duty power
cord with the 6 pin molex connector that is used on many HF rigs.

This particular unit works 100%, and looks really great. It was
used on packet, so no longer has a mic or mobile bracket with
it. The display lights are out. Both operating and service
manuals are included on CD. If you need a high power 2 meter
rig, this one would do the job for you.

$95 plus shipping from Florida.

Thanks.

1039. TenTec HF xcvr and other TenTec items FS

Yahoo group: hamstuff
Date: 2007-03-10 20:11:02 UTC
From: Ken Simpson, W8EK
Topic: 538 Message: 1039

TenTec items for sale:

TenTec 561 Corsair II, HF transceiver
Some people consider the Corsair II to be the best rig that
TenTec made, prior to the Orion. It is not a synthesized rig,
so phase noise is basically nonexistent. This means that it
has a really superb receiver that is far better than most of the
Japanese rigs. It covers 160 thru 10 meters, including the
WARC bands, and features such things as pass band tuning,
Jones filter, variable band pass filtering, notch filter, etc. A
keyer is built in for CW, and of course it has the great QSK
that TenTec is famous for.
This particular unit is about as nice as you will find. Electrically,
everything works 100%. It had the PTO rebuilt about a year ago.
It was back to the factory for a complete health check up about
a year ago as well. Cosmetically, it is close to perfect. There
is a very small scratch on the top near the plastic end trim. No
other scratches that I can find. Manual is included for $550.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to any rig with an analog dial, or used a normal frequency counter.
This particular unit is in great shape electrically. Cosmetically
it looks very nice, but has some very minor wear. $ 190

TenTec hand microphone
There is no model number on this mic, but I think it is a model
700 C; at least that is what the paper work says. It has the 4 pin
connector on it, works fine, and looks like new. $35

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1040. Kenwood TM-G707 dual band xcvr, plus many other Kenwood items FS

Yahoo group: hamstuff
Date: 2007-03-17 12:44:42 UTC
From: Ken Simpson, W8EK
Topic: 1040 Message: 1040

Kenwood TM G707 A dual band FM transceiver for sale:

The G707 is a very sophisticated dual band rig. It covers
both the 2 meter and 440 MHz bands (plus receives outside
the ham bands, so it is useful for weather frequencies, etc.),
and has three power levels, of about 50, 20, or 5 watts. It
has almost 200 memories, so you won't run out! Of course
subaudible tones, and scan features are included, as is a
cross band repeater (this means you can transmit on one
band and receive on the other at the same time). To put it
another way, this radio will do about anything one can think
of, and probably a whole lot more. It also features a very
large LCD display with a nice amber color back light. It is
also possible to separate the main unit from the "control
head" for remote mounting.

This particular rig has had almost no use. It is in its original
box, with manual, mobile bracket, microphone, power cord,
and even the little bag of screws and extra fuse that it came
with originally. There is not a scratch on the rig, and everything
works 100%. It is a really terrific rig! $195

Other Kenwood items:

Accessory items for Kenwood TR-2400 HTs

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap - I think it fits most Kenwood (and likely
other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
To charge battery outside of HT; uses original
charger. It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and
provide an SO-239 connector that will permit a PL-259 to
be attached. This can be used with any HT that has a BNC
connector. $5

Original Operators manual for Kenwood TR-2400 - $15

Accessory items for Kenwood TW-4000 For Sale:

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion
and the UHF (440 MHz) portion. With paper work, hardware,
etc. $55

Kenwood MC-48, touchtone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often
used on 2 m / 440 MHz rigs that do not have touchtone
built in, but can also be used on HF rigs on 10 m
FM. It works fine and looks great also. $ 55

Original Operators manual for Kenwood TW-4000 $15

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Accessory items for Kenwood TH-21 / 31 / 41 series HTs:

Kenwood TU-6 PL encoder
Produces subaudible tones. With paper work. $30

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert". $12

PB-21 H
As above, but heavy duty pack; needs insert. $14

Wrist strap - fits most Kenwood HTs $4

Kenwood SMC-30 speaker microphone
Fits the TH-21/31/41 series of HTs, plus some others. $18

Original Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-6 regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby $22

Prices do not include shipping from Florida.

Thanks.

1041. Coaxial antenna switches FS

Yahoo group: hamstuff
Date: 2007-03-17 17:01:26 UTC
From: Ken Simpson, W8EK
Topic: 521 Message: 1041

Coaxial antenna switches for sale:

MFJ 1704 Coax Switch
This coax switch will switch 4 antennas, and also includes
a lightning protection "pill" in its heavy die cast housing. It
is very heavy duty, and features stripline construction for
good impedance matching at higher frequencies, and gives
50 db isolation, even up thru 500 MHz. Unused antennas
are grounded and a fifth position grounds all antennas.
This one works fine and looks like new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. Unused position IS grounded.
A third position grounds both antennas.
This coaxial antenna switch is in a heavy diecast
housing that utilizes "stripline" construction to keep
the impedance very close to 50 ohms. It also
permits good operation at higher frequencies.
This one works 100% and looks great also. $ 20

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes of
a wheel. It works fine. $ 28.

B & W Model 550 A coax switch
As above, but includes a mounting bracket for $ 30.

B & W Model 55 A - 2
This is a 2 position coax switch, similar to the 550 A
(above), but only switches 2 antennas. The unused
position is not grounded. SO-239 connectors come
out like spokes of a wheel. It works fine and looks
fine also. $20

AmComm JV-104 coax switch
Switches 3 antennas, with SO-239 connectors. It is in
a nice black rectangular box about 4 x 3 x 3 inches in
size. Very nice condition. $25

Pace 5621, 4 position Coax Switch
This is in a 4 x 3 x 2 rectangular box, with 4 switched SO-239
connectors. Unused positions are NOT grounded. It works
fine, but cosmetically is not as nice as some. $8

Prices do not include shipping from Florida.

Thanks.

1043. Yaesu VX-2 compact dual band HT and accessories FS

Yahoo group: hamstuff
Date: 2007-03-18 13:29:06 UTC
From: Ken Simpson, W8EK
Topic: 1043 Message: 1043

For Sale:

Yaesu VX-2 dual band HT
This is a very nice, small HT that will transmit on the 2 meter and 440 MHz bands, and receive almost "DC to light". Obviously there are a few holes in the DC to light receive coverage, but it will receive AM on the AM broadcast band, up thru 30 MHz (so it covers the short wave bands), 6 meters, aircraft, VHF and UHF TV bands, commercial FM band, and most everything else up to 999 MHz, with cell phone frequencies blocked. Transmit power can be up to 3 W, depending on power source. It is about 1.5 W with the internal Lithium Ion battery.

This HT also has lots of memories. It has 900 "standard" memories, 100 "Frequency skip memories", plus several other special types, for a total of something like 1200 memories. You will not run out of memories with this HT! Subaudible (PL) tones are included, as is several scan modes. This HT will do a lot, all in a very small package.

This particular unit is in very nice condition. I can not find a scratch on it, and all lettering is very nice, and LCD display is clear with no defects. Basically, it looks very close to new. Everything works 100%. I never received a belt clip with it, so it does not have one, but one is not needed, as it slips easily into your shirt pocket. Wrist strap is included.

It includes the rubber duck antenna, a good Lithium Ion battery, wall wart charger which charges the battery in about 2.5 hours, wrist strap, paper work, and of course the HT itself. $120

Accessory items for the VX-2:

Yaesu CSC-90 protective case - like new - $18

Yaesu FNB82LI - spare Lithium Ion battery pack
1000 mahr capacity. It holds a charge fine and works like new. $25

"Aftermarket" spare Lithium Ion battery pack
1000 mahr capacity. It also holds a charge fine and works like it was new. $15

"Aftermarket" desk charger
This permits one to charge a spare battery outside of the HT, while the HT is in use. It still takes about 2 hours to

charge a battery, but gives added flexibility. It includes a separate wall wart supply which plugs in to the desk charger. It works fine, and looks close to new. $20

Accessory for Yaesu VX-1 HT:

Yaesu FBA-20 "Battery case" for use with Yaesu VX-1 HT
This unit permits one to use a single AA battery (alkaline, NiCad, NiMH, or whatever) in the VX-1 HT. It has smart circuitry in it to increase the voltage to 3.8 V as required by the HT. It is idea for use as an emergency spare. This one has been tested, and then put back in to its blister package, so it is basically new. $18

Prices do not include shipping from Florida.

Thanks.

FOR SALE:

EIMAC 4PR60 tetrode transmitting tube.
This is a similar tube to the 4-65 but pulse rated, and
lower interelectrode capacitance. 4-pin base. Would make
a neat glowbug transmitter, or a conversation piece.
Available for $5.00 plus shipping.

100 amp hash filter for 12V DC mobile radio use. Large terminals,
Heavy duty. Available for $5.00 plus shipping.

100 watt TVI filter with SO239 connectors, clean - made
by Realistic. Cutoff at 30 MHz. AVailable for $5.00 plus shipping.

Model BC457A mil surplus transmitter 4-5.3 Mc.
Two 1625 finals - all tubes, crystal etc., complete.
Reduced to $35.00 plus shipping

BC221 Frequency Meter - reduced to $35.00 plus
shipping.

10 ohm, 300 Watt NON-INDUCTIVE resistors.
Great for RF termination or power testing. These
will make a very high-powered RF or audio load.
QTY 12 available for $10.00 each plus shipping

11 Pin Octal style Plugs. These are brand new,
and look just like a male octal connector,
chassis mount. Same size only with eleven pins.
Black plastic, male. NOTE - these are NOT tube sockets.
QTY 2 available for $4.00 each plus shipping.

15-Pin Cinch-Jones female connector as used on
Multi Elmac and several other radios - Cable end or
chassis style.
Available for $7.00 plus shipping.

Power resistors - 20 KILOHMS at 10 Watts, 5% -
$3.00 each.

ARRL wants Pactor and Winlink robots to ruin our HF bands
for the CW and AM operators, and even for the more
considerate digital mode operators...

Just click here to file a comment:

http://gullfoss2.fcc.gov/prod/ecfs/upload_v2.cgi

Or get the FULL instructions here:
http://www.qrz.com/ib-bin/ikonboard.cgi?act=ST&f=3&t=150129
= = =

SAMPLE COMMENT:

Comment to the Ex-Parte revision to RM-11306

I am opposed to any change to Rule 97.221 that allows
automatically controlled digital stations to operate outside the
current sub-bands.

The proposed change would cause terribly bad interference as
has been demonstrated repeatedly by the operators of
Pactor / Winlink signals in the HF bands.

1049. Kenwood TH-21 AT, 2 meter HT and many accessories FS

Yahoo group: hamstuff
Date: 2007-03-30 22:10:15 UTC
From: Ken Simpson, W8EK
Topic: 1049 Message: 1049

For Sale:

Kenwood TH-21 AT, 2 meter HT

Fully synthesized, small HT, about the size of a deck of cards. Thumbwheel selection of frequency. The + or - offset is selected by a switch on the back, as is high and low power. It is very easy to use, and has about 2 W output in high power and 1/2 W in low power. Touch tone (DTMF) pad is on the front.

This one is in good condition. It includes rubber duck antenna, good PB-21 H high capacity battery (about 3 times the capacity of a standard PB-21 pack), charge cord, and manual for $40.

Accessory items for Kenwood TH-21 / 31 / 41 series HTs:

Kenwood DC-21 DC adapter
Converts 13 V DC to 7.2 V DC that can be used by the HT. It includes an adapter pack that slides on to the HT and the actual converter unit that plugs into a cigarette lighter. It works fine. Paper work is included for $22.

Kenwood BT-2 "empty" battery pack
This is the "shell" battery pack that will take six AAA cells. You can fill it with alkalines, NiCads, or whatever. It is almost like new. $25

Kenwood TU-6 PL encoder
Produces subaudible tones. With paper work. $30

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it is fine, but it needs a new "insert". With paper work for $10

PB-21 H
As above, but heavy duty pack; needs insert.
Includes paper work for $14.

Wrist strap - fits most Kenwood HTs $4

Kenwood SMC-30 speaker microphone
Fits the TH-21/31/41 series of HTs, plus some others. $18

Special Rubber Duck antennas for Kenwood TH-21 series 2 meter HTs with the threaded connector
Aftermarket stubby, 3.3 inches long $10

Kenwood RA-6 regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby $22

Prices do not include shipping from Florida.

Thanks.

Mounted straight key
This is a clone of a J-38 straight key complete with ball bearings. It looks and works like new.
It is mounted on a very nice piece of Oak wood. This is real Oak, and not particle board that has been covered. The Oak has been finished, and has a bevel around the sides of it on the top. The bottom is finished, and has rubber feet to prevent it from walking across the table. It really looks extremely nice. $55

Other CW items:

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

1073. 2m and 440 MHz mobile antennas FS

Yahoo group: hamstuff
Date: 2007-04-21 20:56:47 UTC
From: Ken Simpson, W8EK
Topic: 1073 Message: 1073

For Sale:

VHF (2 meter) and UHF (440 MHz) mobile antennas and mounts:

Larsen NLA-150 coil only for 2 meters
For use with a 5/8 wave (approx 4 foot) antenna.
Fits the Larsen NLA mount for 3 db gain. $11
-
The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips, if you need them. $6

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz
bands. Good condition for $7.
-
Larsen Q
Fits a 5/16 inch stud. The quarter wave whip can be cut
for 2 meters, 220 MHz, or 440 MHz bands. Great condition. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen NLA-450 coil and "stacked" whip
This fits the Larsen NLA mount, and has about 5 db gain
on the 70 cm band. It includes the coil, and the high gain
stacked whip. Nice condition. $14

Larsen OM-450 whip, coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
Includes "stacked" whip for 5 db gain on 450 MHz. $20

Mobile antenna mounts for sale:

NMO-MM Magnetic Mount
Magnetic mount for any of the NMO antennas (Larsen, Motorola,
and many others). Includes coax. Very good condition. $18

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

1078. major radio clear out, MANY BARGAINS!

Yahoo group: hamstuff
Date: 2007-04-28 02:14:59 UTC
From: goshawk
Topic: 1078 Message: 1078

hello list,
well, I have decided to have a mega clear out of radio equipment, and am selling the following items.

120A psu, has seen very little use since new, has variable voltage, from 12 to 16V, duel fans, and carry handle, comes with mains lead. this was ?350 new, would like ?250 +carriage which will be about ?15, or will consider sensible offers.

yaesu ft736r, this radio has had the extra modules fitted, so covers 4 bands, 6 and 2 meters, and both 70 and 23CM. it has had the speech readout fitted, has seen no use at all, and there is also a tape manual. I am not sure what to ask for this set, so I will consider any sensible offers, when I purchased it, it was around the ?700 mark. as this is a large radio, carriage will be about ?15

Kenwood tmg707, this is a vhf and uhf mobile set, but it has been opened up, so rather than just doing the 2 meters and 70 cm, it will now both receive and transmit from 136 to 176MHZ, and from 400 to 500MHZ, and will receive a lot more. this means that as well as for ham radio, this set can be used on marine band, UK-general, 446 licence free, pmr, and a lot of other frequencies. this set does 50W on high power, and has seen less than 30mins of use, it has also had the VS3 speech readout fitted. last known price was ?240 with out the speech, which was an extra ?45, would like ?150, or will consider sensible offers.

Kenwood ts570, hf set, with full transmit and receive from 0 to 30MHZ, at 100W, has had the speech readout fitted, ?380 +carriage of about ?15, or sensible offers.

Kenwood tmd700, another vhf/uhf mobile set, which has also had its transmit and receive opened up, so like the 707 above, can be used for a lot more than ham radio. this set also features duel receive, a few more connections than the 707, and the cable for putting the control head part of the radio somewhere else to the rest of it comes as standard. speech has also been fitted, and will also include a DTMF hand mic. last known price was ?350 with out speech, ?45 extra, and with out the DTMF mic, ?45 extra. this set has both, and would like ?280, or sensible offers.

ldg tw1 and tw2 talking swr/power meters, the TW1 is for hf, and the TW2 is for vhf and uhf.
these have seen no use at all since new, and were ?110 each, would like ?70 each, or sensible offers.

Kenwood speaker, can't remember the model of this, it has 3 built in filters, line and headphone out sockets, and can be used with 2 radios, has a good sound. ?40 or sensible
offers.

Watson desk mic, think the model is wm2000. this desk mic can be used with 3 radios, as it has 3 outputs, a yaesu, a Kenwood, and an Icom 1. it has up/down, 4 Kenwood buttons, 4 graphic eq controls, volume, compressor low/mid/high, eq on/off, as well as the transmit and
lock buttons. ?50 or sensible offers.

mfj desk mic, this is the same as the Watson mic above, unfortunately, this has developed a fault, it won't power up, but did, so apart from that, which is probably just a wire come off somewhere inside, it should be fine. ?30 or sensible offers.

Morse keys, I have at least 5 Morse keys, ?10 each.

934 radios, I have the following 934MHZ radios, as far as I know, they all work, but as I can't test them properly, they are sold as is. 2 comtell sets, 5 cybernet sets, all of these
for ?20 per radio, or sensible offers.

if interested, please either call, on 07957880038
skype to, dj-goshawk
or email,
goshawk@...

important, please note,
1, I will only ship these items with in the UK.
2, prices where possible include standard carriage, some of the larger/heavier items have
additional carriage because of this. insured carriage is available, please ask if you would prefer this, and I will give you the price.
3, if insured carriage is not used, I will take no responsibility for items lost or damaged
in transit.
4, preferred payment methods are either paypal, nochex, direct bank transfer, or cash if collecting, or sent at purchaser's own risk.
5, cheques are accepted, but any that are for less than ?150 are subject to an additional ?15 cab charge, to cover the cost of going to and from the bank in order to put them in.

Simon

1079. CW keyer, paddles, and other items FS

Yahoo group: hamstuff
Date: 2007-04-28 17:55:06 UTC
From: Ken Simpson, W8EK
Topic: 1079 Message: 1079

CW items for sale:

MFJ 422 B electronic keyer
This keyer includes sidetone, and has adjustments for
volume, tone frequency, and weighting, as well as speed.
It will key either positive or negative voltages, and is
powered by an internal 9 V battery, or external 5 to 9
volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%. With paper work for $45.

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the
black base, with chrome parts. It looks like new
(no scratches or blemishes of any sort), and works
the same. $65

MFJ 564 B Iambic Paddle
This is MFJ's "clone" on the Bencher BY-1. It has the
black base with chrome parts, works great, and looks
like new. $45

Buy either Iambic Paddle with the 422 keyer, and take $5 off.

Mounted straight key
This is a clone of a J-38 straight key complete with ball
bearings. It looks and works like new.
It is mounted on a very nice piece of Oak wood. This is
real Oak, and not particle board that has been covered.
The Oak has been finished, and has a bevel around the
sides of it on the top. The bottom is finished, and has
rubber feet to prevent it from walking across the table.
It looks extremely nice. $55

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for paddles
As above, but with 1/8 inch mini stereo plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

Wow everyone you need to look into this
I just picked up a bunch of bottles of this about a week ago
and I am seeing some big difference in my size and I still
have weeks to go before I reach my max potential which is amazing to me
because mostly all the stuff out there is complete garbage but this one
I can tell you first hand it works good and I am posting here to
let everyone know you can get complete info here http://www.carrtk.com/odhy
and you should try it out I mean if you are not happy
you can you get money back so why not..

1081. Dont pass this up you guys its almost 3 mill

1083. Microphones FS - several different types

Yahoo group: hamstuff
Date: 2007-05-05 16:22:47 UTC
From: Ken Simpson, W8EK
Topic: 1083 Message: 1083

Microphones for sale:

All work 100% and look very nice unless stated otherwise.

Touchtone (DTMF) mics

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touch tone microphone
Regular low Z mic, with a 12 digit touch tone pad and an
8 pin plug wired for Kenwood. Nice condition. $40

CES Model 630 touch tone microphone
This mic has a 12 digit touch tone pad on the front, with a
regular Low Z hand microphone. Round 6 pin mic plug. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the
back. Round 8 pin connector wired for Kenwood. $40

Regular hand microphones:

Yaesu YM-40, 600 ohm impedance hand microphone
This one has a round 8 pin connector, and has up and
down buttons on it, in addition to a lock button on the
back, and the normal PTT switch.
It works fine and looks fine also. $35

Azden PCM-463 A hand microphone
This hand mic had up down buttons on the top, with an M1
call and PTT button on the side. It works with the Azden
PCS-5000, and maybe others. It has a round 8 pin connector
wired for Azden, and is in nice shape. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

HT speaker microphones For Sale:
All work 100% and look fine also.

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the
early Icom HTs, including the IC-2 AT, IC-02-AT, IC-2G AT,
and many others. It also works with many non Icom HTs.

It has a 2.5 mm and 3.5 mm plug. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; fits most Radio Shack
HTs, but also many Icom, Kenwood and Yaesu HTs. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Prices do not include shipping from Florida.

Thanks.

1084. Antenna rotor control boxes FS

Yahoo group: hamstuff
Date: 2007-05-05 19:29:52 UTC
From: Ken Simpson, W8EK
Topic: 1084 Message: 1084

For Sale:

Rotor control box for CDE TR-44

This control box looks just like the one designed for the
Ham M rotor (black squarish box, with large meter in the
middle, and control lever at the bottom), but is made for
the TR-44 lighter duty rotor. This is the control box that
uses only 7 wires, since it has no electrical brake.

This particular control box works fine, and looks very nice.

Paper work is included for $45

Control Box for 8 wire CDE and HyGain "Ham" rotors:

This is the control box only that can be used on any of the 8 wire
Ham M, Ham II, Ham III, Ham IV, Ham V, or Tailtwister rotors. It
can also be used on the smaller CD-44, etc. This particular box
is the one with the meter on the left, and three buttons on the right
for rotor control. It has a metallic colored front panel with a light
goldish or bronze cast to it. The top of the box is black, and the
bottom is off white.

This particular control box works fine, and looks fine as well.

Paper work is included for $75

Prices do not include shipping from Florida.

Thanks.

1085. ARRL Handbooks and many other ham publications FS

Yahoo group: hamstuff
Date: 2007-05-12 13:09:40 UTC
From: Ken Simpson, W8EK
Topic: 1085 Message: 1085

Many Ham Publications For Sale:

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They are vintage, and contain tube tables and other
vintage information not in the newer handbooks.

1947 - 24th edition
This one is very used, as it should be at 60 years old. The spine
is taped, and the cover is partially loose from the binding. This is
a very good, usable handbook, but it is not collector quality. There
are 150 pages of ads in the back, which show a lot of vintage
equipment, tubes, parts, etc. $20

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some
pages have yellowed, and some have not. $ 15

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 15

1977 - 54th edition
Slight crease on cover $ 13

1978 - 55th edition
Extremely nice condition. $ 15

The following are in the larger 8 1/2 by 11 inch format:

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have
yellowed slightly. $18

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

1996 - 73rd edition
Like new, with disk. $18

Other publications:

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition - $7

ARRL "RFI Book"
1999 - First Edition - like new - $12

ARRL "Understanding Amateur Radio"
1977 - $5

ARRL "Satellite Anthology"
1999 - 5th edition - like new - $11

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $11

ARRL "Your Gateway to Packet Radio"
1989 - 2nd edition - $6

ARRL Operating an Amateur Radio Station
1983 - 61st edition - $3

FCC "Interference Handbook"
1986 edition - $4

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition - $8

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8
1991 - 3rd edition - like new - $10

ARRL Public Service Communications
1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 8

FCC "Interference Handbook"
1986 edition - $4

Nostalgic ham licensing materials for sale:
All books are in very good, or better, condition.

General Class Amateur License Study Guide
By W0XI; published by Sams
First Edition - 1979 - $ 3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing

1975 - 2nd edition - $ 3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $ 3

ARRL License Manuals
1979 - 77th edition - $3
1984 - 79th edition - $3
1984 - 80th edition - $3
Technician - 1989 - First edition - $3
General - 1989 - First edition - $3
General - 1997 - Second edition - $6
Advanced - 1985 - First edition - $3
Extra - 1988 - Third edition - $3

ARRL Technician Class Exam course
1993 - First Edition - $5

1981 Foreign Callbook - Good condition - $ 4

Electronic "Cross Reference" Data Books

These books are detailed reference books listing 1000's
and 1000's of different transistors, diodes, ICs and other
solid state devices, and crossing them to NTE or EGC
devices. They also include base diagrams and other
pertinent information. Obviously, different years have
different devices. All are in extremely good physical
condition, and are 8 1/2 x 11 inch paperbacks.

RCA SK Series - Spring 1972 - 96 pages - $9

Semiconductors by GE - 1974 - 74 pages - $ 5

Sylvania ECG - 1976 - 241 pages - $ 7

Sylvania ECG - 1979 - 352 pages - $9

EGC Industrial MRO - 1980 - 207 pages - $7

RCA SK series - 1981 - 409 pages - $9

ECG Master Replacement Guide - 1987 -
700 pages - $11

NTE Technical Guide and Cross Reference
1988 - 604 pages - $9

Archer Semiconductor Reference Guide
1988 - 290 pages - $6

The following Texas Instrument Data Books are available.

BiCMOS Bus Logic Interface - 1988 - $ 2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 - $ 3

LVDS Application and Data Handbook - 2003 - $ 3

The Voltage Regulator Handbook - 1977 - $ 6

Prices do not include shipping from Florida.
"Media Mail" is inexpensive.

Thanks.

1087. Low Pass TVI filters FS

Yahoo group: hamstuff
Date: 2007-05-19 19:45:52 UTC
From: Ken Simpson, W8EK
Topic: 537 Message: 1087

Low Pass TVI filters For Sale:

Add one of these filters to your transmitter to prevent TVI or RFI.

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

Drake TV-5240-LP low pass filter
This filter is different than the typical low pass filter. Instead
of being long and skinny, the enclosure is about 5 inches
square. It says "For use in 52 ohm line of transmitters operating
below 30 Mc." printed on it. It is rated for 1 KW AM, so should
be good for 3000 watts PEP SSB. $30

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. In extremely nice condition for only $35.

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end. $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

AEA items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, etc. This is a late one with the multi-colored
LEDs, and newer circuit board. I think it has the latest
firmware, as it includes Pactor in it. It works fine, and
looks very close to new. The large, inch plus thick
manual is included for $120.

AEA AC-4 "Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232. $ 18

Cable to connect AEA packet interface to computer
Originally used with the AEA CP-1, to interface it to a
Commodore computer. One end has the 5 pin plug on
it that AEA uses. The other end has an edge connector
with 12 positions on each side. It is in close to new
condition. $10

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

1093. Wattmeters / SWR Bridges FS

Yahoo group: hamstuff
Date: 2007-06-16 13:21:05 UTC
From: Ken Simpson, W8EK
Topic: 1093 Message: 1093

Wattmeters / SWR Bridges For Sale:

All have SO-239 connectors and are designed for 50 ohm systems.

Diawa CN-101 L cross needle wattmeter
It covers from 160 thru 2 meters, so band coverage is more
than many of them. It also reads either peak or average power,
switch selected. It has 3 scales of 15, 150, or 1500 watts. Of
course it reads SWR at the same time, since it has a cross
needle meter. It can be back lighted, if you apply 12 V to it.
This one works 100%, and looks like it just came out of the
box. Of course paper work is included. $80

This HF wattmeter will read either average or peak power.
Full scale readings are 20, 200, and 2000 watts. Of course
it will also read SWR.
It works fine, and looks close to new, with no scratches or
blemishes. $40

Micronta 21-520 A HF wattmeter with large dual meters
LARGE dual meters read both forward and reflected power.
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice.
I can not find a scratch on it, and it is in its original box. $50

Heath AM-2
This HF SWR Bridge matches the DX-40, although it can
be used with any HF transmitter. It is about 8 inches
wide and 4.5 inches high, with the meter in the middle,
and a gray colored knob at each side near the bottom.
It covers 160 thru 2 meters and will handle full power.
This particular unit is in very good shape. The front panel
has no defects, but there are a few small scratches on
the top and sides. Paper work is included for $20.

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice
sloping panel enclosure with a wood grain finish. $10

Prices do not include shipping from Florida.

Thanks.

1094. Antenna Baluns FS

Yahoo group: hamstuff
Date: 2007-06-17 13:18:42 UTC
From: Ken Simpson, W8EK
Topic: 495 Message: 1094

Antenna Baluns For Sale:

A balun is made to convert the unbalanced coaxial
cable to a balanced antenna, such as a beam or dipole.
These are 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer.
They will handle full legal power.

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use it
to hang a dipole or inverted V, or a U-bolt can be added to
attach it to the boom of an HF beam antenna.
This particular balun is in nice shape.
It includes the paper work for $40.

Hi Q VanGorden Balun
This one is used primarily as a center insulator for a dipole
antenna. It has an eye to hang it.
Good condition for $15.

Prices do not include shipping from Florida.

Thanks.

1096. CW Keyers, keys, and cables FS

Yahoo group: hamstuff
Date: 2007-06-23 11:52:19 UTC
From: Ken Simpson, W8EK
Topic: 1096 Message: 1096

CW items for sale:

MFJ 492 Menu Keyer
This can function as a normal CW keyer, but it is so much more. It has multiple memories that can be linked. It also has special "serial number" provisions for automatically incrementing the number on each QSO. Many different functions can be changed from the CW key, or from the menu functions on the front panel. This keyer is ideal for a contester, but can be used by anyone. It is quite intuitive to use. This one works 100%, and looks very close to new. With paper work for $75.

MJF 484 "Grandmaster" keyer
This keyer has four memories that may be linked, or used separately. Front panel controls include speed, weight, tone, volume, delay, and memory select, all in a nice egg shell and wood grain case. With paper work for $60.

MFJ 422 B electronic keyer
This keyer includes sidetone, and has adjustments for volume, tone frequency, and weighting, as well as speed. It will key either positive or negative voltages, and is powered by an internal 9 V battery, or external 5 to 9 volt supply.
It is made to go on the back of a Bencher or MFJ Paddle.
It works 100%. With paper work for $45.

Trac Electronic keyer
This is a CMOS keyer that operates from a 9 V battery. The current consumption is so low, a switch is not needed to turn it off. A speed control and a volume control are on the front panel. No memories in this one -- just a good functioning keyer. It works fine and looks really great. $25

Mounted straight key
This is a clone of a J-38 straight key complete with ball bearings. It looks and works like new.
It is mounted on a very nice piece of oak wood. This is real oak, and not particle board that has been covered. The oak has been finished, and has a bevel around the sides of it on the top. The bottom is finished, and has rubber feet to prevent it from walking across the table.
It looks extremely nice. $55

LaPine straight key
This a relatively generic straight key on an aluminum base.
Nothing fancy, but it works fine, and looks fine as well. $12

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for paddles
As above, but with 1/8 inch mini stereo plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

1098. Low Pass TVI Filters FS

Yahoo group: hamstuff
Date: 2007-07-03 21:18:51 UTC
From: Ken Simpson, W8EK
Topic: 1098 Message: 1098

Low Pass TVI filters For Sale:

Add one of these filters to your transmitter to prevent TVI or RFI.
All filters have an SO-239 connector for input and output, and are
designed for 50 ohm systems.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power, and has at least 80 db signal attenuation at
TV channel 2. It is also in a very sturdy metal case
with SO-239 connectors on each end, and is a 50
ohm filter.
This one works great, looks close to new, and is in
its original box for only $60.

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

Drake TV-5240-LP low pass filter
This filter is different than the typical low pass filter. Instead
of being long and skinny, the enclosure is about 5 inches
square. It says "For use in 52 ohm line of transmitters operating
below 30 Mc." printed on it. It is rated for 1 KW AM, so should
be good for 3000 watts PEP SSB. $30

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. In extremely nice condition for only $35.

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end. $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

1101. Antenna tuner, wattmeter, coax switch and dummy load, all in one box

Yahoo group: hamstuff
Date: 2007-07-14 12:40:00 UTC
From: Ken Simpson, W8EK
Topic: 1101 Message: 1101

For Sale:

Vectronics VC-300 DLP HF antenna tuner, peak reading
wattmeter, coax switch and dummy load, all in one box

The VC-300 DLP has a fairly large cross needle meter
for reading both forward and reverse power simultaneously,
and hence the SWR. It will read either average or peak
power, with scales of 30 Watts and 300 Watts. In addition,
a dummy load is included inside, as is a 4 to 1 balun. The
meter can be back lighted if you apply 12 V DC. The tuner
also has an antenna switch built in, that will switch between
"tuned" and "straight thru" operation, in addition to various
antennas. It will tune 160 thru 10 meters. To put it another
way, this tuner will do everything!

This one is in extremely nice condition, both electrically
and cosmetically. The manual is included for $135, plus
shipping from Florida.

Thanks.

1104. Kenwood dual band FM transceiver FS

Yahoo group: hamstuff
Date: 2007-07-21 14:09:46 UTC
From: Ken Simpson, W8EK
Topic: 1104 Message: 1104

For Sale:

Kenwood TW-4000 A dual band mobile FM transceiver

First buyer says he sent money about 3 weeks ago, but
no $$ here, and no answer to e-mail, so it is available again.

The TW-4000 A covers 2 m and 440 MHz FM. It has 25
Watts output, or 5 W in low power. Of course it has
memories, scan, etc. It has a GASFET front end,
giving it a really great receiver.

This would make a great packet rig, which is what it has
been used for. All solid state switching makes silent
packet operation. Since it has been used on packet, it
does not have a mic or mobile bracket with it, although
it takes a standard 8 pin round mic connector, like most
Kenwood rigs.

It needs 13 V DC at 7 or 8 amps to operate. It works fine.
Manual and power cord are included for $95 plus shipping
from Florida.

Thanks.

Date: 2007-08-04 20:51:43 UTC
From: Ken Simpson, W8EK
Topic: 1110 Message: 1110

Regular hand microphones For Sale:

Yaesu YM-40, 600 ohm impedance hand microphone
This one has a round 8 pin connector, and has up and
down buttons on it, in addition to a lock button on the
back, and the normal PTT switch.
It works fine and looks fine also. $35

Azden PCM-463 A hand microphone
This hand mic had up down buttons on the top, with an M1
call and PTT button on the side. It works with the Azden
PCS-5000, and maybe others. It has a round 8 pin connector
wired for Azden, and is in nice shape. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Touchtone (DTMF) microphones:

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touch tone microphone
Regular low Z mic, with a 12 digit touch tone pad and an
8 pin plug wired for Kenwood. Nice condition. $40

CES Model 630 touch tone microphone
This mic has a 12 digit touch tone pad on the front, with a
regular Low Z hand microphone. Round 6 pin mic plug. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the
back. Round 8 pin connector wired for Kenwood. $40

HT speaker microphones:

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor
2.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1115 Message: 1115

Heath HN-31 "Cantenna" RF Dummy Load For Sale:

This is the traditional Heath dummy load that will handle up
to 1000 Watts. It has a derating curve printed on the can,
as well as in the manual.

I measured the resistor and it is about 54 ohms, so obviously
it is not fried, and well within tolerance for a good match to 52
ohms. The cantenna itself is in extremely nice shape.

Paper work included for $40 plus shipping from Florida.

Thanks.

1116. Rubber Duck antennas for your HT FS

Yahoo group: hamstuff
Date: 2007-09-08 11:58:10 UTC
From: Ken Simpson, W8EK
Topic: 1116 Message: 1116

For Sale:

Rubber Duck antennas for your HT.
All are for 2 meters and are in good condition, unless
stated otherwise.

Larsen KD4-VHF2 Standard KulDuck antenna
Regular size about 7 inches long, with BNC Connector. $14

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

Larsen HQ "Kul Duck" gain antenna for 220 MHz
BNC connector. This antenna is supposed to have about
3 db gain over a "normal" rubber duck.
It is for 220 MHz and is about 8 inches long. $15

BNC stubby for 440 MHz - 3 inches long - $10

BNC Antenna cut for 27.1 MHz
About 10 inches long. $12

Prices do not include shipping from Florida.

Thanks.

1117. 2 m and 440 MHz mobile antennas and mounts FS

Yahoo group: hamstuff
Date: 2007-09-10 16:34:12 UTC
From: Ken Simpson, W8EK
Topic: 565 Message: 1117

For Sale:

VHF (2 meter) and UHF (440 MHz) mobile antennas and mounts:

Larsen NLA-150 coil only for 2 meters
For use with a 5/8 wave (approx 4 foot) antenna.
Fits the Larsen NLA mount for 3 db gain. $9
-
The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips, if you need them. $6

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz
bands. Good condition for $7.
-
Larsen Q
Fits a 5/16 inch stud. The quarter wave whip can be cut
for 2 meters, 220 MHz, or 440 MHz bands. Great condition. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen NLA-450 coil and "stacked" whip
This fits the Larsen NLA mount, and has about 5 db gain
on the 70 cm band. It includes the coil, and the high gain
stacked whip. Nice condition. $12

Larsen OM-450 whip, coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Mobile antenna mounts for sale:

NMO-MM Magnetic Mount
Magnetic mount for any of the NMO antennas (Larsen, Motorola,
and many others). Includes coax. Very good condition. $18

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

From: goshawk
Topic: 1121 Message: 1121

hello list,
I am looking for either of the following 2 receivers please,
these are the Icom Ic-R7000
and the Icom IC-R8500

I am not looking to purchase new, so please don't just come back to me with
details of shops, unless they are likely to have some second hand ones at
reasonable prices, thanks.
am looking for them in the UK only.

please either call me on 02082200261,
skype me at dj-goshawk (voice or chat),
or e-mail me at:
dj.goshawk@...
if you can help me find either or both of these receivers, or have either of
them that you want to part with, thanks.

From: cane exuye
Topic: 1125 Message: 1125

Learning to trade takes much longer than most of us
would like. How would you like to take a shortcut and
graduate early from the school of hard knocks?

When I ask the question that way, almost everyone is
ready to learn to do that. The problem is that when I
tell you whats required, youll find a reason why it
wont work for you.

1132. The Secret Of Making Money In The Stock Market

Yahoo group: hamstuff
Date: 2007-10-17 17:25:33 UTC
From: cane exuye
Topic: 1132 Message: 1132

You may have wondered if there are people out there
who consistently make money from the stock market. And
yes, there are people out there who are consistently
making money from the stock market because if they
were not making money from market they would not be
there and the markets would not be there too. These
people are no smarter than you. They do not work any
harder and neither are they lucky than you.

But, unlike you, they never seem to worry about having
money because they know one or two secrets of making
money in the stock market. You see most people miss
the big idea here. They think it takes a lot of money
to make a lot of money. But that is not how it is
done. The idea is to make pennies consistently and to
use them to build vast personal fortunes. The stock
market is a proven wealth builder and can and should
benefit all participants. It is only fair that each
one of us should be entitled to a piece of the action.

1134. Magic Bullet To Retirement

Yahoo group: hamstuff
Date: 2007-10-19 06:29:55 UTC
From: cane exuye
Topic: 1134 Message: 1134

Everyone is looking for that magic bullet that will
allow them to retire rich or at least comfortable.
They want to be able to do what the TV ads show -
vacationing in Fiji, fly fishing in Vermont, etc, etc.
It seems so easy on TV.

A pretty financial analyst from some big company shows
the prospect how it is done. The next part of the
trick is getting it done and that aint easy. It
usually means a change because the potential retiree
must take part of the cash now being spent on present
life style and put it away not to be spent until
retirement becomes a reality. If the couple shown in
the ad do it they will be glad they did. Sacrificing
some current pleasantries will have been worth it. The
$2,000, $3,000, $5,000 trip today could be worth twice
that amount or more at age 65 if the worker now is
lucky enough to have a good broker or planner one who
will not allow loss of principal during subsequent
bear markets.

1135. Autek QF-1 A, Active Audio Filter FS

Yahoo group: hamstuff
Date: 2007-10-19 23:32:50 UTC
From: Ken Simpson, W8EK
Topic: 1135 Message: 1135

Active Audio Filter For Sale:

Autek QF-1 A, Active Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit looks very close to new, and works 100%.

With paper work for $ 55 plus shipping from Florida.

Thanks.

1137. Santec ST-144, 2 meter HT and Santec Accessories FS

Yahoo group: hamstuff
Date: 2007-10-20 12:39:56 UTC
From: Ken Simpson, W8EK
Topic: 1137 Message: 1137

For Sale:

Santec ST-144, 2 meter HT
This full featured 2 meter HT is capable of about 4 Watts,
1 Watt, or 0.1 W power output with a 3 position switch. It
covers the full 2 meter band in 5 KHz steps, like most
modern HTs. It also features a built in digital clock.

This particular unit also includes a PL encoder (which was
an optional extra), so you can access those repeaters
requiring subaudible tone. This one works 100% and
looks very, very nice. Its battery works, but is not holding
a charge for a long length of time. Of course it includes
a rubber duck antenna, carrying strap, and wall wart
battery charger, along with paper work for $65.

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $20

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $20

Santec speaker microphone
It has the small round plug (about 3/8 inch) with 6
pins, as used on most Santec HTs, and many
Wilson and Yaesu HTs. Works and looks great.$20

Prices do not include shipping from Florida.

Thanks.

1138. Investing Secrets of the Wealthy

Yahoo group: hamstuff
Date: 2007-10-20 09:43:08 UTC
From: cane exuye
Topic: 1138 Message: 1138

My favourite subject. Investment. Investing in your
own ecommerce business is the best, most time
efficient way to make money. But to grow real wealth
you need to diversify into other investments as well.
Your ecommerce business (or other business / high
paying job) provides the cash for investing. It is the
interest earned of those investments however that pays
for your luxury lifestyle.

1139. Why the Rich Keep Getting Richer

Yahoo group: hamstuff
Date: 2007-10-21 06:47:18 UTC
From: cane exuye
Topic: 1139 Message: 1139

Rich people: fortunate, lucky, selfish, and arrogant?
Or highly educated, caring, brilliant individuals?
Becoming rich isnt hard, but it does require a bit of
time and knowledge. Having time to get rich, educating
oneself, and buying assets are the three key factors
in attaining untold wealth.

Rich people usually either have or make time to get
rich. Most people that now own huge mansions, have
wonderful riches, and drive the nicest cars usually
begin taking the road to riches in their spare time.
One plan, the most common, is to work at a low-risk,
steady job until one has enough money to invest in
something that will feed one for the rest of their
life. But before one can invest in anything, one first
has to educate oneself.

1140. Home Based Businesses - Getting Out Of The Rat-Race Forever

Yahoo group: hamstuff
Date: 2007-10-22 03:35:07 UTC
From: cane exuye
Topic: 1140 Message: 1140

In early 2006 my wife Kath was looking for free finance ebooks on the web. We were both disgruntled about the pay and long dangerous hours in my contracting job, so she decided to do something about it. She came across an ebook from Jamie McIntyre at 21st Century Academy called "What I Didn't Learn at School But Wish I Had". After reading the ebook Kath was so impressed that she ordered the free DVD with the same title.

When we both watched the DVD we were convinced that this was the right system for us, so we ordered the 21st Century Homestudy Program. This was tough going, because we were down to our last $500 after a renovation on the trashed former drug baron's house across the road. We thought that the renovation road was the route to wealth and thats why we were doing it. Previously, we had been in Network Marketing for many years, but could not seem to breakthrough to the levels we needed to have a decent lifestyle. When we ordered the program, our one thought was, if this doesnt work, its getting returned!

Date: 2007-10-23 10:53:17 UTC
From: cane exuye
Topic: 1141 Message: 1141

It is never too late or too early to start investing for the future. Of course there will be a lot of advantages if you start investing for the future at an early stage. Note that if you start investing while you are still very young, time could work to your advantage. The value of money and properties could go higher with time, thus in most instances, the longer you keep the investment, the greater will be your gain.

Contrary to some myth that you will need a fairly large sum of money to start investing, you could actually start small. If you were financially hard up that every dollar would count to tide you over to the next payday, with more reason for you to save and invest your money into some profitable ventures. Why would you save when you can hardly afford to buy the basic necessities in life?

1142. How To Become A Millionaire In 8 Years Or Less

Yahoo group: hamstuff
Date: 2007-10-24 20:42:32 UTC
From: cane exuye
Topic: 1142 Message: 1142

Contrary to most people's experiences, the FOREX
market is not a voracious "black hole" that seeks to
swallow up your hard earned money. The FOREX market is
simply a market like any other market, whether you are
selling bushels of wheat, fresh fish, or currencies.
It has no agenda to deprive you of your cash. It's
just a harmless ol' teddy bear that needs to be
cuddled and loved. And, if you learn to love it, it
will love you back, and in very generous and tangible
ways. On the other hand, if you are determined to
think of it as your enemy, then you have no choice but
to defeat it; and, of course, it will fight back. As
any professor of quantum physics or spiritual leader
will tell you, how you perceive a thing will determine
how that thing will respond, it's a principle of
cosmic proportion.

1143. Kenwood HT accessories FS

Yahoo group: hamstuff
Date: 2007-10-27 13:27:34 UTC
From: Ken Simpson, W8EK
Topic: 637 Message: 1143

Kenwood HT accessory items For Sale:

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new battery "insert" in it. $12

Kenwood BH-2 belt clip for TH-21 / 31 / 41 series HTs
and maybe others as well. With hardware $5

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-6 regular, 6.6 inches long $10

Original Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $3

Belt clip for TR-2400 HT, complete with hardware - $8

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Original Operators manual for Kenwood TR-2400 - $15

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Prices do not include shipping from Florida.

Thanks.

1145. HF Wattmeter / SWR Bridges FS

Yahoo group: hamstuff
Date: 2007-11-10 13:43:27 UTC
From: Ken Simpson, W8EK
Topic: 1145 Message: 1145

HF wattmeter / SWR Bridges For Sale:

Micronta 21-520 A, HF wattmeter with large dual meters

This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
LARGE dual meters -- one reads forward power and one
reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.

This particular meter works fine, and looks very, very nice.
I can not find a scratch on it, and it is in its original box. $50

Micronta 21-521 A, SWR Bridge, coax switch combination

This unit is a standard HF SWR Bridge, but in addition,
it also has a built in 2 position coax antenna switch.
If you only have two antennas, or one antenna and a
dummy load, this unit would be ideal for you, eliminating
the need for separate units.

This particular unit is in extremely nice condition.
It includes the paper work, and the original box, although
the box is not in as good condition as the meter.
Of course it works fine. $20

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice
sloping panel enclosure with a wood grain finish, and
works fine. $10

Prices do not include shipping from Florida.

Thanks.

1147. RF Dummy Loads FS

Yahoo group: hamstuff
Date: 2007-11-13 12:13:31 UTC
From: Ken Simpson, W8EK
Topic: 1147 Message: 1147

RF Dummy Loads For Sale:

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle up
to 1000 Watts. It has a derating curve printed on the can,
as well as in the manual.

I measured the resistor and it is 50.2 ohms, so obviously it
is not fried, and well within tolerance for a good match to 50
ohms. The cantenna itself is in good shape.

Paper work is included for $40.

Archer 21-628 Dummy Load
Rated at 5 watts, it is not high power, but is very precision.
Ideal if you need a good termination. It measures exactly 52.0 ohms
In like new condition. $10

Prices do not include shipping from Florida.

Thanks.

Vintage Electrical Books For Sale:

Radio Physics Course - An Elementary Text Which
Explains the Principles of Electricity and Radio
By Alfred Ghirardi - Published 1932 by Murray Hill Books
I know that is a long title, but that is what the book is called!
This is a book just under 1000 pages that is very detailed.
It has many interesting topics.
This book is in fairly good shape, although it certainly is not
new! $15

Electrical Engineering by Dawes
Volume 1 - Direct Currents
Third Edition - 1937
I would call this a basic text. 750 pages. It includes
a separate insert that has the answers to the problems.
Book is in nice shape, but does have a name on the
inside cover with a 1938 date. $ 15

Direct and Alternating Currents
By Oppenheimer and Borchers
1963 - McGraw Hill
392 pages of "Modern" info, compared to the 1930's books
Very nice shape, with name in front cover. $12

Unit Outlines in Physics by Colen and Newman
Paperback (I didn't know they made paperbacks then!)
Revised edition, 1940
Some wear, and writing. $ 12

Prices do not include shipping from Florida.

Thanks.

For Sale:

VHF (2 meter) and UHF (440 MHz) mobile antennas and mounts:

Larsen NLA-150 coil and whip for 2 meters
This is a 5/8 wave (approx 4 foot) antenna.
Fits the Larsen NLA mount for 3 db gain. $18

Deduct $6 if you do not need the whip, which is hard to ship.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz
bands. Good condition for $7.

Larsen Q
Fits a 5/16 inch stud. The quarter wave whip can be cut
for 2 meters, 220 MHz, or 440 MHz bands. Great condition. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen NLA-450 coil and "stacked" whip
This fits the Larsen NLA mount, and has about 5 db gain
on the 70 cm band. It includes the coil, and the high gain
stacked whip. Nice condition. $14

Larsen OM-450 whip, coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
Includes "stacked" whip for 5 db gain on 450 MHz. $20

Mobile antenna mounts for sale:

NMO-MM Magnetic Mount
Magnetic mount for any of the NMO antennas (Larsen, Motorola,
and many others). Includes coax. Very good condition. $18

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

1151. 2 meter FM transceiver FS

Yahoo group: hamstuff
Date: 2007-11-22 22:10:17 UTC
From: Ken Simpson, W8EK
Topic: 1151 Message: 1151

For Sale:

KDK FM-2030, Two meter FM transceiver

This transceiver covers two meters with 26 W in high
power and 6 W in low power. It includes PL (subaudible)
tone encoding. The microphone has a touchtone (DTMF)
pad on it, and also Up-Down switches. Of course it has
memories and scan capabilities. It is very easy to operate.
This one looks fine, and works fine.

Included with the radio is the power cord, touchtone
up-down microphone, microphone mounting bracket,
mobile bracket and paperwork, all in the original box
for $89 plus shipping from Florida.

Thanks.

Trac Electronics CMOS Memory Keyer For Sale:

This CW keyer has two very large memories built in to it.
Either can be selected independently.
Of course it works fine as a plain CW keyer if you do not need
the memories.
It can be powered by a 9 Volt battery or wall wort.

This one works fine, and looks very good also.

$45 plus shipping from Florida.

Thanks.

1153. Kenwood Dual Band FM Mobile transceiver FS

Yahoo group: hamstuff
Date: 2007-12-02 14:25:46 UTC
From: Ken Simpson, W8EK
Topic: 1153 Message: 1153

For Sale:

Kenwood TW-4000 A dual band mobile FM transceiver

First buyer says he sent money about 3 weeks ago, but
no $$ here, and no answer to e-mail, so it is available again.

The TW-4000 A covers 2 m and 440 MHz FM. It has 25
Watts output, or 5 W in low power. Of course it has
memories, scan, etc. It has a GASFET front end,
giving it a really great receiver.

This would make a great packet rig, which is what it has
been used for. All solid state switching makes silent
packet operation. Since it has been used on packet, it
does not have a mic or mobile bracket with it, although
it takes a standard 8 pin round mic connector, like most
Kenwood rigs.

It needs 13 V DC at 7 or 8 amps to operate. It works fine.
Manual and power cord are included for $95 plus shipping
from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1155 Message: 1155

Icom IC-4 AT, 440 MHz HT for sale:

The Icom IC-4 AT is a fairly generic HT for the 440 MHz band.
It has a 16 digit touch tone pad on the front, and is fully synthesized,

with the frequency controlled by thumbwheel switches on the top.
It has about 3 watts output in high power and just under a watt in low.

A stubby duck antenna (about 3 inches long), belt clip, and wrist
strap is included, along with a battery charger.
This HT works fine, and looks fine also.
Paper work included for $55.

"Empty" Battery pack for alkaline cells
This is not the actual Icom BP-4, but is a Mr NiCd clone, with a
value added addition. It is both a pack for AA cells, but it is also
a 13.8 V DC adapter. It can be used on the IC-2, IC-3, IC-4 and
that series of HTs, as well as the IC-02 AT series of HTs.
This particular unit works fine and looks like new. $ 30

Prices do not include shipping from Florida.

Thanks.

1157. Wattmeters and SWR Bridges FS

Yahoo group: hamstuff
Date: 2007-12-29 12:08:54 UTC
From: Ken Simpson, W8EK
Topic: 723 Message: 1157

Wattmeters and SWR Bridges For Sale:

Vintage Wattmeter

This wattmeter is made by M.C. Jones Electronics Co. of
Bristol, Conn. It is called a MicroMatch, Model 261.1.

It is a wattmeter that covers frequencies from .5 to 225 Mcs.
Yes, it says Mcs, and not MHz. From the looks of it, I would
guess that it is slightly post WW II vintage. It has the same
type of styling as General Radio, Millen, Measurements Corp,
and similar test equipment of that era. The case itself is gray
crinkle, with a black meter bezel.

The unit is in two parts. There is a sensing unit that is
similar to the pick up unit that E.F.Johnson used as a remote
pick up for the Matchboxes, except this remote pick up is
a bit larger in diameter, and about half as long. The meter
portion says model 262, and has 10, 100, and 1000 Watt
scales in both forward and reverse. It is connected by a
cable about 3 feet long, that has a 1/4 inch plug that plugs
into the remote pick up.

Cosmetically, it is exceptionally good. The paint looks very
good. I can not find a scratch on it. I would say that is it
collectable quality.
Electrically it works fine. $60

Micronta 21-520 A, HF wattmeter with large dual meters

This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
LARGE dual meters -- one reads forward power and one
reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.

This particular meter works fine, and looks very, very nice.
I can not find a scratch on it. $50

SWR Bridges

Both SWR Bridges are designed primarily for HF operation,
although they still function well on 6 and 2 meters. Both have
SO-239 connectors on each end, and are designed for 52
ohm antenna systems.

Quements SWB-3 (same meter also sometimes labeled Swan)
This meter has two separate meters. One is for forward power
and one for reverse. This particular unit has a crack on the face
of the SWR (reflected power) meter, although the meter still
functions fine. It is strictly a cosmetic issue. $15

Swan FS-2
This SWR bridge has a single meter, and a switch to switch
between forward and reflected power. It can also be used for
a field strength meter. This one works fine, and looks great
also. $12

Prices do not include shipping from Florida.

Thanks.

Topic: 1159 Message: 1159

Touchtone (DTMF) microphones For Sale:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 40

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $45

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the
back. Round 8 pin connector wired for Kenwood. $40

Prices do not include shipping from Florida.

Thanks.

1161. Antennas for your HT FS

Yahoo group: hamstuff
Date: 2008-01-17 19:30:20 UTC
From: Ken Simpson, W8EK
Topic: 1161 Message: 1161

Two meter antennas for your HT for sale:

All antennas are for two meters, work fine, and are in good condition.

VoCom 5/8 wave gain antenna for 2 meters
This antenna is about 4 feet long when extended, so it is unwieldy
on an HT, but it really has gain when you need it. It has 3 db gain
over a quarter wave antenna which likely has about 6 db gain over
a rubber duck. To put it another way, this antenna likely has about
9 db gain over a rubber duck. It telescopes to about 9 inches long.
In that position it is still usable, with about the same gain as a
rubber
duck. This antenna is idea for parades, walk-a-thons, and other
events where you need a gain antenna on your HT. It has a BNC
connector on it. $18

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down to
about 4 inches. It has about 6 db gain over the typical rubber
duck antenna. It has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259 connector. $15

Standard rubber duck antenna
With BNC connector, about 7 inches long. $10

PL-259 connector - 6.5 inches long $10
HyGain 275, in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, in original package - $10

5/16 inch threaded, like used by Motorola and others
Regular - about 6 inches long - $10
Stubby - 4 inches long - $10

Type F connector - 6.5 inches long - $10

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Aftermarket stubby, 3.3 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

BNC stubby for 440 MHz - 3 inches long - $10

Prices do not include shipping from Florida.

Thanks.

Date: 2008-01-19 17:47:13 UTC
From: Ken Simpson, W8EK
Topic: 1162 Message: 1162

CW keyer, paddles, and cables for sale:

Trac Electronics CMOS Memory Keyer
This CW keyer has two very large memories built in to it.
Either can be selected independently.
Of course it works fine as a plain CW keyer if you do not need
the memories.
It can be powered by a 9 Volt battery or wall wort.
This one works fine, and looks very good also. $45

Bencher BY-1 Iambic Paddles
Standard Bencher Paddles with black base and chrome parts.
In very nice condition for $65.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but with coiled cord. $10

As above (straight cord), but with 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Gordon West "Radio School" code tapes
This is a set of four cassette tapes to take a person
up thru 13 WPM. It was designed for use when the General
test was 13 WPM, to make one proficient at that speed.
This set is in nice shape, in its original "binder". $12

Prices do not include shipping from Florida.

Thanks.

1163. Coaxial antenna switches and connectors FS

Yahoo group: hamstuff
Date: 2008-01-26 23:56:08 UTC
From: Ken Simpson, W8EK
Topic: 1163 Message: 1163

Coaxial antenna switches For Sale:

All have SO-239 connectors.

Para Dynamics PDC 3HD
This is a high quality coax switch, with printed circuit board
stripline type of construction, to keep the impedance constant.
It has the common connector coming out of the bottom, with
the 3 switched connectors coming out of the top.
It looks very similar to the Diawa CS-201 or MFJ 1702, but
is made to switch three antennas. Unused positions are NOT
grounded. $20

Pace 3 position switch
This switch is in a rectangular box. It has the common connector
on the bottom and the three switched connections coming out
of the top. Unused positions are NOT grounded. $15

AmComm JV-104 coax switch
Switches 3 antennas. It is in a nice black rectangular box
Very nice condition. $18

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does
ground unused antennas. It has SO-239 connectors,
with the coax coming out like spokes of a wheel.
It is in good condition and works fine. $ 35

Waters (B & W) 341 two position coax switch
This switch is very much like the B & W 375 five position
switch, except it only has two position. It has the coax
coming out the back, and it does NOT ground the unused
antenna. This one is in very nice electrical and mechanical
shape. $30

Coax connectors and adapters For Sale:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

1165. Icom HTs and accessories FS

Yahoo group: hamstuff
Date: 2008-02-02 14:29:34 UTC
From: Ken Simpson, W8EK
Topic: 1165 Message: 1165

Icom HTs and related accessories For Sale:

Icom IC-2 AT, 2 meter HT
The Icom IC-2 AT is a fairly generic HT for the 2 meter band.
It is fully synthesized, with the frequency controlled by thumbwheel
switches on the top, and has a 16 digit touchtone pad on the front.
As some may recall, the IC-2 AT originally came with a 12 digit
touch tone pad on it, but some people needed the 16 digit pad
for control operations, so they ordered a new "front" for the 220 or
440 versions of this HT, which had a 16 digit pad on it, and replaced
this front on the 2AT. This is what has been done with this unit. The
label says Icom IC-3AT but it is really an IC-2AT, with the changed
front. The rubber has deteriorated on the 16 digit pad, so it looks
ugly. Even though it looks ugly, all of the 16 digits work fine.
The HT has about 3 watts output in high power and just under a
watt in low. A rubber duck antenna, belt clip, and wrist strap are
included, along with a battery charger. This HT works fine. If you
want an inexpensive, easy to operate HT, this is it. Paper work
included for $35.

Icom IC-4 AT, 440 MHz HT
The Icom IC-4 AT is a fairly generic HT for the 440 MHz band.
It has a 16 digit touch tone pad on the front, and is fully synthesized,
with the frequency controlled by thumbwheel switches on the top.
It has about 3 watts output in high power and just under a watt in
low. A stubby duck antenna, belt clip, and wrist strap is included,
along with a battery charger.
This HT works fine, and looks fine also.
Paper work included for $55.

Icom BC-35 Desk Charger.
It will charge these batteries:
BP-2, BP-3, BP-4 (w/NiCads), BP-5, BP-5A, BP-7, BP-8, BP-70,
CM-2, CM-2G, CM-3, CM-3G, CM-5, CM-5G, CM-5A, CM-5AG,
CM-7, CM-7G, CM-8, CM-8G, CM-96. To put it another way, it
charges all of the batteries used on Icom HTs from about 20
years ago.
This one works fine and looks very close to new.
It is in its original box, with paper work for $25.

Icom DC-1, 13 V DC adapter for many Icom HTs
This adapter slides on the HT, in place of the battery pack. If
13 V DC is applied, it converts the voltage to the proper voltage
for the HT. It can be used with the IC-2, IC-3, IC-4, IC-02, IC-03,
IC-04, and others. This one works fine, and looks very nice.
With paper work for $12.

Icom BP-4 / CM-4 battery case
This is the "empty" battery case, that one may add six AA cells
for extra long battery life. It will take either rechargeable or
alkaline
AA batteries. When used with rechargeable batteries, it can be
charged on a BC-35 desk charger. This will work on the 2GAT,
02AT, 2AT, 4GAT, 04AT, 12GAT or 03AT, plus many of Icom's
commercial radios. This unit is in very nice condition. With
paper work for $15.

"Empty" Battery pack for alkaline cells
This is not the actual Icom BP-4, but is a Mr NiCd clone, with a
value added addition. It is both a pack for AA cells, but it is also
a 13.8 V DC adapter. It can be used on the IC-2, IC-3, IC-4 and
that series of HTs, as well as the IC-02 AT series of HTs.
It is similar to a DC-1 and a BP-4 in one unit.
This particular unit works fine and looks like new. $ 30

Selectone ST-131 Subaudible PL tone encoder
If you need subaudible tones, this unit will add them to the Icom
IC-2AT, 3AT, 4AT, and others of that series that lacked the tones
originally. It is a postage stamp size unit. This one has never been
used, and is still in its original plastic bag, with the instructions.
$20

Prices do not include shipping from Florida.

Thanks.

1166. Shure 444 desk microphone and other mics FS

Yahoo group: hamstuff
Date: 2008-02-14 16:06:30 UTC
From: Ken Simpson, W8EK
Topic: 1166 Message: 1166

Microphones For Sale:

Shure 444 desk microphone
This desk mic is ideal for many rigs, especially those
that are vintage. The 444 has voice shaping built in to
it that gives it more "punch" than most mics. There is a
switch on the bottom to select PTT or VOX operation.
This particular 444 is in its original box. Not a scratch
or blemish on it. Of course it works well also! $60

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the Turner name
on the front, cotton covered cord, and single button
microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the "sheen"
left on it. I no longer have a rig to test it on, but I did connect
it to a scope and get a nice pattern, indicating all is working
well. $35

High Impedance Heath Hand Microphone
Not a GH-12 mic, but similar. It is a white mic that came
with Heath gear, and says Heath on the front. It is Hi Z,
and has the 2 pin Amphenol connector on it, as used by
much of the older Heath gear. It would be ideal for the SB
and HW series, plus many others, including non-Heath rigs.
It works fine, and is in good shape. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Touch tone (DTMF) microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from

the front, but has a touchtone pad on the back. Four pin mic plug. This particular unit has been used, but is in good shape and includes paper work. $ 40

KDK Model TM-2
With touch tone pad and up-down switches. It presently has a 6 pin connector for the KDK 2030, but that can be changed. Nice condition. $45

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the back. Low Z mic element with round 8 pin connector wired for Kenwood. $40

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $40

HT speaker microphones:

Santec speaker microphone
It has the small round plug (about 3/8 inch) with 6 pins, as used on most Santec HTs, and many Wilson and Yaesu HTs. Works and looks great.$20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Speech Processor

MFJ "Super Logarithmic Speech Processor"
Model LSP-520BX II

This unit is one of the "good" speech processors. It uses techniques that will boost your average talk power, without introducing large amounts of distortion. Some processors only add to distortion, but this one works.

It is housed in one of the nice TenTec wood grain / eggshell white enclosures that are a perfect match for some of the earlier TenTec rigs like the Argonaut 505, 509, Triton I and II, and others. Of course it can be used with any rig you want, as it inserts in the microphone audio line. In other words, plug your mic into this unit, plug the unit into your rig, add 12 V DC to power it, and you are set to go.

This unit works fine and looks fine also. $40

Prices do not include shipping from Florida.

Thanks.

1167. Autek QF-1 audio filter FS

Yahoo group: hamstuff
Date: 2008-02-18 15:05:29 UTC
From: Ken Simpson, W8EK
Topic: 1167 Message: 1167

For Sale:

Autek QF-1 audio filter

This is an audio filter that goes between your rig and
speaker. It runs off of 110 V AC, and will peak, notch,
or become a low pass filter. Selectivity (bandwidth)
and frequency are adjustable from the front panel.
The input is a 1/4 inch phone plug, and the output is
a 1/4 inch jack on the front panel. This particular unit
looks very good, and works the same. Paper work
is included for $40 plus shipping from Florida.

Thanks.

1169. Wattmeters and SWR Bridges FS

Yahoo group: hamstuff
Date: 2008-02-23 00:36:38 UTC
From: Ken Simpson, W8EK
Topic: 723 Message: 1169

Wattmeters and SWR Bridges For Sale:

Daiwa CN-520 "Cross needle" Wattmeter
This wattmeter does it all. It covers from 1.8 to 60 MHz,
which means this one meter will measure power on all HF
ham frequencies, plus six meters. It would be ideal for
some of the new multiband rigs that have 1.8 to 55 MHz
coming from one antenna connector, and 2 meters and
440 MHz from a separate connector. It has 2 power
scales of 2000, and 200 watts on forward power, and
400 or 40 watts reflected, and uses a nice cross needle
meter to read both forward and reflected power at the
same time, with a cross scale for SWR. It works great,
and looks OK also. $50

Heath HM-102 HF wattmeter.
Covers 1.8 to 30 MHz, with 200 W and 2000 W full
scale. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter,
or separated from the actual meter by about 3 feet.
SO-239 connectors in and out. This particular meter
works fine and is in good shape. With paper work
included for $38.

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice. $50

Heath HM-15 SWR Bridge
This unit matches the Heath SB (and also HW) line in styling.
It is an SWR Bridge that covers from 160 thru 6 meters, with
SO-239 connectors on the back. The front has the meter on
the left, and two knobs to the right. It is the same size as the
HD-15 phone patch. This one is in very nice shape.
Paper work included for $20.

Heath AM-2
This HF SWR Bridge matches the DX-40, although it can
be used with any HF transmitter. It is about 8 inches

wide and 4.5 inches high, with the meter in the middle,
and a gray colored knob at each side near the bottom.
It covers 160 thru 2 meters and will handle full power.
This particular unit is in good shape.
Paper work is included for $18.

Midland 23-126
This SWR bridge has a single meter, and a switch to switch
between forward and reflected power. It can also be used for
a field strength meter. This one works fine, and looks great
also. $15

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice
sloping panel enclosure with a wood grain finish. $10

Prices do not include shipping from Florida.

Thanks.

1170. Two meter FM transceiver w/ tones FS

Yahoo group: hamstuff
Date: 2008-02-29 20:54:25 UTC
From: Ken Simpson, W8EK
Topic: 1170 Message: 1170

For Sale:

KDK FM-2030, Two meter FM transceiver, with tones

This transceiver covers two meters with 26 W in high
power and 6 W in low power. A PL (CTCSS subaudible)
tone encoder is built in. The microphone has a touchtone
(DTMF) pad on it. Of course it has memories and scan
capabilities. It is very easy to operate.
This one looks fine, and works fine.

Included with the radio is the power cord, touchtone
microphone, mobile bracket and paperwork, all in the
original box for $75 plus shipping from Florida.

Thanks.

1171. Many Microphone and related items FS

Yahoo group: hamstuff
Date: 2008-03-01 15:05:03 UTC
From: Ken Simpson, W8EK
Topic: 1171 Message: 1171

Microphones and related items for sale:

Desk Microphone:

Shure 444 desk microphone
This desk mic is ideal for many rigs, especially those
that are vintage. The 444 has voice shaping built in to
it that gives it more "punch" than most mics. There is a
switch on the bottom to select PTT or VOX operation.
This particular 444 is in its original box. Not a scratch
or blemish on it. Of course it works well also! $60

Regular hand microphones:

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the Turner name
on the front, cotton covered cord, and single button
microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the original
"sheen" left on it. It works fine. $33

High Impedance Heath Hand Microphone
This mic came with Heath gear, and says Heath on the front
of it. It is Hi Z, and has the 2 pin Amphenol connector on it, as
used by much of the older Heath gear. Of course it can also
be used on Johnson, Hallicrafters, and other transmitters
needing a Hi Z mic.
It works fine, and is in good shape. $30

Touch tone (DTMF) microphones for sale:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to

a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 37

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $37

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $37

HT speaker microphone:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Speech Processor

MFJ "Super Logarithmic Speech Processor"
Model LSP-520BX II

This unit is one of the "good" speech processors. It uses
techniques that will boost your average talk power, without
introducing large amounts of distortion. Some processors
only add to distortion, but this one works.

It is housed in one of the nice TenTec wood grain / eggshell
white enclosures that are a perfect match for some of the
earlier TenTec rigs like the Argonaut 505, 509, Triton I and
II, and others. Of course it can be used with any rig you want,
as it inserts in the microphone audio line. In other words,
plug your mic into this unit, plug the unit into your rig, add
12 V DC to power it, and you are set to go.

This unit works fine and looks fine also. $40

Digital interface / Phone Patch

Johnson Viking Phone Patch - Model 250-46

This device can be used as a digital interface, even
though it was designed to be used as a phone patch.
It can easily be converted into a digital interface (such
as between rig and sound card), as it contains the

same components used in the expensive digital
interface boxes being sold today.

This unit is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters.

This one is in nice shape for $30.

Icom HM-8 hand mic with Touch Tone (DTMF) Pad

This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK, as far as I can tell. So if you have
an HM-8 with bad electronics or actual touch tone pad,
this unit will get you up and going again. Actually, the unit
probably can be repaired and used. $12

Prices do not include shipping from Florida.

Thanks.

1172. Keithley 169 Lab Quality DMM FS

Yahoo group: hamstuff
Date: 2008-03-01 21:04:37 UTC
From: Ken Simpson, W8EK
Topic: 1172 Message: 1172

For Sale:

Keithley 169 Lab Quality Digital Multi Meter

This is a bench type DMM, with good accuracy.

3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
(This means you can accidentally apply up to 300 V
RMS when measuring resistance, and the meter
will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg

It is in very nice condition, both electrically and cosmetically.
Manual included for $90 plus shipping from Florida.

Thanks.

1173. Low Pass TVI filters FS

Yahoo group: hamstuff
Date: 2008-03-08 15:28:54 UTC
From: Ken Simpson, W8EK
Topic: 537 Message: 1173

Low Pass TVI filters For Sale:

Low Pass for your transmitter
Add one of these filters to your transmitter to help prevent
TVI or RFI.
All filters have an SO-239 connector for input and output,
and are designed for 52 ohm systems.

B & W model 425 (Also know as FL-10/1500) low pass filter
It cuts off just above 10 meters, and will handle 1500 Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $30

B & W FL-10/1500 Low Pass Filter
This is the more modern, current, latest version of the 425 filter
as listed above. Like new condition. With paper work $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
also has the single page "manual" with it. $ 33

Johnson Nye Viking 250-20 Low Pass Filter
This cylindrical low pass filter has a cut off frequency of
45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB.
Filter only $33
Filter with mounting bracket $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $25

Prices do not include shipping from Florida.

Thanks.

1175. Alpha Delta Coax Switches FS

Yahoo group: hamstuff
Date: 2008-03-21 16:42:57 UTC
From: Ken Simpson, W8EK
Topic: 1175 Message: 1175

For Sale:

Coax switches by Alpha Delta

Delta 4
This is a coax switch designed to switch four antennas.
It actually has a fifth position that will ground all antennas.
There is also a special lightning arrester "plug" built in
that can be changed if you get hit. The switch is of strip
line type construction so that it provides a good impedance
match at higher frequencies; it is rated for use through 450
MHz. Of course it will handle a full 1500 Watts. SO-239
connectors. This is a very high quality coax switch!
This particular switch works just like it should, and looks
very close to new. With paper work for $65 .

Delta 2
Same as Delta 4 above, except it will only switch two
antennas, and has a third position to ground all antennas.
This one also works great and looks great also.
With paper work for $40

Prices do not include shipping from Florida.

Thanks.

1176. Several HTs (2 m, 440, and dual band) and accessories FS

Yahoo group: hamstuff
Date: 2008-03-22 18:52:22 UTC
From: Ken Simpson, W8EK
Topic: 1176 Message: 1176

For Sale:

A variety of HTs (both 2 m and 440 MHz) and associated
accessories

Realistic HTX-202 for 2 meters
This HT has about 5 W output, or 1 W in low power. It
has an exceptional receiver on it, with extremely good
front end characteristics. Of course it has memories,
scan, and all the normal bells and whistles, including a
very readable LCD display. A touchtone DTMF pad is
included on it, as are PL (subaudible) tones.
This particular unit works fine, and looks very close to new.
It includes a good battery, charger, belt clip, carrying strap,
rubber duck antenna and paper work for $70.

Realistic HTX-404 for 440 MHz
Similar to the HTX-202 above, but for the 440 MHz band.
It also works fine, and looks really great. It includes a good
battery, charger, belt clip, rubber duck antenna and paper
work for $70.

Radio Shack 119-310 speaker microphone
Can be used on either of the above HTs, or on many others
such as Icom, Yaesu etc. It works fine, and looks good also.
$18

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT, IC-4 AT,
etc. This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes a
good battery pack, belt clip, rubber duck, and paper work for $100.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent receiver.

It has a touchtone pad on it, and is very simple to operate. You likely

will not need to read to manual to use this one!
It includes a good battery (new insert a couple months ago), charger, rubber duck, carrying strap, and paper work for $60.

Alinco DJ-G5 dual band 2 meter and 440 MHz HT
I said earlier that the Alinco DJ-191 2 meter HT has about everything except the kitchen sink in it. I think they must have included the kitchen sink in this one! It has all of the features of the DJ-191 above,
but also works on the 440 MHz band. It will even cross band repeat, if you talk to it right. But I am certain you will need to read the manual
on this one! It has three power levels of about 6, 3.5 and 1 watts. The receiver covers from 108 to 174 MHz, and then from 420 to 480 MHz. This means it covers the AM aircraft band, as well as the VHF public service, weather frequencies, and UHF public service. I can not think of anything a ham would want it to do that it will not do. This particular unit works fine, and looks extremely nice. It includes a good battery, belt clip, rubber duck antenna, and paper work for $250.

Speaker microphone for Alinco HTs above.
I thought it was actually an Icom HM-9, but I can not find that written on it any place. I do know that it works fine with the Alinco HTs. It looks OK also. $18

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also Alinco DJ-191 and DJ-G5 HTs above, or any other HT with BNC connector. It will convert the BNC connector on the HT, so that you can use a normal antenna with a PL-259 connector. Like new. $5

Prices do not include shipping from Florida.

Thanks.

1178. Extensive Ham Publications FS - Both Vintage and Modern

Yahoo group: hamstuff
Date: 2008-04-05 10:30:02 UTC
From: Ken Simpson, W8EK
Topic: 1178 Message: 1178

Ham Publications For Sale (Both Vintage and Modern):

I realize this is a long list; I have tried to group the books
as much as possible. All are in good condition or better.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1958 - 35th edition - Actual book is in very good condition
.....Cover has been repaired by laminating. $15
1967 - 44th edition - Very nice condition $15
1973 - 50th edition - Very nice condition throughout $12
1977 - 54th edition - Good condition $10
1978 - 55th edition - Extremely nice condition $12

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1983 - 60th edition - Great condition; no problems $15
1985 - 62nd edition - Like new $17
1986 - 63rd edition - Close to new condition $17
1993 - 70th edition - Hardbound - Like new $20
2006 - 83rd edition - with CD, like new $35

Radio Physics Course - An Elementary Text Which
Explains the Principles of Electricity and Radio
By Alfred Ghirardi - Published 1932 by Murray Hill Books
This is a book just under 1000 pages that is very detailed.
It has many interesting topics.
This book is in fairly good shape, although certainly not
new! $15

Electrical Engineering by Dawes
Volume 1 - Direct Currents
Third Edition - 1937
I would call this a basic text. 750 pages. It includes
a separate insert that has the answers to the problems.
Book is in nice shape, but does have a name on the
inside cover with a 1938 date. $15

Direct and Alternating Currents
By Oppenheimer and Borchers
1963 - McGraw Hill - 392 pages of "Modern" info,
compared to the 1930's books
Very nice shape, with name in front cover. $12

Unit Outlines in Physics by Colen and Newman
Paperback (I didn't know they made paperbacks then!)
Revised edition, 1940
Some wear, and writing. $ 12

Modern Electronic Communication by Gary Miller
This text book is used in many community colleges, and is an
exceptionally thorough, yet easy to understand book covering all
aspects of communications, from Ohm's Law on up.
Hardback in very nice condition. $18

Books about Operating an Amateur Radio Station:

ARRL "Stealth Amateur Radio - Operate from Anywhere"
By Kirk Kleinschmidt, NT0Z - like new - $25

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition $8
1991 - 3rd edition - like new $10

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition $8
2000 - 7th edition - Inch thick with "Ham Desktop
.....Reference" included - Like New - $18

ARRL "Operating an Amateur Radio Station"
1983 - 61st edition $3
1984 - 62nd edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, but appears to be about 1990-1992 $3

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition $7

ARRL "Practical Packet Radio"
By Stan Horzepa, WA1LOU
First Edition - 1998 - Like new - $10

"Digital Communications with Amateur Radio"
By Radio Shack, Jim Grubbs, K9EI
1988 - $4

ARRL "FM and Repeaters for the Radio Amateur"
By W1XZ - 1978 - Second edition - $5

ARRL "Radio Frequency Interference"
1981 - 2nd edition - like new - $10

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "Your Ham Antenna Companion"
A guide to understanding and building antennas

1995 - First edition - $8

ARRL "Lightning Calculator"
Circular slide rule type to figure inductance,
resonance, etc.
1932 copyright date - good shape - $18

ARRL "Understanding Basic Electronics"
By WR1B - inch thick course - $12

ARRL "Weekend Projects for the Radio Amateur"
1979 - First Edition - $8

Sears "Simplified Electric Wiring Handbook"
1962 - Lots of diagrams - $3

Archer "Getting Started in Electronics"
By Forrest Mims - many diagrams - 9th edition - $4

Radio Shack "Basic Digital Electronics"
By Alvis Evans - water stain on back - 1996 - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First Edition - About an inch thick - $5

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Radio Amateur's World Atlas
Published by Callbook - 12th edition - $8

Radio Amateur's World Atlas
Published in Germany - $8

National Geographic World Map
As seen from the satellites - $1

Time Selector
Round "circular slide rule" type of
device to select time in other areas.
By PanAm Airlines - no date I can find, but looks
about 1950 vintage $2

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "FCC Rulebook"
Eighth Edition - 1989 - $4
As above, but "Newly Revised to include Codeless
.....Technician" - 1989, updated to 1991 - Like New - $6

W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993 - Fourth Edition - $3
2002 - 17th Revised Edition - $4

Tab Books: "Oscar: The Ham Radio Satellites"
by Dave Ingram, K4TWJ - 1979 - First Edition
Hardback - Like new - $15

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $10

General and Technician License Study Material:

To the best of my knowledge, this is current material.

ARRL Ham Radio License Manual - Technician Level
This is the book you need to get your first license, or to
get someone started in ham radio. It is used by most
of the Tech licensing classes. Like new for $18

ARRL General Class License Manual - 5th edition
This book has not only the questions, but also an
explanation of the theory behind the questions.
Like new for $12

ARRL General Q & A Manual - 2nd edition
This book has the questions and a brief explanation. It
is not nearly as thorough as the actual License Manual
above. Like new for $10

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stone, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Extra Class Test Guide - The Final Exam, by Disk Bash, KL7IHP
This is the book that started it all, with the first publication
of the actual exam questions.
Second Edition - 1990 - well used - $6

Ameco "Mastering the Morse Code" by Martin Schwartz
First Edition - 1957 - $8

Ameco "Radio Amateur License Guide" by Schwartz
Covers Novice, Tech, and General questions with diagrams
and tube info needed for the tests - 1956 - $5

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.....1997 - Second Edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Sam, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide

2000-01

US Repeater MapBook
Includes Repeater Directory, with maps showing their location
For US, Canada, and Mexico - Sixth Edition - $5

Original Operating Manuals for Kenwood Rigs:

All manuals are original, in very nice condition, for
Kenwood radios.
All are operating manuals, and not service manuals.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile FM
transceivers for 2 meters, 220 MHz, 440 MHz, and 1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Operating manual for TW-4000 dual bander $15

ORIGINAL Heath manuals. These are manuals
only. They are all originals, in exceptionally
good condition, and are not copies.

Heath CO-1 Code Practice Oscillator
1959 - Extremely nice condition, with NO check marks
in the book. Separate pictorials included. $7

HD-15 Hybrid Phone patch - 1965
Check marks in book,
Schematic is part of book. $8

Heath HM-2102 VHF Wattmeter Assembly Manual
1972 - Looks very close to new, but does have check
marks in the book. Schematic included. $10

Heath HN-31 A "Cantenna" Dummy Load
For the "A" model dated 1982
No check marks in book. $10

Heath HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks in book. $10

GD-600 Photoelectric Light Switch
Schematic is part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Analog/Mixed-Signal Products Designer's Guide
With CD - February 2000 $5

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 $2

LVDS Application and Data Handbook - 2003 $2

The Voltage Regulator Handbook - 1977 $5

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

1179. WM-2000 leads or wiring?

Yahoo group: hamstuff
Date: 2008-04-13 12:58:54 UTC
From: goshawk
Topic: 1179 Message: 1179

hello list,
I am looking for leads for a Watson WM-2000 desk mic, or at least the wiring info for it, so that I can get some leads made, thanks.

1182. 2 meter and 440 MHz HTs and accessory items FS

Yahoo group: hamstuff
Date: 2008-05-10 12:31:07 UTC
From: Ken Simpson, W8EK
Topic: 1182 Message: 1182

For Sale:

A variety of HTs (2 meter and 440 MHz) and associated accessories:

I know this is a long list, but I have tried to group items.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating frequency. The HT has about 1.5 watts output, and a decent receiver. It has a touchtone pad on it, and is very simple to operate. You likely will not need to read to manual to use this one! It includes a good battery (new insert a couple months ago), charger, rubber duck, carrying strap, and paper work for $60.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It has a very large, readable LCD display that I can read without my glasses! It has about 7 watts max output, and the receiver is great. It covers from 136 to 174 MHz, so it covers all of the weather and VHF public service frequencies. Of course it has memories and all sorts of scan features. Touchtones (DTMF) and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes a good battery pack, belt clip, rubber duck, and paper work for $100.

Speaker microphone for Alinco HT above, plus many others.
I thought it was actually an Icom HM-9, but I can not find that written on it any place. I do know that it works fine with the Alinco HT. It looks OK also. $18

Yaesu FT-26, 2 meter HT
This HT has a nice LCD display, with memories, scan, and subaudible tones. Basically, all the things one would expect in an HT. This unit comes with the desk charger, and not a wall charger. The battery seems to hold a charge OK, but seems somewhat weak, so it may need an "insert" soon. It works 100%, and looks very nice.
Rubber duck and paper work included for $75.

Realistic HTX-202 for 2 meters
This HT has about 5 W output, or 1 W in low power. It has an exceptional receiver on it, with extremely good front end characteristics. Of course it has memories, scan, and all the normal bells and whistles, including a very readable LCD display. A touchtone DTMF pad is included on it, as are PL (subaudible) tones.

This particular unit has a problem, however.
There is no transmit audio when using it strictly as an HT.
It does have audio when using it with a speaker mic,
which would indicate that the mic element in the HT itself
is bad. My eyesight is no longer good enough to work on
these small parts. Fix the mic element, and you should be
in great shape. As an alternative, use it with a speaker
mic, and don't worry about it! Subaudible tone, touchtone
pad, and all of those parts appear to work fine, as does the
receiver.
Cosmetically, the unit looks very close to new.
I am selling the HT only, with no accessories. $35

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also
Alinco DJ-191 above, or any other HT with BNC connector.
It will convert the BNC connector on the HT, so that you
can use a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $5

Antenna adapter to fit the antenna connector on the TH-21/31/41
series of HTs and provide an SO-239 connector that will permit
a regular PL-259 to be attached. $5

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

BNC stubby for 440 MHz - 3 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

HT speaker microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $16

Speaker microphone for many different HTs
I think this is actually an Icom HM-9, but I can not find that
written on it any place. It has the 2.5 mm and 3.5mm connector
pins and will work on most Icom HTs including IC-02, 03, 04,
2/3/4SA/T, 24AT, P2/3/4, T21, T41, W21, 2GXA/T,and others.
It will also work on Radio Shack HTs like the HTX-202,
HTX-404, HTX-420, HTX-400, etc., plus many Alinco and
Yaesu HTs. $18

Belt Clips for various HTs:
Motorola, with hardware - $8
Kenwood TR-2400, with hardware - $8
Radio Shack HTX-202/404, with hardware - $10
Yaesu FT-209, with hardware - $8

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Accessories for Yaesu FT-209:

Belt clip with mounting screws - $8

Carrying strap (likely fits other HTs as well) $4

Accessories for Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $16

Belt clip for TR-2400 HT, complete with hardware - $8

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

1183. Mobile HF antennas and related items FS

Yahoo group: hamstuff
Date: 2008-05-11 17:12:22 UTC
From: Ken Simpson, W8EK
Topic: 1183 Message: 1183

Mobile HF antennas and antenna related items for sale:

Outbacker Perth HF Mobile antenna
The PERTH antenna covers 80-75-40-30-20-17-15-12-10m,
which means all of the HF bands, including the WARC bands.
The length is about 7 feet long (fully extended) with a 3 foot tip.
The Outbacker is constructed of fiberglass with pre-tuned copper
helical windings and covered with smooth epoxy-resin and a
coating of polyurethane for strength, and durability. The mounting
ferrule is nickel-plated brass with industry standard 3/8x24 threads.
Frequency coverage is broadband but the top of the antenna is
adjustable which allows tuning for the lowest possible VSWR even
on 75 meters and 10 meters. Tap points are clearly engraved for
each band. Changing bands is accomplished manually by plugging
the exclusive Outbacker "Wander Lead" into the proper tap.
The Outbacker antennas have a beautiful, shiny black finish.
This antenna works well and is in good shape. Included is a
package of "Penetrox" which should be used on the "Wander
Lead" to prevent corrosion, and make good contact. $250

Hamstick HF mobile antennas:

These are the original honest to goodness Hamsticks,
made by Lakeview, and are not one of the clones.

Each antenna, when fully assembled and tuned, is about
7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so they
fit a standard ball mount.

Two are available -- one for 20 meters and one for 40 meters.

These antennas are new, still in their original package, unused.

They are $30 each.

Hustler mobile antennas:

All work fine and are in good mechanical condition.

"Standard" Hustler resonators:
40 meter resonator RM-40 $17
20 meter resonator RM-20 $15
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

Hustler mobile masts:
MO-2 (folds about 27 inches above ball) $22

MO-1 mast that has a start of a split where it folds
.....over. It can be used as an MO-3 (non tilt mast)
.....or needs care when tilting. $ 15

RSS-2, Stainless steel resonator spring $10

MFJ 902 "Travel Tuner"
This HF tuner is small and compact, and is made to be
used with some of the new, small compact rigs, such as
the Icom 706, Yaesu FT-100, Kenwood TS-50, etc.,
although it will work fine with a larger fixed station rig.
It is designed for 80 thru 10 meter operation, and will
handle 150 watts.
It has provisions to bypass the tuner, if you so desire.
This particular unit works fine, and looks very close to new.
It is in its original box, with paper work. $65

Wattmeter/SWR Bridges:

Micronta 21-520 A wattmeter with large dual meters
This meter is designed primarily for HF operation, although
it still functions well on 6 and 2 meters. It has SO-239
connectors, and is designed for 52 ohm antenna systems.
This wattmeter has full scale power readings of 10, 100, and
1000 watts. LARGE dual meters -- one reads forward power
and one reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice.
I can not find a scratch on it. It is still in its original box. $55

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some
of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $90.

Radio Works T-6 VHF Isolator
This unit is designed for VHF frequencies, and provides
isolation to keep RF where it belongs, and out of your
shack. The purpose of this device is to "decouple" the
feedline from all of the things in your shack, so that the
RF would not get in places it did not beyond. To put it
another way, this device might help keep RF out of your
computer, as an example.
This one is out of the package, but has never been on
the air. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

1184. Antenna Tuner and Wattmeter/SWR Bridges FS

Yahoo group: hamstuff
Date: 2008-05-17 13:01:34 UTC
From: Ken Simpson, W8EK
Topic: 1184 Message: 1184

Antenna tuner and wattmeter/SWR Bridges For Sale:

MFJ 902 "Travel Tuner"
This HF tuner is small and compact, and is made to be
used with some of the new, small compact rigs, such as
the Icom 706, Yaesu FT-100, Kenwood TS-50, etc.,
although it will work fine with a larger fixed station rig.
It is designed for 80 thru 10 meter operation, and will
handle 150 watts.
It has provisions to bypass the tuner, if you so desire.
This particular unit works fine, and looks very close to new.
It is in its original box, with paper work. $65

HF wattmeter / SWR Bridges:

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some
of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an on-off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $90

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Prices do not include shipping from Florida.

Thanks.

1185. Extensive list of HF related items FS

Yahoo group: hamstuff
Date: 2008-05-24 12:13:02 UTC
From: Ken Simpson, W8EK
Topic: 1185 Message: 1185

Extensive list of HF related items for sale:

I realize that this list is long; I have attempted to group
items as much as possible.

CW related items:

Vibroplex "Blue Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Wattmeter/SWR Bridges:

These meters are designed primarily for HF operation, although
they still function well on 6 and 2 meters. They have SO-239
connectors, and are designed for 52 ohm antenna systems.

Micronta 21-520 A wattmeter with large dual meters
This wattmeter has full scale power readings of 10, 100, and
1000 watts. LARGE dual meters -- one reads forward power
and one reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice.
I can not find a scratch on it. It is still in its original box. $55

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some

of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an on-off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $85

MFJ 902 "Travel Tuner"
This HF tuner is small and compact, and is made to be
used with some of the new, small compact rigs, such as
the Icom 706, Yaesu FT-100, Kenwood TS-50, etc.,
although it will work fine with a larger fixed station rig.
It is designed for 80 thru 10 meter operation, and will
handle 150 watts.
It has provisions to bypass the tuner, if you so desire.
This particular unit works fine, and looks very close to new.
It is in its original box, with paper work. $60

Outbacker Perth HF Mobile antenna
The PERTH antenna covers 80-75-40-30-20-17-15-12-10m,
which means all of the HF bands, including the WARC bands.
The length is about 7 feet long (fully extended) with a 3 foot tip.
The Outbacker is constructed of fiberglass with pre-tuned copper
helical windings and covered with smooth epoxy-resin and a
coating of polyurethane for strength, and durability. The mounting
ferrule is nickel-plated brass with industry standard 3/8x24 threads.
Frequency coverage is broadband but the top of the antenna is
adjustable which allows tuning for the lowest possible VSWR even
on 75 meters and 10 meters. Tap points are clearly engraved for
each band. Changing bands is accomplished manually by plugging
the exclusive Outbacker "Wander Lead" into the proper tap.
The Outbacker antennas have a beautiful, shiny black finish.
This antenna works well and is in good shape. Included is a
package of "Penetrox" which should be used on the "Wander
Lead" to prevent corrosion, and make good contact. $250

Hamstick HF mobile antennas:

These are the original honest to goodness Hamsticks,
made by Lakeview, and are not one of the clones.

Each antenna, when fully assembled and tuned, is about
7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so they
fit a standard ball mount.

Two are available -- one for 20 meters and one for 40 meters.

These antennas are new, still in their original package, unused.

They are $29 each.

Hustler mobile antennas:

All work fine and are in good mechanical condition.

"Standard" Hustler resonators:
40 meter resonator RM-40 $17
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

Hustler mobile masts:
MO-2 (folds about 25 inches above ball) $22
MO-1 mast that has a start of a split where it folds
.....over. It can be used as an MO-3 (non tilt mast)
.....or needs care when tilting. $ 15

RSS-2, Stainless steel resonator spring $10

Regular hand microphones:

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the cotton
covered cord, and single button microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the original
"sheen" left on it. It works fine. $33

High Impedance Heath Hand Microphone
This mic came with Heath gear. It is Hi Z, and has 1/4 inch
stereo plug on it, as used by Swan, TenTec, and others.
It can be used on any rig needing a Hi Z mic.
It works fine, and is in good shape. $30

Touch tone (DTMF) microphones for sale:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often used
on the 2 m and 440 MHz rigs that do not have touchtone
built in, but can also be used on HF rigs for touchtone on
10 m FM. It works fine and looks great also.
With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 37

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $45

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $37

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $37

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK, as far as I can tell. So if you have
an HM-8 with bad electronics or actual touch tone pad,
this unit will get you up and going again. Actually, the unit
probably can be repaired and used. $12

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Digital interface / Phone Patch

Johnson Viking Phone Patch - Model 250-46

This device can be used as a digital interface, even
though it was designed to be used as a phone patch.
It can easily be converted into a digital interface (such
as between rig and sound card), as it contains the
same components used in the expensive digital
interface boxes being sold today.

This unit is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters.

This one is in nice shape for $30.

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Low Pass TVI filters:

Low Pass for your transmitter
Add one of these filters to your transmitter to help prevent
TVI or RFI.
All filters have an SO-239 connector for input and output,
and are designed for 52 ohm systems.

B & W model 425 (Also know as FL-10/1500) low pass filter
It cuts off just above 10 meters, and will handle 1500 Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.

This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter that has been optimized to
have more attenuation in the 40 MHz region, where many
TVs have their IF. According to the manual it is good for
1000 Watts "average", which would be about 2000 watts
PEP, and has over 80 db attenuation at 41 MHz. SO-239
connectors on each end. This one looks close to new, and
also has the single page "manual" with it. $ 40

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Heath IP-27 DC "lab type" power supply
This supply is capable of up to 50 V DC at up to 1 1/2
amps of current. It is set up in 5 volt ranges (0 to 5 V,
5 to 10 V, etc), with a bit of overlap on the ranges, and
then has a pot to set the fine voltage. Heath used a neat
design, where the power transformer has many taps,
and is switched as one changes ranges, keeping heat
and power dissipation to a minimum. The current
limit has 4 ranges (50, 150, 500 ma, and 1.5 amps),
with a pot to set the fine adjustment. It also has a very
large (approx 5 inch) meter to read the voltage and current.
This one works great, and looks fine also. It has had the
Heath recommended updates done to it.
With paper work for $85.

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,

to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1188. Extensive list of ham items FS - Antenna tuner, HTs, many misc accessory items

Yahoo group: hamstuff
Date: 2008-06-14 15:19:03 UTC
From: Ken Simpson, W8EK
Topic: 1188 Message: 1188

For Sale:

I know this is a long list; I have tried to group similar items
together.

High Power Antenna Tuner

This TenTec high power antenna tuner will do it all!
It uses an "L" network instead of the "T" network.
This means that there is only one correct match. With the "T"
network, there are many places that will give a 1:1 SWR, but
only one of these positions is best. With the "L" network, this
is not a problem, and results in a tuner that is much more efficient.

It will easily handle full legal power, and has a roller inductor
so one can get an exact match over any of the HF bands,
including WARC bands.
It also has a balun for use with twin lead.

This is not only a tuner. It also has a four position antenna
switch built in, plus an illuminated wattmeter with 200 and
2000 watt positions, and an SWR bridge.

This particular tuner works 100%, and looks close to new.
I can not find a scratch on it.

With paper work for $325.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent
receiver. It has a touchtone pad on it, and is very simple to
operate. You likely will not need to read to manual to use this
one! It includes a good battery (new insert a couple months ago),
charger, rubber duck, carrying strap, and paper work for $60.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work

for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Dead Radio Shack 19-300 Battery pack for HT-202 and HTX-404
As above, except battery is dead. Use it to put new insert in,
or for other projects. $8

HF wattmeter / SWR Bridges:

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some
of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an on-off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $89

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Microphones:

High Impedance Heath Hand Microphone
This mic came with Heath gear. It is Hi Z, and has 1/4 inch
stereo plug on it, as used by Swan, TenTec, and others.
It can be used on any rig needing a Hi Z mic.
It works fine, and is in good shape. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Microphone for Heath "Lunchbox" Series
This is the ORIGINAL microphone for the Twoer, Sixer,
and others of the "Lunch Box" series.
It is the original Turner microphone, with the cotton covered
cord, and single button microphone connector.
It is in extremely nice shape. No problems with the cord or
connector, and the mic itself even has a bit of the original
"sheen" left on it. It works fine. $33

Touch tone (DTMF) microphones for sale:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig
taking this kind of connector. Has UP and DOWN
switches, along with 16 digit touchtone pad. It is often used
on the 2 m and 440 MHz rigs that do not have touchtone
built in, but can also be used on HF rigs for touchtone on
10 m FM. It works fine and looks great also.
With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK. So if you have an HM-8 with bad
electronics or actual touch tone pad, this unit will get you
up and going again. Actually, the unit probably can be
repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps

Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Johnson Viking Phone Patch - Model 250-46
This phone patch is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It is possible that the face
plate can be removed, and it made to be mounted
horizontally, but I have not done that. The reason I
say this is that there are feet on the bottom, and on
the left side. Maybe the feet on the left side are to
protect the rig. In any case, it has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters, and many others in that era.
It works fine and looks OK also. $30

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Low Pass TVI filters:

Low Pass for your transmitter
Add one of these filters to your transmitter to help prevent
TVI or RFI.
All filters have an SO-239 connector for input and output,
and are designed for 52 ohm systems.

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.

This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also
Alinco DJ-191 and DJ-G5 HTs above, or any other HT with BNC
connector. It will convert the BNC connector on the HT, so that you
can use a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Avanti / Antenna Specialists "On Glass" antennas

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

BNC stubby for 440 MHz - 3 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Radio Shack HTX-202/404, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

1190. Many ham items FS

Yahoo group: hamstuff
Date: 2008-07-04 12:07:46 UTC
From: Ken Simpson, W8EK
Topic: 1190 Message: 1190

I know this is a long list; I have tried to group similar items
together.

High Power Antenna Tuner

This TenTec high power antenna tuner will do it all!
It uses an "L" network instead of the "T" network.
This means that there is only one correct match. With the "T"
network, there are many places that will give a 1:1 SWR, but
only one of these positions is best. With the "L" network, this
is not a problem, and results in a tuner that is much more efficient.

It will easily handle full legal power, and has a roller inductor
so one can get an exact match over any of the HF bands,
including WARC bands.
It also has a balun for use with twin lead.

This is not only a tuner. It also has a four position antenna
switch built in, plus an illuminated wattmeter with 200 and
2000 watt positions, and an SWR bridge.

This particular tuner works 100%, and looks close to new.
I can not find a scratch on it.

With paper work for $325.

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have band modules for
160 meters - 1.8 to 2.0 MHz
30 meters - 10 to 10.5 MHz
10 meters - 28 to 29 MHz.
All work fine. With paper work for $65 each.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work (in case you need it to install a mobile
bracket !) for $30.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.

This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Headphones:

Kenwood HS-5 headphones
These deluxe communications headphones are engineered
and tuned for radio communications to provide distinctive
voice sound (150-4000 Hz).
With ¼ inch mono plug; 8 ohms, and 6 foot cord.
In very nice shape. With paper work for $55.

Generic headphones
Similar to the HS-5 above, but with plastic ear pads.
"Made in USA" stamped on them. About 100 ohm impedance,
With 1/4 inch mono plug, and about 5 foot cord.
Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable through the use of magnets. The Brass Racer Iambic is a convenient, keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base.
This one works great, is in very nice condition, and includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic has up-down switches, plus a row of four switches above the touch tone pad. They are used for "Call Button", VFO key, Memory recall key, and the fourth one is programmable. The back has a lock switch. It has an RJ-45 connector (like a computer LAN).
This particular mic works fine, and looks fine also. It is still in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector. Has UP and DOWN switches, along with 16 digit touchtone pad. It is often used on the 2 m and 440 MHz rigs that do not have touchtone built in, but can also be used on HF rigs for touchtone on 10 m FM. It works fine and looks great also.
With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with a low impedance microphone. This one has the 8 pin

modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK. So if you have an HM-8 with bad
electronics or actual touch tone pad, this unit will get you
up and going again. Actually, the unit probably can be
repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!

This particular unit works 100% and looks very close to new.
$135

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Johnson Viking Phone Patch - Model 250-46
This phone patch is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It is possible that the face
plate can be removed, and it made to be mounted
horizontally, but I have not done that. The reason I
say this is that there are feet on the bottom, and on
the left side. Maybe the feet on the left side are to
protect the rig. In any case, it has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson, Heath,
Hallicrafters, and many others in that era.
It works fine and looks OK also. $30

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector (such as the
DJ-191 above, but many others). It will convert the BNC
connector on the HT, so that you can use a normal antenna
with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Avanti / Antenna Specialists "On Glass" antennas

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

BNC stubby for 440 MHz - 3 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Radio Shack HTX-202/404, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

1192. Headphones, Microphones, and other ham items FS

Yahoo group: hamstuff
Date: 2008-07-12 14:37:25 UTC
From: Ken Simpson, W8EK
Topic: 1192 Message: 1192

Ham Items For Sale:

I know this is a long list; I have tried to group similar items
together.

Headphones:

Generic headphones
Similar to the Kenwood HS-5, but with plastic ear pads.
"Made in USA" stamped on them. With 1/4 inch mono
plug, and about 5 foot cord. Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Regular Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK. So if you have an HM-8 with bad
electronics or actual touch tone pad, this unit will get you
up and going again. Actually, the unit probably can be
repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)

and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have band modules for
10 meters - 28 to 29 MHz.
All work fine. With paper work for $65 each.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work (in case you need it to install a mobile
bracket !) for $30.

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$125

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Prices do not include shipping from Florida.

Thanks.

1196. Extensive list of HT and HT related accessories FS

Yahoo group: hamstuff
Date: 2008-07-26 13:03:37 UTC
From: Ken Simpson, W8EK
Topic: 1196 Message: 1196

Extensive list of HT and HT related accessories For Sale:

I know this is a long list; I have tried to group similar items
together.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, it would be ideal. $8 each

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Hustler SF-2 antenna for 2 meters
This is a 5/8 wave antenna with about 3 db gain over a
quarter wave antenna. It is about 4 feet long, and is made
to screw into a standard 3/8 inch 24 thread mount.
It works fine and looks fine. $15

Hustler RSS-2 stainless steel resonator spring
Recommended by Hustler to go at the top of the masts
used with HF resonators, and below the resonator, to
prevent breakage, in case the resonator hits a tree limb.
This one looks very close to new. $10

Larsen VHF and UHF Mobile Antennas:

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen OM-450 coil, mount, and whip for 440 MHz
Made to mount on a flat surface
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5

mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector (such as the
DJ-191 above, but many others). It will convert the BNC
connector on the HT, so that you can use a normal antenna
with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Operating manual for TW-4000 dual bander $15

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Prices do not include shipping from Florida.

Thanks.

1197. Antenna tuner and other HF related items FS

Yahoo group: hamstuff
Date: 2008-08-02 11:57:04 UTC
From: Ken Simpson, W8EK
Topic: 1197 Message: 1197

Antenna tuner and other HF related items For Sale:

I know this is a long list; I have tried to group similar items
together.

Antenna tuner For Sale:

MFJ 941 E antenna tuner for 160 thru 10 meters

This is the latest "E" version of this popular tuner.

This tuner has a "cross needle" SWR bridge built into it,
so you can read both forward power and SWR at the
same time. The meter has a back light, assuming 12
Volts is applied to the tuner. The wattmeter portion will
read either 30 W or 300 W full scale.

An antenna switch will switch between either balanced line,
two coax antennas, or a dummy load. Antennas can be
operated thru the tuner, or the tuner can be bypassed.

This tuner will operate on 160 thru 10 meters, including the
WARC bands.

This particular unit works 100%. It looks very close to new.
Almost like it just came out of its box; maybe that is because
it is still in its original box.

Manual is included for $100

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have a band module for 10 meters - 28 to 29 MHz.
It works fine. With paper work for $65.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work for $30.

TenTec 306 power adapter
The 555 Scout and several other TenTec rigs take a 2
pin power connector. Most of the TenTec power supplies
have a 4 pin plug with larger conductors. This adapter
adapts the 4 pin power connector, so it can be used on
a radio with the 2 pin power plug. Like new, with paper
work (all half page of it!). $10

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Headphones:

Generic headphones
Similar to the Kenwood HS-5 headphones, but with plastic
ear pads. "Made in USA" stamped on them.
With 1/4 inch mono plug, and about 5 foot cord.
Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element
in it is open. A part of the plastic holding the PTT button
does not seem quite right, but the actual touch tone pad
and electronics is OK. So if you have an HM-8 with bad
electronics or actual touch tone pad, this unit will get you
up and going again. Actually, the unit probably can be
repaired and used. $10

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Hamstick HF mobile antenna for 20 meters

This is the original honest to goodness Hamstick,
made by Lakeview, and are not one of the clones.

This antenna, when fully assembled and tuned, is about
7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so it fits
a standard ball mount.

This antennas is new, still in their original package, unused.
$27

Hustler RSS-2, Stainless steel resonator spring $10

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

LARGE Analog meters

Weston Model 741 DC ammeter
50 ua movement with scales of 2.5, 5, and 10
This is a large, approx 4 inch meter. $15

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting

This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

1198. A list of Software that we must have on our computer

Yahoo group: hamstuff
Date: 2008-08-12 07:06:03 UTC
From: atherola
Topic: 1198 Message: 1198

We don't have to spend fortunes to get software for different applications. They are available in plenty as freeware.

Have a look at a list of all essential software that are available for free here: http://freesoftware.internethunter.info

1200. Kenwood TS-440 HF xcvr plus other Kenwood items FS

Yahoo group: hamstuff
Date: 2008-08-23 13:25:33 UTC
From: Ken Simpson, W8EK
Topic: 1200 Message: 1200

Kenwood Items For Sale:

Kenwood TS-440 S / AT, 100 Watt HF transceiver

The Kenwood TS-440S/AT was designed for superior
performance in the SSB, CW, AM, FM and AFSK modes.
An automatic antenna tuner is built in. Coverage is 160
through 10 meters including the WARC bands with 100
watts (40W AM). It includes such things as notch filter,
individual selection of optional crystal filters, digital readout,
memories, scan capabilities, IF shift, direct frequency entry
from a keyboard, and many other features. It requires 13
VDC at about 20 amps.

This particular TS-440 is about as perfect as you can find.
Electrically, it functions 100%. There are no problems with
the VCO and PLL like plagues some of these units. Likewise
the frequency entry from the keyboard is clean and definite.
Cosmetically, it looks like it just came from the factory. Not a
scratch on it. It is in its original double box with foam inserts,
with original manual that looks like it has not been used. You
simply will not find a more perfect TS-440! All of this for only $525.

Kenwood PS-50 heavy duty power supply

This power supply was designed for use with the TS-440
transceiver, but it can be used with any rig. It is capable of
supplying 13 V DC at up to 20 amps, continuously for an hour.
It has the standard 6 pin molex output connector, as used by
Kenwood, Icom, Yaesu, and others for their HF rigs. It also has
screw terminals on the back for use with a second rig, such as
a 2 meter rig.

This particular unit is immaculate. It functions 100%, and looks
like new. Not a scratch on it. It is in its original boxes, with the
foam inserts, and original manual that looks like it was never used.

The power supply by itself is $125, and will sell after the TS-440
above. If sold with the TS-440, the combination is only $625.

Other Kenwood items for sale:

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent receiver.
It has a touchtone pad on it, and is very simple to operate. You likely
will not need to read to manual to use this one!

This one has a battery case where one may insert six AAA batteries.
This is very advantageous, as one may choose to use alkaline
batteries, or some of the newer NiMH batteries that have much
higher capacity. It includes the battery case, stubby rubber duck,
belt clip, and paper work for $60.

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

Kenwood MJ-48 microphone connector adapter
Converts a round 4 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. $20

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood PC-1 phone patch
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a

standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with
threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Original Kenwood Manuals:

All manuals are in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $ 8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 mobile $15

Operating manual for TH-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Prices do not include shipping from Florida.

Thanks.

1201. HTs and many misc ham items FS

Yahoo group: hamstuff
Date: 2008-08-24 17:39:38 UTC
From: Ken Simpson, W8EK
Topic: 1201 Message: 1201

Many miscellaneous ham items for sale:

Kenwood TH-41 AT HT for 440 MHz.

This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent receiver.
It has a touchtone pad on it, and is very simple to operate. You likely
will not need to read to manual to use this one!

This one has a battery case where one may insert six AAA batteries.
This is very advantageous, as one may choose to use alkaline
batteries, or some of the newer NiMH batteries that have much
higher capacity.

It includes the battery case, stubby rubber duck, belt clip, and paper
work for $60.

Alinco DJ-191, 2 meter HT

This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so that means it covers
all of the weather and VHF public service frequencies, in
addition to the ham band.
Of course it has memories and all sorts of scan features.
Touchtones (DTMF) and PL (subaudible) tones are included.

This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $99.

"CW using your HT"

This unit was made by a now silent key, following an article
in July 1997 QST and May 1997 World Radio. The idea is
to be able to send CW using your HT, so that code practice
over a repeater is possible, assuming you can hit the repeater
with your HT.

Powered by a 9 volt battery, it has a tone generator that can
be keyed, with the proper interface to go to the mic input on
your HT. All sorts of interfacing is provided, including deviation
and volume controls, transmitter keying, etc.

This unit is in a nice minibox, approximately 4.5 x 3.5 x 1.5 inches.
Most importantly, COMPLETE documentation is included,
showing his own layout, as well as both original articles. $15

120 Volt AC Line "Polarity checker" For Sale:

This device is designed so that one can check the 3 prong 120
V AC outlets, to see that they are wired correctly. It has bulbs
that light and indicate all is OK, or if there is a fault. If a fault
exists, the exact fault can be determined from the lights.

This unit was built by a silent key in a 4 x 2 x 2 inch minibox, with
a heavy 15 amp plug to plug into the 120 V AC outlet. Instructions
and light codes are on the outside of the box, with schematic and
the article it was built from on the inside. $10

Gonset ORIGINAL manual
Gonset Noise Clipper Model C
Actually, this is only two sheets of paper, but it is the manual
for the noise clipper.
This one has a couple marks in one corner, plus the paper has
yellowed somewhat. $4

W7FG Manual reprint

These are W7FG reprints of the original manuals. As you likely
know, W7FG reprints are extremely good quality.

Hallicrafters S-20 R Receiver
Included is the W7FG reprint, in a binder, along with two
modifications that this silent key performed on his S-20 R.
One mod is for a BFO, and the second is for an S meter.
Other notes are included in the binder. $14

Ironworks "Connect Quick" CQ-1 Antenna Mount

Connect Quick Antenna Mount is a mounting plate system
that provides a rapid and secure means of attaching items
such as antenna booms to masts, solar panels to posts,
sound and lighting installations, and other similarly mounted
devices. Installation and removal are accomplished in a snap!

It is designed primarily for use in emergency communications /
portable antenna systems. More details can be found at
http://www.connectquick.net/
The unit appears to be heavy aluminum and stainless steel.

This one is new, still sealed in the original packing. They are
$35 from the web site. This one is only $25.

Centronics Switch

This switch, made by Centronics, is made to switch up
to four separate devices to a single common line. The
front panel has a single rotary switch labeled "A B C D".
The rear panel has five Centronics connectors like are
on parallel port printers.

This particular unit works fine and looks very, very nice.
It is in a very heavy duty metal enclosure, with no scratches
or defects. $10

LARGE Analog Meters

Weston Model 741 DC ammeter
50 ua movement with scales of 2.5, 5, and 10
This is a large, square, approx 4 inch meter. $15

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

General Electric Elapsed Time Meter

This elapsed time meter will measure the total time that
a piece of equipment has been turned on. It is designed
for 115 V AC, 60 hertz. It is ideal for equipment such as
a linear amplifier, or any other equipment where the time
that it has been used is important.

This particular meter reads in minutes (instead of hours).
It reads 000000.0 minutes, and has provisions for resetting
the time. It is a square meter, about 2 3/4 inches on a side.
Of course it works fine. $20

Meter movement from Heath RF Power Meter

This is a 200 ua meter movement, with a white scale from 0 to
10 on it. It is about 2 5/8 inches wide and 2 1/2 inches high. It
says "Ideal Precision Meter Co, Made in USA" on the back. My
memory says it is from an Heath SWR Bridge.

This one works fine and looks great also. $14

Battery charge adapter for Azden PCS-300 HT For Sale:
This is an adapter that permits one to charge the battery of the
Azden PCS-300, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Santec items

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

HT audio connector cable

Do you need a cable to connect audio from a sound card
to your HT? Or maybe connect some other digital "gadget"
to your HT? Or maybe just a switch box.

I have a cable that will connect to many HTs. It has a 3.5 mm
and a 2.5 mm connector, molded so that the two are separated
about 1/2 inch apart.

The cable is about 3 feet long, and is in good shape. $12

Kantronics Cable

This cable is made to plug in to the 9 pin DB-9 connector that
is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio. It is often used for APRS, and other interfacing.

The cable has a DB-9 connector on one end. The other end has
the connectors for two radios, and is labeled "1" and "2", with "1"
having a red 3.5 mm plug, a white 3.5 mm plug, and a black 2.5
mm plug. The "2" is as the same as "1" except it does not have
the white 3.5 mm plug. It is $18.

Accessory items for Kenwood TR-2400 HTs

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and maybe others. This one
looks fine and works fine. $16

Belt clip for TR-2400 HT
In great condition, complete with hardware $8

Original Operators manual for Kenwood TR-2400 $15

Battery charge cable for Kenwood TR-2400 HT
To charge battery outside of HT; uses original
charger. It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and likely
other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and
provide an SO-239 connector that will permit a PL-259 to
be attached. This can be used with any HT that has a BNC
connector. $5

"Dead" Icom Battery Pack

Icom BP-3 battery pack

I found a BP-3 battery pack that is dead.
This pack is used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and some others. It will also
fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.

This one is dead, but if you need a battery shell, to
put a new "insert" in to, or for some project, it would
be ideal. Adding one of the newer high capacity inserts
will give you a very inexpensive new battery, or build a
regulator in for use from 12 V DC. $8

Nye Viking "Master Key" Model 330-001 CW Straight Key

From their web page:
The perfect straight key. Complete with cord and plug --
ready to use! Isolated contact assembly separates keying
circuit from hardware. Includes gold-plated copper contacts,
adjustable key arm, Navy knob and heavy die-cast base.

This is a top of the line straight key. These are about $85 new.
This one works like new, and looks like new.
It is only $55.

Headphones

These are all communications headphones with appropriate
frequency response. They are not stereo "Hi Fi" headphones.

Generic headphones
Similar to the Kenwood HS-5, but with plastic ear pads.
"Made in USA" stamped on them. With 1/4 inch mono plug,
and about 5 foot cord. Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Kenwood PC-1 phone patch / interface

Although this is a Kenwood phone patch, it can be used
with most any rig. It has separate receive and transmit
gain controls for setting the level to the phone line.
This is the model with the 4 pin microphone connectors,
but they can be changed, if needed. It includes a nice
meter for adjusting the null so VOX will work OK.

Although this was designed as a phone patch, it can also
be used as a digital interface to a sound card.

This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $40.

TenTec 306 power adapter For Sale:

The 555 Scout, 535 Argonaut, 536 Delta, 550 Pegasus,
556 Argo, and several other TenTec rigs take a 2 pin
power connector. Most of the TenTec power supplies
have a 4 pin plug with larger conductors. This adapter
adapts the 4 pin power connector on the power supply,
so it can be used on a radio requiring the 2 pin power
plug.
Like new, with paper work (all half page of it!). $12

Kantronics "Interface II" Terminal Unit For Sale:

This unit is made to copy RTTY signals, and feed the output
to a computer. To quote the brochure that is included with it,
it is "designed by the Kantronics team to give the discerning
operator excellent performance."

It features 170, 425, and 850 shift on both transmit and receive.
An AFSK generator is built in, or FSK can be used. It has two
separate channels for use with 2 rigs. For optimum reception,
a six pole filter is changed as the shift is changed. It requires
12 V DC at about 200 ma to operate.

-
These were originally about $270. You can get this one with
the paper work for only $30

Kenwood Microphone and Antenna Adapters

Kenwood MJ-48 microphone connector adapter
Converts a round 4 pin Kenwood connector on the microphone,
so it can be plugged into a Kenwood rig with the round 8 pin
connector. $20

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood connector on the microphone,
so it can be plugged into a Kenwood rig with the round 8 pin
connector. $20

Antenna adapter to fit the BNC connector on an HT and
provide an SO-239 connector that will permit a regular
PL-259 to be attached. This can be used on any HT (not
just Kenwood) that has a BNC connector on it. $5

Antenna adapter to fit the antenna connector on the Kenwood
TH-21/31/41 series of HTs and provide an SO-239 connector
that will permit a regular PL-259 to be attached. $5
-

Coax Connectors and Adapters
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF Right angle connector - male to female
Takes PL-259 on one side and an SO-239 on the other $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

1202. Extensive list of ham publications FS

Yahoo group: hamstuff
Date: 2008-08-30 13:22:17 UTC
From: Ken Simpson, W8EK
Topic: 1202 Message: 1202

Ham Publications For Sale (Both Vintage and Modern):

I realize this is a long list; I have tried to group the books
as much as possible. All are in good condition or better.
Most are extremely nice, close to new condition.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10
1978 - 55th edition - Extremely nice condition $12

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1985 - 62nd edition - Like new $17
2006 - 83rd edition - with CD, like new $35

Books about Operating an Amateur Radio Station:

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition $8
1991 - 3rd edition - like new $10

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition $8
2000 - 7th edition - Inch thick with "Ham Desktop
.....Reference" included - Like New - $18

ARRL "Operating an Amateur Radio Station"
1976 - 57th edition $3
1983 - 61st edition $3
1984 - 62nd edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, but appears to be about 1990-1992 $3

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition $7

ARRL "FM and Repeaters for the Radio Amateur"
By W1XZ - Second edition - $5

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First Edition - About an inch thick - $5

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Radio Amateur's World Atlas
Published in Germany - $8

ARRL US Call Area Map
Large, colorful map, Like new. $5

National Geographic World Map
As seen from the satellites - $1

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "FCC Rulebook"
Eighth Edition - 1989 - $4
As above, but "Newly Revised to include Codeless
.....Technician" - 1989, updated to 1991 - Like New - $6

W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993 - Fourth Edition - $3
2002 - 17th Revised Edition - $4

Tab Books: "Oscar: The Ham Radio Satellites"
by Dave Ingram, K4TWJ - 1979 - First Edition
Hardback - Like new - $15

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $10

The following books are often used as text books at the two
year community college level.

Electric Circuits Fundamentals and Electronics Fundamentals
Floyd - 3rd edition - Over 1000 pages, plus another 200 +
pages of answers to problems. This is often used as a text
book at Community and Technical Colleges.
Like new. $25

Digital Electronics by Uffenbeck
Large book with just under 700 pages. It includes answers
to the problems. Like new. $25

Computers by Long and Long
Large book with about 750 pages. Answers to problems
included. Like new. $25

Assembling and Repairing Personal Computers by Beeson
About 400 pages of extensive, thorough information. Like
new. $20

A Guide to Managing and Maintaining Your PC by Andrews
Sometimes used for A+ computer certification. About 750
pages, plus CD. Like new. $20

Computer Repair Toolkit by Bigelow
Over 400 pages of information and diagnostic programs.
Like new, with CD. $20

ARRL Ham Radio License Manual - Technician Level
This is the book you need to get your first license, or to
get someone started in ham radio. It is used by most
of the Tech licensing classes.
To the best of my knowledge, this is current material.
Like new for $18

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Extra Class Test Guide - The Final Exam, by Disk Bash, KL7IHP
This is the book that started it all, with the first publication
of the actual exam questions.
Second Edition - 1990 - well used - $6

Ameco "Mastering the Morse Code" by Martin Schwartz
First Edition - 1957 - $8

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.....1997 - Second Edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Radio Shack from 5 watts to 1000 watts
1974 - Spiral bound - $4

Sam, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Photofacts as of
Aug 1960 - Good condition - $8

"Basic Technology for the Amateur Radio Enthusiast"
By Alpha Delta Communications, Don Tyrrell, W8AD - $5

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Repeater Directories - $3 each
1982-83
1983-84
1987-88
1989-90
2000-01

US Repeater MapBook
Includes Repeater Directory, with maps showing their location
For US, Canada, and Mexico - Sixth Edition - $5

Hallicrafters manual for sale:
Hallicrafters S-20 R Receiver Manual
Included is the W7FG reprint, in a binder, along with two
modifications that this silent key performed on his S-20 R.
One mod is for a BFO, and the second is for an S meter.
Other notes are included in the binder.
This is a W7FG reprint of the original manual. As you likely
know, W7FG reprints are extremely good quality. $14

Gonset ORIGINAL manuals

Gonset Noise Clipper Model C
Actually, this is only two sheets of paper, but it is the manual
for the noise clipper.
This one has a couple marks in one corner, plus the paper has
yellowed somewhat. $4

ORIGINAL Operating Manuals for Kenwood Rigs:

All manuals are original, in very nice condition, for
Kenwood radios. They are originals and not copies.
All are operating manuals, and not service manuals.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile FM
transceivers for 2 meters, 220 MHz, 440 MHz, and 1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Operating manual for TW-4000 dual bander $15

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath CO-1 Code Practice Oscillator
1959, Extremely nice, with NO check marks
Pictorials included $6

GD-600 Photoelectric Light Switch
Schematic is part of book $5

HD-1234 Coax Switch
1973, Four Position Coax Switch
Like new, no check marks $7

HD-1426 Relative Field Strength Meter
1977, Excellent $6

HN-31A "Cantenna" Dummy Load
1982 for the "A" model, no check marks $7

HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks $9

IM-5284 Multimeter
Large schematic only $3

Heath "Kit Builders Guide"
included with many Heath kits. $3

These are original manuals only.

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Analog/Mixed-Signal Products Designer's Guide
With CD - February 2000 $5

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 $2

LVDS Application and Data Handbook - 2003 $2

The Voltage Regulator Handbook - 1977 $5

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

1203. Two Meter Transceivers, plus many VHF accessories FS

Yahoo group: hamstuff
Date: 2008-09-06 14:07:02 UTC
From: Ken Simpson, W8EK
Topic: 1203 Message: 1203

Several 2 meter transceivers, plus many VHF accessories For Sale:

Kenwood TS-711, multimode 2 meter transceiver

This unit is an FM, SSB, and CW transceiver for 2 meters.
It has 40 memory channels, and up to 25 Watts of output power,
which is continuously variable (no Hi or Low switch, but a front
panel control to continuously vary power). Of course it will scan,
and do the things one expects in a 2 meter rig. It has a GASFET
in the front end for one of the best receivers I have ever used.
The 120 V AC power supply as well as 13 V DC, is built in. The
case looks very similar to a TS-440 or TS-450 HF rig.

This particular unit is very nice. There are a few very light
scratches,
but none on the front panel. It does have one very, very minor
problem. The MHz down button does not work. This is not a real
problem, as one can use the MHz up button a couple times, and get
to the same place. It is so minor, that I didn't feel that it was worth
bothering about. With paper work, including original multicolor
sales brochure, for $425.

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the
things that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is one
paint spot missing, about the size of a pin head. It includes
the touchtone microphone, mobile mounting bracket, power
cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even
the mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $90

Other accessory items for sale:

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range

with a multi turn pot. It has crowbar over voltage protection, short circuit & thermal protection and features a pair of nice large edgewise meters to measure output voltage and output current. There is an internal fan. This is a very healthy, heavy duty supply!
This particular unit works 100% and looks very close to new.
$125

Larsen VHF and UHF Mobile Antennas:

These antennas are used, but are in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen OM-450 coil, mount, and whip for 440 MHz
Made to mount on a flat surface
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by Antenna Specialists, to mount on a windshield, or other glass. They do not require a ground plane, as they are 1/2 wave antennas, rated to have 3 db gain. They are ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet of the special mounting glue that is furnished by Antenna Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, have been used, but are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs and maybe others. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

"Dead" Icom Battery Pack:
Icom BP-3 battery pack
I found a BP-3 battery pack that is dead. This pack is used on
the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others.
It will also fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new
"insert" in to, or for some project, it would be ideal. Adding one
of the newer high capacity inserts will give you a very inexpensive
new battery, or build a regulator in for use from 12 V DC. $8

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector. It will
convert the BNC connector on the HT, so that you can use
a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable" This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Prices do not include shipping from Florida.

Thanks.

1205. Large variety of Kenwood accessories, plus TH-215 HT FS

Yahoo group: hamstuff
Date: 2008-09-13 13:38:54 UTC
From: Ken Simpson, W8EK
Topic: 1205 Message: 1205

Large variety of accessories for Kenwood Radios plus TH-215 HT For Sale:

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it has
memories, scan features, and the things one expects in an HT.
Subaudible
(PL, CTCSS) tones are built in and can be adjusted from the keypad. A
16
digit touchtone (DTMF) pad is built in. It can be powered by the PG-3 E

cord from 13 V DC to provide full 7 watt output.
This one is in very nice condition. It includes a good PB-2 standard
battery,
rubber duck antenna, and paper work for $75.

SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many other
Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded together.
It works fine, and is in good condition. $25

BC-7 Desk Charger
This unit will fast charge PB-1, PB-2, PB-3, PB-4, and maybe other
Kenwood battery packs. It works fine and is in good shape. $50

PB-1 Battery Pack
12 V at 800 mahr. Fits TH-215, TH-225, TH-415, and others.
This is an optional high power, high capacity battery pack. It looks
great, and holds a charge fine. With paper work for $25

PB-2 Battery Pack
8.4 V, 500 mahr. Fits the TH-215, TH-225, TH-415, and others.
This is the standard pack like comes with the HT. This one looks fine
and holds a charge well. It is in its original box, with paper work for
$20

PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the
TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in,

and permits high power operation of the HTs. $20

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4
battery packs. It can also be used with the smaller PB-2 and PB-3
battery
packs, by putting a filler in the case. Black color. In very nice
condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with
the
smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and
is
in very nice condition. $25

Belt Clips for various HTs -- All include the hardware with the belt
clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood PC-1 phone patch
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for Kenwood TH-21 / TH-31 / TH-41 HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with
threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Original Kenwood Manuals:

All manuals are in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $ 8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 mobile $15

Operating manual for TH-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service Manual for TR-2600, 2 meter HT $15

Prices do not include shipping from Florida.

Thanks.

1206. VHF Wattmeters and antenna tuner FS

Yahoo group: hamstuff
Date: 2008-09-28 12:40:12 UTC
From: Ken Simpson, W8EK
Topic: 1206 Message: 1206

VHF Wattmeters, and Antenna Tuner For Sale:

MFJ 921 antenna tuner for 2 meters and 220 MHz,
combined with a wattmeter and SWR bridge

This unit will match your 2 meter antenna so that most any
2 meter antenna will show a 1:1 SWR to the rig. Ditto for the
220 MHz band.

It is also a wattmeter with 30 Watt and 300 Watt scales,
although the tuner is only rated for 200 Watts. An SWR bridge
is also included. SO-239 connectors in and out.

This particular unit is in excellent condition. I can not find a
scratch on it, and of course it works fine.

With paper work for $50.

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter
by about 3 feet. SO-239 connectors in and out. This
particular meter works great, looks fine and includes
paper work for $ 40.

Prices do not include shipping from Florida.

Thanks.

1209. Icom HT and other Icom items FS

Yahoo group: hamstuff
Date: 2008-10-18 12:34:30 UTC
From: Ken Simpson, W8EK
Topic: 1209 Message: 1209

Icom items For Sale:

Icom IC-04 HT for 440 MHz
This is the 440 MHz version of the popular IC-02 AT. It has
about 7 watts out if used with the larger battery pack, or
powered from 12 V DC. About 5 Watts with the standard
battery pack, or about 1 watt in low power.

Of course it has memories, scan features, and the things
one normally expects in an HT. The keyboard functions as
a DTMF pad, and it has adjustable PL (subaudible) tones
in it as well.

This particular unit works 100% and looks very good.
There is some slight wear, but it is minor.

Rubber duck antenna, belt clip, and paper work are
included for $75.

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and
BP-8 battery packs. It will also charge the BP-3 and BP-4,
but these take 12 to 15 hours. It works 100% and looks
fine as well. $35

Icom BP-7 battery pack
This pack can be used on the Icom IC-02 AT, IC-03 AT,
IC-04 AT, and other Icom HTs.
It can also be used on the Radio Shack HTX-202 and
HTX-404, and maybe others.
This is a 13 V DC at 450 mahr battery pack.
It holds a charge and looks fine. With paper work for $25.

"Dead" Icom Battery Pack:
Icom BP-3 battery pack
I found a BP-3 battery pack that is dead. This pack is used on
the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others.
It will also fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new
"insert" in to, or for some project, it would be ideal. Adding one
of the newer high capacity inserts will give you a very inexpensive
new battery, or build a regulator in for use from 12 V DC. $8

Icom HM-8 touch tone DTMF Microphone
This mic has a touch tone pad on it, with a switch to turn the
pad on or off. There is also a preamp built in to the mic, so

that it can be used with the Icom 25A , 245, 290, 402, 202S,
451, 471A and maybe others. It has a round 8 pin connector
on it. Paper work is included for $45.

Icom HM-12 hand mic with up/down switches
This electret mic is used with most of the modern Icom rigs
that use a round 8 pin mic plug, including the Icom 25A, 28H,
38, 45A, 48, 77, 78, 120, 229H, 271, 275, 290, 375, 451,
471/A, 475, 505, 575, 707, 718, 725, 728, 729, 735, 736,
737/A, 745, 746, 751/A, 756/PRO, 761, 765, 775, 781, 820H,
821H, 900, 901, 970, 1201, 1271, 1275, 2400, 3200, 3210
and maybe others. It has an up and a down switch for changing
frequencies, changing memories, etc.
This one works 100% and looks like new. It has lived most of
its life in a drawer!
With paper work for $40.

Icom HM-56 A, DTMF touchtone microphone w/up-down switch
This electret mic has a 16 digit DTMF touchtone pad on it
along with other special buttons. It also has 14 memories
included in it for remembering phone numbers to dial. It works
with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400,
2410, 2500 and others. This mic also has an up and a down
switch on it. Basically, it is like an HM-12, but with DTMF pad
and memories added. These are about $170 new, so that
gives some idea of its sophistication!
This one is still in its box, with paper work. I do not think it
has ever been used. $95

Prices do not include shipping from Florida.

Thanks.

1210. Many HF Accessory items FS

Yahoo group: hamstuff
Date: 2008-10-25 12:21:04 UTC
From: Ken Simpson, W8EK
Topic: 1210 Message: 1210

Extensive list of HF and related accessories For Sale:

B & W Model 595 "Protax" Coax Switch
This is the switch that is in a rectangular box about 9
inches long, with seven SO-239 connectors coming out
of the back. It is B & W's top of the line "Protax" series,
which means that it grounds all unused antennas. It will
switch up to 6 antennas.
This one works 100% and looks really great -- close to
new condition.
With the paper work for $45.

Micronta 21-525B Field Strength and SWR Meter
Covers 3 to 30 MHz, to check your SWR or to use to
check your field strength.
This meter works fine and looks close to new, with no scratches.
It is in its original box, with the paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of
course it works fine also.
The meter unit is in a very nice light gray / dark gray enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and
switching between the two. This sensor is model SWB, and
says it is good to 225 Mc. Of course it is for 50 ohm systems,
and has an SO-239 on each end of the sensor. $50

Unadilla W2AU "ANsulator" For Sale:
The Unadilla W2AU ANsulator Antenna Center Insulator is
handy for building all sorts of dipoles, quads and yagi antennas.
It includes a built in lightning arrestor. Also included is a top
eye-bolt to support the antenna. There are strong eye bolts
and spade lugs on either side for the antenna wire. It has an
SO-239 connector, designed to accept a standard PL-259
for easy feedline connection.
This particular unit appears to have never been used, but since
it came from a silent key estate, I can not verify. It is in its
original
box, with paper work. Not a scratch on it. $12

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range

with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$125

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Heil "Traveler" Headset / Boom Microphone For Sale:
To quote the Heil Sound Web Site,
"The Heil Traveler is a unique, high-performance single-
sided headset that's ideal for portable and emergency
operation. Compatible with over 100 different radios,
the Traveler provides unmatched versatility for a wide
variety of Amateur Radio applications."
This is a combination of a headphone and a boom
microphone. Of course it is engineered to obtain
exceptional specs, as only Heil can do.
This particular unit has the Heil HC-5 mic element,
which is considered the "rag chew" high fidelity element.
The unit works fine and looks very close to new.
$65

Headphones:

These are all communications headphones with appropriate
frequency response. They are not stereo "Hi Fi" headphones.

Generic headphones
Similar to the Kenwood HS-5, with plastic ear pads.
"Made in USA" stamped on them. With 1/4 inch mono plug,
and about 5 foot cord. Nice shape. $23

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $16

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood connector on the microphone,
so it can be plugged into a Kenwood rig with the round 8 pin

connector. $20

CW items:

Bencher BY-2 Paddle
This is the "All Chrome" Bencher, including the chrome
base. It is in nice shape, and of course has the nice
Bencher touch. $80

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Generic Code Key
This is a very generic code key. It is not fancy, but is adequate
to get the job done. It is mounted on a nice wood base that is
finished and looks very nice. $18

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

MFJ 422 B electronic keyer
This keyer includes sidetone, and has adjustments for
volume, tone frequency, and weighting, as well as speed.
It will key either positive or negative voltages, and is
powered by an internal 9 V battery, or external 5 to 9
volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%, and looks great also. With paper
work for $45.

TenTec Accessories

TenTec 285, 500 Hz filter
500 hz for CW
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

TenTec 288, 1.8 KHz filter
1800 hz for narrow SSB or wide CW
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

Scout 555 / Argo 556 Band Modules
Band modules for 40, 30, 20, 17, 15, and 10 meters.
Non-WARC band modules are $65 each.
WARC band modules (30 and 17 meters) are $70 each.

TenTec 296 mobile mount for 555 Scout
Nice clam shell type of mount in extremely good condition.

$50

Low Pass TVI Filters:

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work with it. $ 35

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end.
$35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer model, and looks like it would take more power. It likely was made in the days that plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. $ 40.

Prices do not include shipping from Florida.

Thanks.

1212. looking for some beko amps please!

Yahoo group: hamstuff
Date: 2008-11-09 17:24:26 UTC
From: goshawk
Topic: 1212 Message: 1212

hello list,
I am looking, for any of the following Beko amps please, as I can't seem to find them anywhere, even on ebay!

HLV-500 for 23cm
HLV-700 for 70cm
HLV-1200 for 2m
or if possible, would prefer:
HLV-1000 for 23cm
HLV-1400 for 70cm
HLV-2400 for 2m

I would prefer, if possible, to get them from somewhere in the UK, or europe, but, as these are proving so hard to find, would appreciate contact details of any place that I could find them, or anyone who is selling any of them, as long as they are in full working order, and good condition, and as long as they ship to the UK.

please contact me, using any of the details below, if you can help me, thanks.

VHF & UHF HTs and mobile rig, plus many accessories For Sale:

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it has memories, scan features, and the things one expects in an HT. Subaudible (PL, CTCSS) tones are built in and can be adjusted from the keypad. A 16 digit touchtone (DTMF) pad is built in. The HT can be powered by the PG-3 E cord from 13 V DC to provide full 7 watt output. This one is in very nice condition. It includes a good PB-2 standard battery, rubber duck antenna, and paper work for $75.

Kenwood SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many other Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded together. It works fine, and is in good condition. $23

Kenwood PB-1 Battery Pack
12 V at 800 mahr. Fits TH-215, TH-225, TH-415, and others.
This is an optional high power, high capacity battery pack. It looks great, and holds a charge fine. With paper work for $25

Kenwood PB-2 Battery Pack
8.4 V, 500 mahr. Fits the TH-215, TH-225, TH-415, and others.
This is the standard pack like comes with the HT. This one looks fine and holds a charge well. It is in its original box, with paper work for $20

Kenwood PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in, and permits high power operation of the HTs. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Kenwood BH-2 Belt Clip - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine

and works fine. $20

Icom IC-04 HT for 440 MHz
This is the 440 MHz version of the popular IC-02 AT. It has
about 7 watts out if used with the larger battery pack, or
powered from 12 V DC. About 5 Watts with the standard
battery pack, or about 1 watt in low power.
Of course it has memories, scan features, and the things
one normally expects in an HT. The keyboard functions as
a DTMF pad, and it has PL (subaudible) tones adjustable
from the front keypad in it as well.
This particular unit works 100% and looks very good.
There is some slight wear, but it is quite minor.
Rubber duck antenna, belt clip, and paper work are
included for $75.

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and
BP-8 battery packs. It will also charge the BP-3 and BP-4,
but these take 12 to 15 hours. It works 100% and looks
fine as well. $35

Icom BP-7 battery pack
This pack can be used on the Icom IC-02 AT, IC-03 AT,
IC-04 AT, and other Icom HTs.
It can also be used on the Radio Shack HTX-202 and
HTX-404, and maybe others.
This is a 13 V DC at 450 mahr battery pack.
It holds a charge and looks fine. With paper work for $25.

"Dead" Icom Battery Pack:
Icom BP-3 battery pack
I found a BP-3 battery pack that is dead. This pack is used on
the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others.
It will also fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new
"insert" in to, or for some project, it would be ideal. Adding one
of the newer high capacity inserts will give you a very inexpensive
new battery, or build a regulator in for use from 12 V DC. $8

Icom HM-8 touch tone DTMF Microphone
This mic has a touch tone pad on it, with a switch to turn the
pad on or off. There is also a preamp built in to the mic, so
that it can be used with the Icom 25A , 245, 290, 402, 202S,
451, 471A and maybe others. It has a round 8 pin connector
on it. Paper work is included for $45.

Icom HM-56 A, DTMF touchtone microphone w/up-down switch
This electret mic has a 16 digit DTMF touchtone pad on it
along with other special buttons. It also has 14 memories
included in it for remembering phone numbers to dial. It works

with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400, 2410, 2500 and others. This mic also has an up and a down switch on it. Basically, it is like an HM-12, but with DTMF pad and memories added. These are about $170 new, so that gives some idea of its sophistication!
This one is still in its box, with paper work. I do not think it has ever been used. $95

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and about 7 watts in low power. The rig is fully synthesized, has memories, scan, subaudible PL tone, and all the things that one expects in a 2 meter rig. It has a touchtone microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is one paint spot missing, about the size of a pin head. It includes the touchtone microphone, mobile mounting bracket, power cord, and paper work. The original box is also included, although the box looks much worse than the radio. Even the mic clip, and a bag of screws are included, as is the original multicolored sales brochure. $90

MFJ 810 VHF Wattmeter / SWR Bridge
Similar to the MFJ 816 listed above, but for the 2 meter and 220 MHz VHF bands. A web site says it is the same as the MFJ 812.
This particular unit works fine, and looks fine also.
With paper work for $25.

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, have been used, but are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original package from when I bought it
20 or 25 years ago

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package from when I bought it
20 or 25 years ago

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector. It will
convert the BNC connector on the HT, so that you can use
a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Prices do not include shipping from Florida.

Thanks.

1214. Kenwood SP-430 speaker and other Kenwood items FS

Yahoo group: hamstuff
Date: 2008-11-22 18:45:22 UTC
From: Ken Simpson, W8EK
Topic: 1214 Message: 1214

Large variety of accessories for Kenwood Radios For Sale:

Kenwood SP-430 External Speaker
The Kenwood SP-430 external speaker provides low-distortion,
clear sound and high intelligibility in any mode. It is made
in an all metal cabinet that is tuned for best speech
intelligence. This is an 8 ohm speaker which has two screw
terminals on the back for input, although the original cord
with an 1/8 inch plug is also included. There is a snap-out
bail that will slightly slant the speaker upwards, if
desired. The SP-430 is physically 5 x 4 x 9.5 inches in size.
It is made to match the TS-430, TS-440, TS-711, TS-811, and
many other Kenwood rigs.
This on is in extremely nice condition. There is one very, very
slight scratch that can be seen if it is held just right.
Of course it works 100%.
Paper work is included for $75.

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it has
memories, scan features, and the things one expects in an HT. Subaudible
(PL, CTCSS) tones are built in and can be adjusted from the keypad. A 16
digit touchtone (DTMF) pad is built in. It can be powered by the PG-3 E
cord from 13 V DC to provide full 7 watt output.
This one is in very nice condition. It includes a good PB-2 standard
battery,
rubber duck antenna, and paper work for $75.

SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many other
Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded together.
Two are available. Both look very nice and work 100%.
One has a cord that is slightly stretched. It is $18.
The other has a perfect cord, and is close to new condition.
It is $25.

PB-1 Battery Pack
12 V at 800 mahr. Fits TH-215, TH-225, TH-415, and others.
This is an optional high power, high capacity battery pack. It looks
great, and holds a charge fine. With paper work for $25

PB-2 Battery Pack
8.4 V, 500 mahr. Fits the TH-215, TH-225, TH-415, and others.
This is the standard pack like comes with the HT. This one looks fine
and holds a charge well. It is in its original box, with paper work for $20

PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in, and permits high power operation of the HTs. $20

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Belt Clips for various HTs -- All include the hardware with the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for Kenwood TH-21 / TH-31 / TH-41 HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with
threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

Original Operating Manuals for Kenwood rigs For Sale:

All manuals are in very nice condition, for Kenwood
radios and accessories, unless stated otherwise.
All are original and are not copies.

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-80 desk microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Service manual for TH-21 series HTs $20

Operating manual for TH-215 / 315 / 415 HTs $12

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221 / 421 mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile
FM transceivers for 2 meters, 220 MHz, 440 MHz, and
1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $12

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $12

Operating manual for TR-2600, 2 meter HT $12

Service manual for TR-2600, 2 meter HT $12

Operating manual for TS-120, HF transceiver $18

Operating manual for TW-4000 dual bander $15

Service Manual for TW-4000 dual bander $20

These are Kenwood Original Manuals only.

Prices do not include shipping from Florida.

Thanks.

CW and related items For Sale:

Special Deluxe CW Key
This first key is extremely nice, and is special in its mounting. The key itself is a Nye Viking Speedex oval base 310-001 key, which sells new for $58 by itself, and has very nice action. What separates this key from any others is the base it is mounted on. It is solid metal about 6 inches long and 5 inches wide and 3/4 inch thick. It weighs about 6 pounds, so it will not move across the desk when you use it. There is a nice beveling around the top. To put it another way, this is a specially machined base, made for the key. The metal appears to be copper, although it is not shiny copper, but instead has a "patina" to it like antique items. A layer of cork covers the bottom to protect your operating table. There is a cable with a metallic shielded 1/4 inch plug on it. This is certainly a one of a kind key. $100

TenTec KR-2 A Keyer Paddle For Sale:
The KR-2 A is the same paddle assembly used in the KR-5 and KR-20 A keyers, but does not have any electronics inside. It also has a small button on the top of the case that can be used as a straight key, but can also be used as an aid to tune up your rig.
It is designed to be used with your own keyer, but many people have put an electronic keyer inside the shielded aluminum case which is about 4 x 4 x 2 inches in size, plus the paddle itself.
The KR-2 A is the woodgrain top / egg shell white color that matches the early Triton series of rigs, plus the Argonaut 509, and others.
This particular unit is in good condition.
The paper work is included (a single sheet). $25

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8
As above, but 1/8 inch plug. $8

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

Code Tapes For Sale:

The following code tapes are from a silent key estate. They
are not original tapes. I have no idea where he got them from
-- if they came from the internet, off the air, or what. I do
know that they are code tapes that have good code practice on
them, as I have listened to portions of each tape. They all
appear to be 90 minute tapes. The names I am listing is what
is written on the tape.
I am selling them for basically the cost of the tape - $4 each.

Novice Class Prep - Random Runs

Novice Class Prep - Simulated Tests

10 WPM Plateau Buster

General Class 3 to 13 Speed Builder

General Class Speed Builder Tape - 13 WPM

Gordon West - 13 WPM

General Test

CW Related books:

Ameco "Mastering the Morse Code"
First Edition, 1957 $8

Ameco Code Course
This book looks like it might be made to go with the Ameco
code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code

practice oscillator from a 50C5 and 35W4. There is no date
or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of
cassette tapes. This has the info that is contained on the
tapes listed in it. If you have the tapes, and need the booklet
to go with it, this is for you. If you just want to read about
it, this is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course,
leading to a novice license. $3

Two & Three Position Coaxial Antenna Switches:

B & W Model CS-3 G (formerly 593)
This switch is in a rectangular box, with four SO-239
connectors coming out of the back. It will switch 3
antennas, grounding the antennas that are not in use.
It works great, and looks very close to new.
With paper work for $40.

Model CX-3 Coax Switch
This switch will switch 3 antennas, with unused positions
NOT grounded. Rectangular with three connectors out the back,
and the common out the front.
It works fine and looks great. $15

SWR Bridges:

Micronta 21-525B Field Strength and SWR Meter
Covers 3 to 30 MHz, to check your SWR or to use to
check your field strength.
This meter works fine and looks close to new, with no scratches.
It is in its original box, with the paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of
course it works fine also.
The meter unit is in a very nice light gray / black enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and
switching between the two. This sensor is model SWB, and
says it is good to 225 Mc. Of course it is for 50 ohm systems,
and has an SO-239 on each end of the sensor. $50

TenTec Scout 555 and Argo 556 accessories:

TenTec Scout 555 / Argo 556 Band Modules
These are the modules that plug in to either the TenTec
Scout or Argo, to give additional band coverage.

Band modules are available for 40, 30, and 20 meters.
Non-WARC band modules are $65 each.
WARC band module (30 meters) is $70.

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on
the enclosure which shows that it is only good for 300 watts
for about 30 seconds. It is good for 100 Watts for about
1 and a half minutes, which is likely the way most of us
would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can be
used on VHF rigs as well. It is rated for under 1.1 to 1 SWR
to 30 MHz and usable up to 650 MHz with under 1.3 to 1 SWR.
PL-259 connector.
I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

Heavy duty power supply:
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt
range with a multi turn pot. It has crowbar over voltage
protection, short circuit & thermal protection and
features a pair of nice large edgewise meters to measure
output voltage and output current. There is an internal
fan. This is a very healthy, heavy duty, deluxe supply!
$135

Headphones:
Generic headset
Smaller ear pieces just over an inch in diameter, so they
do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to
connect your rig on both transmit and receive to a
telephone line, these can also be used to interface your
rig to a sound card. There is an internal audio
transformer inside, just like on some of the "interface
boxes" being sold today.

Kenwood PC-1 A phone patch/digital interface
This is the model with the 8 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
With paperwork for $40

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. These are about $60 new;
this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end. $30

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Drake TV-1000 Low Pass TVI filter
This is the low pass TVI filter that is in the copper case,
and may also be used on the low end of six meters, as well
as HF.
It is a 50 ohm filter and is good for 1000 W below 30 MHz,
and about 200 W up to 52 MHz.
This one works fine and looks good also.
With paper work for $30.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $28

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Prices do not include shipping from Florida.

Thanks.

used on VHF rigs as well. It is rated for under 1.1 to 1 SWR
to 30 MHz and usable up to 650 MHz with under 1.3 to 1 SWR.
PL-259 connector.

I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone (DTMF) Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

It is designed to be used with your own keyer, but many
people have put an electronic keyer inside the shielded
aluminum case which is about 4 x 4 x 2 inches in size,
plus the paddle itself.
The KR-2 A is the woodgrain top / egg shell white color
that matches the early Triton series of rigs, plus the
Argonaut 509, and others.
This particular unit is in good condition.
The paper work is included (a single sheet). $25

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,

and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

TenTec Accessories:

TenTec 285, 500 Hz filter
500 hz for CW
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

Scout 555 / Argo 556 Band Modules
Band modules for 40, 30, and 20 meters.
Non-WARC band modules are $65 each.
WARC band module (30 meters) is $70 each.

Low Pass TVI Filters:

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation in
the 40 MHz region, where many TVs have their IF. It is good for
1000 Watts "average" according to the manual, and has over 80
db attenuation at 41 MHz. This one looks great, and includes
the paper work with it. $ 35

Drake TV-1000 Low Pass TVI filter
This is the low pass TVI filter that is in the copper case,
and may also be used on the low end of six meters, as well
as HF.
It is a 50 ohm filter and is good for 1000 W below 30 MHz,
and about 200 W up to 52 MHz.
This one works fine and looks good also.
With paper work for $30.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. These are about $60 new; this one is close to new
for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency
of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of
AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end.
$35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end. This is an
older model that seems much heavier duty. It weighs almost twice as
much as the newer model, and looks like it would take more power.
It likely was made in the days that plate modulated AM was the rule.

$30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will
handle 1500 Watts. SO-239 connector on each end. This is the latest
model B & W filter. It is in very nice condition; it looks very
close to new. $ 40.

Prices do not include shipping from Florida.

Thanks.

1220. Many Ham Publications FS - Vintage and Modern

Yahoo group: hamstuff
Date: 2009-01-29 14:59:06 UTC
From: Ken Simpson, W8EK
Topic: 1220 Message: 1220

Ham Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, published by ARRL,
unless listed otherwise.

Hints and Kinks for the Radio Amateur
1974, smaller size, $8
1989, 12th edition, $8
1997, 14th edition, like new, $14

Understanding Amateur Radio
1977, no edition number listed, $8

How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

The Mobile Manual, 1955, First Edition,
part of spine binding missing, but otherwise is in good
condition, with all pages intact, and in binding properly,
contains a large number of very vintage equipment ads, $15

Antenna Related Books:

Antenna Anthology, 1978, First Edition, $8

Antenna Compendium, 1992, First Edition, like new, $15

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1985 - 62nd edition - Like new $17
2006 - 83rd edition - with CD, like new $35

Satellite Anthology, 1999, 5th edition, like new, $10

Weather Satellite Handbook, 1990, 4th edition, like new, $10

Operating an Amateur Radio Station, 1983, 61st edition, $3

FCC "Interference Handbook", 1986 edition, $4

Radio Amateurs Operating Manual, 1985, 2nd edition, $8

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Radio Amateur's World Atlas
Published in Germany - $8

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

ARRL Public Service Communications 1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 7

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Ameco "Mastering the Morse Code" by Martin Schwartz
First Edition - 1957 - $8

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Ameco Code Course
This book might be made to go with the Ameco Code records.
There is general information about the code, but portions
of the book list what is being sent by the code records.
There is also a diagram about how to make a code practice
oscillator from a 50C5 and 35W4. $5

ARRL Code Kit Book, 1976
This is the booklet only, that originally went with a kit
of cassette tapes. This has the info contained on the
tapes listed in it. $2

Code Tapes:

All are original tapes in great condition, in their
original containers.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set to take one from 15 WPM up thru 20 WPM;
Paper work is included. $12

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $8

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.........1997 - Second Edition
Advanced Class - 1985 - First edition
.........1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Sam, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Photofacts as of
Aug 1960 - Good condition - $8

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Repeater Directories - $3 each
1982-83
1983-84
1987-88
1989-90
1999-2000
2000-01

US Repeater MapBook
Includes Repeater Directory, with maps showing their location
For US, Canada, and Mexico - Sixth Edition - $5

Prices do not include shipping from Florida.
Media Mail shipping is relatively inexpensive.

Thanks.

1221. 2 meter rigs and accessories FS

Yahoo group: hamstuff
Date: 2009-01-31 15:02:50 UTC
From: Ken Simpson, W8EK
Topic: 1221 Message: 1221

Two meter rigs and accessories For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

MFJ 810 VHF Wattmeter / SWR Bridge
Similar to the MFJ 816 listed above, but for the 2 meter
and 220 MHz VHF bands. A web site says it is the same as
the MFJ 812.
This particular unit works fine, and looks fine also.
With paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of course
it works fine also.
The meter unit is in a very nice light gray / dark gray enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and switching
between the two. This sensor is model SWB, and says it is good to
225 Mc. Of course it is for 50 ohm systems, and has an SO-239 on
each end of the sensor. $50

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on
the enclosure which shows that it is only good for 300 watts
for about 30 seconds. It is good for 100 Watts for about
1 and a half minutes, which is likely the way most of us
would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can
be used on VHF rigs as well. It is rated for under 1.1 to 1

SWR to 30 MHz and usable up to 650 MHz with under 1.3 to 1
SWR. PL-259 connector.
I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Microphone
Touch tone DTMF microphone with 6 pin connector, as used
on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400,
TR-9000, TR-9130, and others. Up-down switch on top. Of
course the connector could be changed to an 8 pin connector
to use on other rigs. This one works 100%, and includes
paper work in the original box for $45.

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular (non DTMF) Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires
polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.

It works fine, and looks good also. $25

Icom charger and battery:

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8 battery packs. It will also charge the BP-3 and BP-4, but these take 12 to 15 hours. It works 100% and looks fine as well. $35

Rebuilt Battery for Icom IC-2AT, IC-02 AT, etc.
Equivalent to a BP-5 plus.
This battery will work on an Icom IC-2AT, 3AT, 4AT, 02AT, 03AT, 04AT, and probably other Icom HTs. It will also work on many Radio Shack HTs (the ones that use the Icom battery packs).
This pack was rebuilt about 6 weeks ago, and is a 7.2 Volt pack with 1600 Mahr capacity NiMH batteries. That means it will produce "normal" power with your HT, but lasts about 5 times as long as the original BP-3 battery pack. $30

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Kenwood SMC-32 Speaker Microphone
Fits TH-215, 225, 235, 425, and many others. It has a right angle, "L" shaped connector on it.
This one works fine and looks really great. $25

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in, and permits high power operation of the HTs. $20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600, and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2 and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it is fine, but it needs a new "insert". With paper work for $10

Special rubber duck antenna for Kenwood TH-21 HT with threaded connector
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Belt Clips for various HTs -- All include the hardware with the belt clip

$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Antennas and antenna related items for sale:

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet.
Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and
many others will fit on it. It includes coax, with an N connector
on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.
All fit the Larsen NLA mount, which is a mount that
is proprietary to Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 4.6 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Prices do not include shipping from Florida.

Thanks.

1222. Antennas and many antenna related items FS

Yahoo group: hamstuff
Date: 2009-02-21 12:29:21 UTC
From: Ken Simpson, W8EK
Topic: 1222 Message: 1222

Antennas and antenna related items for sale:

HyGain BN-86 Antenna Balun
The HyGain BN-86 Balun is a 1:1 balun that may be used on
beam antennas or on dipoles. HyGain used it with the TH-6
Tribanders (plus many others), but it has many more uses on
most any type of antenna between 3 and 30 MHz.
The spec sheet says it is good for 1500 W PEP, or 800 W
average with less than 2:1 SWR. Power rating goes down with
an increase in SWR.
It can be mounted directly to the boom of a beam with a U
bolt, or it can be hung as an inverted V, or used as a straight
dipole. To put it another way, it is very versatile.
This one works fine, and looks good also.
These are about $80 new. This one includes the paper
work, for $40.

Wattmeters and SWR Bridges:

Heath HM-15 SWR Bridge For Sale:
It is an HF SWR Bridge, with SO-239 connectors on the
back. The front has the meter on the left, and two knobs
to the right. It is the same size as the HD-15 phone
patch,and is made to compliment the Heath SB line.
This one works fine and is in extremely nice
cosmetic shape.
Paper work included for $20.

MFJ 860 HF Wattmeter / SWR Bridge
This meter has the modern cross needle meter that will read
both forward and reverse power at the same time, and hence
SWR also. It is for 1.8 thru 60 MHz, and has scales for 300
Watts and 30 Watts full scale. If 12 V is applied, the meter
is back lighted.
This particular unit works fine, and looks fine also.
With paper work for $45.

MFJ 812 B VHF Wattmeter / SWR Bridge
This meter covers 144 and 220 MHz. You can read forward and
reflected power in 2 ranges - 30 or 300 Watts. It also reads
SWR from 144 thru 220Mhz.
The MFJ-812B also reads relative field strength from 1 to 220
MHz. It has a binding post for the field strength antenna.
It is in a nice eggshell white and black case.
This one works fine and looks great also.
With paper work for $30.

MFJ 817 Cross Needle VHF Wattmeter / SWR Bridge
The MFJ-817 covers 2 meters VHF and 440 MHz UHF. The extra large 3 inch Cross Needle Meter reads SWR and peak/average for forward and reflected power. Power ranges: 200/2 Watts forward and 50/5 Watts reflected. Reads SWR from 1:1 and 8:1. SO-239 connectors. There is a switch for dial illumination (requires 12 V DC). This one works fine and looks nice with its black face. These are over $100 new, but you can have this one for $60.

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT ground unused antennas. It has SO-239 connectors on the sides, with the coax coming out like spokes of a wheel.
This particular switch has the optional B & W plate installed that has the antennas labeled with 28, 21, 14, 7, and 3.5 on the dial.
Of course it works fine, and look OK also.
$40

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which has a gain of about 3 db. The coil can be used with any of the NMO mounts (made by Motorola, Larsen, Cushcraft and many others). The antenna is approximately four feet long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet. Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and many others will fit on it. It includes coax, with an N connector on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.
All fit the Larsen NLA mount, which is a mount that
is proprietary to Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

ARRL Antenna Book
1974, 13th edition, smaller size
pages show yellowing $8

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 4.6 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Hustler HF mobile antenna resonators:

Standard 400 Watt Hustler resonators
15 meter resonator RM-15 $14
10 meter resonator RM-10 Still sealed in original package $15

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation in
the 40 MHz region, where many TVs have their IF. It is good for
1000 Watts "average" according to the manual, and has over 80
db attenuation at 41 MHz. This one looks great, and includes
the paper work with it. $ 35

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end. $35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer model, and looks like it would take more power. It likely was made in the days that plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. $ 40.

Coax connectors and adapters:
Prices are per connector.
Several of each are available.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

Two meter rigs and accessories For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters
This rig is fully synthesized, has memories, scan, subaudible
PL tone, and all the things that one expects in a 2 meter rig.
It has a touchtone microphone with it. This rig produces just
over 25 Watts in high power and about 7 watts in low power.
It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

Kenwood TH-215, 2 meter HT
Covers the 2 meter band with up to 7 W output power. Of course it
has memories, scan features, and the things one expects in an HT.
Subaudible (PL, CTCSS) tones are built in and can be adjusted from
the keypad. A 16 digit touchtone (DTMF) pad is built in. The HT can
be powered by the PG-3 E cord from 13 V DC to provide full 7 watt
output. This one is in very nice condition. It includes a battery
tray in which you can add six AA cells. This permits use of alkaline,
NiMH, or NiCad cells. Also included is a rubber duck antenna, and
paper work for $75.

MFJ 817 Cross Needle VHF Wattmeter / SWR Bridge
The MFJ-817 covers 2 meters VHF and 440 MHz UHF. The extra large
3 inch Cross Needle Meter reads SWR and peak/average for forward
and reflected power. Power ranges: 200/2 Watts forward and 50/5
Watts reflected. Reads SWR from 1:1 and 8:1. SO-239 connectors.
There is a switch for dial illumination (requires 12 V DC).
This one works fine and looks nice with its black face.
These are over $100 new, but you can have this one for $60.

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes
of a wheel.

This particular switch has the optional B & W plate
installed that has the antennas labeled with 28, 21,
14, 7, and 3.5 on the dial.
Of course it works fine, and looks OK also.
$40

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for
most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

DTMF Touch Tone Microphones:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular (non DTMF) Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72,
TR-22 C, TR-33 C, and others. It has the standard 4 pin plug
wired for Drake/Kenwood, and is a 500 ohm mic. Of course it
could be used on an HF rig as well as a 2 m rig. It looks
great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires
polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Icom charger:

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8
battery packs. It will also charge the BP-3 and BP-4, but
these take 12 to 15 hours. It works 100% and looks fine
as well. $35

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, Santec,
and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC
to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has
a filter built in, and permits high power operation of the HTs.
$20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600,
and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2
and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with threaded connector
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips for various HTs -- All include the hardware with
the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Antennas and antenna related items for sale:

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet.
Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and
many others will fit on it. It includes coax, with an N connector
on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen PO-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet.
The center of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It includes coax, with a PL-259 connector on it.

It is in good condition for $17.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Coax connectors and adapters:
Prices are per connector.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Kantronics "Interface II" Terminal Unit
This unit is made to copy RTTY signals, and feed the output
to a computer. To quote the brochure that is included with it,
it is "designed by the Kantronics team to give the discerning
operator excellent performance."
It features 170, 425, and 850 shift on both transmit and receive.
An AFSK generator is built in, or FSK can be used. It has two
separate channels for use with 2 rigs. For optimum reception,
a six pole filter is changed as the shift is changed. It requires
12 V DC at about 200 ma to operate.
These were originally about $270. You can get this one with
the paper work for only $30.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Date: 2009-03-14 10:40:05 UTC
From: Ken Simpson, W8EK
Topic: 1225 Message: 1225

HF and related accessories For Sale:

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes
of a wheel.
This particular switch has the optional B & W plate
installed that has the antennas labeled with 28, 21,
14, 7, and 3.5 on the dial.
Of course it works fine, and look OK also.
$40

HyGain BN-86 Antenna Balun
The HyGain BN-86 Balun is a 1:1 balun that may be used on
beam antennas or on dipoles. HyGain used it with the TH-6
Tribanders (plus many others), but it has many more uses on
most any type of antenna between 3 and 30 MHz.
The spec sheet says it is good for 1500 W PEP, or 800 W
average with less than 2:1 SWR. Power rating goes down with
an increase in SWR.
It can be mounted directly to the boom of a beam with a U
bolt, or it can be hung as an inverted V, or used as a straight
dipole. To put it another way, it is very versatile.
This one works fine, and looks good also.
These are about $80 new. This one includes the paper
work, for $40.

Hallicrafters S-120 Shortwave receiver

Hallicrafters S-120 vintage shortwave radio receiver
from the 1960's. Four Bands covering 550 KHz to 30 MHz.
It has a built in speaker and antenna for the broadcast
band. An external wire antenna is needed for the short
wave bands.
The receiver is working fine.
Signals are picked up on all four bands.
Cosmetically, it looks very, very, very nice. I can not
find a scratch on it, and all of the chrome looks great.
Even the telescoping antenna that was included with it
originally is still with it, as well as the paper stickers
glued inside and on the bottom of the cabinet. Of course
the fiber board rear cover is also on it.
Paper work is included for $95

MFJ 722 audio filter

This is an audio filter made to go between your rig
and speaker. It includes a bypass switch.

You can put it into a high pass mode, use it as a notch
filter, or as a narrow CW filter. It is great for both
SSB and CW, and appears to be similar to the Autek QF-1
audio filter, but is in a much nicer egg shell and
woodgrain enclosure.
It requires 12 V DC for operation.

For more info, please see
http://www.mfjenterprises.com/Produc...ductid=MFJ-722

This particular filter works fine, and looks OK also.
Paper work included for $45.

Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72,
TR-22 C, TR-33 C, and others. It has the standard 4 pin plug
wired for Drake/Kenwood, and is a 500 ohm mic. Of course it
could be used on an HF rig as well as a 2 m rig. It looks
great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.

With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

CW items:

Special Deluxe CW Key
This first key is extremely nice, and is special in its
mounting. The key itself is a Nye Viking Speedex oval base
310-001 key, which sells new for $58 by itself, and has
very nice action. What separates this key from any others
is the base it is mounted on. It is solid metal about 6
inches long and 5 inches wide and 3/4 inch thick. It
weighs about 6 pounds, so it will not move across the
desk when you use it. There is a nice beveling around
the top. To put it another way, this is a specially
machined base, made for the key. The metal appears
to be copper, although it is not shiny copper, but
instead has a "patina" to it like antique items. A
layer of cork covers the bottom to protect your operating
table. There is a cable with a metallic shielded 1/4 inch
plug on it. This is certainly a one of a kind key. $95

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch (3.5 mm) plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

CW Related books and tapes:

Ameco Code Course
This book looks like it might be made to go with the Ameco
code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code
practice oscillator from a 50C5 and 35W4. There is no date
or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of
cassette tapes. This has the info that is contained on the
tapes listed in it. If you have the tapes, and need the booklet
to go with it, this is for you. If you just want to read about
it, this is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course,
leading to a novice license. $3

These are original tapes, in their original container.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set with paper work included. $10

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $6

TenTec Accessories:

Scout 555 / Argo 556 Band Module
Band module to add 40 meters (7 MHz) to the Scout or Argo.
Extremely nice condition for $65.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power supply
to the amp. It has a heavy duty 9 pin molex type
connector on both ends, and multiple runs of either
#12 or #14 wire, and is about 6 feet long.
It is in good shape. $18

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.

Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6.

Yaesu Log Book
Dark Red color, with picture of FT-1000 on inside.
International prefixes, and DXCC Country list also included,
along with about 50 double sided pages for logging.
Never used. $8

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for
most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

Kantronics "Interface II" Terminal Unit For Sale:

This unit is made to copy RTTY signals, and feed the output
to a computer. To quote the brochure that is included with it,
it is "designed by the Kantronics team to give the discerning
operator excellent performance."

It features 170, 425, and 850 shift on both transmit and receive.
An AFSK generator is built in, or FSK can be used. It has two
separate channels for use with 2 rigs. For optimum reception,
a six pole filter is changed as the shift is changed. It requires
12 V DC at about 200 ma to operate.

These were originally about $270. You can get this one with
the paper work for only $30.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver and
before the antenna) to reduce harmonic interference.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off

frequency of 45 MHz and 75 db of attenuation. It is rated to
take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239
connectors on each end. $35.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. $40

Hustler HF mobile antenna resonators:

Standard 400 Watt Hustler resonators
15 meter resonator RM-15 $14
10 meter resonator RM-10 Still sealed in original package $15

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

ARRL Antenna Book
1974, 13th edition, smaller size
pages show yellowing $8

Call Area Map of the World
33 x 24 inches in size $5

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

ARRL DXCC Countries List
Sept 1997 - marks in it $2

Ham Price Guide - 2nd Edition
Lists prices of used ham gear $5

AEA Items:

AEA AC-1 Power Supply
"Wall wort" 12 V DC power supply at 1 amp.

Can be used with PK-232 or PK-88.
It plugs directly into these units, or any with
a 2.1 mm coaxial connector, center positive.
It works 100% and looks great. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

Coax connectors and adapters:
Prices are per connector. These are connectors I have
accumulated over 40+ years, and not used.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

1226. Custom Made Double Bazooka Antennas

Yahoo group: hamstuff
Date: 2009-03-20 14:05:13 UTC
From: AD5VJ Bob
Topic: 1226 Message: 1226

Check us out:

http://americanaerial.ad5vj.com/

This is not the imported version this is HandMade and Performance Tested.

We customize all of our antennas to meet your operating needs.

This antenna presents anywhere from 95% to 100% efficiency, except at the band edges, where it normally exhibits approximately 85%
to 88% efficiency. So it is very good for QRP work, as well as, Full Legal Limit without a BALUN.

Thanks for your interest,
Bob AD5VJ
5495 Upper Denton Road
Weatherford, Texas 76085

From: Ken Simpson, W8EK
Topic: 1225 Message: 1227

HF and related accessories For Sale:

MFJ 722 audio filter

This is an audio filter made to go between your rig
and speaker. It includes a bypass switch.

You can put it into a high pass mode, use it as a notch
filter, or as a narrow CW filter. It is great for both
SSB and CW, and appears to be similar to the Autek
audio filter, but is in a much nicer egg shell and
woodgrain enclosure.
It requires 12 V DC for operation.

For more info, please see
http://www.mfjenterprises.com/Produc...ductid=MFJ-722

This particular filter works fine, and looks OK also.
Paper work included for $45.

MFJ 812 B VHF Wattmeter / SWR Bridge

This meter covers 144 and 220 MHz. You can read forward and
reflected power in 2 ranges - 30 or 300 Watts. It also reads
SWR from 144 thru 220Mhz.

The MFJ-812B also reads relative field strength from 1 to 220
MHz. It has a binding post for the field strength antenna.

It is in a nice eggshell white and black case.
This one works fine and looks great also.

With paper work for $30.

Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72,
TR-22 C, TR-33 C, and others. It has the standard 4 pin plug
wired for Drake/Kenwood, and is a 500 ohm mic. Of course it
could be used on an HF rig as well as a 2 m rig. It looks
great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

CW items:

Special Deluxe CW Key
This first key is extremely nice, and is special in its
mounting. The key itself is a Nye Viking Speedex oval base
310-001 key, which sells new for $58 by itself, and has
very nice action. What separates this key from any others
is the base it is mounted on. It is solid metal about 6
inches long and 5 inches wide and 3/4 inch thick. It
weighs about 6 pounds, so it will not move across the
desk when you use it. There is a nice beveling around
the top. To put it another way, this is a specially
machined base, made for the key. The metal appears
to be copper, although it is not shiny copper, but
instead has a "patina" to it like antique items. A
layer of cork covers the bottom to protect your operating
table. There is a cable with a metallic shielded 1/4 inch
plug on it. This is certainly a one of a kind key. $95

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch (3.5 mm) plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

CW Related books and tapes:

Ameco Code Course
This book looks like it might be made to go with the Ameco
code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code
practice oscillator from a 50C5 and 35W4. There is no date
or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of
cassette tapes. This has the info that is contained on the
tapes listed in it. If you have the tapes, and need the booklet
to go with it, this is for you. If you just want to read about
it, this is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course,
leading to a novice license. $3

These are original code tapes, in their original container.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set with paper work included. $10

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $6

TenTec Accessories:

Scout 555 / Argo 556 Band Module
Band module to add 40 meters (7 MHz) to the Scout or Argo.
Extremely nice condition for $65.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power supply
to the amp. It has a heavy duty 9 pin molex type
connector on both ends, and multiple runs of either
#12 or #14 wire, and is about 6 feet long.
It is in good shape. $18

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6.

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for
most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

AEA Items:

AEA AC-1 Power Supply
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232 or PK-88.
It plugs directly into these units, or any with
a 2.1 mm coaxial connector, center positive.
It works 100% and looks great. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver and
before the antenna) to reduce harmonic interference.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation. It is rated to
take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239
connectors on each end. $35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

HF mobile antennas:

Hustler "Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

ARRL Antenna Book
1974, 13th edition, smaller size
pages show yellowing $8

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

Call Area Map of the World
33 x 24 inches in size $5

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info

is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

ARRL DXCC Countries List
Sept 1997 - marks in it $2

Ham Price Guide - 2nd Edition
Lists prices of used ham gear $5

Coax connectors and adapters:
Prices are per connector. These are connectors I have
accumulated over 40+ years, and not used.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

1228. 2 meter / 440 MHz ham rigs and many accessories FS

Yahoo group: hamstuff
Date: 2009-04-18 14:49:27 UTC
From: Ken Simpson, W8EK
Topic: 1228 Message: 1228

For Sale:

VHF and UHF (2 meter and 440 MHz) transceivers and accessories

Dual Band HT:

Radio Shack HTX-420, 2 meter / 70 cm Dual Band FM Transceiver

Transmits on the 2 m and 440 MHz band, and receives on 137 to
174 and 420 to 512 MHz on FM, plus 108 to 137 MHz AM for the
aircraft band. It also has SAME alert for the weather radio
portion. A compass is built in. Power output is adjustable
with 3 levels of about 4 W, 1 W, and .2 W. Cross band operation
is also possible. Of course it has the normal memories, scan,
PL subaudible tones, and all the other things one expects in a
modern HT.

A 7.2 V, 1200 mahr Lithium Ion Battery is included, as is a
rubber duck, wall charger, and operating manual. In addition,
it has a nice desk stand to make it easier to use at home.
The HT works great, and looks very close to new. $200

Spare Battery for Radio Shack HTX-420 dual band HT:

W & W LC-343 L, Lithium Ion Battery for Radio Shack HTX-420 HT

This Lithium Battery is 7.2 volts at 1300 mahr, and is made to
fit the HTX-420 dual bander. It can be charged with either a
wall charger or desk charger.

This particular battery works great. My guess is that the now
silent key used it only a couple times. It holds a charge well,
and functions 100%. It looks very close to new. $32

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig is fully synthesized, has memories, scan, subaudible
PL tone, and all the things that one expects in a 2 meter rig.
It has a touch tone microphone with it. This rig produces just
over 25 Watts in high power and about 7 watts in low power.
It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. It includes
the touch tone microphone, mobile mounting bracket, power
cord, and paper work. The original box is also included.

Even the mic clip, and a bag of screws are included, as is
the original multicolored sales brochure. $89

MFJ 812 B VHF Wattmeter / SWR Bridge
This meter covers 144 and 220 MHz. You can read forward and
reflected power in 2 ranges - 30 or 300 Watts. It also reads
SWR from 144 thru 220Mhz.
The MFJ-812B also reads relative field strength from 1 to 220
MHz.
This one works fine and looks great also.
With paper work for $30.

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8 battery

packs. It will also charge the BP-3 and BP-4, but these take 12 to 15 hours. It works 100% and looks fine as well. $35

Accessories for Kenwood TH-215, 225, 235, etc. HTs:

PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and others. It has a filter built in, and permits high power operation of the HTs. $20

SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2 and PB-3 battery packs. Black color. Very nice condition. $15

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessory items for Kenwood TR-2400 and other HTs:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and maybe others. This one looks fine and works fine. $16

Belt clip for TR-2400 HT
In great condition, complete with hardware - $8

Original Operators manual for Kenwood TR-2400 - $15

Wrist strap - I think it fits most Kenwood (and likely other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This can be used with any HT that has a BNC connector. $5

Santec HT items:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather

shoulder strap has not been used. $22

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips and Wrist Straps for various HTs:

Belt Clips for various HTs - All include hardware.
$8 each
Kenwood BH-2 for TR-2500, TR-2600, TH-215, TH-225 and others
Kenwood TR-2400
Motorola

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

I have a Spanish version of the Operating Manual
for the Kenwood G-707 dual band transceiver available.
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $10

Yaesu Items:

Yaesu MH-12 A2B Speaker Microphone
This speaker microphone has a 3.5 mm and a 2.5 mm plug
on it, molded together, as is used on many, many HTs.
It will fit many Yaesu, Icom, Alinco, Radio Shack and
other HTs.
This one works fine, and looks very close to new.
I can not find any defects on it. $20

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, Santec,
and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

Wrist Strap for Yaesu FT-209 - $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6 each.

Antennas for 2 meters, 220 Mhz, or 440 MHz:

Larsen VHF and UHF Mobile Antennas

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen PO-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet.
The center of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It includes coax, with a PL-259 connector on it.
It is in good condition. $17

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $22.

Avanti / Antenna Specialists "On Glass" mobile antennas

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 7 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter crystals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have cross
references for the various rigs, so I will know what you need
if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

Ham Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, unless listed otherwise.

ARRL Hints and Kinks for the Radio Amateur
1974, smaller size, $8
1989, 12th edition, $8
1997, 14th edition, like new, $14

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

Bash Book
This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing all of
the General Class questions and answers. Nice condition. $8

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

ARRL Operating an Amateur Radio Station
1976 - 57th edition $3
1978 - 58th edition $3

1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

ARRL Radio Amateurs Operating Manual, 1985, 2nd edition, $8

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Call Area Map of the World
33 x 24 inches in size $5

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

ARRL Public Service Communications 1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 7

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4

As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.....1997 - Second Edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Sams, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Photofacts as of
Aug 1960 - Good condition - $8

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Gonset ORIGINAL manual:
Gonset Noise Clipper Model C $4

ORIGINAL Operating Manuals for Kenwood Rigs:

All manuals are original, in very nice condition, for
Kenwood radios. They are originals and not copies.
All are original Kenwood manuals in very nice condition.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-215 / 315 / 415 HTs $12

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12
Service manual for TR-2600 $12

Operating manual for TS-120, HF transceiver $18

Operating manual for TW-4000 dual bander $15
Service Manual for TW-4000 $20

Original Manuals for Kenwood Accessories:

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

These are Kenwood Original Manuals only.

ORIGINAL Icom operating manuals:
Please note that all of these are original Icom manuals
and are not copies.
All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $7
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, and BP-5 Batteries $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
IC-229, 2 meter mobile transceiver $15
IC-230, 2 meter mobile transceiver $15
IC-3 PA Power supply $10
UT-16 Voice Synthesizer $5

These are original manuals only.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and
all are close to new condition.

GD-600 Photoelectric Light Switch
Schematic is part of book $5

HD-15 Hybrid Phone patch
1965, Schematic is part of book. $8

HD-1234 Coax Switch
1973, Four Position Coax Switch
Like new, no check marks $7

HM-2102 VHF Wattmeter 1972
Very nice condition. No check marks.
Schematic is part of book. $15

HN-31A "Cantenna" Dummy Load
1982 for the "A" model, no check marks $7

HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks $9

IM-5284 Multimeter
Large schematic only $3

These are original manuals only.

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with
very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

1236. Coaxial Antenna Switches and Connectors FS

Yahoo group: hamstuff
Date: 2009-08-28 17:02:12 UTC
From: Ken Simpson, W8EK
Topic: 1236 Message: 1236

Coaxial Antenna Switches and Connectors For Sale:

All antenna switches have SO-239 connectors.

B & W Model 593 Coax Switch
This is the switch that is in a rectangular box about 6
inches long, with four SO-239 connectors coming out
of the back. It will switch 3 antennas, grounding the
antennas that are not in use. It works great.
In its original box, with paper work for $35.

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel. $35

Five position Coax Switch
This switch looks to be the same as the B & W 550 A,
but it is not. Same styling, but the unused connectors
ARE grounded. Coax out the sides like spokes of a
wheel. $35

Unknown brand of four position antenna switch
This is in a large round copper container painted black,
about 5 inches in diameter, with a large (about 3 inch)
black knob. A heavy duty grounding bolt is included.
Unused positions are NOT grounded. Coax out the sides
like spokes of a wheel. $25

Heath HD-1234 Antenna Switch
This switch will transfer four antennas. The coax
comes out of the sides like spokes of a wheel. Unused
connectors ARE grounded. Mounting bracket and paper
work included for $25.

Dow Key antenna relay
This is similar to the antenna relay like we used
in the 1960's to switch between transmit and receive.
It has a 120 V coil, but no auxiliary contacts. $30

Coax connectors and adapters For Sale:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

1238. Microphones FS - Desk, Hand, DTMF, and Speaker Mics

Yahoo group: hamstuff
Date: 2009-09-06 23:25:07 UTC
From: Ken Simpson, W8EK
Topic: 1238 Message: 1238

Microphones For Sale - Desk, Hand, DTMF Touch tone, and Speaker-Mics:

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/FT-Library/Eighties/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Turner Hand Microphone
J 450 C, Ceramic Hand Microphone
Black/Dark Gray front, with brownish/light gray back.
Dark PTT button.
This is high impedance mic, presently with stripped and
tinned ends.
This particular mic works fine and looks like new. $30

Radio Shack Hand Mic with DTMF Tones, plus many extra buttons
This mic has the modular 8 conductor plug like a computer
LAN on it. The mic has a 16 digit touch tone pad on it,
along with buttons for up, down, VFO, MR, MHz, Call, and
of course PTT. It also has a lock switch. Lettering is
very clear, and coiled cord is in great shape. $45

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Azden PCM-463 hand microphone
This is a standard hand microphone with up and down
switches on it. It also has a "Memory 1 Call" button
on the top of the PTT switch. I think this was used
with the Azden PCS-5000. I know I used the PCS-5000
on packet, and have now found the mic that was once
with the rig. I also used packet on a PCS-4000 and
PCS-6000 at various times, so it is possible that

this mic might be used with either of those. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones For Sale:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones For Sale:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.

Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Prices do not include shipping from Florida.

Thanks.

1239. 2 m rig, plus many ham accessory items FS

Yahoo group: hamstuff
Date: 2009-09-12 15:39:22 UTC
From: Ken Simpson, W8EK
Topic: 1239 Message: 1239

Two meter FM Transceiver, plus many ham station accessory
items For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

TenTec items:

TenTec 285, 500 Hz filter
500 hz for CW or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $75

TenTec 288, 1800 Hz filter
1800 hz for wide CW, narrow SSB or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
It looks like new, with paperwork. $75

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Heath VHF Wattmeter

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Midland 23-126 SWR Bridge
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it. $30

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/F...ies/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge,
Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual
meter. It is the round, cylindrical sensor that can go with
many of the Johnson Matchbox units. SO-239 connectors on
each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper
work, and original packing material. It appears to be new,
and certainly is quite collectible. $60

CMOS Iambic Keyer

This keyer features a build in set of HamKey Paddles.
The front has speed control, plus a volume control for
the sidetone volume. Of course that means that it can
also be used for code practice. Also on the front panel
is a 3 position switch that turns off the output to the
transmitter (for code practice), puts it in to "Keyer

mode", or locks it on for transmitter tune up.

The rear panel has provisions for an external speaker
(one is built in), external key, external paddles, plus
jacks for keying the transmitter. There is also a connector
for external 9 to 12 V DC power, although it can be powered
by a regular 9 V battery if desired.

It works fine and is in extremely nice condition. $50

Cables for CW Straight Key and for CW Paddles:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Vectronics VEC-212 Code Practice Oscillator:

This appears to be the same as the MFJ 557 code practice
oscillator, but with the VEC label on it.

A picture can be seen at http://www.n4mw.com/cp100tn.jpg

It is a traditional code practice oscillator, with adjustable
volume and tone. It includes a straight key on a nice base.
It operates from a 9 volt battery, or from a wall wort power
supply.

With paper work for $22.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath Phone Patch and SWR Bridge:

Both of these units match the Heath SB series.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface to the computer for PSK31, etc. It is in
good shape. Paper work included for $25.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will

handle 1500 watts.
In extremely nice condition for $35.

MFJ 722 audio filter

This is an audio filter made to go between your rig
and speaker. It includes a bypass switch.

You can put it into a high pass mode, use it as a notch
filter, or as a narrow CW filter. It is great for both
SSB and CW, and appears to be similar to the Autek
audio filter, but is in a much nicer egg shell and
woodgrain enclosure.
It requires 12 V DC for operation.

For more info, please see
http://www.mfjenterprises.com/Produc...ductid=MFJ-722

This particular filter works fine, and looks OK also.
Paper work included for $45.

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each.

AEA Items:

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232, PK-88 or others. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone

into on the front, along with a switch to switch between mic or TNC. There are two cables coming out of the back, with one going to the mic jack on your rig, and other going to your TNC. There is also provision for receive audio in, and an external speaker. No power is required. Inside the box is a series of jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

Icom Hand Microphones:

Icom HM-3
This low impedance hand microphone fits the Icom 22S, 224, 205S, 451A, 551D and likely others. It works fine, looks fine, and has a standard 4 pin connector on it. $20

Icom HM-4
This low impedance hand microphone fits the Icom 20, 21, 22, 30, 31, 60, 201, 202, 211, 215, 230, 245, 280, 402 and likely others. This one has a nice pattern on the scope, but presently does not have a connector on it, but of course one could be added. It looks fine. $20

Generic Hand Microphone
This is a low impedance hand microphone, black in color. It is presently has an 8 pin round connector, wired for Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad on the back. Four pin mic plug. Used, but in good shape. Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.
Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Yaesu Items:

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6 each.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Yaesu FT-207
Yaesu FT-209

Wrist Strap for Yaesu FT-209 - $4

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

1240. 2 m HT plus many HT accessories FS

Yahoo group: hamstuff
Date: 2009-09-19 11:12:53 UTC
From: Ken Simpson, W8EK
Topic: 1240 Message: 1240

Kenwood TH-215 HT, plus many accessory items for many HTs For Sale:

Kenwood TH-215, 2 meter HT (plus public service band on receive)
Covers the 2 meter band with up to 7 W output power. Of course
it has memories, scan features, and the things one expects in
an HT. Subaudible (PL, CTCSS) tones are built in and can be
adjusted from the keypad. A 16 digit touchtone (DTMF) pad is
built in. It can be powered by the PG-3 E cord from 13 V DC
to provide full 7 watt output. It also has about 1 W output
in low power.
This one is in very nice condition. It includes a PB-2 battery,
rubber duck antenna, and paper work for $70.

BC-7 Desk Charger
This unit will fast charge PB-1, PB-2, PB-3, PB-4, and maybe
other Kenwood battery packs. It works fine and is in good
shape. $50

PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V
DC to the TH-215, TH-225, TH-415, and other Kenwood HTs.
It has a filter built in, and permits high power operation
of the HTs. $20

SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard
PB-2 and PB-3 battery packs. Black color. Very nice
condition. $15

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Speaker Microphones:

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.
Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery
of the Kenwood TR-2400, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. It is in good shape, and works
fine. $3

Wrist strap
I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and
provide an SO-239 connector that will permit a PL-259 to
be attached. This adapter can be used on any HT with a
BNC connector. $5

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center
of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It is in good condition. $17

Larsen VHF and UHF Mobile Antennas:

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8
For 450 MHz, used, but very good. $6

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by Antenna Specialists, to mount on a windshield, or other glass. They do not require a ground plane, as they are 1/2 wave antennas, rated to have 3 db gain. They are ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

"Dead" Icom Battery Pack:

Icom BP-3 battery pack
I have the equivalent of the BP-3 battery pack that is dead. This is actually a pack from a Radio Shack HT that uses the same batteries as the Icom. It looks like it will hold 6 AA battery cells. This pack is used on the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others. It will also fit some of the Radio Shack / Realistic HTs such as the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new "insert" in to, or for some project, it would be ideal. Adding one of the newer high capacity inserts will give you a very inexpensive new battery, or build a regulator in for use from 12 V DC.
It looks very nice, and is not all scratched up. $10

Selectone ST-131 Subaudible PL tone encoder
If you need subaudible tones, this unit will add them
to the Icom IC-2AT, 3AT, 4AT, and others of that series
that lacked the tones originally. It is a postage stamp
size unit. This one has never been used, and is still
in its original plastic bag, with the instructions. $30

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the
battery of the Azden PCS-300, 2 meter HT, outside
of the HT itself. Usually, one must have the battery
inside the HT, but this lets you charge a second
battery outside of the HT. The original charger is
used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Original Kenwood Manuals:

All manuals are in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Service manual for TH-21 series HTs $20

Operating manual for TH-215, 2 meter HT
Good condition, but has some writing on the covers $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 mobile $15

Operating manual for TH-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service Manual for TR-2600, 2 meter HT $15

Manuals for Kenwood Accessories:

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-80 desk microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

All of the above are in English.

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $10

ORIGINAL Icom operating manuals:
Please note that all of these are original Icom manuals
and are not copies.
All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $7
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, and BP-5 Batteries $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
IC-229, 2 meter mobile transceiver $15
IC-230, 2 meter mobile transceiver $15
IC-3 PA Power supply $10
UT-16 Voice Synthesizer $5

These are original manuals only.

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter crystals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have
cross references for the various rigs, so I will know what
you need if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

1241. Wattmeter and SWR Bridges FS

Yahoo group: hamstuff
Date: 2009-09-27 11:39:39 UTC
From: Ken Simpson, W8EK
Topic: 1241 Message: 1241

Wattmeter and SWR Bridges For Sale:

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Midland 23-126 SWR Bridge
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it. $30

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge,
Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual
meter. It is the round, cylindrical sensor that can go with
many of the Johnson Matchbox units. SO-239 connectors on
each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper
work, and original packing material. It appears to be new,
and certainly is quite collectible. $60

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Alliance U-100 and U-110 antenna rotor control boxes
This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.
Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.
Both control boxes works fine, and look fine also.
Paper work included for $25 each.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1242 Message: 1242

Antennas and antenna related accessories For Sale:

Multiband HF "doublet" antenna:

This antenna is basically an 80 meter dipole, fed with
"Window" twin lead. It is approximately 66 feet long on
each half, with a center insulator that it can be hung by,
and a length of window twin lead to go to your antenna
tuner. It does need to be used with an antenna tuner,
capable of feeding balanced line. With an antenna tuner,
it should be able to be used on most HF bands.

This antenna came from a silent key estate. I have no
paper work on it, and do not know the manufacturer.
It was in a drawer, and not in the air, so it is quite
possible that it has not been used. It is in good shape,
although the stranded copper antenna wire is no longer
shiny. $30

Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are 1:1 baluns, which means that they will preserve the
impedance, instead of acting like a transformer. They will
handle full legal power.

HF 1 to 1 Baluns:

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Two Position Coax Switch w/Lightning Protection
Alpha Delta "Delta 2" two position switch
This is the switch that has a lot of lightning protection built
in, including a gas discharge tube. It also has a center
position of the switch that grounds both antennas.
You can read more about it at

http://www.universal-radio.com/CATALOG/switch/2415.html
This one is in nice condition.
Of course it works fine. $40

Antenna Traps for 17 meters (18.1 MHz)

Unadilla KW-17 Traps
17 Meter (18.118 MHz) Reyco Coils

W2VS traps are available for 80 meters and up. Rated for
2KW PEP. Built from stainless steel and aluminum hardware
to resist corrosion, these rugged traps have a pull strength
of over 600 lbs. Trap coils are waterproofed and condensers
are epoxy-sealed.

These are $46 from Unadilla. It appears that these have
never been used. Buy the pair for only $25.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and
includes paper work for $40.

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge,
Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual
meter. It is the round, cylindrical sensor that can go with
many of the Johnson Matchbox units. SO-239 connectors on
each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper
work, and original packing material. It appears to be new,
and certainly is quite collectible. $60

Hustler HF mobile high power resonators

All work fine and are in great cosmetic condition.

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

7 pin DIN Cable
This cable has a 7 pin DIN plug on each end, and is about
18 inches long. I think it is used for Icom HF transceivers
to connect the HF rig to one of the automatic antenna tuners,
such as the AT-150. It could have other uses. $20

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8

For 450 MHz, used, but very good. $6

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet. The center of the mag mount takes an NLA type antenna. It includes coax, with a PL-259 connector on it. It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center of the mag mount has an SO-239 connector, which means any antenna with a PL-259 can be used with it. It is in good condition. $17

Avanti "On Glass" antenna for 440 MHz For Sale:

This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

Extensive List of Many Ham Items For Sale

Extensive List of Many Ham Items For Sale
Wattmeters, Speaker, Microphones, HT accessories,
Baluns, Filters, Phone Patches, Keyers, and much more

Wattmeter and SWR Bridges:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Communications Speaker:
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Microphones:

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/F...ies/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Yaesu MH-31 B 8 dynamic hand microphone
This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any Yaesu
rig that uses the round 8 pin connector. It has up, down,
and fst switches, and well as a tone switch, in addition
to the PTT switch.
This particular unit works 100%, and is still unused in
its original box. It even includes the new shiny, chrome
mic holder for $40.

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of
the box. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Yaesu MH-15a8
Has 16 digit DTMF pad on the back with an Up-Down
switch on the top in addition to the PTT button.
8 pin round connector. $40

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a

normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6,
VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think
it also fits the FT-50 and FT-60, and maybe others. It
has a single 4 conductor, 3.5 mm plug on it. This one
is just like new. $30

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Other HT accessories:

Kenwood BT-13 Battery Case
This is a battery case for the Kenwood TH-F6A HT.
A person can add 4 AA cells to it, and power the HT.
Alkaline cells can be used, but so can NiMH cells,
which have a very high capacity.
This BT-13 is new, never used. They list for $32,
but you can have this one for $22.

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

TenTec items:

TenTec 285, 500 Hz filter
500 hz for CW or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $75

TenTec KR-2 Paddles
The paddles are a single lever paddle, like is in the KR-5
keyer. They are housed in a nice eggshell white and wood
grain cabinet. There is also a separate button on top that
can be used as a straight key, or to tune up a rig or
antenna tuner. $40

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

HF 1 to 1 Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are all 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer. They will
handle full legal power, and take a PL-259 connector.

Bencher ZA-1 A Balun
This 1:1 balun will handle full legal power, and can be used
either with a dipole or a beam. It has strain relief for the
dipole wire, and can be hung from the provided mounting hole.
This one works fine and looks great. $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each.

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.
Regular (400 Watt PEP) Resonator:
40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

Coax Cable with Type "N" Connectors For Sale:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

AEA Items:

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232, PK-88 or others. $15

Phone Patches:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording

and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-19 Phone Patch
This phone patch is made to match the Apache, Marauder, etc. The large VU meter is in the middle. Below the meter is a single conductor mic jack, two small chrome knobs for xmtr and rcvr gain control, and a larger rotary on-off switch with chrome knob on the right. There is a terminal strip on the back for connections. Of course it can be used as an interface to sound cards for digital mode operation as well.
This unit looks extremely nice. Of course it works fine. With paper work for $25.

CW Items:

TenTec KR-2 Paddles
The paddles are a single lever paddle, like is in the KR-5 keyer. They are housed in a nice eggshell white and wood grain cabinet. There is also a separate button on top that can be used as a straight key, or to tune up a rig or antenna tuner. $40

Buy the paddles with one of the keyers below, and take $10 off of the pair.

MFJ 484 C "GrandMaster" Keyer with Memories
This keyer has a built in sidetone, with volume and tone adjustable on the front panel. Speed and weighting are also adjustable from the front panel.
It has 4 large memories. You may install a 9 volt battery to preserve memory contents during a power failure. It can be powered by either a 9 Volt battery, a 9 V DC wall wart, or your station 12 V DC power supply.
It is a nice eggshell white and wood grain enclosure that matches the TenTec KR-2 paddle. $55

Palomar Engineers IC Keyer
This keyer includes a sidetone with speaker built in. It
also will operate in either full automatic mode (like most
keyers), or in semiautomatic mode (like a bug). The 9 Volt
battery is external, so it can be changed easily. This one
works great. $45

Cables for CW Straight Key and for CW Paddles For Sale:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Low Pass TVI Filters For Sale:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

Coax connectors and adapters For Sale:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters For Sale:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

Antennas and antenna related accessories For Sale:

HF 1 to 1 Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are all 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer. They will
handle full legal power, and take a PL-259 connector.

Bencher ZA-1 A Balun
This 1:1 balun will handle full legal power, and can be used
either with a dipole or a beam. It has strain relief for the
dipole wire, and can be hung from the provided mounting hole.
This one works fine and looks great. $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and
includes paper work for $40.

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.

Regular (400 Watt PEP) Resonator:
40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

Alliance U-100 and U-110 antenna rotor control boxes
This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.
Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.
Both control boxes works fine, and look fine also.
Paper work included for $25 each

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8
For 450 MHz, used, but very good. $6

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center
of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It is in good condition. $17

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

Electronic Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, unless listed otherwise.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13

The ARRL RFI Book
Practical Cures for Radio Frequency Interference
1999, First Edition, Large 8 1/2 X 11 book, $12

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

ARRL Learning to work with Integrated Circuits
1977, First edition $12

ARRL Radio Frequency Interference
1978, First Edition, $10

ARRL The Satellite Experimenter's Handbook
1984, First Edition, $8
1990, Second Edition, $15

ARRL Radio Amateurs Operating Manual, 1985, 2nd edition, $8

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

CQ The Packet Radio Operators Manual
By Buck Rogers, K4ABT, 1995
Close to new condition, $14

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab
Hardback Book, Like New, 208 pages, 1992, $12

Allied Dictionary of Electronic Terms
Fifth Edition, 1960, like new condition, $10

ARRL Operating an Amateur Radio Station
1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Call Area Map of the World
33 x 24 inches in size $5

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

ARRL Public Service Communications 1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 7

W5YI Books:
"Ham Operator Education Package" 1992, $4
W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993 - Fourth Edition - $3
2002 - 17th Revised Edition - $4

Bash Book
This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing all of
the General Class questions and answers. Nice condition. $8

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Sams, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing

1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Passport to World Band Radio, 2004
Detailed info about receivers, where to listen, etc. $8

WRTH - World Radio TV Handbook, 2004
Directory of Global Broadcasting, $8

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Gonset ORIGINAL manual:
Gonset Noise Clipper Model C $4

ORIGINAL Operating Manuals for Kenwood Rigs and accessories:

All manuals are original, in very nice condition, for
Kenwood radios and accessories. They are originals and not
copies.
All are original Kenwood manuals in very nice condition.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-215 / 315 / 415 HTs $12

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12
Service manual for TR-2600 $12

Operating manual for TS-120, HF transceiver $18

Operating manual for TW-4000 dual bander $15
Service Manual for TW-4000 $20

BC-5 DC charger/adapter $4
HS-5 Headphones $4
LF-30A Low Pass Filter $5
MC-30 and MC-35 hand microphones $5

MC-85 desk microphone $4
PB-1, PB-2, PB-3, and PB-4 battery packs $3
PS-6 power supply $6
PS-30 power supply $5
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-230 speaker $4
SP-430 speaker $4
SP-520 speaker $4
SW-2000 SWR Bridge $5
YG-3395C CW Filter $3
YK-88SN Narrow SSB Filter $4

ORIGINAL Icom operating manuals:
Please note that all of these are original Icom manuals
and are not copies.
All are in very good condition, unless noted otherwise.
These are original manuals only.

BC-30 Desk Charger $7
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, and BP-5 Batteries $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
IC-229, 2 meter mobile transceiver $15
IC-230, 2 meter mobile transceiver $15
IC-3 PA Power supply $10
UT-16 Voice Synthesizer $5

These are original manuals only.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and
all are close to new condition.

AM-2 Reflected Power Meter
(Also known as SWR Meter), 1960,
w/ schematic and pictorial, $8

GD-600 Photoelectric Light Switch
Schematic is part of book $5

HD-15 Hybrid Phone patch
1965, Schematic is part of book. $8

HD-1234 Coax Switch
1973, Four Position Coax Switch
Like new, no check marks $7

Heath HDP-21 Desk Microphone
1969, Great condition, $4

HM-15 Reflected Power Meter and SWR Bridge
1968, Schematic is in book, $8

HM-2102 VHF Wattmeter 1972
Very nice condition. No check marks.
Schematic is part of book. $15

HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks $9

IM-5284 Multimeter
Large schematic only $3

SB-102 HF Transceiver
Schematic Only, Large fold out page, $4

T-2 Signal Tracer
No date listed, but I would guess from the 1950's, $8

Brochure "Heathkit Specials" featuring the Twoer and Sixer,
SB series, HR-20, and others. $4

These are original manuals only.

Transistor Substitution Books For Sale:

All are in excellent condition.

Sams Transistor Substitution Handbook
Second Edition, 1961, 112 pages, $5

Sams Transistor Substitution Handbook No. 10
Tenth Edition, 1970, 160 pages, $6

Sams Transistor Substitution Handbook No. 14
14th Edition, 1974, Larger book, $8

Sylvania ECG Semiconductor replacement guide
1976, larger book, 276 pages, $8

Sylvania ECG Semiconductors Master Replacement Guide
1979, larger book, 360 pages, $10

Sylvania ECG Semiconductor Master Replacement Guide
1987, larger book, about 700 pages, $15

Archer Transistor Replacement Guide
62-1015, No date listed, 8000 substitutions, $5

Archer Transistor Substitution Guide
276-2000, 1972, 15,000 types, 96 pages, $5

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with
very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

1247. Wattmeter, Baluns, Speaker, Mics, HT accessories and much more FS

Yahoo group: hamstuff
Date: 2009-11-07 16:44:34 UTC
From: Ken Simpson, W8EK
Topic: 1247 Message: 1247

Extensive List of Many Ham Items For Sale
Wattmeter, Baluns, Speaker, Microphones, HT accessories,
Filters, Phone Patches, Keyer, and much more

Wattmeter and SWR Bridge:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

HF 1 to 1 Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a
balanced antenna, such as a beam or dipole.
These are all 1:1 baluns, which means that they will preserve
the impedance, instead of acting like a transformer. They will
handle full legal power, and take a PL-259 connector.

Bencher ZA-1 A Balun
This 1:1 balun will handle full legal power, and can be used
either with a dipole or a beam. It has strain relief for the
dipole wire, and can be hung from the provided mounting hole.
This one works fine and looks great. $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Kenwood Log Book
Completely unused, new condition. It has standard log
book pages, with a world map on the inside cover, and
a DXCC list (as of 1987) in the back. Cover is a
silver color with the Kenwood Logo. $8

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Microphones:

Yaesu MH-31 B 8 dynamic hand microphone
This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any Yaesu
rig that uses the round 8 pin connector. It has up, down,
and fst switches, and well as a tone switch, in addition
to the PTT switch. This is a modern MH-1 B 8 mic.
This particular unit works 100%, and is still unused in
its original box. It even includes the new shiny, chrome
mic holder for $40.

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of
the box. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25

As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6,
VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think
it also fits the FT-50 and FT-60, and maybe others. It
has a single 4 conductor, 3.5 mm plug on it. This one
is just like new. $30

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Other HT accessories:

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

TenTec items:

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.
Regular (400 Watt PEP) Resonator:
40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

Coax Cable with Type "N" Connectors For Sale:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

AEA Items:

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232, PK-88 or others. $15

Phone Patches:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-19 Phone Patch
This phone patch is made to match the Apache, Marauder, etc. The large VU meter is in the middle. Below the meter is a single conductor mic jack, two small chrome knobs for xmtr and rcvr gain control, and a larger rotary on-off switch with chrome knob on the right. There is a terminal strip on the back for connections. Of course it can be used as an interface to sound cards for digital mode operation as well.
This unit looks extremely nice. Of course it works fine.
With paper work for $25.

CW Items:

Palomar Engineers IC Keyer
This keyer includes a sidetone with speaker built in. It also will operate in either full automatic mode (like most keyers), or in semiautomatic mode (like a bug). The 9 Volt battery is external, so it can be changed easily. This one works great. $45

Cables for CW Straight Key and for CW Paddles:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

Antennas and antenna related accessories For Sale:

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 meters, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. For either 220 MHz or 450 MHz.
Please specify. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
For 450 MHz. $6

Larsen Magnetic Antenna Mount:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks very close to
new and includes paper work for $45.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice

condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 6 meters (if adjusted as such), and will
handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

1252. Many Different Microphones FS

Yahoo group: hamstuff
Date: 2009-12-11 18:57:43 UTC
From: Ken Simpson, W8EK
Topic: 1252 Message: 1252

Many Different Microphones For Sale:

Heath hand microphone
This is the black colored hand mic that was used on
the HW and SB series transceivers from 25 or 30 years ago.
It is a Hi Z mic. This particular mic is in good condition.
It works great, and looks OK cosmetically. It even includes
the mounting clip (which looks like it was never used).
This mic presently has stripped and tinned ends.
I have paper work for a Heath GH-12 A hand microphone with
it. $30

Yaesu MH-1 B 8 dynamic hand microphone
This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any
Yaesu rig that uses the round 8 pin connector. It has
up, down, and fst switches, and well as a tone switch,
in addition to the PTT switch.
This particular unit works fie. The front of it looks
very good. The back has some minor defects, but nothing
that effects operation. $30

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of the
box. $30

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-23 DTMF Touch Tone Hand Microphone
This mic has the 16 digit DTMF touchtone pad, but also has
the up and down switches. It was designed to be used with
the 27, 28, 37, and 47 that require a longer nut on the mic,
but can also be used with the 25A, 28H, 38, 45A, 48, 77, 78,
120, 229H, 271, 275, 290, 375, 451, 471/A, 475, 505, 575,
707, 718, 725, 728, 729, 735, 736, 737/A, 745, 746, 751/A,
756/PRO, 761, 765, 775, 781, 820H, 821H, 900, 901, 970,
1201, 1271, 1275, 2400, 3200, 3210 and maybe others.
It can also be used on an HF rig to give a mic with DTMF
Touch Tones.
Basically, it is the same as the HM-14, but with a larger nut
on the connector.
It has the round 8 pin connector, is in good shape, and
works fine. It looks close to new. $50

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it
stored in the mic, and "speed dial" with this mic. 12
digit touch tone pad on the front, with the microphone
part above the pad. This one presently has a 4 pin plug
on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

VoMax Speech Processor:

This unit was considered the absolute best speech processor
available in the 80's. The VoMax splits the audio signal into
discrete bands, peak-limits each band, passes the separate
signals through bandpass filters to eliminate distortion,
and sums the signals in a phase-equalizing combiner. The
result is superb audio you can feed to your transmitter
that has low distortion and 10-12db power gain!

The VoMax added between your microphone and transmitter gives you extra punch that is equivalent to adding a linear amplifier.

This particular unit works fine, and is in its original box, complete with the wall wort power supply, although it can be powered by 12 V DC. It is quite possible that this unit was never used until I took it out of the box to test it. The instruction sheets look like they were never unfolded!

$95

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

3 pin mic plug for Drake TR-22
This is the small 3 pin mic plug that fits the Drake TR-22 mic jack. It is much smaller than most of the mic connectors. I thought these were completely gone, but one appeared from a silent key. This one has been used, but should still be usable some more. $12

Prices do not include shipping from Florida.

Thanks.

1253. Antennas and related items FS

Yahoo group: hamstuff
Date: 2009-12-12 21:55:12 UTC
From: Ken Simpson, W8EK
Topic: 1253 Message: 1253

Antennas and antenna related items for sale:

B & W Coaxial Antenna Switches:

Both switches will handle full legal limit, and have
SO-239 connectors.

B & W 375 "Protax" coax switch
This switch will switch up to 6 antennas, and DOES
ground the unused antennas. It has the coax coming
out the back in one large bundle. This one works 100%
electrically, and looks very nice. $45

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel. This one has the optional
face place also.
This one works fine and looks fine as well. $40

HF Antenna Baluns:

A balun is used to match a balanced antenna (such as a beam or
dipole) to an unbalanced feedline (such as coax).

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use it to
hang a dipole or inverted V, or a U-bolt can be added to attach
it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical use.
It includes the paper work for $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks fine. $25

Hustler HF mobile resonators and masts:
All work fine and are in great cosmetic condition.

Standard" Hustler resonators (good for 400 Watts PEP):
80 meter resonator RM-80 $22
75 meter resonator RM-75 $22
40 meter resonator RM-40 $20
20 meter resonator RM-20 $17
17 meter resonator RM-17 $15

15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $40
75 meter RM-75 S $39

Hustler mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

VHF Cross Needle Wattmeter / SWR Meter:

The SX144-430 Cross-Needle SWR and RF Power meter is for use on 140-160 MHz and 400-480 MHz. In other words 2 meters and the ham 440 MHz bands are included. It is designed for 50 ohm systems, and has SO-239 connectors on the back. The cross needle meter measures 10 Watts, 100 Watts, or 1000 Watts full scale on forward and 2, 20 or 200 watts reverse power.

This particular meter works 100%, and looks like new. In fact it is still in its original box, with paper work, for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take 1.5 KW output with 5 KW peaks, and has at least 80 db signal attenuation at TV channel 2. It is also in a very sturdy metal case.
Bencher sells these for $90.
This one works great and looks close to new, for only $60.

Nye Viking Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong
magnet. Any of the NMO antennas made by Larsen, Motorola,
Cushcraft, and many others will fit on it. It includes coax,
with an PL-259 connector on it. It is in great condition
for $22.

Larsen NMO-2/70 antenna for 2 meters and 440 MHz combined
Single antenna screws in to any NMO mount, and covers the
2 meter band with about 2 db gain, and the 440 MHz band
with about 4 db gain. It is a very rugged antenna.
This one works fine, includes both the coil and the loaded
whip, and looks very close to new. $45

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
For 450 MHz. $6

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Regular length, 6 1/2 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

Date: 2009-12-26 17:41:32 UTC
From: Ken Simpson, W8EK
Topic: 1255 Message: 1255

Extensive List of Many Ham Items For Sale
Speech Processor, Baluns, Coax Switch, 2 meter FM Rig, TenTec
Items, Hustler mobile resonators, Microphones, TVI filters,
Wattmeter, HT accessories, Speaker, Phone Patches, and
much more

VoMax Speech Processor:

This unit was considered the absolute best speech processor
available in the 80's. The VoMax splits the audio signal into
discrete bands, processes each band, passes the separate
signals through bandpass filters to eliminate distortion,
and sums the signals in a phase-equalizing combiner. The
result is superb audio you can feed to your transmitter
that has low distortion and 10-12db power gain!

The VoMax added between your microphone and transmitter
gives you extra punch that is equivalent to adding a linear
amplifier.

This particular unit works fine, and is in its original box,
complete with the wall wort power supply, although it can be
powered by 12 V DC. It is quite possible that this unit was
never used until I took it out of the box to test it. The
instruction sheets look like they were never unfolded!
$95

HF Antenna Baluns:

A balun is used to match a balanced antenna (such as a beam or
dipole) to an unbalanced feedline (such as coax).

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use it to
hang a dipole or inverted V, or a U-bolt can be added to attach
it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical use.
It includes the paper work for $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks fine. $25

Coaxial Antenna Switch:
B & W Model 550 A coax switch

This model will switch up to 5 antennas, and does NOT ground unused antennas. It has the coax coming out the sides like spokes of a wheel. This one has the optional face place also. It will handle full legal limit.
This one works fine and looks fine as well. $40

VHF Cross Needle Wattmeter / SWR Meter:

The SX144-430 Cross-Needle SWR and RF Power meter is for use on 140-160 MHz and 400-480 MHz. In other words 2 meters and the ham 440 MHz bands are included. It is designed for 50 ohm systems, and has SO-239 connectors on the back. The cross needle meter measures 10 Watts, 100 Watts, or 1000 Watts full scale on forward and 2, 20 or 200 watts reverse power.

This particular meter works 100%, and looks like new. In fact it is still in its original box, with paper work, for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take 1.5 KW output with 5 KW peaks, and has at least 80 db signal attenuation at TV channel 2. It is also in a very sturdy metal case.
Bencher sells these for $90.
This one works great and looks close to new, for only $60.

Nye Viking Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has

over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $80

TenTec Items:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel

around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Hustler HF mobile antennas:

All work fine and are in nice condition.

Standard" Hustler resonators (good for 400 Watts PEP):
80 meter resonator RM-80 $22
75 meter resonator RM-75 $22
40 meter resonator RM-40 $20
20 meter resonator RM-20 $17
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $40
75 meter RM-75 S $39

Hustler mobile masts:
MO-1 (folds about 14 inches above ball) $22

Microphones:

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of the
box. $30

Heath High Impedance Hand Microphone
This is the black colored hand mic that was used on
the HW and SB series transceivers from 25 or 30 years ago.
It is a Hi Z mic. This particular mic is in good condition.
It works great, and looks fine cosmetically. It even includes
the mounting clip (which looks like it was never used).
This mic presently has stripped and tinned ends, but of
course a connector can easily be added.
I have paper work for a Heath GH-12 A hand microphone with
it, but am not certain that is what it is. My memory says
the GH-12 A was dark green in color, and this one is a
black color. $30

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. It is presently has an 8 pin round connector, wired for Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

ParaDynamics PDC-5 Wattmeter/Antenna Tuner
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

HT accessories:

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for Kenwood TH-21/31/41 series HTs:

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge. Physically it
is fine, but it needs a new "insert". Or use it to build
a DC pack, or other project. With paper work for $8

Kenwood PB-21 H battery pack
As above, but heavy duty pack; needs insert.
With paper work for $12.

Wall wort charger for use with the PB-21 H Battery pack
With the 2.1 mm coaxial connector to charge the larger
battery pack. $15

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Kenwood RA-6 Special 2 meter rubber duck antenna for Kenwood
TH-21 HT with threaded connector, standard 6.6 inches long. $15

Service manual for TH-21 AT, plus most of the TH-21/31/41
accessories such as DC-21, EP-2, TU-6, etc. $20

Accessories for the Kenwood TR-2400 HT

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs, plus most
accessories for this series HT $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long
Regular BNC, about 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22
mic jack. It is much smaller than most of the mic connectors.
I thought these were completely gone, but one appeared from
a silent key. This one has been used, but should still be
usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Kenwood Log Book
Completely unused, new condition. It has standard log
book pages, with a world map on the inside cover, and
a DXCC list (as of 1987) in the back. Cover is a
silver color with the Kenwood Logo. $8

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

CW Items:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

AEA Power Supply
AEA AC-1

"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners, etc.
$15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface to the computer for PSK31, etc. It is in
extremely good condition. No scratches or imperfections.
Paper work included for $25.

Heath HD-19 Phone Patch
This phone patch is made to match the Apache, Marauder,
etc. The large VU meter is in the middle. Below the
meter is a single conductor mic jack, two small chrome
knobs for xmtr and rcvr gain control, and a larger rotary
on-off switch with chrome knob on the right. There is a
terminal strip on the back for connections. Of course
it can be used as an interface to sound cards for digital
mode operation as well.
This unit looks extremely nice. Of course it works fine.
With paper work for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored

scale about 6 inches long. It weighs about 5 1/2 pounds!
It has terminals for scales of 150, 1500, 15000, and
150000 millivolts.
Also included is the calibration information (from 1944)
indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case,
that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

1256. 2 m rig, filters, mics, speech processor, etc. FS

Yahoo group: hamstuff
Date: 2010-01-09 18:02:12 UTC
From: Ken Simpson, W8EK
Topic: 1256 Message: 1256

Extensive List of Many Ham Items For Sale
2 meter FM Rig, TenTec Items, Microphones, TVI filters,
Wattmeter, HT accessories, Speaker, Phone Patches, and
much more

Two meter FM Transceiver:

Azden PCS-4000 FM transceiver for 2 meters

This is a nice small unit, which has 16 memories in 2 banks,
scan capabilities (memories or band scan), priority channel,
DTMF touchtone microphone with Up and Down switch and
Memory 1 call, plus all sorts of other bells and whistles. It has
25 Watts or 5 Watts output power and an extremely good
receiver.

This particular unit works fine, and looks very nice.

Microphone, mobile bracket, power cord, and manual are
included for $70.

VoMax Speech Processor:

This unit was considered the absolute best speech processor
available in the 80's. The VoMax splits the audio signal into
discrete bands, processes each band, passes the separate
signals through bandpass filters to eliminate distortion,
and sums the signals in a phase-equalizing combiner. The
result is superb audio you can feed to your transmitter
that has low distortion and 10-12db power gain!

The VoMax added between your microphone and transmitter
gives you extra punch that is equivalent to adding a linear
amplifier. It is power by 12 V DC at about 100 ma.

This particular unit works fine, and looks very nice.
Paper work is included for $75.

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass
Filter. This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 Watts
average below 30 MHz, and about 200 W up to 52 MHz. It works
fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

TenTec Items:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Microphones:

Heath High Impedance Hand Microphone
This is the black colored hand mic that was used on
the HW and SB series transceivers from 25 or 30 years ago.
It is a Hi Z mic. This particular mic is in good condition.
It works great, and looks fine cosmetically. It even includes
the mounting clip (which looks like it was never used).
This mic presently has stripped and tinned ends, but of
course a connector can easily be added.
I have paper work for a Heath GH-12 A hand microphone with
it, but am not certain that is what it is. My memory says
the GH-12 A was dark green in color, and this one is a
black color. $30

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking
this kind of connector (TM-201, TM-211, TM-221, TM-231,
TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870,
TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN
switches and PTT, along with 16 digit touch tone pad.
It works fine, and includes paper work for $50.

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on
TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000,
TR-9130, and others. Up-down switch on top. 16 digit touch
tone pad. This one works fine, and includes paper work for $45.

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it

stored in the mic, and "speed dial" with this mic. 12
digit touch tone pad on the front, with the microphone
part above the pad. This one presently has a 4 pin plug
on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

ParaDynamics PDC-5 Wattmeter/Antenna Tuner
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Hustler HF mobile antennas:

All work fine and are in good condition.

Standard" Hustler resonators (good for 400 Watts PEP):
75 meter resonator RM-75 $22

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage $38

Heavy Duty Mobile/Portable Antenna Mount:

This is a very heavy duty antenna mount, designed to
take any standard 3/8-24 threaded antenna. which includes just
about any HF antenna and many other antennas as well.

The mount is made to be clamped around a vertical object, such
as a pipe, tubing, or even a square channel. It would be ideal
to attach to something like a chain link fence. It could also be
used as a mirror mount on trucks. It will take up to 1 1/2 inch
diameter objects. It has a very large screw type mechanism with
a large handle to tighten to the vertical object. It could be
placed in operation very quickly, so it is great for portable
and emergency operation, where one would want to set up a
mount quickly.

The bottom of it has an SO-239 connector, ready to take a
standard PL-259 connector.

This unit is in good condition. $20

HT accessories:

Icom BP-20 Battery Case For Sale:
The BP-20 is an "empty" battery pack designed to hold
regular AA cells. Of course a person can use regular
alkaline batteries, or NiCads, or NiMh batteries. This
pack will work with the Icom u2AT, u3AT, u4AT, and maybe
others. It is ideal if you have one of these HTs that
now has a dead battery.
This particular BP-20 is in its original box, and appears
to be new and never used. The box is labeled CM-20, which
is the same as the BP-20, except the commercial version.
$20

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is
basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be

used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for the Kenwood TR-2400 HT

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,

voltages, etc. $18

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs, plus most
accessories for this series HT $20

Service manual for Kenwood TH-41 series HTs, plus most
accessories for this series HT $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

Alinco Stubby w/BNC Connector, 4.6 inches long
Regular BNC, about 6.5 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22
mic jack. It is much smaller than most of the mic connectors.
I thought these were completely gone, but one appeared from
a silent key. This one has been used, but should still be
usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

CW Items:

"Code Crash" by Jerome Mintz
This is a VHS video tape that teaches a person the code.
It is a very basic tape, with the assumption that one does
not know any of the code. $12

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

AEA Power Supply
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners, etc.
$15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in extremely good condition. No scratches or imperfections. Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored scale about 6 inches long. It weighs about 5 1/2 pounds! It has terminals for scales of 150, 1500, 15000, and 150000 millivolts.
Also included is the calibration information (from 1944) indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case, that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

1258. 2 m rig, Microphones, CW Paddles, TVI Filters, and much more FS

Yahoo group: hamstuff
Date: 2010-01-18 18:48:16 UTC
From: Ken Simpson, W8EK
Topic: 1258 Message: 1258

Extensive List of Many Ham Items For Sale
2 meter FM Transceiver, Coax switch, SWR Bridge, Coax Relay,
Communications Speaker, TVI filters, Microphones, TenTec Items,
Hustler mobile resonator, Wattmeter, HT accessories, Phone
Patches, and much more

Two meter FM Transceiver:

Azden PCS-4000 FM transceiver for 2 meters

This is a nice small unit, which has 16 memories in 2 banks,
scan capabilities (memories or band scan), priority channel,
DTMF touchtone microphone with Up and Down switch and
Memory 1 call, plus all sorts of other bells and whistles. It has
25 Watts or 5 Watts output power and an extremely good
receiver.

This particular unit works fine, and looks very nice.

Microphone, mobile bracket, power cord, and manual are
included for $70.

Heath HD-1234 Coaxial antenna switch
This coax switch has SO-239 connectors arranged so the
coax comes out like the spokes of a wheel. It will switch
up to 4 antennas, and also ground all of the antennas.
This particular switch works fine and looks fine also.
With paper work for $35.

SWR Bridge

CalComm #9856 SWR Meter

The included paper work says this meter is good for 3 to 150
MHz, so one can use it on 2 meters, and on 6 meters as well
as on the HF bands. It can also be used as a field strength
meter.

It has an SO-239 connector on each end, and it made to be mounted
in a vertical position, with the meter at the top, and the
adjustment knob at the bottom.

This meter includes the paper work (and even the warranty info),
and the original box, although the box has seen better days. The
meter itself works fine, and is in extremely nice condition. The
back of it has holes for mounting it to a wall. A former owner
removed some of the paint from around these mounting holes, so
that it would get a better electrical ground. $20

B & W 377 Coaxial Antenna Relay

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

MFJ CWF-2 CW filter
This audio filter can be powered by a 9 V battery or a 9 volt wall wart. It has a switch selectable bandwidth of 80, 110, or 180 hertz. Of course you can turn it off also!
It inserts in the audio line, and can really cut the QRM down. It is not a fancy DSP filter, but then, neither is the price. This one is in good shape but has wear around the switch that is used to select bandwidth. The top and sides are close to perfect. $15

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

Microphones:

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. Striped and tinned ends. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-8 DTMF touchtone microphone
The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones. Of course it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451, 471A, plus other rigs.
This particular microphone has an 8 pin round connector, works fine, is in its original box, and includes paper work for $50.

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector (TM-201, TM-211, TM-221, TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870, TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN switches and PTT, along with 16 digit touch tone pad.
It works fine, and includes paper work for $50.

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. 16 digit touch tone pad. This one works fine, and includes paper work for $45.

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine

and works fine. $18

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle
The Brass Racer Paddles are unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable by the use of magnets. It is a convenient, space saving portable keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base. Designed for use with an external keyer or a keyer built into the radio. It has a long shielded cord with a 1/4 inch stereo plug. It works fine and looks good. $100

"Code Crash" by Jerome Mintz
This is a VHS video tape that teaches a person the code. It is a very basic tape, with the assumption that one does not know any of the code. $12

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

TenTec Items:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that

I could find. $150

Hustler HF mobile antennas:

All work fine and are in nice condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage $38

ParaDynamics PDC-5 Wattmeter/Antenna Tuner
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference. All will handle full legal power
at HF, have an SO-239 connector on each end, and are designed
for 50 ohm systems.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case.
This one works great, and looks close to new. Someone added some
felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these
for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425)
This filter cuts off just above 10 meters, and is the latest
model B & W filter. It is in very nice condition; it looks very

close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for about 200 W up to 52 MHz, but full power on HF. It works fine, and is in very nice shape. $35

Drake TV-3300-LP
This modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF (over 80 db attenuation at 41 MHz). This one looks great, and includes the paper work. $30

Drake TV-42-LP Low pass filter
Rated for 100 W thru 30 MHz.
Similar characteristics as the TV-3300, but lower power rating. It works fine and looks like new. $ 15

HT accessories:

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. $25

Accessories for the Kenwood TR-2400 HT

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine

and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs (2 meter), plus most
accessories for this series HT $20

Service manuals for Kenwood TH-41, 440 MHz HT, plus most
accessories $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

Regular BNC, about 6.5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22
mic jack. It is much smaller than most of the mic connectors.
I thought these were completely gone, but one appeared from
a silent key. This one has been used, but should still be
usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

AEA Power Supply
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners, etc.
$15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface to the computer for PSK31, etc. It is in

extremely good condition. No scratches or imperfections.
Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored
scale about 6 inches long. It weighs about 5 1/2 pounds!
It has terminals for scales of 150, 1500, 15000, and
150000 millivolts.
Also included is the calibration information (from 1944)
indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case,
that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

1259. Many Microphones FS

Yahoo group: hamstuff
Date: 2010-01-22 16:41:50 UTC
From: Ken Simpson, W8EK
Topic: 1259 Message: 1259

Microphones For Sale:

All of these microphones have been tested and work well.

Shure 444 D Dual Impedance Desk Microphone
The 444 D has voice shaping built in to it, providing greater articulation at communications frequencies. Of course it has a PTT switch on the base, that can be used as a momentary switch, or can be locked in position. Also under the base are switches for High or Low Z.
This mic is the black color, and is in very nice shape, with paper work for $75.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Indian on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks good also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome, but it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. With 4 pin connector. $25

With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-8 touchtone microphone
The HM-8 has a 12 digit touch tone (DTMF) pad on the front
of it, along with an on-off switch for the tones. Of course
it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451,
471A, plus other rigs.
This particular microphone has an 8 pin round connector, works
fine, looks like new, is in its original box, and includes
paper work for $50.

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a
switch to turn the pad on and off. I presently has a 4 pin
plug on it, and can be used on most any rig. It works fine,
and looks great. $35

KDK TM-2 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with up
and down switches. It presently has a 6 pin connector, as
used on the KDK FM-2030, FM-2033, and other KDKs using the
6 pin plug. Of course the plug could be changed, and it
could be used on any brand rig.
This one works fine and looks very close to new. $40

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it
stored in the mic, and "speed dial" with this mic. 12
digit touch tone pad on the front, with the microphone
part above the pad. This one presently has a 4 pin plug
on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $ 20

Prices do not include shipping from Florida.

Thanks.

1260. Antennas and related items FS

Yahoo group: hamstuff
Date: 2010-01-23 13:11:14 UTC
From: Ken Simpson, W8EK
Topic: 1253 Message: 1260

Antennas and antenna related items for sale:

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Heath HD-1234 Coaxial antenna switch:
This coax switch has SO-239 connectors arranged so the coax comes out like the spokes of a wheel. It will switch up to 4 antennas, and also ground all of the antennas. This particular switch works fine and looks fine also. With paper work for $35.

CalComm #9856 SWR Meter
The included paper work says this meter is good for 3 to 150 MHz, so one can use it on 2 meters, and on 6 meters as well as on the HF bands. It can also be used as a field strength meter.
It has an SO-239 connector on each end, and is made to be mounted in a vertical position, with the meter at the top, and the adjustment knob at the bottom.
This meter includes the paper work (and even the warranty info), and the original box, although the box has seen better days. The meter itself works fine, and is in extremely nice condition. The back of it has holes for mounting it to a wall. A former owner removed some of the paint from around these mounting holes, so that it would get a better electrical ground. $20

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NMO-Q Quarter Wave Antenna, fits any NMO mount
For two meters. $10
For 450 MHz. $6

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna
that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added
some felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these
for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass
Filter. This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 Watts
average below 30 MHz, and about 200 W up to 52 MHz. It works
fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Drake TV-42-LP Low pass filter
Rated for 100 W thru 30 MHz.
Similar characteristics as the TV-3300, but lower power rating.
It works fine and looks like new. $15

AEA "Hot Rod" Gain antenna for 2 meters:

This antenna has a BNC connector on it, and offers gain over
other HT antennas. It is telescoping, and about 3 feet long.

This is a half wave antenna with matching coil, so it does not
depend upon the ground plane (or lack thereof) on your HT.

It is rated to have 3 db gain over a quarter wave antenna.
However, the rubber duck used on most HTs is no where close
to being as efficient as a quarter wave antenna. Typically they
are 6 to 10 db lower. The result is that this antenna should
give you an easy 10 db gain over most HT antennas.

This one works fine, and looks good as well. $18

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

1262. Orlando FL Hamcation Info

Yahoo group: hamstuff
Date: 2010-01-31 18:20:50 UTC
From: Ken Simpson, W8EK
Topic: 1262 Message: 1262

Orlando FL Hamcation Information:

The Orlando Hamcation is less than two weeks away. It will be
held from February 12 thru February 14, but much of the activity
starts on Thursday, February 11, when most of the tailgaters
set up. If you have not made your plans to attend, you need
to do so now. Florida is the place to be in February!

Info can be found at
http://hamcation.com/default.html
There is a lot of information at this web site, so be certain
to check all of the special areas.

At the present time, there are a few tables still available in
the swap building. All of the wall spaces and end caps have been
taken. If you want more than one table together, get your
reservation in NOW. Having a table inside the building, instead
of outside in the tailgate area, protects you (and your equipment)
from the weather, and only costs $10 more for the entire weekend.
Please e-mail hamcation@... to make reservations or get
more information.

Everyone knows that there are many other activities in the central
Florida area, so be certain to bring the XYL. Hamcation will also
have YL activities, and of course many are now hams, so will enjoy
Hamcation as well. The bottom line is "Bring the entire family."

Advance registrations are running considerably ahead of past years,
so this promises to be another large (10,000 plus hams) hamfest.
To put it another way, don't stay home because you think attendance
might be down due to the economy. It does not look that way.

See you there!

Thanks.

73,

Ken, W8EK

From: Ken Simpson, W8EK
Topic: 1269 Message: 1269

CW Paddle and Cables, Microphones, Speaker, Low Pass TVI Filters, Coaxial Antenna Relay, Power Supplies, and much more For sale:

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle

The Brass Racer Paddles are unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable by the use of magnets. It is a convenient, space saving portable keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base. Designed for use with an external keyer or a keyer built into the radio. It has a long shielded cord with a 1/4 inch stereo plug. It works fine and looks good. $100

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks good also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty

coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added some felt to the bottom, so that it protects better. It is in its original box, with paper work. Bencher currently sells these for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in extremely good condition. No scratches or imperfections. Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored scale about 6 inches long. It weighs about 5 1/2 pounds!
It has terminals for scales of 150, 1500, 15000, and 150000 millivolts.
Also included is the calibration information (from 1944) indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case, that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs (2 meter), plus most accessories for this series HT $20

Service manuals for Kenwood TH-41, 440 MHz HT, plus most accessories $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware.
$15

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners,

etc. $15

Prices do not include shipping from Florida.

Thanks.

HT accessories and related items for sale::

Protective cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. $15

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

Regular BNC, about 6.5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.

It is in good shape, and works fine. $3

Accessories for the Azden PCS-300 HT:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs (2 meter), plus most
accessories for this series HT $20

Service manuals for Kenwood TH-41, 440 MHz HT, plus most
accessories $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Communications Speaker
This 4 inch square speaker is optimized for communications

frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22 mic jack. It is much smaller than most of the mic connectors. I thought these were completely gone, but one appeared from a silent key. This one has been used, but should still be usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

AEA Power Supply
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both
transmit and receive. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the 144 MHz
segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have
cross references for the various rigs, so I will know what
you need if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

Many Ham Publications For Sale:

Vintage ARRL Licensing material:

All books are in very good, or better, condition.

ARRL Tune in the World with Amateur Radio
1976, First Edition $3

ARRL Now You're Talking
1993, 2nd edition $10

ARRL Tech Q & A, 1997, First Edition $8

ARRL Technician Class Computerized Exam Review
Complete with Disk and Book, still sealed in package, $10

ARRL License Manuals - $3 each
1977, 76th edition, All classes
1979, 77th edition, All classes
1984, 79th edition, All classes
1984, 80th edition, All classes

Technician Class
1989, First Edition
1993, Second Edition

General Class
1989, First Edition
1997, Second Edition

Advanced Class
1985, First Edition
1990, Third Edition
1996, Fourth Edition

Extra Class, 1988, Third edition

Tab Books: "Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new $15

ARRL "Radio Amateurs Operating Manual", 2nd edition, $8

RSGB "Amateur Radio Operating Manual", 2nd edition, $8

ARRL "Operating an Amateur Radio Station"
1976 - 57th edition $3
1978 - 58th edition $3

1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, but appears to be about 1990-1992 $3

ARRL Amateur Radio Field Resources Directory
First edition, $7

FCC Rule Books and other ham publications:

ARRL "FCC Rulebook"
Seventh edition, $3
Eighth Edition, $4
As above, but "Newly Revised to include Codeless
.....Technician" - Like New, $6
13th edition $10

W5YI
"Ham Operator Education Package" $4
"Rules and Regulations - Part 97 Amateur Radio Service"
Fourth Edition $3
17th Revised Edition $4

ARRL Public Service Communications
Ninth edition, $3
no edition number listed, $3

RSGB "Amateur Radio Operating Manual"
2nd edition, $8

ARRL How to Become a Radio Amateur, 1970, 26th edition,
This book is in extremely nice, close to new condition,
with many vintage ads in the back. It has a lot of good
information, and is collectible. $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

Bash Book
This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing the
General Class questions and answers. Nice condition. $8

ARRL Handbooks:

The first one is in the smaller format (6 1/2 by 9 1/2 inch size).
It includes tube charts and ads for vintage equipment, which are
not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
58th edition - Nice shape $13

ARRL Learning to Work with Integrated Circuits, First edition $10

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Hardback Book Published by Tab
Like New, 208 pages, $12

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Radio Frequency Interference, First Edition, $10

ARRL Operating an Amateur Radio Station
57th edition, 58th edition, 61st edition, 62nd edition, $3 each
63rd edition $4

ARRL Public Service Communications
Ninth edition, $3
no edition number listed, $3

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

ARRL How to Become a Radio Amateur, 1970, 26th edition,
This book is in extremely nice, close to new condition,
with many vintage ads in the back. It has a lot of good
information, and is collectible. $15

The ARRL RFI Book
Practical Cures for Radio Frequency Interference
First Edition, Large 8 1/2 X 11, inch thick, 320 page book, $12

Digital, Satellite and related Books:

Your Packet Companion by Steve Ford, WB8IMY
ARRL, 1995, First Edition, $5

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

Shortwave Listening and Related Books:
-
WRTH - World Radio TV Handbook, 2004

Directory of Global Broadcasting, $8

ARRL How to Become a Radio Amateur,
1970, 26th edition
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

W5YI Books:
"Ham Operator Education Package" 1992, $4
W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993, Fourth Edition, $3
2002, 17th Revised Edition, $4

Bash Book:
This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing all of
the General Class questions and answers. Nice condition. $8

Other Licensing material:

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

ARRL Radio Amateurs Operating Manual
1985, 2nd edition, $8

Electronics Text Books:

The following books are often used as text books at the two
year community and technical college level.

Experiments in Electrical Circuit Analysis, Schuler
About 200 pages, including programs. $50

Study Guide for Electronics Fundamentals, McIntyre
Paper back with about 200 pages of study material
w/answers. $15

Understanding Electricity and Electronics Student Lab Guide
by Science Electronics, 135 page paper back $12

Computers by Long and Long
Large book with about 750 pages. Answers to problems
included. Like new. $20

A Guide to Managing and Maintaining Your PC by Andrews
Sometimes used for A+ computer certification. About 750
pages, plus CD. Like new. $30

Tab Publishing and Sams Vintage Licensing material:

Tab Books: "Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ - 1979, First Edition
Hardback, Like new $15

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975, 2nd edition $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975, 2nd edition $3

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition, 1979 $3

W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993, Fourth Edition $3
2002, 17th Revised Edition $4

Ameco Ham Publications:

These are all Ameco Publications that are in
extremely nice condition.

Ameco "Novice License Radio Amateur FCC Test Manual"
1984, like new $4

Ameco "Amateur Radio Novice Class Theory Course"
Far more in depth than the test manual.
First Edition, 1978 $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
1992 $3

Ameco "General Class Radio Amateur FCC Test Manual"
1984, Like new $4
As above, but includes 1988 questions and answers $4

Ameco "Advanced Class Radio Amateur License Guide"
First Edition, 1981, like new $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
Copyright 1987, with added 1991 material
First Edition, Like New $6

Texas Instruments Data Books:

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with
very little use.

Analog Applications Journal, $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide, June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD, January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference, August 1999 $3

Logic Selection Guide, August 1998 $4

BiCMOS Bus Logic Interface, 1988 $2

Prices do not include shipping from Flroida.

Thanks.

Hello! This is my short video gift for You
http://afx.cc/present

1279. 2 m multimode, power supplies, mics, and other ham items FS

Yahoo group: hamstuff
Date: 2010-03-27 23:16:43 UTC
From: Ken Simpson, W8EK
Topic: 1279 Message: 1279

Many Ham Items For Sale
Multimode 2 meter transceiver, Power Supplies, SWR Bridge,
Microphones (Hand Mics, DTMF Touch Tone Mics, Speaker Mics),
Communication Speaker, CW Paddles, Low Pass TVI Filters,

Kenwood TR-9130 Multimode 2 meter transceiver:

The Kenwood TR-9130 2 meter multimode transceiver provides 2
meter operation in FM, LSB, USB and CW modes. Power output may
be selected at 5 watts (FM/CW) or 25 watts (FM/SSB/CW). It
includes an RF gain, RIT, analog S/RF meter, noise blanker,
dual VFOs, all-mode squelch and memories. Both memory scan
and band scan are supported. It requires 13 VDC at about 5.5
amps.

This particular unit works fine and looks extremely nice. It
includes the mobile mounting bracket with hardware, DC cord,
chrome bail, and touch tone DTMF hand mic, all in the original
box. It even has the multi-color, multi-page sales brochure
with it, and a bag of hardware that came with it originally.

With paper work for $230.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Vanco SWR-1 SWR Bridge and Field Strength Meter
Covers from 3.5 thru 150 MHz with 5% accuracy, according to the
specs on the box, and is 6 inches by 2 inches by 2 7/8 inches
in size. If you need an SWR bridge that will cover both the
HF bands, plus 6 meters and 2 meters, this is it.
This particular meter works fine, and is in its original box,
complete with original instructions, and wrapped in its bubble
pack. $25

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the
Johnson logo with the Viking on it. It has a PTT switch and
coiled cord, and produces a nice pattern on the scope. It
looks very nice also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might
have come from a HyGain rig. It has a PTT switch and black
coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444
Desk Mic, but this one is a hand mic. It is a controlled
magnetic mic, with frequency response tailored for voice
communications. It has a rugged case, and a heavy duty
coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come
from a Polycom rig. The mic is a good solid metal case with
chrome plating all around, with a black PTT switch and black
coiled cord. There are some pits on the chrome; it works
fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.
The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks fine. $12

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle

The Brass Racer Paddles are unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable by the use of magnets. It is a convenient, space saving portable keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base. Designed for use with an external keyer or a keyer built into the radio. It has a long shielded cord with a 1/4 inch stereo plug. It works fine and looks good. $100

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50

years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added some felt to the bottom, so that it protects better. It is in its original box, with paper work. Bencher currently sells these for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation

in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

1280. FS: Waxed Lacing Cord

Yahoo group: hamstuff
Date: 2010-03-29 12:39:38 UTC
From: Bry Carling
Topic: 1280 Message: 1280

FOR SALE: WAXED LACING CORD

New rolls of high quality lacing cord....

Lacing cord for wiring harnesses in homebrew equipment or
restoration of older radio and electronic equipment.
Brand new - comes as a 300 yard spool, so should last for a long time.
Available for $12.50 per spool plus shipping

ALSO:
Waxed Lacing cord Brand new - a larger 500 yard spool,
should last for a long time. One left!
Available for $15.00 plus shipping.

For fastest response, please use my main e-mail address:
af4k@...

Picture and details at:
http://www.af4k.com/miscpart.htm

1282. Digging Deeper in the Basement for Crystals

Yahoo group: hamstuff
Date: 2010-03-30 16:16:59 UTC
From: Bry Carling
Topic: 1282 Message: 1282

FOR SALE: More "Bargain Basement" Crystals...

For $2.00 to $6.00 each while they last... sold in groups
only. Many of these will multiply up nicely into 20m, 15m,
10m, 6m, 2m, etc.
Some are marked as 15m and 10m are actually 7 MHz crystals.
All are type hc6u metal can crystals with 1/2 inch pin spacing (thin pins)
unless otherwise stated.Shipping additional.

Group 11 - 1845.76 kHz, 1905 kHz and QTY 2 X 1942 MHz
- all 4 for $16.00

Group 12 - QTY 2 X 3727 kHz, 7037 kHz, 7052 kHz, 7070.37 kHz
- All 5 for $29.00

Group 13 - 7022, 7037, 7070.37, 7079, 7081, 7095 kHz
- All 6 for $24.00

Group 14 - QTY 2 X 7095, 7124, 7129, 7138 kHz
- all 5 for $15.00

Group 15 - 7000, 7100, 7159, 7170.37, 7174 kHz
- All 5 for $15.00

Group 16 - 7174, 7185, 7200, 7212, 7242, 7290 kHz
- All 6 for $27.00

Group 17 - QTY 2 X 7218, 7228, 7246, 7247, 7295 kHz
- All 6 for $27.00

Group 18 - 7034 kHz, QTY 2 X 7051 kHz, 7084 kHz, QTY 2 X 7101 kHz
MARKED as: 21.1035, QTY 2 X 21.1535, 21.2535, QTY 2 X 21.3035 MHz
- All 6 for $24.00

Group 19 - 7034, 7051, 7068, QTY 2 X 7084, QTY 2 X 7101 kHz
MARKED as: 21.1035, 21.1535, 21.20350, QTY 2 X 21.2535, QTY 2 X
21.3035 MHz
- All 7 for $21.00

Group 20 - QTY 2 X 7111, 7171, 7184, 7196, 7216, 7253, 7361 kHz
MARKED as: QTY 2 X 28.444, 28.685, 28.735, 28.785, 28.866, 29.011,
29.444 MHz
- All 8 for $26.00

Group 21 - QTY 2 New FT243 'PR' Crystals on 28.616 and 28.670 MHz
- these two for $8.00 total.

Group 22 - QTY 40 (forty) FT241 crystals - note these are
the LF crystals for the military surplus channelized radios.
- Available for $20.00 for all 40.

Please e-mail me off the list to arrange purchase.

Updated listing of availability of these groups will be posted at:

http://www.af4k.com/basementcrystals.htm

1283. Antennas and related items FS

Yahoo group: hamstuff
Date: 2010-04-02 14:57:27 UTC
From: Ken Simpson, W8EK
Topic: 1253 Message: 1283

Antennas and related items for sale:

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler MOS Monitor Antenna:
The Hustler MOS monitor antenna is for use on indoor scanners.
It features a suction cup to hold it to the top of the table.
A Motorola type connector can be moved up and down the antenna
so that it is just the right height to plug directly in to
your scanner.
Basically, this antenna will attach to the table behind your
desktop scanner, out of the way, but will provide a significant
amount of gain over the internal antenna.
This particular antenna works fine, and looks very close to new.
$20

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a really heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus much more, and has at least 80 db signal
attenuation at TV channel 2.
It is in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks very close to new. It has felt
on the bottom, so that it protects better. It is in its original
box, with paper work.
Bencher currently sells these for about $90. This one is only
$65

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC, Original antenna from Kenwood TH-215
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

No panties subway ride - HAVE YOU SEEN THIS???!
http://afx.cc/no-panties

1285. REDUCED MORE: Ham Crystals

Yahoo group: hamstuff
Date: 2010-04-08 00:21:02 UTC
From: Bry Carling
Topic: 1285 Message: 1285

Reduced even more - some great groups of
Amateur Band Crystals...

80m CW and AM, 40m CW and AM etc. etc. etc.

For $2.00 and $3.00 each while they last... sold in groups
only.
Many of these will multiply up nicely into 20m, 15m,
10m, 6m, 2m, etc.
A few are marked as 15m and 10m but are actually 7 MHz crystals.
All are type hc6u metal can crystals with 1/2 inch pin spacing
(thin pins) unless otherwise stated.

Group 11 - 1845.76 kHz, 1905 kHz and QTY 2 X 1942 MHz
- SOLD

Group 12 - QTY 2 X 3727 kHz, 7037 kHz, 7052 kHz, 7070.37 kHz
- All 5 for $10.00

Group 13 - 7022, 7037, 7070.37, 7079, 7081, 7095 kHz
- All 6 for $18.00

Group 14 - QTY 2 X 7095, 7124, 7129, 7138 kHz
- all 5 for $10.00

Group 15 - 7000, 7100, 7159, 7170.37, 7174 kHz
- All 5 for $10.00

Group 16 - 7174, 7185, 7200, 7212, 7242, 7290 kHz
- All 6 for $15.00

Group 17 - QTY 2 X 7218, 7228, 7246, 7247, 7295 kHz
- All 6 for $12.00

Group 18 - 7034 kHz, QTY 2 X 7051 kHz, 7084 kHz, QTY 2 X 7101 kHz
MARKED as: 21.1035, QTY 2 X 21.1535, 21.2535, QTY 2 X 21.3035 MHz
- All 6 for $18.00

Group 19 - 7034, 7051, 7068, QTY 2 X 7084, QTY 2 X 7101 kHz
MARKED as: 21.1035, 21.1535, 21.20350, QTY 2 X 21.2535, QTY 2 X
21.3035 MHz
- All 7 for $14.00

Group 20 - QTY 2 X 7111, 7171, 7184, 7196, 7216, 7253, 7361 kHz
MARKED as: QTY 2 X 28.444, 28.685, 28.735, 28.785, 28.866, 29.011,
29.444 MHz
- All 8 for $16.00

Group 21 - QTY 2 New FT243 'PR' Crystals on 28.616 and 28.670 MHz
- these two for $6.00 total.

Please e-mail me off the list to arrange purchase.

Updated listing of availability of these groups will be posted at:

1287. FS - A Few ARRL Books

Yahoo group: hamstuff
Date: 2010-04-09 10:07:09 UTC
From: Bry Carling
Topic: 1287 Message: 1287

For sale:

Three amateur radio books:

1) - Understanding Amateur Radio - ARRL, 3rd Edition 1977,
Excellent condition.

2) - ARRL, Hints and Kinks for the Radio Amateur, 13th Edition, 1992
Excellent condition.

3) - Tune In The World With Ham Radio, ARRL, 1976

I will sell all of three these for $10.00 total.

Please mail me off the list to arrange urchase.

All the best - Bry Carling, AF4K

1288. FS or FT: Three HF Mobile whips

Yahoo group: hamstuff
Date: 2010-04-09 10:57:57 UTC
From: Bry Carling
Topic: 1288 Message: 1288

FOR SALE OR TRADE - I have three HF amateur band mobile whips
that are for sale or trade. All are in excellent condition.

PRO-AM

PHF-40 = 40m whip antenna
PHF-15 = 15m whip antenna
PHF-17? The label fell of the last one I think it is a 17m whip antenna.
Or it may possibly be for 20m.

All of these have 3/8 X 24 threads for mounting on your
standard antenna mount.

I would like to sell these or trade for other amateur radio
parts or equipment.

73 - Brian Carling, AF4K

1289. Power Supplies, Microphones, Speaker, Filters, and more FS

Yahoo group: hamstuff
Date: 2010-04-10 14:00:42 UTC
From: Ken Simpson, W8EK
Topic: 1289 Message: 1289

Many Ham Items For Sale
Power Supplies, Microphones (Hand Mics, DTMF Touch Tone Mics, Speaker Mics), Communication Speaker, Low Pass TVI Filters, and more

10 amp Motorola NPN1007A Power Supply
This supply looks like an Astron! Same color paint, same styling, etc. In fact I thought it was an Astron until I read the Motorola name tag.
This one works 100%, and looks very close to new. I can not find a scratch on it. $40

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc. $15

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks extremely nice also. No scratches, and it even shines! It presently has a 1/4 inch stereo plug on it, which of course can be changed. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

Mobile Bracket for Icom IC-27:
This mobile bracket fits the Icom IC-27, 37, 47, and that series of Icom rigs. This mount goes completely around

the rig, so it would work with most any other rig that
is about 5 1/2 inches wide and 1 1/2 inches high.
This one is in very nice, close to new condition. $20

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

CW Items:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added
some felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these
for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV Vertical to give 80/75 meter coverage (basically make it into a 5BTV) $38

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

1291. Audio Filter, SWR Bridge, Keyer,and many other items FS

Yahoo group: hamstuff
Date: 2010-04-24 20:44:58 UTC
From: Ken Simpson, W8EK
Topic: 1291 Message: 1291

Many Ham Items For Sale
Audio Filter, SWR Bridge, Keyer, Power Supplies, Microphones
(Hand Mics, DTMF Touch Tone Mics, Speaker Mics),
Communications Speaker, Low Pass TVI Filters, etc.

Autek QF-1 A, Active Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit looks very, very nice, and works 100%.
With paper work for $55.

Dual Meter SWR Bridge

This meter is a Siltronics / Swan SWR-2. Back in the 1970's and
80's, this meter was relabeled by many different manufacturers
with their own label, but is basically the same meter that was
made in Japan. It has two separate meters -- one for forward
power and one for reading the SWR. It works from 160 thru 2
meters, so is useful on most any frequency you would want.
The SWR-2 has SO-239 connectors on each end. It differs
from the SWR-1 that had the connectors on the back.

This particular meter works fine. Cosmetically the forward
power meter lens has a crack in it. The SWR meter is fine.
Since it is only necessary to set the forward meter to full
scale, this really does not detract from its usefulness.

With paper work for $18.

CW Items:

MFJ 422 C electronic keyer
This keyer uses the Curtis chip, and includes sidetone, has
adjustments for volume, tone frequency, and weighting, as well
as speed. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external 5 to
9 volt supply. It is made to go on the back of a Bencher
Paddle. It works 100%, and looks great also. With paper
work for $45.

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Power Supplies:

10 amp Motorola NPN1007A Power Supply
This supply looks like an Astron! Same color paint, same
styling, etc. In fact I thought it was an Astron until I
read the Motorola name tag.
This one works 100%, and looks very close to new. I can not
find a scratch on it. $40

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks very nice also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal

low impedance microphone. With 4 pin plug. Like new. $38

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.
The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks fine. $12

Phone Patch / Digital Interface:

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in great shape. Paper work included for $25.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1253 Message: 1293

Antennas and related items for sale:

Dual Meter SWR Bridge:

This meter is a Siltronics / Swan SWR-2. Back in the 1970's and 80's, this meter was relabeled by many different manufacturers with their own label, but is basically the same meter that was made in Japan. It has two separate meters -- one for forward power and one for reading the SWR. It works from 160 thru 2 meters, so is useful on most any frequency you would want. The SWR-2 has SO-239 connectors on each end. It differs from the SWR-1 that had the connectors on the back.

This particular meter works fine. Cosmetically the forward power meter lens has a crack in it. The SWR meter is fine. Since it is only necessary to set the forward meter to full scale, this really does not detract from its usefulness.

With paper work for $18.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to never have been used. It even has its rubber washer with it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler MOS Monitor Antenna:
The Hustler MOS monitor antenna is for use on indoor scanners.
It features a suction cup to hold it to the top of the table.
A Motorola type connector can be moved up and down the antenna
so that it is just the right height to plug directly in to
your scanner.
Basically, this antenna will attach to the table behind your
desktop scanner, out of the way, but will provide a significant
amount of gain over the internal antenna.
This particular antenna works fine, and looks very close to new.
$20

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC, Original antenna from Kenwood TH-215
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

1294. FS: 455 kc. and 500 kc. crystals

Yahoo group: hamstuff
Date: 2010-05-01 19:41:28 UTC
From: Bry Carling
Topic: 1294 Message: 1294

FOR SALE:
455 kc. and 500 kc. crystals

455 kHz crystals are in hc6u holders, brand new, for $19.00 each
several available.

I have ONE 500 kHz crystal available i na CR-2/U holder, which
is identical to an FT-241 crystal. It has the same pins and spacing
as a standard FT243 crystal and a slightly wider body.
QTY 1 available for $19.00

Shipping additional.

1295. REDUCED - Ham Crystals $2.00 and up

Yahoo group: hamstuff
Date: 2010-05-07 12:06:11 UTC
From: Bry Carling
Topic: 1295 Message: 1295

Reduced even more - some great groups of
Amateur Band hc6u and FT243 Crystals...

80m CW and AM, 40m CW and AM etc. etc. etc.
For $2.00 and $3.00 each while they last... sold in groups
only.

Group 14 hc6u - QTY 2 X 7095, 7124, 7129, 7138 kHz
- all 5 for $10.00

Group 15 hc6u - 7000, 7100, 7159, 7170.37, 7174 kHz
- All 5 for $10.00

Group 16 hc6u - 7174, 7185, 7200, 7212, 7242, 7290 kHz
- All 6 for $15.00

Group 17 hc6u - QTY 2 X 7218, 7228, 7246, 7247, 7295 kHz
- All 6 for $12.00

Group 18 hc6u - 7034 kHz, QTY 2 X 7051 kHz, 7084 kHz, QTY 2 X 7101
kHz
MARKED as: 21.1035, QTY 2 X 21.1535, 21.2535, QTY 2 X 21.3035 MHz
- All 6 for $18.00

Group 20 hc6u - QTY 2 X 7111, 7171, 7184, 7196, 7216, 7253, 7361
kHz
MARKED as: QTY 2 X 28.444, 28.685, 28.735, 28.785, 28.866, 29.011,
29.444 MHz
- All 8 for $16.00

Group 21 hc6u - QTY 2 New FT243 'PR' Crystals on 28.616 and 28.670
MHz
- these two for $6.00 total.

Group 25 - Two FT243 crystals on 20m fundamental freqs of
14.042 MHz and 14.060 MHz - available for $24.00 plus shipping.

Please e-mail me off the list to arrange purchase.

Updated listing of availability of these groups will be posted at:

1307. Drake 4-Line 30m Crystals

Yahoo group: hamstuff
Date: 2010-05-26 00:47:06 UTC
From: Bry Carling
Topic: 1307 Message: 1307

FOR SALE: Drake 4-Line 30m Crystals

This is the PROPER recommended crystal as described for
Drake equipment to be used on the 10 MHz band.
Great for your Drake T4X and R4B etc.

If you use 21.100 MHz crystals which would be the "normal" ones
to use, there is a severe reduction in sensitivity.
For best band coverage you need a crystal on 20.800 MHz.

I have had just a limited number of these made up for Drake owners.

They are currently available for $35.00 each and when they are gone,
that's it for the run.

Get the best performance from your Drake 4-Line equipment
on 30 meters.

Contact me off the list if you would like some of these.

1308. Kenwood MC-50 Microphone

Yahoo group: hamstuff
Date: 2010-05-26 12:54:18 UTC
From: Bry Carling
Topic: 1308 Message: 1308

FOR SALE: The Kenwood MC-50 desk mic has PTT and LOCK buttons. It
was originally designed for
use with the TS-120S, TS-520S, TS-530S, TS-820S and TS-830S. It can
easily be adapted to work with
other transceivers. The MC-50 microphone is no longer in production.

The connection at the back of the mike can be removed and rotated 180
degrees to select
either high or low impedance.
- Selectable impedance: 600 ohms or 50 kilohms.
- Sensitivity is:
- -56 dB +/- 3 dB when used at 50 kilohms. And -76 dB +/- 3 dB when
used at 600 ohms.

The microphone is in excellent condition. No scratches, marks, rust, scuffs
etc.
Hard to tell from new, and comes with the stand and cables of course. It
also comes
with the instruction sheet.

As of right now I have two of these available, and you will not find any better
ones.
One comes with the MFJ-48 which is a 4-pin to 8-pin adapter. This adapter
allows the MC-50
microphone to be used with later model Kenwood tranceivers such as the
TS-440s, TS-140s, etc.
The other one already has an 8-pin connector so can;t immediately be used
on the older radios.
Take your choice... first come, first served.

Available for $85.00 each plus shipping.

1317. Wattmeters, SWR Bridges, Antenna Tuners, and antenna related items FS

Yahoo group: hamstuff
Date: 2010-06-10 21:58:05 UTC
From: Ken Simpson, W8EK
Topic: 1317 Message: 1317

Wattmeters, SWR Bridges, Antenna Tuners, and antenna related items For Sale:

Dentron W-1 HF Wattmeter / SWR Bridge:

This wattmeter is designed for use on the HF bands (1.8 to 30 MHz), and has full scale readings of 2000 Watts and 200 Watts. It is also a calibrated SWR Bridge. It is in a nice black enclosure that will match most ham gear.

This one works fine, and looks very close to new. No scratches, dents, or dings.

With paper work for $55.

MFJ-906 Antenna Tuner/Wattmeter/SWR Bridge for 6 meters:

The MFJ-906 6 Meter antenna tuner for the Magic Band gives you low SWR with practically any coax-fed antenna.

With low SWR, your rig will be more efficient; you will get more power out of your 6 meter transceiver and into your antenna for more DX, it will run cooler and last longer.

A lighted Cross-Needle SWR/Wattmeter shows SWR, forward and reflected power simultaneously in 300/60 forward and 30/6 reflected Watt ranges and has an ON/OFF lamp switch. With a built-in bypass switch, you can bypass your tuner and connect your transceiver directly to your antenna.

The MFJ-906 handles 100 Watts FM and 200 Watts SSB PEP. The MFJ-906 measures 8" x 2?" x 3". The meter lamp uses 12 Vdc.

This one works fine and looks very close to new. MFJ sells them for about $100. With paper work for $65.

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks good, but has a small defect on the left side of the meter that does not effect operation.

Paper work included for $40.

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. All have SO-239 connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Siltronix SWR-2
This one is in its original box, and appears that it has never been used. With original paper work for $50

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

B & W 551 A "Transfer" or "Bypass" Coax Switch:

This switch is designed to switch an auxiliary piece of equipment in and out (For example, bypass a linear amplifier, transverter, preamp, etc.). It has four SO-239 connectors coming out the sides.

It is in good shape for $40 plus shipping from Florida.

B & W 377 Coaxial Antenna Relay:

Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box; probably the same as some of the B & W coax switches used. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC, at 15 ma. The instruction sheet says that it is a unique relay design permitting this large variation in voltage. It also says it is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

This unit is in extremely nice condition, looking close to new, other than dymo labels that have been added.
With the paper work for $50.

B & W VS-300 A Antenna Tuner:

Handles 300 watts, with a wattmeter for 300 W forward and 30 W reverse included. Antenna switch for 3 coax antennas, plus a balun for open wire line. Antenna switch also includes a "bypass" position.

This one is in good shape. It works fine and looks great also.

Paper work included for $70.

HF Antenna Balun:

HyGain BN-86 Balun

The case of the BN-86 is constructed so that one can use it to hang a dipole or inverted V, or a U-bolt can be added to attach it to the boom of an HF beam antenna. The specs say it is good for 3 to 30 MHz, and will handle 1500 watts.

This particular balun works fine, but does show some physical use.
It includes the paper work for $40.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. Both have SO-239 connectors.

B & W FL-10/1500 low pass filter
This 50 ohm filter cuts off just above 10 meters, and will handle 1500 Watts. This is the latest model B & W filter. It is in very nice condition; it looks very close to new.
With paper work $40.

B & W 425 low pass filter
It cuts off just above 10 meters, and will handle 1500+ Watts. Maximum attenuation is at 52 MHz, with at least 70 db across the band. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer model, and looks like it would take more power. It even has a serial number on it, and "Patent applied for". Paper work included. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna. Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen NLA-MM Mag Mount
Can be used with any NLA type antenna, including those above. Includes the mag mount itself, plus coax with PL-259 connector. $20

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to never have been used. It even has its rubber washer with it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150above, or any other antenna that requires a 5/16 inch stud. Very nice for $18.

Hustler MOS Monitor Antenna:
The Hustler MOS monitor antenna is for use on indoor scanners.
It features a suction cup to hold it to the top of the table.
A Motorola type connector can be moved up and down the antenna
so that it is just the right height to plug directly in to
your scanner.
Basically, this antenna will attach to the table behind your
desktop scanner, out of the way, but will provide a significant
amount of gain over the internal antenna.
This particular antenna works fine, and looks very close to new.
$20

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Prices do not include shipping from Florida.

Thanks.

1318. Misc Ham Accessories FS

Yahoo group: hamstuff
Date: 2010-06-13 13:32:29 UTC
From: Ken Simpson, W8EK
Topic: 1318 Message: 1318

Various Miscellaneous Accessory Items For Sale:

Autek QF-1 A, Active Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit looks very, very nice, and works 100%.
With paper work for $55.

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and
25 watt scales. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter, or
separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks good, but has a
small defect on the left side of the meter that does not
effect operation.

Paper work included for $40.

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna. They were made in Japan, and labeled with various
names, including Swan, Siltronix, and Quement. All have SO-239
connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says
Siltronix on it. The original instruction sheet has both
Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is in a black enclosure,
and is an 8 ohm speaker. It has a cord with a 1/8 inch
(3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Phone Patch / Digital Interface:

Heath HD-15 phone patch

This is the unit with the VU meter on the left and 3 knobs that
match the SB series to the middle and right. Low or high Z output
to the transmitter. It can also be used as an interface for PSK31,
and other digital modes.

It is in excellent condition. It has a couple of modifications that
are very professionally done. There is a modular jack added for the
phone line. Two RCA phono jacks have been added for speaker in and
out. In both cases, they are in parallel with the original terminal
strip, so either may be used. The actual meter movement has been
replaced with a slightly larger, and more professional looking meter.

Paper work included for $30.

As above, but without any modifications, with paper work. $25

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the

tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

1319. FS: 455 kHz Filter Partial Kit

Yahoo group: hamstuff
Date: 2010-06-19 21:37:16 UTC
From: Bry Carling
Topic: 1319 Message: 1319

For Sale: 455 kHz Filter Partial Kit

This is suitable for a 250 Hz bandwidth CW filter. Has 60 dB
rejection outside the pass band. Connect right after the last i.f. and
before the detector in almost any receiver design.
Two pole filter design using tubes - typically like a
6AK5 and 12AX7. Can also be adapted for use with a modern
transistor circuit.

Comes with all instructions, schemtic, complete article and
two 455 kHz hc6u crystals.

Two sockets available for an additional $5.00 with this kit.

I currently have eight of these kits left, and they are available for
$32.00 each plus shipping.

1320. Kenwood Items FS

Yahoo group: hamstuff
Date: 2010-06-22 17:58:56 UTC
From: Ken Simpson, W8EK
Topic: 1320 Message: 1320

An assortment of various Kenwood items For Sale:

Linear Amp Switching Cable for Kenwood Rigs:

This cable goes between a Kenwood transceiver and a linear amplifier to switch the amp from transmit to receive. One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers. Before using this cable, please check to be certain that the voltages and currents needed by your amplifier match the switching capabilities of your transceiver. There is a second coax cable with RCA phono plug for ALC control, if desired. $18

As above, but without the ALC cable. Most modern amps do not need the ALC connection, so this cable has only one coax for switching the relay. $12

Kenwood Paper Items:

Kenwood Log Book
Completely unused, new condition. It has standard log book pages, with a world map on the inside cover, and a DXCC list (as of 1983) in the back. Cover is a brownish color with the Kenwood Logo. $8

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as of 1985. Obviously, it is not completely up to date, but still is a very nice map. Like new. $5

Generic Hi Z Hand Microphone
This hand mic is black in color. It has a PTT switch and black coiled cord. It works fine and looks very close to new. Ideal for the Kenwood "Hybrid" rigs such as the TS-520, 530, 820, 830, etc. $25

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily

monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Accessories for Kenwood TH-215, TH-225, TH-415, and other HTs in that series:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood PB-2 Battery pack
8.4 V at 500 mahr. Holds charge fine. $25

Kenwood Wall Wort Charger for PB-2 above. $12

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Kenwood BH-1 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-1 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Original Operating Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original and are not copies.

BC-5 DC charger/adapter $4
HS-5 Headphones $4
LF-30A Low Pass Filter $5
MC-30 and MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, and PB-4 battery packs $3
PS-6 power supply $6
PS-30 power supply $5
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $4
YK-88SN Narrow SSB Filter $4

Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TH-21 HT for 2 meters $8
Operating manual for TH-225, 2 meter HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
..For 2 meters, 440 MHz, and 1200 MHz. $12
Operating manual for TR-2200, 2 meter "portable"
..This is very similar to the Drake TR-22. $15
Operating manual for TR-2400, 2 meter HT $12
Operating manual for TR-2500, 2 meter HT $14

These are original Kenwood manuals only.

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood.

$10
Please note: All other manuals are in English.

Service Manuals:

These are service manuals (not operating manuals) in extremely
good condition.

Service Manual for Kenwood TR-9130 multimode 2 meter transceiver
This manual is a very good copy. $10

Service manual for Kenwood TW-4000 dual bander, $20

Service manual for TR-2600, 2 meter HT $12

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Prices do not include shipping from Florida.

Thanks.

1321. Lightning Protection, Headset, DMM, Cables and much more FS

Yahoo group: hamstuff
Date: 2010-06-24 15:29:08 UTC
From: Ken Simpson, W8EK
Topic: 1321 Message: 1321

Lightning Protection, Communications Headset,
Microphones and Heil "Shock Mount", DMM, SWR
Bridges, Cables, and Crystals For Sale:

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower, or just as it enters your house.
This unit has two SO-239 connectors, and is rated to
take 750 Watts and operate from 50 to 300 MHz (VHF)
and from 380 to 550 MHz (UHF).

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded, although it appears that someone must have
measured the SWR, as it says "4.5 MHz to 54 MHz, 1.1 to
1.4" on the back.

These sell for about $75 new. Buy this one for $55.

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser above,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Communications Headset:

Telex A-610 Dual Headset

This is a pair of 600 ohm communications headphones.
Telex is commonly used in aviation circles, and is designed
for good voice communications from the ground to the plane.
Of course if they work good for the aircraft industry, they
should work well for hams. It also tells one something about
the ruggedness and reliability of these headphones.

They have a 1/4 inch mono plug.

This particular pair works fine, and looks extremely good.
No defects that I can find. $40

Heil SM-1 Microphone "Shock Mount"

The SM-1 "Shock Mount" is Heil Sound's 8-point flexible suspension support system that helps suppress low-frequency rumble on the microphone line by absorbing and damping vibrations picked up from the studio desk or console. It is a professional suspended shock mounting system, black in color. The SM-1 is designed for use with the slim-line Heil Sound microphones, such as the GoldLine GM series, HM-10-DUAL and the PR-20. Its standard 5/8" threads mount onto the PL-2T "Topless" and other mounts, for easy installation.

This shock mount works with the GM-5 and similar body sizes.

This particular unit works fine, and looks very close to new.
$50

Micronta 21-194 Digital Multimeter For Sale:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2

meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a small defect on the left side of the meter that does not effect operation.

Paper work included for $40.

Hand Microphones:

Icom HM-12 microphone:
The HM-12 has a round 8 pin connector on it, and includes up-down switches on the top and a lock switch on the back. It is used with most of the modern Icom rigs using a round 8 pin connector.
The mic works as it should, and the mic itself looks very, very good. The cord has seen some of the Florida sun and has some deterioration. $40

Generic Hi Z Hand Microphone
This hand mic is black in color. It has a PTT switch and black coiled cord. It works fine and looks very close to new. $25

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. Looks and works great. With 4 pin connector. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $38

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the
mic, and "speed dial". 12 digit touch tone pad on the front,
with the microphone part above the pad. With an 8 pin modular
plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

HT Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $20

Communications Speaker:

This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is in a black enclosure,
and is an 8 ohm speaker. It has a cord with a 1/8 inch
(3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear

amplifier to switch the amp from transmit to receive. One
end has a DIN connector, as is used with most Kenwood rigs.
The other end has an RCA phono plug, as used by most linear
amplifiers. Before using this cable, please check the
switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Crystals - FT-243, HC-6, etc.:

1000.00 KHz for crystal calibrator (octal plug)

FT-243 Crystals for 40, 20, 15, and 10 meter ham bands

Crystals can be used at fundamental, or multiplied for
20, 15, or 10 meters. E.g. the 7081 could be used at 7081,
14162, 21243, or 28324 KHz.

7081 (HC-6), 7094 (HC-6), 7174 (HC-6), 7175, 7186,
7189, 7198.5 (HC-6), 7200 (HC-6), 7200, 7207, 7225,
7236.2 (HC-6), 7248, 7261 (FT-243 & HC-6), 7283.33 (HC-6)
7325, 7375, 7395, 7400, 7404, 7410,

HC-6 Crystals
These may be used as heterodyning crystals in many
Collins, Drake, Heath, Yaesu, and other rigs.
Freq of crystal in MHz.
7.98, 9.5, 12.0, 12.545, 15.0, 16.0, 17.0, 24.7, 30.75,
32.5, 39.0, 41.9, 42.7, 44.5, 46.0, 46.7, 49.9, 51.1,

All crystals are $8 each, plus shipping from Florida.

I also have many 2 meter crystals in HC-25 holders.
Please e-mail your needs.

Prices do not include shipping from Florida.

Thanks.

1322. Lightning Protection, Headset, DMM, Cables and much more FS

Yahoo group: hamstuff
Date: 2010-06-24 15:27:13 UTC
From: Ken Simpson, W8EK
Topic: 1321 Message: 1322

Lightning Protection, Communications Headset,
Microphones and Heil "Shock Mount", DMM, SWR
Bridges, Cables, and Crystals For Sale:

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower, or just as it enters your house.
This unit has two SO-239 connectors, and is rated to
take 750 Watts and operate from 50 to 300 MHz (VHF)
and from 380 to 550 MHz (UHF).

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded, although it appears that someone must have
measured the SWR, as it says "4.5 MHz to 54 MHz, 1.1 to
1.4" on the back.

These sell for about $75 new. Buy this one for $55.

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser above,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Communications Headset:

Telex A-610 Dual Headset

This is a pair of 600 ohm communications headphones.
Telex is commonly used in aviation circles, and is designed
for good voice communications from the ground to the plane.
Of course if they work good for the aircraft industry, they
should work well for hams. It also tells one something about
the ruggedness and reliability of these headphones.

They have a 1/4 inch mono plug.

This particular pair works fine, and looks extremely good.
No defects that I can find. $40

Heil SM-1 Microphone "Shock Mount"

The SM-1 "Shock Mount" is Heil Sound's 8-point flexible suspension support system that helps suppress low-frequency rumble on the microphone line by absorbing and damping vibrations picked up from the studio desk or console. It is a professional suspended shock mounting system, black in color. The SM-1 is designed for use with the slim-line Heil Sound microphones, such as the GoldLine GM series, HM-10-DUAL and the PR-20. Its standard 5/8" threads mount onto the PL-2T "Topless" and other mounts, for easy installation.

This shock mount works with the GM-5 and similar body sizes.

This particular unit works fine, and looks very close to new.
$50

Micronta 21-194 Digital Multimeter For Sale:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2

meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a small defect on the left side of the meter that does not effect operation.

Paper work included for $40.

Hand Microphones:

Icom HM-12 microphone:
The HM-12 has a round 8 pin connector on it, and includes up-down switches on the top and a lock switch on the back. It is used with most of the modern Icom rigs using a round 8 pin connector.
The mic works as it should, and the mic itself looks very, very good. The cord has seen some of the Florida sun and has some deterioration. $40

Generic Hi Z Hand Microphone
This hand mic is black in color. It has a PTT switch and black coiled cord. It works fine and looks very close to new. $25

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. Looks and works great. With 4 pin connector. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $38

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the
mic, and "speed dial". 12 digit touch tone pad on the front,
with the microphone part above the pad. With an 8 pin modular
plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

HT Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $20

Communications Speaker:

This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is in a black enclosure,
and is an 8 ohm speaker. It has a cord with a 1/8 inch
(3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear

amplifier to switch the amp from transmit to receive. One
end has a DIN connector, as is used with most Kenwood rigs.
The other end has an RCA phono plug, as used by most linear
amplifiers. Before using this cable, please check the
switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Crystals - FT-243, HC-6, etc.:

1000.00 KHz for crystal calibrator (octal plug)

FT-243 Crystals for 40, 20, 15, and 10 meter ham bands

Crystals can be used at fundamental, or multiplied for
20, 15, or 10 meters. E.g. the 7081 could be used at 7081,
14162, 21243, or 28324 KHz.

7081 (HC-6), 7094 (HC-6), 7174 (HC-6), 7175, 7186,
7189, 7198.5 (HC-6), 7200 (HC-6), 7200, 7207, 7225,
7236.2 (HC-6), 7248, 7261 (FT-243 & HC-6), 7283.33 (HC-6)
7325, 7375, 7395, 7400, 7404, 7410,

HC-6 Crystals
These may be used as heterodyning crystals in many
Collins, Drake, Heath, Yaesu, and other rigs.
Freq of crystal in MHz.
7.98, 9.5, 12.0, 12.545, 15.0, 16.0, 17.0, 24.7, 30.75,
32.5, 39.0, 41.9, 42.7, 44.5, 46.0, 46.7, 49.9, 51.1,

All crystals are $8 each, plus shipping from Florida.

I also have many 2 meter crystals in HC-25 holders.
Please e-mail your needs.

Prices do not include shipping from Florida.

Thanks.

1325. FS: Two 40,000 uFD Capacitors

Yahoo group: hamstuff
Date: 2010-07-02 22:01:37 UTC
From: Bry Carling
Topic: 1325 Message: 1325

FOR SALE: Two Sangamo type DCMX computer-grade
electrolytic capacitors - Made in U.S.A.
Each is 40,000 uFD and rated at 25V DC.

These are ideal for power supplies and/or use with
high-powered car audio systems running on 13.8V DC power.

These are large, heavy duty capacitors with dimensions 6" X 3" diameter.

Will sell the pair for $15.00 plus $10.00 for USA shipping.

Bry Carling, AF4K

1326. Johnson Desk Mic, other mics, SWR Bridges FS

Yahoo group: hamstuff
Date: 2010-07-03 12:39:42 UTC
From: Ken Simpson, W8EK
Topic: 1326 Message: 1326

For Sale:

Johnson Desk Microphone
It looks like a Shure 444, except it says Johnson on the front instead of Shure, and has the Johnson logo on it. I am assuming that it is a Shure 444 that Johnson simply had their name and logo placed on it.
This one has a very nice pattern on the scope and looks extremely nice. $45

Heil SM-1 Microphone "Shock Mount":
The SM-1 "Shock Mount" is Heil Sound's 8-point flexible suspension support system that helps suppress low-frequency rumble on the microphone line by absorbing and damping vibrations picked up from the studio desk or console.
It is a professional suspended shock mounting system, black in color. The SM-1 is designed for use with the slim-line Heil Sound microphones, such as the GoldLine GM series, HM-10-DUAL and the PR-20. Its standard 5/8" threads mount onto the PL-2T "Topless" and other mounts, for easy installation.
This shock mount works with the GM-5 and similar body sizes.
This particular unit works fine, and looks very close to new.
$50

Heil Microphone Cable:
Heil CC-1 K microphone cable
This has an 8 pin round female connector wired for Kenwood on one end and a 4 pin XLR female on the other end. It also has the 1/4 inch socket that can be used for a foot switch, or other PTT switch. It is about 8 feet long.
It can be used to connect a Heil GM-5 microphone to most Kenwood rigs that take the round 8 pin connector, although it probably could be used with other units as well.
This one works fine and looks very close to new. In fact I doubt you could tell it from new. $25

Hand Microphones:

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,

with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and
25 watt scales. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter, or
separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a
small defect on the left side of the meter that does not
effect operation.

Paper work included for $40.

Prices do not include shipping from Florida.

Thanks.

1327. FS: More groups of ham band crystals - Most are $2 and $3 each

Yahoo group: hamstuff
Date: 2010-07-03 20:25:41 UTC
From: Bry Carling
Topic: 1327 Message: 1327

FOR SALE:
I have several more groups of ham band crystals now available.

Most of these are around $2.00 or $3.00 each. Great for experimenting
and day to day operations on 75 through 10m bands.

Some of them are hc6u crystals. Most are the standard FT-243 types.

Example: QTY 7 - FT243 crystals for $14.00

Have a look here:
http://www.af4k.com/basementcrystals.htm

Date: 2010-07-05 13:28:25 UTC
From: Bry Carling
Topic: 1328 Message: 1328

FOR SALE:

The following are type FT171B Crystals: (for BC610
or T-368 transmitters)
These are normally $19.00 for each crystal...

Group 171-A - 3510, 3520, 3550, 3615, 3905, 7290
kHz - All 6 for $24.00 total.

Group 171-B - 3510, 3615, 3835, 3905, 3905, 3945
kHz - All 6 for $24.00 total.

Group 171-C - 3615, 3905, 7285, 7290, 7295, 14286
kHz - All 6 for $24.00 total.

Group 171-D - 3615, 3905 kHz - Two for $8.00 total.

The following are type CR-1A Crystals:
Group 12-C - 6820 (QTY 4), 7610, 8007.7, 8297 kHz
- All 7 for $7.00 total.

DETAILS and latest listings at:
http://www.af4k.com/basementcrystals.htm

Topic: 1329 Message: 1329

REDUCED:

Two Sangamo type DCMX computer-grade electrolytic capacitors -
Made in U.S.A. Each is 40,000 uFD and rated at 25V DC.

These are ideal for power supplies and/or use with high-powered
car audio systems running on 13.8V DC power.
These are large, heavy duty capacitors with dimensions 6" X 3" diameter.
Will sell the pair for $15.00 plus $10.00 for USA shipping.

Cornell-Dubilier computer grade capacitor, 9100 uF at 35V DC.
With all mounting hardware. Dimensions: 3-3/4" X 1-3/4" diameter
Made in the USA - available for $2.00.

G.E. Dielectrol non-PCB, oil-filled capacitor 40 uF at 480V DC.
Easily good for 1000V DC.
Dimensions: 5" X 2-1/2" diameter.
Available for $5.00 plus shipping.

Will sell ALL four caps above for $16.00 plus $11.00 for USA shipping.

Topic: 1331 Message: 1331

The for what its worth department, I have an 820s and the audio chip went out. A TA7201P chip was out. Ordered one from Audio Lab of Georgia for $8.24, got it today,put it in and once again the ole girl talking. Some websites say this chip is no longer available and a long process to make a subsitituion. They are out there, no need to change a bunch of stuff when the 10 pin replacement is still available. Hope this help someone.

OK - nobody wants them but I hate to throw nice things like this away.

FREE:

Two Sangamo type DCMX computer-grade electrolytic capacitors -
Made in U.S.A. Each is 40,000 uFD and rated at 25V DC.

These are ideal for power supplies and/or use with high-powered
car audio systems running on 13.8V DC power.
These are large, heavy duty capacitors with dimensions 6" X 3" diameter.

Cornell-Dubilier computer grade capacitor, 9100 uF at 35V DC.
With all mounting hardware. Dimensions: 3-3/4" X 1-3/4" diameter
Made in the USA

G.E. Dielectrol non-PCB, oil-filled capacitor 40 uF at 480V DC.
Easily good for 1000V DC.
Dimensions: 5" X 2-1/2" diameter.

FREE for postage. Just pay $12.00 for USA shipping.
Next stop will be the dumpster if they are still here on Monday.

Bry, AF4K

1334. KF Rig, Dual Band HT, PS, Ant Tuner, Wattmeters, and much more FS

Yahoo group: hamstuff
Date: 2010-07-10 18:26:08 UTC
From: Ken Simpson, W8EK
Topic: 1334 Message: 1334

TenTec 585 Paragon, Power supplies, Automatic Antenna Tuner,
Dual Band HT, Wattmeter / SWR Bridges, Cables, Lightning
Protection, and other items For Sale:

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!).

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. There are a couple of very minor scratches on the heat
sink that certainly will not be noticeable in operation.

Large manual and power cord included for $650.

TenTec Model 280 power supply, 20 amps at 13 V DC

This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that
some have. It also has an ammeter on it.

This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.

With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,

but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Icom AH-3 Automatic Antenna Tuner:

The Icom AH-3 automatic tuner will tune continuously from 1.8
MHz through 30 MHz, i.e. from the low end of the 160 meter band
to top of the 10 meter band, including 60 meters and all WARC
bands. The AH-3 is a full HF tuner. Note that the newer Icom AH-4
tuner is not listed to tune below 3.5 MHz, while the the AH-3 is.
It requires at least 5 watts to automatically tune, and will handle
up to 120 watts. It requires 13 V DC to operate.

The AH-3 works with any Icom radio with standard 4 pin rear tuner
connector, such as the Icom 703, 703+, 706 series, 718, 746, 746
Pro, 756 series (including Pros), 7000, 7200, and many others. It
can also be used with most any other radio with a simple interface
(information provided).

This AH-3 is in excellent condition. Paper work is included for
$200.

Yaesu VX-1 Dual Band HT:

This is a dual-band HT which provides small size combined
with wide frequency coverage while weighing about 4 ounces.

It can produce up to 1 Watt output power in the 2 meter &
440 MHz bands. The VX-1 provides extraordinarily wide
frequency receive coverage of 500-1700 kHz plus 76-999 MHz,
which includes AM BC, FM BC, public safety, and audio from
most TV channels. The operating mode (AM, FM-Narrow, FM-Wide)
can be automatically preset.

It includes an FNB-52LI High-Capacity Lithium-Ion battery.
The memory system includes two main channel groups, plus
additional memories bringing the memory total to 291 channels!

To put it another way, the VX-1 will do more than most hams need!

This one includes the HT, LIon Battery, Charger, Rubber Duck
antenna, and an extensive manual. It works fine, and looks
very close to new. $125

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
It is white and says "Yaesu" on the front, with the Yaesu

logo. It has never been used. $6

Wattmeters and SWR Bridges:

HF Digital Peak and Average Reading Wattmeter

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer
case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and
25 watt scales. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter, or
separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a
small defect on the left side of the meter that does not
effect operation.

Paper work included for $40.

120 Volt AC Power cables:

These are power cables that plug in to the 120 V AC line.
They have the standard 3 prong plug on one end, and have the
"International" 3 slot socket on the other end, as is used
on most computers, plus many other pieces of electronic
equipment, such as ham gear and test equipment.

These all function fine, and look very good. Some have been
used, and some may not have been.

Buy one for $1, six for $5, or 14 for $10.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Prices do not include shipping from Florida.

Thanks.

1336. FS: Box of New Precision Power Resistors

Yahoo group: hamstuff
Date: 2010-07-16 10:11:03 UTC
From: Bry Carling
Topic: 1336 Message: 1336

FOR SALE: Quantity 37 precision power resistors. All new and unused,
with long radial leads. Gray in color. Great for homebrew and repair projects.

QTY 8: 5 watt power resistors - all rated 1% tolerance.
Consists of seven (7) at 100 kilohms and one at 2500 ohms.

QTY 8: 2 watt power resistors - all rated 1% tolerance.
Consists of
Quantity 7 at 500 kilohms,
Quantity 1 at 9.50 kilohms

QTY 18: 1 watt power resistors - all rated 1% tolerance.
Consists of -
Quantity 1 at 2.0 Megohms,
Quantity 1 at 1.0 Megohms,
Quantity 1 at 250 kilohms,
Quantity 2 at 200 kilohms,
Quantity 4 at 100 kilohms,
Quantity 2 at 51.0 kilohms,
Quantity 2 at 22.0 kilohms,
Quantity 1 at 8.0 kilohms,
Quantity 1 at 5000 ohms,
Quantity 1 at 4560 ohms,
Quantity 3 at 4500 ohms

QTY 3: 1/2 watt power resistors - all rated 1% tolerance.
radial leads.
Quantity at 800 kilohms
Quantity at 100 kilohms
Quantity at 2700 ohms

Will sell all the above for $15.00 plus shipping

1337. HF Rig, PSs, Vertical Antennas, Wattmeter FS

Yahoo group: hamstuff
Date: 2010-07-16 15:40:50 UTC
From: Ken Simpson, W8EK
Topic: 1337 Message: 1337

TenTec 585 Paragon HF Transceiver, Power Supplies, HF Digital Wattmeter, HF Vertical Antennas, and Lightning Protection For Sale:

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all of the "Updates" performed on it by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. There are a couple of very minor scratches on the heat sink that certainly will not be noticeable in operation.

Large manual and power cord included for $650.

TenTec Model 280 power supply, 20 amps at 13 V DC

This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.

This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.

With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel

basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

Two HF Vertical Antennas for pick up near Ocala Florida:

These two HF Vertical antennas are located near Ocala, Florida, near I-75. They are disassembled, on the ground, ready for pickup, and reassembly at your QTH. Paper work is included, as are all parts, to the best of my knowledge. I was careful with disassembly, so it should be easy to reassemble them. Due to their size, it is just not practical to ship them.

HyGain HyTower HF Vertical Antenna:

The HyGain HyTower HF vertical covers 80, 40, 20, 15, and 10 meters. The WARC bands (and 160 meters) can be added, but are not a part of this antenna at present. This is an extremely rugged antenna, consisting of about 30 feet of actual tower, with additional stubs for tuning. Total height is about 50 feet.

Automatic band selection is achieved through a unique stub decoupling system so that an electrical 1/4 wavelength (or odd multiple) exists on all bands. Unity gain on 20, 40, 80; 2 dB on 10/15 Meters.

This particular antenna is in extremely good condition. As far as I know, all hardware is included. The galvanizing on the tower sections is very good. The hardware is all stainless and still shines, with the exception of the galvanized bolts that Rohn uses on most all of their tower to hold the sections together. I do not find any rust.

Due to size, this is pick up only, near Ocala FL, close to I-75.

This antenna sells for about $1000 new. With paper work for $450.

Gap "Titan" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny. If I were putting it up myself, I would clean the connections with a Scotchbrite sponge, but it is in great condition. I will even furnish the sponge!

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below, but still protect against lightning. Two versions are available. One has an SO-239 connector on each end. The other has a PL-259 on one end and an SO-239 on the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning protection equipment. This coaxial antenna protector is designed to be inserted in the coaxial cable at the bottom of a tower.
This unit has two SO-239 connectors, and is rated to take 750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears that it might not have been used. It is not oxidized, or corroded.

These sell for about $75 new. Buy this one for $55.

Prices do not include shipping from Florida.

Thanks.

1339. FS: Conar Twins - collector quality

Yahoo group: hamstuff
Date: 2010-07-21 12:23:39 UTC
From: Bry Carling
Topic: 1339 Message: 1339

FOR SALE: CONAR Transmitter and Receiver

Extra sharp and collector quality...

Conar 400 Transmitter - 25 watts on 80m, 40m and 15m bands.
Usesa 6DQ6 sweep tube. Crystal controlled, runs on 120V AC.
These were both part of an NRI training course. Looks like new.
Would rate this transmitter a 10 out of 10. It has not been tested.

Conar 500 Receiver. Beautiful front panel. A few marks on the top
but not bad. Runs on 120V AC. Receives AM, SSB and CW. Covers
bands: 80m, 40m and 15m - full coverage. Built-in speaker, and
headphones
output. Controls for volume, variable BFO, antenna trimmer etc.
Front panel is excellent and overall would rate this receiver
9 out of 10. It has not been tested.

These come with copies of the manuals.
Excellent condition. Pictures will be posted soon at:
http://www.af4k.com/radios.htm

Will sell the pair for $250.00 plus shipping

1343. TenTec HF Rig, Ant Tuners, Wattmeters, Filter, Mic, etc.

Yahoo group: hamstuff
Date: 2010-08-06 14:01:51 UTC
From: Ken Simpson, W8EK
Topic: 1343 Message: 1343

TenTec and related Items For Sale:

HF Transceiver, Antenna Tuners, Interface, Tuning Pod, Wattmeters,
Power Supplies, Microphone, and more

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one also has the Giehl chip in it making it
similar to a Paragon II.

Large manual and power cord included for $650.

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.
TenTec
It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

MFJ 949 E Antenna Tuner

The MFJ-949E deluxe 300 watt Versa Tuner II gives you full coverage
from 1.8 to 30 MHz, with a peak and average reading cross-needle

SWR/power meter. It features a custom designed inductor switch, 1000 volt tuning capacitors, Teflon insulation washers and proper L/C ratio to ensure arc-free operation with up to 300 Watts. MFJ's Cross-Needle Meter shows you SWR, forward and reflected power simultaneously. It reads both peak and average power on 300 or 30 watt ranges. A dummy load is built in. It includes an antenna switch for the two coaxial cables and one random wire or balanced line, in addition to the dummy load. It needs 12 V DC to illuminate the meter.

This is the current model that MFJ is selling. This particular unit works fine, and looks close to new. With paper work for $125.

TenTec Model 258 RS-232 interface board w/258-IBM Software
This accessory will add a computer interface to TenTec HF transceivers. I know for sure it works with the 585 Paragon, and my memory says it also works with the Omni V, and I think the Omni VI, although I think certain interations of the Omni VI included it as standard. It consists of a plug in board, plus cabling to a DB-25 connector.
In addition to the hardware, I also have the software, for use on a standard PC.
It is in good shape and works fine.
$135 for both the hardware and software

TenTec 301 "Tuning Pod"
This unit can be used with an Omni V and Omni VI, and I think most of the TenTec rigs that use an optical encoder. It permits one to tune the rig from a semi-remote location. This one works fine and looks very close to new. With paper work for $125.

TenTec 288, 1800 Hz filter
1800 hz for wide CW, narrow SSB or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
It looks like new, with paperwork. $75

MFJ 815 B Cross Needle Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new. With paper work for $65.

MFJ 815 (not the B model) similar to above.
It works fine, and looks good. With paper work for $50.

TenTec Power Supplies:

TenTec 961 power supply with speaker
Produces 20+ amps at 13.8 Volts DC.
This supply matches the Corsair II, Paragon, and Omni V/VI series.
A nice speaker is included. This particular unit works 100% and
looks very good. Paper work is included for $150.

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass
transistors, instead of the one that some have. It also has an
ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and
"hold" buttons. It works great, and looks like new.
With paper work for $75.

Prices do not include shipping from Florida.

Thanks.

1346. Interfaces for computer/digital modes FS

Yahoo group: hamstuff
Date: 2010-08-14 13:01:33 UTC
From: Ken Simpson, W8EK
Topic: 1346 Message: 1346

Various Interfaces for computer control, digital modes,
etc. For Sale:

Kenwood IF-232c Interface / Converter

The IF-232c is the interface adapter for connection between
the RS-232C terminal of a personal computer and the interface
terminals of transceivers capable of computer control, such
as the TS-440S, TS-940S, the TS-811/711 series, and others.

The interface acts as a voltage converter between the RS-232C
port (-12 to + 12V) and the TTL levels of the transceiver
(0 to +5V), and as a noise-suppressor.

This one includes a wall wart power supply, DIN plug, and
paper work for $60.

Heath HD-15 phone patch / digital interface
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface for PSK31, and other digital modes.
It is in excellent condition. It has a couple of modifications
that are very professionally done. The actual meter movement
has been replaced with a slightly larger, and more professional
looking meter. Knobs are original. There is a modular jack
added for the phone line. Two RCA phono jacks have been added
for speaker in and out. In both cases, they are in parallel
with the original terminal strip, so either may be used.
It works fine and looks close to new. A terrific unit.
Paper work included for $30.

Heath HD-15 Phone Patch
As above, but with no modifications, in extremely good condition.
No scratches or imperfections. Paper work included for $25.

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Earthmate GPS by DeLorme, with software

The GPS unit plugs into a USB port on your computer. DeLorme Street Atlas Software is included, so plan your route, and also let the GPS tell you where you are, and give you voice directions, if desired. You can even ask it questions!

It will calculate your route and tell you exactly where and when to turn, plus figure statistics such as mileage.

The GPS hardware unit is powered from the USB port, so no additional power supply is needed.

This particular unit is in close to new condition, in its original box, with the GPS unit, and the software. I would think that it could be used with APRS. $65

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear amplifier to switch the amp from transmit to receive. One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers. Before using this cable, please check the switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

Books about Digital subjects:

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Hardback Book Published by Tab
Like New, 208 pages, $12

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

Your Packet Companion by Steve Ford, WB8IMY
ARRL, 1995, First Edition, $5

Computers by Long and Long
Large book with about 750 pages. Answers to problems included. Like new. $20

Prices do not include shipping from Florida.

Thanks.

1350. FS: Box of TUBE ERA pilot lamps and some bulbs

Yahoo group: hamstuff
Date: 2010-08-21 16:19:01 UTC
From: Bry Carling
Topic: 1350 Message: 1350

FOR SALE: TUBE ERA pilot lamps and some bulbs....

This is a box of about 35 or 40 various bayonet style tube era pilot lights as used in commercial radio transmitters, receivers, test equipment etc. typical lamp holders, some panel mount, some not.

Also a bunch of behind-the-panel type screw in and bayonet fitting lamps, and a few bulbs for them too. These are typical like #44, #51, grain-of-wheat bulbs etc. Red, blue, green and white jeweled lenses etc. includes some plastic standoffs and phenolic terminal strips etc.

Will sell the whole box for $12.00 plus $6.00 for USA shipping.

73 - Brian, AF4K

1351. 2 meter HT, many HT accessories, etc. FS

Yahoo group: hamstuff
Date: 2010-08-22 11:41:19 UTC
From: Ken Simpson, W8EK
Topic: 1351 Message: 1351

Two meter HT, HT Accessories, and VHF/UHF related equipment for sale,
such as Protective Cases, GPS for APRS, Speaker Microphones,
Batteries, Belt Clips, Wrist Straps, Rubber Ducks, Wattmeters,
Power Cables, DMM, and much more:

ADI-201, 2 meter HT:

The ADI-201 is a really great HT. It features up to 5 watts
power output (actually about 5 W, 2.5 W and 0.3 W in three
power ranges). It can be powered by many different voltages
from 5 V to 16 V DC, producing different power outputs. It
covers not only the 2 meter band, but also receives in the
public service bands, including the weather frequencies, so
it is ideal for such things as Skywarn. It has full tone
capabilities, handling subaudible CTCSS PL tone encode and
decode, along with some paging functions. DTMF tones are
also available. Of course it has 40 memories, scan features,
and all of the things one would expect in a modern 2 meter HT.

This particular HT has the 12 V high power battery with it.
It looks very, very good (I can not find a scratch on it),
and works 100%. It includes the HT, rubber duck antenna,
belt clip, wrist strap, charger, and paper work for $75.

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge
like new. $22

FNB-52 LI Lithium Battery for VX-1 HT
Fits VX-1 dual band HT. It works fine. Holds a good charge
and is in good health. $25

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

FBA-20 "Empty battery Pack" for VX-1
Takes a single AA cell, which can be alkaline, NiCad, NiMH,
etc. Like new. $18

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.

It is white and says "Yaesu" on the front, with the Yaesu logo. It has never been used. $6

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215 HT, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. $25

Earthmate GPS by DeLorme, with software

The GPS unit plugs into a USB port on your computer. DeLorme Street Atlas Software is included, so plan your route, and also let the GPS tell you where you are, and give you voice directions, if desired. You can even ask it questions!

It will calculate your route and tell you exactly where and when to turn, plus figure statistics such as mileage.

The GPS hardware unit is powered from the USB port, so no additional power supply is needed.

This particular unit is in close to new condition, in its original box, with the GPS unit, and the software. I would think that it could be used with APRS. $65

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. Coiled cord is somewhat stretched, but works
fine. $12

Dead PB-2 Battery for rebuilding, or use the case to adapt
other batteries. Looks fine.
For Kenwood TH-205, TH-215, TH-415, TH-225, etc.
Two available. $6 each.
Buy both for $10.

Kenwood Wall Wort Charger for PB-2. $12

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for

Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

Dead Battery Packs:

Please note that all of these battery packs are dead. There
is no voltage from them. They are being sold for the purpose
of rebuilding, or to be used to build a regulator in them,
or whatever.

Batteries for Icom 2AT, 3 AT, 4 AT, 02AT, 03AT. 04AT, 24,
and others:
BP-2, looks very nice $5
BP-3, looks like it may have gotten warm, and may be slightly
deformed $4
BP-4, "Empty case" for alkalines, etc. Needs cleaning. $8
BP-5, larger pack, looks good, but has former owners call
sign scratched in case, $5
Buy all four of the above for $20.

Dead Kenwood PB-2 Battery for rebuilding, or use the case to
adapt other batteries. Looks fine.
For Kenwood TH-205, TH-215, TH-415, TH-225, etc.
Two available. $6 each.
Buy both for $10.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Micronta 21-194 Digital Multimeter:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Prices do not include shipping from Florida.

Thanks.

1352. Antenna Tuner, HF Rig, Wattmeters, etc. FS

Yahoo group: hamstuff
Date: 2010-08-27 19:38:19 UTC
From: Ken Simpson, W8EK
Topic: 1352 Message: 1352

For Sale:

Antenna Tuner, HF Transceiver, Power Supplies, Microphone,
Wattmeters / SWR Bridges, Vertical Antenna, and more

TenTec 238 Full Power Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one also has the Giehl chip in it making it
similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass

transistors, instead of the one that some have. It also has an
ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and
"hold" buttons. It works great, and looks like new.
With paper work for $75.

AEA items:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, etc. I think it has the latest firmware, as it
includes Pactor in it. It works fine, and looks very close
to new. The large, inch thick manual is included for $125.

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $17

Wattmeters and SWR Bridges:

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select power ranges of 20/200/2000 watts
forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters
in addition to the HF bands, making it ideal for some of
the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good.
With paper work for $50.

HF Digital Peak and Average Reading Wattmeter
Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it. It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.
This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. It is in original box, with original instruction sheet, and antenna. $30

HyGain 18 HT HyTower HF Vertical Antenna:

The HyGain HyTower HF vertical covers 80, 40, 20, 15, and 10 meters. The WARC bands (and 160 meters) can be added, but are not a part of this antenna at present. This is an extremely rugged antenna, consisting of about 30 feet of actual tower, with additional stubs for tuning.

Automatic band selection is achieved through a unique stub decoupling system so that an electrical 1/4 wavelength (or odd multiple) exists on all bands. Unity gain on 20, 40, 80; 2 dB on 10 and 15 Meters.

This particular antenna is in extremely good condition. It has stainless steel hardware. The galvanizing on the tower is very good. As far as I know all hardware is included. The base insulators are new.

Due to size, this is pick up only, near Ocala FL, close to I-75.

This antenna sells for about $1000 new. With paper work for $450.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded. $55.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Knife Switch
A knife switch is often used to switch antennas using open
wire or "twin line" feeders, but can be used for other purposes.
This knife switch is DPDT. The base is about 2 1/2 by 1 1/2
inches in size, and is phenolic.
This one works fine and is in good condition. $7

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Prices do not include shipping from Florida.

Thanks.

1353. Equipment for digital modes FS

Yahoo group: hamstuff
Date: 2010-09-04 12:13:02 UTC
From: Ken Simpson, W8EK
Topic: 1353 Message: 1353

Equipment for the Digital Modes For Sale:

AEA items:

AEA PK-232 MBX / DSP,
multi-mode digital controller with the DSP Option
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, Pactor, etc.
This unit has the latest Version 7.2 firmware, and has the
DSP option installed, so it has considerable upgrades compared
to most PK-232's you find for sale.
It works fine, and looks very close to new.
The large, inch thick manual is included for $175.

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $17

Heath HD-15 phone patch / digital interface

This is the unit with the VU meter on the left and 3 knobs that
match the SB series to the middle and right. Low or high Z output
to the transmitter. It can also be used as an interface for PSK31,
and other digital modes that use a sound card. The meter makes
it great for setting levels.

This one is in excellent condition. It has a couple of great
modifications that are very professionally done. The meter has
been replaced with a slightly larger, and more professional
looking meter. There is a modular jack added for the phone line.
Two RCA phono jacks have been added for speaker in and out. In
both cases, they are in parallel with the original terminal strip,
so either the original terminal strip or the new connections may
be used.

Paper work included for $30.

Heath HD-15 digital interface / phone patch
As above, but this one is all original. It is in excellent
condition. Cosmetically, I can not find a scratch on it.
Everything on it is original.
Paper work included for $25.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Earthmate GPS by DeLorme, with software

The GPS unit plugs into a USB port on your computer. DeLorme Street Atlas Software is included, so plan your route, and also let the GPS tell you where you are, and give you voice directions, if desired. You can even ask it questions!

It will calculate your route and tell you exactly where and when to turn, plus figure statistics such as mileage.

The GPS hardware unit is powered from the USB port, so no additional power supply is needed.

This particular unit is in close to new condition, in its original box, with the GPS unit, and the software. I would think that it could be used with APRS. $60

Wattmeters and SWR Bridges:

M C Jones VHF/UHF Wattmeter
This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.
This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.
This one functions fine, and looks extremely nice for its age.
$60

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select power ranges of 20/200/2000 watts
forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters
in addition to the HF bands, making it ideal for some of
the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good.
With paper work for $50.

HF Digital Peak and Average Reading Wattmeter
Radio Shack MTA-20 (21-527) Digital Wattmeter will read either
peak or average power. It is a digital meter with no moving
parts, although it does have a sort of analog bar graph on it.
It is rated to cover 1.8 thru 30 MHz, so it covers all of the
HF bands. It will measure up to 2000 Watts, in ranges of 2000,
200, or 20. It will also indicate SWR, which requires at least
1/2 Watt. It has a nice back light, and requires 13 V DC for
operation. There is about a 3 foot cable between the digital
display and the remote sensor. This is a great meter.
This particular meter is in its original box, and appears to
not have been used. It has been tested, and works fine. $100

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. It is in original
box, with original instruction sheet, and antenna. $30

19 inch Relay Rack Shelves

This black shelf in made to fit a standard 19 inch relay rack.
The shelf itself is 17 5/8 inches wide (standard width for
inside of the rack) by 18 inches. It attaches to the rack so
that 4 inches of it extends in front of the rack and 14 inches
behind the rack (or you could reverse it for 14 inches in front
and 4 behind). It has vent holes so that equipment that is set
on it can get some air. It requires 4 inches of rack space.

It is similar to one seen here
http://www.l-com.com/item.aspx?id=8487
or
http://www.rackmounts.com/Middle-Atl...MS-DF2984.html
except 4 inches of it extends past the mounting point.

These are in extremely good condition. I can not find a scratch
on them. They look new. Two are available. Buy one for $35,
or both together for $65.

Prices do not include shipping from Florida.

Thanks.

1354. Tower and antenna related items FS

Yahoo group: hamstuff
Date: 2010-09-05 19:05:05 UTC
From: Ken Simpson, W8EK
Topic: 1354 Message: 1354

Antennas and related items For Sale:
Tower, Mast, Full Power Antenna Tuner, Wattmeters and SWR
Bridges, Lightning Protectors, VHF and UHF Mobile antennas,
Coax Connectors, etc.

The first two items are pickup only near Ocala, Florida,
close to I-75. The other items can be shipped.

Antenna tower:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Heavy Duty Antenna Mast:

18 foot long heavy duty galvanized antenna mast.
2 inch OD with 1/4 inch wall.
This is heavy! But also very strong!

It is in good condition and is located near Ocala Florida,
near I-75. $125

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select power ranges of 20/200/2000 watts forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good. With paper work for $50.

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case
is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Larsen LM type VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to
never have been used. It even has its rubber washer with
it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $9

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Prices do not include shipping from Florida.

Thanks.

1355. HF Rig, Tuner, Ant Analyzer, Mics, Wattmeters, etc. FS

Yahoo group: hamstuff
Date: 2010-09-11 13:50:47 UTC
From: Ken Simpson, W8EK
Topic: 1355 Message: 1355

For Sale:

HF Transceiver, Antenna Tuner, Antenna Analyzer, Power
Supplies, Microphones, Wattmeters / SWR Bridges, and more

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one also has the Giehl chip in it making it
similar to a Paragon II.

Large manual and power cord included for $650.

TenTec 238 Full Power Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass

transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and "hold" buttons. It works great, and looks like new.
With paper work for $75.

Collins Hand Microphone:

Collins MM-1 Mobile Microphone
The Collins MM-1 is a pressure-operated dynamic microphone designed to fit your hand comfortably. This mike is engineered for maximum voice response, and its die-cast case is finished in brushed satin chrome.

This one works fine; there are a couple extremely small pits (smaller than a pin head) on the chrome, but it looks very good. The coiled cord is a bit stiffer than when it was new.
With PJ-068 connector (often used on Collins and Drake equipment) for $100.

Antenna Analyzer:

MFJ 249 Antenna Analyzer:

This antenna analyzer covers from 1.8 to 170 MHz, so it covers all of the HF bands, plus 6 and 2 meters.

Use this unit to find your antennas true resonant frequency. Trim dipoles and verticals. Adjust your Yagi, quad, loop and other antennas, change antenna spacing and height and watch SWR, resistance and reactance change instantly. Perfectly tune critical HF mobile antennas in seconds. Take the guesswork out of building and adjusting matching networks and baluns. You can determine velocity factor, coax cable loss in dB, length of coax and distance to a short or open in feet. You can read SWR, return loss and reflection coefficient. Two line LCD screen clearly displays your information. Built-in frequency counter.

This particular unit works fine, and looks extremely nice.
With paper work for $150.

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS.
It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic
regulation, EMI filter, fold back current limiting for protection
from excessive current and shorted output, and crowbar over-voltage
protection.

This particular supply works 100% and looks the same. I can not find
a scratch on it. With paper work for $50.

Wattmeters and SWR Bridges:

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select power ranges of 20/200/2000 watts
forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters
in addition to the HF bands, making it ideal for some of
the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good.
With paper work for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just
after WW II. At that time, it was the gold standard of wattmeters,
basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12
Watts full scale in the forward position, and 4 Watts full scale
in reflected. It also has an SWR calibrate and SWR scale on the
meter. I think the frequency range is from 20 to 1000 MHz, but I
am not 100% positive of that. It works well on 2 meters and 440
MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

SWR Bridge:

Quement SWB-2 HF and VHF Dual Meter SWR Bridge
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is

ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

Lightning Protector:

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded. $55.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Knife Switch
A knife switch is often used to switch antennas using open
wire or "twin line" feeders, but can be used for other purposes.
This knife switch is DPDT. The base is about 2 1/2 by 1 1/2
inches in size, and is phenolic.
This one works fine and is in good condition. $7

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Prices do not include shipping from Florida.

Thanks.

1356. Dual Band HT, 2 m HT, HT Accessories and more FS

Yahoo group: hamstuff
Date: 2010-09-12 20:01:02 UTC
From: Ken Simpson, W8EK
Topic: 1356 Message: 1356

Dual Band HT, Two meter HT, HT Accessories, and VHF/UHF
related equipment for sale, such as Protective Cases,
Speaker Microphones, Batteries, Belt Clips,
Wrist Straps, Rubber Ducks, DMM, and much more:

Yaesu VX-3 dual band HT:

The compact VX-3R 2m/70cm FM HT Transceiver is loaded with
convenience features. In additon to top quality performance
on 2m and 70cm, you will also be able to enjoy stereo FM and
AM broadcast band reception.

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive
frequency coverage, providing local-area two-way amateur
communications along with unmatched monitoring capability.
The VX-3R receives: 500 - 1800 kHz (AM Band), 1.8 - 30 MHz
(Shortwave), 30 - 76 MHz (VHF Lowband with 6M), 76 - 108 MHz
(FM band), 108 - 137 MHz (Air Band), 137 - 174 MHz (VHF High
band with 2M), 174 - 222 MHz, 222 - 420 MHz (VHF band with 220),
420 - 470 MHz (440), 470 - 800 MHz and 800 - 999 MHz (800 band
[cellular blocked]). You get a huge 1000 channel memory system.

Power output with the supplied Lithium Ion battery is 1.5 watts
VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output
jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like
new, with no scratches. It has its original box, rubber duck
antenna, LiIon Battery, charger, and paper work all for only $175.

ADI-201, 2 meter HT:

The ADI-201 is a really great HT. It features up to 5 watts
power output (actually about 5 W, 2.5 W and 0.3 W in three
power ranges). It can be powered by many different voltages
from 5 V to 16 V DC, producing different power outputs. It
covers not only the 2 meter band, but also receives in the
public service bands, including the weather frequencies, so
it is ideal for such things as Skywarn. It has full tone
capabilities, handling subaudible CTCSS PL tone encode and
decode, along with some paging functions. DTMF tones are
also available. Of course it has 40 memories, scan features,
and all of the things one would expect in a modern 2 meter HT.

This particular HT has the 12 V high power battery with it.
It looks very, very good (I can not find a scratch on it),
and works 100%. It includes the HT, a rubber duck antenna,

belt clip, wrist strap, charger, and paper work for $75.

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge like new. $22

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

FBA-20 "Empty battery Pack" for VX-1
Takes a single AA cell, which can be alkaline, NiCad, NiMH, etc. Like new. $18

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters. It is white and says "Yaesu" on the front, with the Yaesu logo. It has never been used. $6

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215 HT, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the

Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but works fine. $12

Kenwood BC-2 Wall Wort Charger for PB-2. $12

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3 3.7 volts, 1200 mahr, works great, and holds a charge like new. $15

Dead Battery Packs:

Please note that all of these battery packs are dead. There is no voltage from them. They are being sold for the purpose of rebuilding, or to be used to build a regulator in them, or whatever.

Batteries for Icom 2AT, 3 AT, 4 AT, 02AT, 03AT. 04AT, 24, and others:
BP-2, looks very nice $5
BP-3, looks like it may have gotten warm, and may be slightly deformed $4
BP-4, "Empty case" for alkalines, etc. Needs cleaning. $8
BP-5, larger pack, looks good, but has former owners call sign scratched in case, $5
Buy all four of the above for $20.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Micronta 21-194 Digital Multimeter:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Prices do not include shipping from Florida.

Thanks.

1358. FS: Power - Bleeder Resistors

Yahoo group: hamstuff
Date: 2010-09-25 15:25:41 UTC
From: Bry Carling
Topic: 1358 Message: 1358

FOR SALE: Power - Bleeder Resistors

All are quality, USA made NOS parts -

50,000 ohms at 100 watts = $20.00
25,000 ohms w/slider at 100 watts = $22.00
25,000 ohms at 100 watts = $20.00
25,000 ohms at 75 watts = $18.00
25,000 ohms at 50 watts = $16.00
24,000 ohms at 72 watts = $18.00
20,000 ohms at 100 watts = $20.00
20,000 ohms at 50 watts = $16.00
18,000 ohms at 86 watts = $18.00
18,000 ohms at 55 watts = $15.00
16,000 ohms at 50 watts = $15.00
15,000 ohms at 120 watts = $18.00
15,000 ohms at 72 watts = $16.00
14,000 ohms at 50 watts = $16.00 (QTY 2)
12,000 ohms at 116 watts = $18.00
12,000 ohms at 75 watts = $16.00
12,000 ohms at 68 watts = $14.00
12,000 ohms at 40 watts = $10.00
12,000 ohms at 30 watts = $8.00

Shipping additional

1360. Antenna Tuner, Wattmeters, Dummy Load FS

Yahoo group: hamstuff
Date: 2010-09-30 10:54:52 UTC
From: Ken Simpson, W8EK
Topic: 1360 Message: 1360

For Sale:

Antenna Tuners, Wattmeters / SWR Bridges, Antenna Analyzer,
Dummy Load,

TenTec 238 Full Power Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will
match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct
matching point, and not false readings like some tuners. It has a
roller inductor that permits matching all HF bands, including the
WARC bands.

In addition to the tuner, it also includes a wattmeter with 200
and 2000 watt scales, plus SWR bridge. There is also an antenna
switch built in, so this unit will handle all of your antenna
needs.

This particular unit works fine, and looks extremely nice. I can
not find a scratch or defect on it. With paper work for $395.

MFJ 941 C antenna tuner for 160 thru 10 meters

This tuner has a "cross needle" SWR bridge built into it,
so one can read both forward power, reflected power, and
SWR at the same time. The meter has a back light, assuming
12 Volts is applied to the tuner. The wattmeter portion
will read either 30 W or 300 W full scale.

An antenna switch will switch between either balanced line,
two coax antennas, or a built in dummy load. Antennas can
be operated thru the tuner, or the tuner can be bypassed.

This tuner will operate on 160 thru 10 meters, including
the WARC bands.

This particular unit works 100%. It looks extremely nice.
I can not find a scratch on it.

Paper work is included for $100.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200
watts. I would not put more than 100 watt thru it, however.
It is in a nice Woodgrain / Eggshell color enclosure that is
a perfect match for some of the earlier TenTec gear, such as

the Triton I and II, Argonaut 505 and 509, and others.
This one works fine, and looks fine also. $45

Wattmeter and SWR Bridges:

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it it is rated to be used up thru 2 meters (1.8 thru 150 MHz). It is also a field strength meter.
SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

MFJ 249 Antenna Analyzer:
This antenna analyzer covers from 1.8 to 170 MHz, so it covers all of the HF bands, plus 6 and 2 meters.
Use this unit to find your antennas true resonant frequency. Trim dipoles and verticals. Adjust your Yagi, quad, loop and other antennas, change antenna spacing and height and watch SWR, resistance and reactance change instantly. Perfectly tune critical HF mobile antennas in seconds. Take the guesswork out of building and adjusting matching networks and baluns. You can determine velocity factor, coax cable loss in dB, length of coax and distance to a short or open in feet. You can read SWR, return loss and reflection coefficient. Two line LCD screen clearly

displays your information. Built-in frequency counter.
This particular unit works fine, and looks extremely nice.
With paper work for $150.

Heath HN-31 "Cantenna" RF Dummy Load:
This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.
I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.
Paper work is included for $45.

Prices do not include shipping from Florida.

Thanks.

1361. HF Rigs and Power Supplies FS

Yahoo group: hamstuff
Date: 2010-10-02 11:43:36 UTC
From: Ken Simpson, W8EK
Topic: 1361 Message: 1361

Several HF Transceivers, and Power Supplies For Sale:

Icom IC-756 Pro, 160 thru 6 meter transceiver

The upgraded Icom IC-756 Pro covers all nine HF ham bands plus 6 meters (receive from 30 kHz - 60 MHz). The high resolution 4.9 inch TFT color dot matrix LCD display provides more operating information than you've ever had before, including a spectrum scope (± 12.5, ± 25, ± 50 or ± 100 kHz). The Pro features a 32-bit floating point DSP Digital IF filter with 41 selectable bandwidths, microphone equalizer, manual notch function, digital twin pass band tuning (PBT), all mode, including PSK31, and much more. No additional filters or high stability crystal oscillators are available or needed. The selectivity lets you pull out weak signals like never before. The rear panel features two antenna inputs plus an RCA type receive antenna jack.

It includes such things as a Voice Keyer, 101 Memories, RIT/XIT, Noise Blanker, Multiple Display Formats, Realtime Spectrum Display, Twin Digital PBT, Voice Recorder, 100 Watt Output, Built-in Auto Antenna Tuner, TCXO Built In, 100% Duty Cycle, Built in RTTY Demod, DSP Notch, 1 Hz Readout, Memory Keyer, RF Attenuator 6/12/18 dB, Automatic Notch and much more.

This particular unit works 100% as best I can tell. I tried to test everything. It looks extremely nice. It is in its original box, with paper work for $1100.

Icom IC-746, 160 thru 2 meter transceiver

The Icom IC-746 covers 160-10 meters plus 6 and 2 meters. 100 Watts of output is available on all bands - HF, 50 MHz and 144 MHz, making the IC-746 a practical choice for all-around base station use. The die-cast aluminum chassis and a large cooling fan help to stabilize the PA circuit, providing 100% full duty cycle operation. It has 100 alphanumeric memories, spectrum display, Twin PBT, CTCSS encode / decode, APF, two stage preamp, keypad entry, automatic antenna tuner and electronic keyer. DSP digitally transposes receive audio components in all modes of operation to produce desired AF frequency characteristics at the IF stage of the transceiver. This built-in DSP provides: noise reduction, automatic notch filter and selectable APF. The digital bar graph meter displays ALC, power output and SWR simultaneously! The radio automatically selects from the three separate antenna inputs (HF, 6 meters, 2 meters). A built-in

automatic antenna tuner operates on the HF bands plus 6 meters. The rear panel has three antenna jacks. The 746 requires 12 VDC at 20 amps.

Features include Spectrum Scope, 102 Memories, RIT/XIT, Noise Blanker, VOX Function, Selectable APF, Dual Display, 100 Watt Output, 40 Watt Output (AM), Built-in Automatic Antenna Tuner 180-6 Meters, Full Break-In CW, CW Keyer, 100% Duty Cycle, Rx Antenna Jack, DSP Notch, 1 Hz Readout, Memory Keyer, RF Attenuator 6/12/18 dB, and much more.

This particular unit works 100% as best I can tell. It looks very close to new, and is in its original box, with paper work for $750.

Icom PS-30 Deluxe Power Supply

The Icom PS-30 power supply delivers 13.8 VDC at 25 amps. This power supply features a meter which can be set to display amperage or voltage. Four outputs are provided on the rear panel. Output 1 is a hard wired, high amperage cable with the Icom standard 6 pin Molex plug. Outputs 2, 3 and 4 provide low amperage 13.8 VDC output. This power supply has a snap-out tilt bracket.

This one works 100% and looks very nice. With paper work for $185.

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

Kenwood PS-430 power supply
This 20 amp, 13 V DC power supply matches TS- 140, TS-430, TS-440, and others. It has the heavy 6 pin Kenwood power cable plus an axillary 13 V DC output on back for running other shack accessories.
This one works fine, and looks good. With paper work for $100.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will match almost anything. It is rated to match loads up to 3000 ohms.
TenTec
It is an "L" network, which means that there is only one correct matching point, and not false readings like some tuners. It has a roller inductor that permits matching all HF bands, including the WARC bands.

In addition to the tuner, it also includes a wattmeter with 200 and 2000 watt scales, plus SWR bridge. There is also an antenna switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can not find a scratch or defect on it. With paper work for $395.

MFJ 989 C Roller Inductor Full Power HF Tuner:

This is the most popular legal limit antenna tuner. It handles 1500 Watts from 1.8 to 30 MHz including MARS/WARC bands.

You can match dipoles, verticals, inverted V's, random wires, beams, balanced lines, coax, mobile whips, shortwave -- nearly any antenna.

It includes a cross needle meter to read forward power, reflected power, and SWR simultaneously. It will read peak or average power. It also has a switched meter light, if you supply 12 Volts to it.
An antenna switch is built in, as is a dummy load.

This one works 100% with absolutely no problems. It looks extremely nice, with no scratches. It includes paper work, and is in its original box.

MFJ sells these for just under $400. Buy this one for $230.

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and "hold" buttons. It works great, and looks like new.
With paper work for $75.

RCA equivalent to a Shure 444 desk microphone
Although the front of this mic says RCA on it, it looks like a Shure 444, and has a controlled magnetic element in it just like the Shure 444. My assumption is that it is a 444 with an RCA label.
Of course most of us know that the 444 is an extremely good communications microphone with great articulation.
This one works fine, and looks very nice. It has a 4 pin connector on it. $50

Prices do not include shipping from Florida.

Thanks.

1362. FS: Two BC610 crystals for 80m

Yahoo group: hamstuff
Date: 2010-10-04 11:51:20 UTC
From: Bry Carling
Topic: 1362 Message: 1362

FOR SALE: Two original BC610 crystals for 80m band.

These are the larger old crystals in the FT171B cases... 3/4" pin spacing
and a handle on top.

One is on 3615 kHz, and the other one is on 3905 kHz.
Good working condition.

Will sell as a pair only - for $20.00 plus shipping.

(normally sell for $19.00 each)

Contact via e-mail: bcarling@...
or check the other crystals at my web site:

http://www.af4k.com/FT171_crystals.htm

http://www.af4k.com/crystals.htm

1364. FS: Plate & Filament Power Transformer

Yahoo group: hamstuff
Date: 2010-10-04 18:42:05 UTC
From: Bry Carling
Topic: 1364 Message: 1364

FOR SALE: Brand New, old stock Military Surplus Plate Transformer.

Gray potted upright style transformer. Manufactured by Tensor Electric.
Primaries:
103, 115, 126V AC at 57 to 440 Hz

Secondaries:
6.3V AV at 9 Amps
5.0V AC at 2 Amps
465V AC c.t. at 75 mA - VERY conservatively rated.
Will easily supply 150 mA DC and about 200-300 mA ICAS.
Dimensions: 4-1/4" X 3-5/8" X 4-1/2" tall with four #10
threaded mounting studs.

QTY 1 available for $20.00 plus shipping.

FOR SALE: UTC model S-70 Filament Transformer.

Classic gray potted upright style transformer with the beveled corners.
Lightly used and in good working condition. These vintage UTC
transformers typically sell for around $100 each on eBay.
Here is a guy selling a pair of rusty ones for $259.00 - item # 310154251173

Primaries:
105 and 115V AC

TWO Secondaries:
Each is 6.3V c.t. at 5 Amps

PRI:1500V HIPOT
SEC:3000V HIPOT
CT 6.3V 5A x2
50~60Hz

Dimensions: 4-1/2" X 3-1/8" X 3-7/8" tall with four ears that
have mounting holes.

QTY 1 available for $35.00 plus shipping.

1367. FS: AM & CW ops - Nearly Free, old FT243 crystals

Yahoo group: hamstuff
Date: 2010-10-08 22:17:55 UTC
From: Bry Carling
Topic: 1367 Message: 1367

FOR SALE:

Groups of original old FT243 crystals. Great for experiments
needing some reliable WW2-era rocks for those who prefer them.
Hard to beat and hard to find. They just need a home!

GROUP 6 - SIX (6) FT243 crystals - original ones on
7125, 7140, 7206, 7200, 7202, 7243 kHz
Available for just $6.00 total for all six plus shipping.

GROUP 7 - SEVEN (7) FT243 crystals - original ones on
7125, 7140, 7173, 7229, 7242, 7274, 7291 kHz
Available for just $7.00 total for all seven plus shipping.

GROUP 8 - EIGHT (8) FT243 CRYSTALS - original ones on
7125, 7140, 7167, 7205, 7221, 7248, 7291, 7297 kHz
Available for just $8.00 total for all eight plus shipping.

You can order directly on line. Or e-mail me.

Many other ham band FT243 crystals, new and old available.
See:

1368. Nearly Free Ham Band Crystals II

Yahoo group: hamstuff
Date: 2010-10-11 12:49:48 UTC
From: Bry Carling
Topic: 1368 Message: 1368

Thank you to everyone who responded about the groups of crystals.
They were all sold. I have a few more if anyone is interested, great
for homebrewing and experimenting "AM CW delight" - as follows:

(these will only be sold as groups)

GROUP 1 - hc16 crystals on: 7174, 7185, 7200, 7212, 7244 kHz
Available for $5.00 plus shipping

GROUP 2 - hc16 crystals on: 28444, 28444, 28555, 28735, 28785, 28866,
29011, 29444 kHz
Available for $8.00 plus shipping

GROUP 3 - FT243 crystals on 7073, 7100, 7125, 7140, 7175, 7200, 225,
7244, 7275, 7286 kHz
Available for $12.00 plus shipping

GROUP 4 - FT243 Crystals on 7075, 7100, 7106.7, 7125, 7140, 7173,
7175, 7224, 7275 kHz
Available for $12.00 plus shipping

GROUP 5 - FT243 Crystals on 7073, 7125, 7125, 7140, 7151, 7174, 7175,
7200, 7225, 7300 kHz
Available for $12.00 plus shipping

Contact me off the list via e-mail please...

1372. HF Rigs, PSs, Ant Tuner, and related HF items FS

Yahoo group: hamstuff
Date: 2010-10-29 12:10:29 UTC
From: Ken Simpson, W8EK
Topic: 1372 Message: 1372

Several HF Transceivers, Power Supplies and Antenna
Tuners For Sale:

Icom IC-746, 160 thru 2 meter transceiver

The Icom IC-746 covers 160-10 meters plus 6 and 2 meters. 100 Watts of output is available on all bands - HF, 50 MHz and 144 MHz, making the IC-746 a practical choice for all-around base station use. The die-cast aluminum chassis and a large cooling fan help to stabilize the PA circuit, providing 100% full duty cycle operation. It has 100 alphanumeric memories, spectrum display, Twin PBT, CTCSS encode / decode, APF, two stage preamp, keypad entry, automatic antenna tuner and electronic keyer. DSP digitally transposes receive audio components in all modes of operation to produce desired AF frequency characteristics at the IF stage of the transceiver. This built-in DSP provides: noise reduction, automatic notch filter and selectable APF. The digital bar graph meter displays ALC, power output and SWR simultaneously! The radio automatically selects from the three separate antenna inputs (HF, 6 meters, 2 meters). A built-in automatic antenna tuner operates on the HF bands plus 6 meters. The rear panel has three antenna jacks. The 746 requires 12 VDC at 20 amps.

Features include Spectrum Scope, 102 Memories, RIT/XIT, Noise Blanker, VOX Function, Selectable APF, Dual Display, 100 Watt Output, 40 Watt Output (AM), Built-in Automatic Antenna Tuner 180-6 Meters, Full Break-In CW, CW Keyer, 100% Duty Cycle, Rx Antenna Jack, DSP Notch, 1 Hz Readout, Memory Keyer, RF Attenuator 6/12/18 dB, and much more.

This particular unit works 100% as best I can tell. It looks very close to new, and is in its original box, with paper work for $750.

Icom IC-706 Mk II G 160 thru 2 meter transceiver:

The '706' Series represents one of the most popular transceivers in amateur radio histroy. The latest version is the incredibly small Icom IC-706 Mark II G which adds many new features and capabilities not found in previous versions. The "G" is an all-mode transceiver that provides 100 watts on HF and 6 meters and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a removable, remoteable, front panel that allows control of all features. The large LCD display features alphanumeric memory

names (9 character) and soft key descriptions. The LCD even supports a simple band scope display. Other advanced features include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker, Speech Compressor, Mini Spectrum Scope and Electronic Keyer. This latest version in the 706 series includes the UT-106 DSP module as a standard feature. Despite its compact size (6.56" x 2.28" x 7.88"), it has big, easy to use control dials. With HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work is included for $650.

Icom MB-62 Mobile Mounting Bracket:

The MB-62 is the mobile mounting bracket that is used for the Icom 706 series, IC-703, and for the AT-180.

This particular one is new, still in its original box, with all mounting hardware, never used, just as it came from Icom. $25

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and

PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

Kenwood YK-88SN, 1.8 KHz filter for narrow SSB or wide CW
This solder in filter fits the TS-440 (above), plus many other Kenwood rigs. It provides a very effective filter for SSB when conditions are tough, and a medium width filter for CW when the going is not as tough. Of course it works fine. It looks fine also, as if that matters when inside a rig. $79

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

TenTec 670 Electronic Keyer / Paddle:

The TenTec 670 is a complete electronic CW keyer in one package. It includes the paddle as well as the electronics, so there is no need to add a paddle as with most keyers. There is a cable with two RCA phono plugs on it it -- one for 12 V DC and one for the keying output. This unit is made to key solid state rigs (typically switching 12 Volts). It is a sort of chocolate brown color styled to match the early Omni series A,B, and C, the TenTec Delta, etc.

This particular unit works fine, and looks extremely nice. I can not find a scratch on it.

Paper work included for $60.

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS. It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output, and crowbar over-voltage protection.

This particular supply works 100% and looks the same. I can not find a scratch on it. With paper work for $50.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however. It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. This one works fine, and looks fine also. $45

Ameritron ARB-704 Linear Amplifier Keying Interface

The ARB-704 advanced interface is compatible with all common radios and amplifiers.

The input is designed to be compatible with any transmitter or transceiver, and the output is compatible with AC control lines or DC positive or negative amplifier control lines having up to 200 Volts peak open circuit voltage and 300 mA of operating current.

The ARB-704 has many electrical advantages over conventional relay buffer systems. The ARB-704 has no moving parts so it switches almost instantaneously.

This one is new, in its box, with everything that came with it originally, including all cables, and manual. MFJ sells them for about $60. Buy this one for $45.

Ameritron PNP-7D "Quick Connect" Cable for most Kenwood rigs
(TS-440, 950, 130, 2000, etc.) to ARB-704. New. $12

Coaxial antenna switches:

All have SO-239 connectors, and work 100%.

B & W Model CSR-5G (also known as 376)
This model will switch up to 5 antennas, grounding
all unused antennas. It has SO-239 connectors, with
the coax coming out like spokes of a wheel.
This one works 100%. With paperwork for $45.

MFJ 1702 B, 2 position
Heavy die cast housing, with a center position
to ground both antennas. Works great, and looks like
new. $22

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so they are ideal for the new
rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

I also have many other accessories available such as
microphones, wattmeters, keyers, etc. Just too many to list
here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1373. FS: Ham Homebrewing parts

Yahoo group: hamstuff
Date: 2010-10-29 19:51:49 UTC
From: Bry Carling
Topic: 1373 Message: 1373

FOR SALE:

NEW IN BOX FT243 Crystals on 1030 kHz - $5.00 each (QTY 10 available)

NEW IN BOX FT243 Crystal on 1475 kHz - $5.00 (QTY 1 available)

GROUP OF SIX panel mount fuse holders - traditional cartridge fuse sizes.
various shapes, but all pretty standard. All for $6.00 plus shipping.

RCA 6197 tubes - QTY 4 available. New in boxes. $2.00 each plus shipping.

RCA 5651 tubes - QTY 2 available. New in boxes. $2.00 each plus shipping.

Sylvania 5963 tubes - QTY 2 available. New in boxes. $3.00 each plus
shipping.

JUNK BOXES (!!) - may include caps, power supplies, tubes, resistors,
plugs,
adapters, crystals, variable capacitors, fuses, hardware etc. These will fill a
medium sized Priority mail flat rate box to USA for $15.00 plus $13.00
shipping.
Easily worth at least $60.00 by anyone's reckoning.
QTY 4 available for $15.00 plus shipping.

HIGH Voltage terminal - plug and socket for panel mount of up to 5 KV
cables to RF PA etc.
QTY 1 available for $2.00 plus shipping.

PAIR OF special UHF diodes - type 1N21B as used in microwave
applications and prized by
crystal set builders. Will sell the pair for $5.00 plus shipping.

BOX of ten air variable capacitors with 1/4" shafts. Various PFs. Mostly
medium - low power
devices and most will be max of about 20 pf to 300 pF.
Will sell all for $20.00 plus shipping

STANCOR P-8359 p[ower transformer, new in box.
117V at 60 Cy. primary, SEC = 12.6V CT at 3.0 A
Available for $6.00 plus shipping

Pair of No. 20 ceramic standoffs by EF Johnson, conical, with two screw
mounts.
Height is 2". Width is 1-5/8" - has stud-nut and solder tag terminals on top.
Will sell the pair for just $4.00 plus shipping.

Group of TEN type CR-1A crystals from WW2 - most are not in the ham
bands - a few may be.

Will sell as a group for $10.00 plus shipping.

GROUP of TEN type FT243 Crystals WW2-era original types in the 40
meter ham band.
FREQs = 7000, 7075, 7100, 7125, 7140, 7173.3, 7175, 7185, 7222, 7275
kHz
A great value at $20.00 plus shipping for the entire group. (normally $14
each!)

PAIR of RF Chokes. 2.5 mH multi-pile types as typically used in low level
transmitter stages or
in receivers, about 1" long X 1-1/2" diameter pilings, plus length of leads
attached. Good,
used condition. Will sell the pair for $4.00 plus shipping.

QTY 4 new Octal sockets, with ground tags. Will sell all four for $6.00 plus
shipping.

QTY 4 used Octal sockets, with ground tags. Good condition. Will sell all
four for $4.00 plus shipping.

QTY 4 new LOCTAL sockets. Will sell all four for $8.00 plus shipping.

hc6u Crystal Sockets, ceramic - available for $4.00 each or FOUR for
$12.00

QTY 8 - Phenolic, NEW 5-way terminal strips. Traditional turret style, great
for homebrewing.
Dimensions, 2-/12' X 1/2" with 5 turrets. Wrap, solder, bingo, perfection. 2
sets available.
Will sell group of 8 for $16.00 plus shipping.

CS-137 crystal case from WW2 era. Good condition. Has been painted a
darker green but still quite usable and in good shape.
Holds QTY 120 type FT243 crystals. Available for $15.00 plus shipping.

Combine items to save on shipping costs.

73 & thanks for looking - Bry, AF4K

1374. FS: Isolation Transformers

Yahoo group: hamstuff
Date: 2010-11-01 12:55:16 UTC
From: Bry Carling
Topic: 1374 Message: 1374

FOR SALE:

1000 watt Isolation Transformer. for 120V AC.

by Northlake Engineering Co. This is a 1:1 transformer.
120V AC in = 120V AC out. Very conservatively rated.
Actually is rated for 12 Amps (1400 watts.)

Has four IEC outlets and heavy duty power cable.
Heavy gauge, light gray metal case with rubber feet.
Like new condition.

Has a nice breaker switch for power ON/OFF.

Available for $45.00 each plus shipping

[Non-text portions of this message have been removed]

1376. HF antenna related items FS

HF Antenna Related Items For Sale

Automatic and manual antenna tuners, Wattmeters and SWR Bridges, Dummy Load, Coax and Connectors, Tower, etc.

SGC-239 Automatic Antenna Tuner:

The SG-239 will operate from 1.8 to 30MHz with 1.5 to 200W. It has over 130,000 tuning combinations and 170 memory bins. It gives you the most flexibility because it will work with any antenna and any transceiver. It also has push buttons for a manual tune option. It weighs only 2 pounds, so you can use it for base or portable!

TECHNICAL SPECIFICATIONS
HF Frequency Range: 1.8 to 30 MHz
Power Input Range: 1.5 to 200W (PEP) and 80W (continuous)
DC Input Requirement: +13.8 VDC (nominal) at 300 ma
Recurrent set time: Typical: Less than 10 milliseconds
Antenna Minimum lengths:
40 feet(3.3 to 30 MHz) or 100 feet(1.8 to 30 MHz)
Size:7.5L x 6W x 1.85H inches
Case Construction: Aluminum case with exposed PCB

This particular unit works fine, and appears to be new, still in its original box. With paper work for $150.

MFJ 900 HF Antenna Tuner:

The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however.

It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. But of course it can be used with any HF rig.

This one works fine, and looks fine also. $45

Daiwa CN-465 M, Dual Needle, VHF / UHF Wattmeter:

The Daiwa CN-465 M is a wattmeter designed for VHF and UHF frequencies, covering from 140 to 450 MHz. Since it is a cross needle meter, it can read forward power, reverse power, and SWR simultaneously. It also has a lighted meter if you apply 12 volts to it. The full scale deflections are either 75 or 15 watts forward, and 15 or 5 watts in reverse.

This particular meter works 100% and looks very nice.

With paper work for $55.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

ParaDynamics PDC-5 Wattmeter / Antenna Tuner:

This unit has a wattmeter with scales of 100 W, 10 W, and 1 W with an antenna tuner built in.
The tuner portion works on 10 m, 12 m, and 15 m.
The wattmeter seems accurate from 20 meters thru 10 meters.

It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks great. $12

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so they are ideal for the new rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a kilowatt. It has a derating curve both printed in the manual

and on the can.

I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Antenna tower in Florida:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

I also have many other accessories available such as HF rigs,
microphones, wattmeters, keyers, etc. Just too many to list
here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1377. Desk Mics, Hand Mics, DTMF Mics, Spkr Mics FS

Yahoo group: hamstuff
Date: 2010-11-07 14:00:13 UTC
From: Ken Simpson, W8EK
Topic: 1377 Message: 1377

A variety of Desk Microphones, Hand Microphones, DTMF
Touch Tone Microphones, and HT speaker microphones for sale:

Desk Microphones:

Kenwood MC-60 A Desk Microphone

The MC-60 A is a deluxe desk microphone that includes up-down
switches, as well as a locking or non-locking PTT switch.
It may be used either in amplified or non-amplified mode.
It has a round 8 pin connector on it, and can be used with
virtually all Kenwood rigs with the round 8 pin connector.

This particular mic comes from a non-smoking environment,
works 100%, and looks very close to new.

Paper work included for $90.

Astatic D-104 Desk Microphone

Most people know that the Astatic D-104 is the "Lollypop"
desk mic. This mic has very nice chrome plating on the mic
itself, and on the PTT grip section. The base is black.

Of course it works fine, and looks extremely nice.

With paper work for $75.

Shure Desk Microphones:

Shure 522
This is a desk mic that looks very close to the same as the
common Shure 444, but it has a dynamic mic element in it, with
good articulation. It has a high and low impedance switch on
the bottom.
This one works fine and looks very close to new. $55

RCA equivalent to a Shure 444 desk microphone
Although the front of this mic says RCA on it, it looks like a
Shure 444, and has a controlled magnetic element in it just
like the Shure 444. My assumption is that it is a 444 with an
RCA label.
Of course most of us know that the 444 is an extremely good
communications microphone with great articulation.
This one works fine, and looks nice. It has a 4 pin
connector on it. $50

TenTec Desk Microphones:

TenTec Model 706 deluxe base microphone
The TenTec model 706 is an electret microphone. It has an 8 pin connector as used on the Orion, Eagle, and the newer TenTec rigs. This particular mic works 100% and looks very close to new. $75

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphone.
The unit consists of a die-cast zinc shell with molded sliding PTT on/off switch, dynamic microphone element and detachable multi-wire connection cable.
It has an 8 pin connector as used on the Orion, Eagle and newer TenTec rigs.
This particular mic works 100% and is still in its original box. $60

Hand Microphones:

Astatic D-104-M6 Hand Microphone

Most of use know what the D-104 "Lollypop" desk mic is like. This is the hand mic equivalent.

The D104-M6 microphone is a quality performance field effect amplified “power” microphone. The housing is molded black ABS; the front half is chrome plated and the grille screen is chrome plated. The output impedance is compatible with the inputs of almost all commercial transceivers; it has an externally adjustable high gain amplifier to ensure the desired modulation level.
The D104-M6 has an easily accessible control so that the correct modulation level can be set for each operators voice.

This one works fine and looks extremely nice.

With paper work for $40.

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal

low impedance microphone. With 4 pin plug. Like new. $38

HT Speaker Microphones:

Icom HM-70 Speaker Microphone
The Icom HM-70 speaker mic (also known as the EX-1036)
works on the Icom 2SRA, 4SRA, Delta 1, IC-W2/X2 or any
Icom HT which uses the single 3 conductor stereo-style
1/8 inch (3.5 mm) plug.
This one is in the original box, and appears to be unused.
$25

Azden SDX-316
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that needs 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. The coiled cord has been stretched a bit, but
it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Prices do not include shipping from Florida.

Thanks.

1378. FS: Feedback Destroyer / EQ - $65.00

Yahoo group: hamstuff
Date: 2010-11-11 13:14:36 UTC
From: Bry Carling
Topic: 1378 Message: 1378

FOR SALE - Behringer Feedback Destroyer Pro Model DSP1124P
and Parametric Equalizer

Description: 24-Bit Dual Engine Digital Feedback Suppressor / Parametric
EQ

* Ultra-high performance 2-channel digital feedback suppressor /
parametric EQ
* Automatically and "intelligently" locates and destroys up to 12
frequencies per channel
* "Set-and-forget" default setting enables immediate and super-easy
performance
* 2 x 12 fully programmable parametric filters that can be set manually
or via MIDI
* Auto mode continuously monitors the mix, resetting programmed
filters automatically
* Single-shot mode automatically detects and destroys feedback and
locks the filter until you reset it manually
* Manual mode allows individual setting of up to 2 x 12 fully parametric
filters with frequency, bandwidth and gain adjustment
* 2 digital processing engines provide independent or coupled functions
on left and right channels
* Extensive MIDI implementation and user preset memories for storing
and instantly recalling programs
* Accurate eight-segment LED level meters for perfect level setting and
optimum performance
* Servo-balanced, gold-plated XLR and 1/4" TRS connectors
* High-quality components and exceptionally rugged construction
ensure long life
* Conceived and designed by BEHRINGER Germany

This is a standard 19" rack mount unit.

Purchased recently and never used due to a change in plans.
Comes new in the box.
Cost $99.00 new (which was a great price.)

Available for $65.00 firm. Possible ham trades considered.

1379. HF Rigs, Power Supplies, Ant Tuner, and more FS

Yahoo group: hamstuff
Date: 2010-11-13 15:29:36 UTC
From: Ken Simpson, W8EK
Topic: 1379 Message: 1379

Several HF Transceivers, Power Supplies, Antenna Tuner,
etc. For Sale:

Icom IC-706 Mk II G 160 thru 2 meter transceiver:

The '706' Series represents one of the most popular transceivers
in amateur radio histroy. The latest version is the incredibly
small Icom IC-706 Mark II G which adds many new features and
capabilities not found in previous versions. The "G" is an
all-mode transceiver that provides 100 watts on HF and 6 meters
and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives
from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a
removable, remoteable, front panel that allows control of all
features. The large LCD display features alphanumeric memory
names (9 character) and soft key descriptions. The LCD even
supports a simple band scope display. Other advanced features
include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker,
Speech Compressor, Mini Spectrum Scope and Electronic Keyer.
This latest version in the 706 series includes the UT-106 DSP
module as a standard feature. Despite its compact size (6.56"
x 2.28" x 7.88"), it has big, easy to use control dials. With
HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely
nice. Microphone and paper work is included for $650.

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

Sangean ATS-803 A Short Wave Receiver:

The Sangean ATS-803A is a "top of the line" receiver. This digital world band radio has dual-conversion covering all shortwave frequencies (1.6-30 MHz), long wave (150-519 kHz), AM (520-1710 kHz) and FM (87.5-108 MHz). A BFO control is included for smooth SSB and CW reception. An LCD display with dial lamp shows frequency, 24 hour time, battery indicator and signal strength. The receiver features an RF gain, tone, wide-narrow selectivity, keypad entry, manual tuning knob, plus 14 memories. There is an external RCA phone antenna jack on the rear panel.
The left panel has a 3.5mm earphone jack plus a DIN type jack for tape recording. It can be powered by either batteries or a wall wart power supply.

This one works fine and looks really great as well.
With paper work for $100.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS. It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output, and crowbar over-voltage protection.

This particular supply works 100% and looks the same. I can not find a scratch on it. With paper work for $50.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however. It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others.
This one works fine, and looks fine also. $45

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so they are ideal for the new rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

CW Keys:

Nye Viking Speedex 310-001 "Oval Base" Key
Nice action, with nickel hardware. This originally had a black
base, but someone painted the base to look like it is brass.
Nye sells these for $58. This one is only $35.

Heavy Metallic Base for CW Key
This is a heavy metal base that weighs about a pound and a half,
black color with red felt on the bottom. Attach most any key to
it and it will stay in place on your desk! $20

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or
become a low pass or high pass filter. Selectivity (bandwidth)
and frequency are adjustable from the front panel. This is the
"A" model that also has an additional notch filter added.
The input is an 1/4 inch phone plug, and the output is a 1/4
inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice.
I can not find a scratch on it.

With paper work for $60.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and include
paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

I also have many other accessories available such as
microphones, wattmeters, etc. Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1380. FS: Marker Crystals

Yahoo group: hamstuff
Date: 2010-11-15 12:14:40 UTC
From: Bry Carling
Topic: 1380 Message: 1380

For sale: Marker Crystals

100 kHz - $19.00 each
1.000 MHz - $16.00 each
10.000 MHz - $16.00 each

These are full size, hc6u, or wire lead crystals. In the case of
the 100kHz crystals, they are new manufacture, top quality
"tall hc6/u" crystals known as hc13/u. Some of the others are available
with wire leads. Shipping is additional.

1381. FS: TUBE ERA Ham Parts

Yahoo group: hamstuff
Date: 2010-11-18 12:28:46 UTC
From: Bry Carling
Topic: 1381 Message: 1381

FOR SALE:

QTY 14 Tube-era transformers.
These are mostly open frame, above-chassis type transformers w/lugs.
One or two potted, includes output transformers, power transformers etc.
Some marked, some pot-luck.
Will sell all 14 for $25.00 plus $11.00 for USA shipping.

JUNK BOXES (!!) - may include caps, power supplies, tubes, resistors, plugs,
adapters, crystals, variable capacitors, fuses, hardware etc. These will fill a
medium sized Priority mail flat rate box to USA for $15.00 plus $13.00 shipping.
Easily worth at least $60.00 by anyone's reckoning.
QTY 2 available for $15.00 plus $12.00 for USA shipping.

Paper capacitors, QTY 30 new, old stock caps with axial leads for
$3.00 plus shipping

Electrolytic capacitors, QTY 30 new, old stock caps with axial and radial
leads for $3.00 plus shipping

New RF Chokes, 2 mH pi-wound types with axial leads - rated 50 mA
Available for $2.00 each

New RF Chokes, 1 mH pi-wound types with axial leads - rated 50 mA
Available for $1.00 each

GROUPS of original ham band, 1945-1960 era FT243 crystals:

GROUP A:
QTY 5 - 3835, 3858, 3910, 3931, 3952 kHz
All for $15.00 plus shipping

GROUP B:
QTY 5 - 3878, 3891, 3940, 3945, 3990 kHz
All for $15.00 plus shipping

GROUP C:
QTY 2 - 3825 kHz
Pair for $10.00 plus shipping

GROUP D:

GROUP G:
QTY 2 more - 3995 kHz
Pair for $10.00 plus shipping

NEW IN BOX FT243 Crystals on 1030 kHz - $6.00 each (QTY 8 available)

100 kHz Calibrator Crystals HC13/U (TALL HC6U)
- $19.00 each plus shipping.

Other FT243 crystals: 1430, 1470, 1525, 1585, 1600, 1700, 1790 kHz
1815, 1822, 1825, 1843, 1850, 1856 kHz FT243 crystals - $14.00 each

QTY 1 - FT-243 crystal case, military surplus, type CS-137 with two locking compartments. Holds up to 120 crystals. QTY 1 available for $15.00 plus shipping.

GROUP OF SIX panel mount fuse holders - traditional cartridge fuse sizes. Very standard for homebrewing and repairs. All for $6.00 plus shipping.

QTY 4 Octal tube sockets. These are clean, used sockets.- standard type with ears for chassis mounting. All four for $4.00 plus shipping.

RCA 6197 tubes - QTY 4 available. New in boxes. $2.00 each plus shipping.

RCA 5651 tubes - QTY 2 available. New in boxes. $2.00 each plus shipping.

Sylvania 5963 tubes - QTY 2 available. New in boxes. $3.00 each plus shipping.

Please contact me directly to arrange purchase.

1383. Hustler 5TBV Antenna - HELP!

Yahoo group: hamstuff
Date: 2010-11-21 21:21:54 UTC
From: Bry Carling
Topic: 1383 Message: 1383

Hi guys - I am finally finishing assembly of a Hustler 5TBV Antenna
that I inherited from Doc, KD4E about 3 years ago.

I have almost finished putting it together.

However, I found an EXTRA PIECE that is not discussed or described
in the manual as far as I can see!

It looks like a hose clamp with three fins attached, each about 6" long.

Does anyone know what the intended use of this gadget might be?

Here is the picture:

http://www.af4k.com/extrapiece.jpg

Any clues would be immensely appreciated before I put this puppy
up in the air.

1384. Re: [FLBOATANCHORS] Hustler 5TBV Antenna - HELP!

Yahoo group: hamstuff
Date: 2010-11-21 21:26:32 UTC
From: Ken Simpson, W8EK
Topic: 1383 Message: 1384

Hi Bry,

It is the "spider" that goes under the 80/75 meter resonator at
the top. The 3 pieces are folded out, so they are parallel to
the ground. It is used on the 5BTV and 6BTV, but NOT on the
4 BTV, as there is no 80/75 meter resonator on the 4BTV.

73,

Ken, W8EK

Yahoo group: hamstuff
Date: 2010-12-01 20:24:36 UTC
From: Bry Carling
Topic: 1387 Message: 1387

FOR SALE:

Interface modern transceivers with older tube linear amplifiers
with ease with this plug-and-play device.

Manufactured by Mike, WB8VGE of SunLight Energy Systems, The
Heathkit Shop. This one is brand new - I never used it.

The Ampkeyer will solve the universal problem of interfacing
one's transceiver to an amplifier, no matter what the rig or what kind of
amplifier. And you don't have to open up the amp to install any
modifications.

Manufacturer page:
http://www.theheathkitshop.com/page13/page13.html

Details and glowing reviews here.
http://www.eham.net/reviews/detail/3100?page=1

Comes with the original documentation. Mint condition.

New cost is $49.95 plus shipping.
Will sell mine for $39.95 plus shipping.

73 - Bry, AF4K

1388. HF Antenna related items FS

Yahoo group: hamstuff
Date: 2010-12-08 14:02:00 UTC
From: Ken Simpson, W8EK
Topic: 1388 Message: 1388

HF Antenna related items For Sale -- Automatic and manual antenna tuners, Legal Limit Baluns, Coaxial Antenna Switch, SWR Bridges, Rotor Control Box, Dummy Load, Low Pass TVI Filters, Speaker, Tower, Connectors and more

LDG Automatic Antenna Tuners:

I have two LDG automatic tuners available. Both will work from 160 thru 6 meters. They will automatically tune with relays, and then hold that tuning. They have memories, so that tuning takes just a fraction of a second after it is done the first time. Both will handle 100 watts on HF. Tuning range is about 6 ohms to 800 ohms, so it is a really broad range.

Z-100 tuner
This tuner can be used with any rig. It can be powered by 9 volt batteries, or a 12 V DC supply. Good for QRP. This one works fine, and looks very close to new. With paper work for $115.

IT-100 tuner
This tuner is made specifically for the Icom rigs with AH-4 interface, which includes the IC-706 series, IC-7000, IC-756, and others. It gets its power from the rig.
This one works fine, and looks close to new. With paper work and cables for $135.

MFJ 900 HF Antenna Tuner:

The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however.

It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. But of course it can be used with any HF rig.

This one works fine, and looks fine also. $45

Heavy Duty Legal Limit Plus Balun:

HyGain BN-4000 D Balun

A balun is used to convert an unbalanced load such as coax to a balanced load such as a beam or dipole. It will also help reduce radiation from the coax feedline, that could reduce TVI and other interference.

The BN-4000 D is a 1 to 1 ratio broadband 50 Ohm current balun, and is potted to seal out moisture. It is rated at 4000 Watts for increased power handling capabilities. Frequency range is 1 MHz to 54 MHz. It has stainless steel hardware and comes with a SO-239 connector.

This particular unit works fine and looks really great. It would appear that it has not been used. All connections are clean and shiny; the case also shines. It is the latest "D" model of the BN-4000.

Paper work is included for $80.

Coaxial Antenna Switch:

B & W Model 550 A coax switch

This model will switch up to 5 antennas, and does NOT ground unused antennas. It has the coax coming out the sides like spokes of a wheel.

This one works fine and looks good as well.

$35

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that

reads SWR has a crack on the very right edge of it. Strictly cosmetic. $25

8 wire antenna rotor control box:

Newer 8 wire antenna rotor control box
This control box will work with most of the antenna rotors that require the 8 wire control, which includes most CDE, Ham-M, Ham III, Ham IV, etc.
This is the newer black colored control box, with the HyGain name, designed for the Ham IV. It works fine, and looks very good. Paper work is included for $95.

Please note that this is the control box only, and does not include the actual rotor.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a kilowatt. It has a derating curve both printed in the manual and on the can.

I measured the resistor and it is 47 ohms, so obviously it is in good shape and a great match for 50 ohms. The cantenna itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

ParaDynamics PDC-5 Wattmeter / Antenna Tuner:

This unit has a wattmeter with scales of 100 W, 10 W, and 1 W with an antenna tuner built in.
The tuner portion works on 10 m, 12 m, and 15 m.
The wattmeter seems accurate from 20 meters thru 10 meters.

It is physically small (only 5 X 3 X 1), so would be ideal for portable use. Of course with a 1 watt scale it would also be great for QRP use.

The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks great. $12

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors and include paper work.

Drake TV-1000
This is the copper cased filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W below 30 MHz, and about 200 W up to 52 MHz. $30.

Drake TV-3300
This is a modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
It looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
This is an older, heavier duty model. $35

Yaesu SP-901 P Speaker For Sale:

Although the SP-901 was made to match the FT-901 and FT-902 series, it is a very good match for most ham quipment, and provides a very desirable front facing speaker.

The "P" model of the SP-901 also includes a phone patch, if you would like to use that. Of course you can just use it as a plain speaker without connecting the phone patch portion, if you want.

This particular unit works fine and looks extremely nice. I can not find any scratches on it. It looks perfect.

With paper work for $90.

Gap "Titan DX" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny.

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Antenna tower for sale in Florida:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters For Sale:
-
Prices are per connector. Several of each are available.
These are NOS (have not been used).
-
BNC male for coax cable
standard type - $2
crimp on type - $3
-
Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3
-
BNC "T" - two female and one male - $3
-
Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5
-
UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3
-
UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

1390. Hand Mics, Desk Mics, and other Mics FS

Yahoo group: hamstuff
Date: 2010-12-11 21:57:24 UTC
From: Ken Simpson, W8EK
Topic: 1390 Message: 1390

A variety of Desk Microphones, Hand Microphones, DTMF
Touch Tone Microphones, and HT speaker microphones for sale:

Desk Microphones:

Astatic D-104 Desk Microphone

Most people know that the Astatic D-104 is the "Lollypop"
desk mic. This mic has very nice chrome plating on the mic
itself, and on the PTT grip section. The base is black.

Of course it works fine, and looks extremely nice.

With paper work for $75.

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphone.
The unit consists of a die-cast zinc shell with molded sliding
PTT on/off switch, dynamic microphone element and detachable
multi-wire connection cable.
It has an 8 pin connector as used on the Orion, Eagle and newer
TenTec rigs.
This particular mic works 100% and is still in its original box. $60

Turner "Plus Three" Desk Microphone
This is an amplified desk mic, so it can be used with most any
rig. Gain can be adjusted from basically no gain to quite a bit.
The reviews on eham, several people say it is the best microphone
they ever used. It requires a 9 volt battery. It presently has
a round 8 pin connector wired for Kenwood, but of course that
can be changed.
This one works fine and looks nice. $40

Hand Microphones:

Kenwood MC-35 S hand microphone
This Hi Z hand microphone is used with most all of the
older Kenwood rigs - TS-120, TS-180, TS-520, TS-820,
etc. This can be a noise canceling mic. It has a switch
to switch the noise cancelling in or out. It has a four
pin plug on it to match these rigs. Of course it can be
used on any rig requiring a Hi Z mic.
This one is in very nice shape, and includes paper work.
$40

Astatic D-104-M6 Hand Microphone
Most of use know what the D-104 "Lollypop" desk mic is like.

This is the hand mic equivalent.
The D104-M6 microphone is a quality performance field effect amplified “power” microphone. The housing is molded black ABS; the front half is chrome plated and the grille screen is chrome plated. The output impedance is compatible with the inputs of almost all commercial transceivers; it has an externally adjustable high gain amplifier to ensure the desired modulation level. The D104-M6 has an easily accessible control so that the correct modulation level can be set for each operators voice.
This one works fine and looks extremely nice.
With paper work for $40.

Generic Low Impedance Hand Microphone
This is a low impedance hand microphone, black in color.
Looks and works great. With 4 pin connector. $25

DTMF Touch Tone Microphones:

Icom HM-8 hand mic with Touch Tone (DTMF) Pad:
The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones. Of course it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451, 471A, plus other rigs.
This particular microphone has an 8 pin round connector, works fine, and includes paper work for $40.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

HT Speaker Microphones:

Icom HM-70 Speaker Microphone
The Icom HM-70 speaker mic (also known as the EX-1036)
works on the Icom 2SRA, 4SRA, Delta 1, IC-W2/X2 or any
Icom HT which uses the single 3 conductor stereo-style
1/8 inch (3.5 mm) plug.
This one is in the original box, and appears to be unused.
$25

Azden SDX-316
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that needs 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. The coiled cord has been stretched a bit, but
it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Prices do not include shipping from Florida.

Thanks.

From: Bry Carling
Topic: 1392 Message: 1392

FOR SALE:

1) BOX of 10 Ceramic Variable Capacitors. Various values from 30 pF
and up. Some transmitting, some receiving. All ten for $20.00 plus shipping.

2) 100 kHz crystals - new, tall type hc13u calibrator crystal as used in all
tube era radios. FIts the same soicket as an hc6u crystal. Available for
$19.00 each plus shipping.

3) Lacing cord for wiring harnesses. New, 300 yard spool available for
$12.50 plus shipping.

4) Pair of 2E26 transmitting tubes. Used, good tested tube pair for $5.00
plus shipping.

5) EIMAC 4-65A transmitting tube with ceramic socket in excellent condition.
QTY 1 available for $8.00 plus shipping.

6) RCA 832 mil-spec transmitting tube - looks new.
QTY 1 available for $5.00 plus shipping.

7) G.E. 6997 VHF transmitting tube, used. Looks OK.
QTY 1 available for $2.00 plus shipping.

8) Drake Crystal for R4A, R4B or R4C, covers 10.0 - 10.5 MHz
QTY 1 available for $12.00

9) Group of hc6u crystals on 7000 kHz, 7100 kHz, 7159 kHz, 7170 kHz,
and QTY 2 X 7174 kHz. TOTAL of six mil surplus crystals for $12.00
plus shipping.

10) Pair of FT243 crystals on 3880 kHz. One for you and one for a friend!
These are available for $10.00 each plus shipping.

11) Broadcast band FT243 crystals. 1200 kHz, 1300 kHz, 1475 kHz, 1600
kHz, 1585 kHz. Available for $14.00 each plus shipping.

73 and thanks for looking.

From: Ken Simpson, W8EK
Topic: 1395 Message: 1395

Multiband Multimode Transceviers, Power Supplies, Wattmeters,
and SWR Bridges For Sale:

Icom IC-746 Pro, 160 thru 2 meter Multi mode transceiver:

The Icom IC-746 Pro covers 160-10 meters plus 6 and 2 meters
all mode. 100 Watts of output is available on all bands - HF,
50 MHz and 144 MHz, making the IC-746 Pro a practical choice
for all-around base station use. The die-cast aluminum chassis
and a large cooling fan help to stabilize the PA circuit,
providing 100% full duty cycle operation. The new Pro version
features 32 bit floating point DSP and 24-bit AD/DA converter.
There are NO more expensive optional filters to buy. The
digital IF filter allows one to select 51 filter bandwidths.
There are three user selectable filter memories per mode.
Soft and sharp filter shapes can be selected in both SSB and
CW modes independently. You can also change the settings on
the fly and compare! For repeater operation theres is a
built-in tone encoder and decoder with 50 CTCSS and 108
DTCS based tones. There is even a built-in Baudot RTTY
demodulator.

It has 100 alphanumeric memories, digital RF speech
compression, spectrum display, Manual and Automatic Notch,
digital Twin PBT, Noise Blanker, CTCSS encode/decode, APF,
two stage preamp, automatic antenna tuner and electronic
keyer. A built-in automatic antenna tuner operates on the
HF bands plus 6 meters. The 746 Pro requires 12 VDC at 23
amps. It is 11.3 x 4.8 x 12.5 inches in size and weighs
20 Lbs. See the May 2002 issue of QST for a review of
this radio.

Features
* Spectrum Scope
* 102 Memories
* RIT/XIT
* Digital Noise Reduction
* Manual and Automatic Notch
* Digital Twin PBT
* Dual Display
* 100 Watt Output
* 40 Watt Output (AM)
* Digital RF Speech Compressor
* Microphone Equalizer
* Monitor Transmit Audio
* SWR Plotting

* Built-in Automatic Antenna Tuner 180-6 Meters
* Full Break-In CW
* SSB/CW Synchronous Tuning
* 100% Duty Cycle
* Rx Antenna Jack
* 32 bit DSP
* 1 Hz Readout
* 4 Channel Memory Keyer
* RF Attenuator 6/12/18 dB
* RTTY Demodulator
* CW Pitch and CW Reverse
* Adjustable Transmit Bandwith
* Triple Band Stack Registers

This one works 100% as best I can tell, and looks close to
the same. I can not find a scratch on it. With paper work
for $1050.

Icom IC-706 Mk II G 160 thru 440 MHz transceiver:

The '706' Series represents one of the most popular transceivers
in amateur radio histroy. The latest version is the incredibly
small Icom IC-706 Mark II G which adds many new features and
capabilities not found in previous versions. The "G" is an
all-mode transceiver that provides 100 watts on HF and 6 meters
and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives
from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a
removable, remoteable, front panel that allows control of all
features. The large LCD display features alphanumeric memory
names (9 character) and soft key descriptions. The LCD even
supports a simple band scope display. Other advanced features
include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker,
Speech Compressor, Mini Spectrum Scope and Electronic Keyer.
This latest version in the 706 series includes the UT-106 DSP
module as a standard feature. Despite its compact size (6.56"
x 2.28" x 7.88"), it has big, easy to use control dials. With
HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories

* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work are included for $650.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one is in exceptional condition. It also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Icom PS-125 Switching 25 amp power supply
The ICOM PS-125 switching power supply provides 13.8 VDC, at 25 amps. The output cord has the Molex plug prewired for many Icom radios such as the IC-746Pro (above), or any of

the rigs (including Kenwood and Yaesu) that require the heavy duty 6 pin molex connector. It is 4.4 x 3.7 x 11.3 inches in size and weighs under 7 pounds. With paper work for $135

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS. It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output, and crowbar over-voltage protection.

This particular supply works 100% and looks the same. I can not find a scratch on it. With paper work for $50.

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on

the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. All have SO-239 connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that reads SWR has a crack in it. Strictly cosmetic. $25

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

I also have many other accessories available such as many different types of microphones, wattmeters, keyers, etc. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1396. Dual Band HT, HT accessories, and VHF related items FS

Yahoo group: hamstuff
Date: 2010-12-19 23:40:02 UTC
From: Ken Simpson, W8EK
Topic: 1396 Message: 1396

Dual Band HT, HT Accessories, and VHF/UHF related equipment
for sale,
such as Wattmeters / SWR Bridges, Duplexers, Protective Cases,
Speaker Microphones, Belt Clips, Wrist Straps, Rubber Ducks,
and more:

Yaesu VX-3 dual band HT:

The compact VX-3R 2m/70cm FM HT Transceiver is loaded with
convenience features. In additon to top quality performance
on 2m and 70cm, you will also be able to enjoy stereo FM and
AM broadcast band reception.

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive
frequency coverage, providing local-area two-way amateur
communications along with unmatched monitoring capability.
The VX-3R receives: 500 - 1800 kHz (AM Band), 1.8 - 30 MHz
(Shortwave), 30 - 76 MHz (VHF Lowband with 6M), 76 - 108 MHz
(FM band), 108 - 137 MHz (Air Band), 137 - 174 MHz (VHF High
band with 2M), 174 - 222 MHz, 222 - 420 MHz (VHF band with 220),
420 - 470 MHz (440), 470 - 800 MHz and 800 - 999 MHz (800 band
[cellular blocked]). You get a huge 1000 channel memory system.

Power output with the supplied Lithium Ion battery is 1.5 watts
VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output
jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like
new, with no scratches. It has its original box, rubber duck
antenna, LiIon Battery, charger, and paper work all for only $155.

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge
like new. $22

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
It is white and says "Yaesu" on the front, with the Yaesu
logo. It has never been used. $6

Duplexers / Diplexers:

These units are designed to split transmit and receive signals between 2 meters and 440 MHz bands. Some rigs have only one output connector; you may want to use separate antennas for 2 meters and for 440 MHz. Or, you might have a combination 2m/440 MHz antenna, and your rig has two outputs. These units can be used either to combine or separate the two bands. Both work fine and look great also.

Maldol HS-770
2 m and 440 Mhz ports have a foot long coax with PL-259 connectors. Common is a case mounted SO-239 connector. $50

Diamond MX-72 D
It has a 1.6-150mhz input on one port (so it can be used to split 6 meter or HF as well as 2 meters) and a 400-460mhz port. The HF port will handle 1kw and the UHF port 400 watts. Isolation is 60db between ports. It has an SO-239 on one end and two PL-259's on the other. $40

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on

the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that reads SWR has a crack on the very right edge of it. Strictly cosmetic. $25

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

"Rigblaster Plus / USB" Digital Interface:

Rigblaster Plus / USB by West Mountain Radio
A RIGblaster is the easiest way to connect your radio to a computer so that you may operate using over 100 existing and future ham radio sound card software programs.
You will be able to operate over 20 exciting modes that your radio could not operate otherwise.

Presently available ham radio sound card software, a RIGblaster, a radio and a computer is the easy and modern way to operate with every existing or future Amateur Radio sound card program.

This particular unit is complete, in its original box, with all of the items listed on the enclosed paper work. Software CD is included, along with many cables. It looks like this unit may not have ever been used. Most bags appear that they have not been opened.

West Mountain sells these for about $160. Buy this one for only $120.

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in that series:

Kenwood PG-3 E Filtered Cigarette Lighter Cable
This cable is used to power the Kenwood TH-215 series, TH-225 series, TH-25, TH-75, and other Kenwood HTs. It plugs into a cigarette lighter, and filters the noise.
This one is NOS (New, Old Stock), still in its original blister pack. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs For Sale:

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries for
the TH-21 series, and may also be used on other Kenwood radios.
$12

DEAD Kenwood PH-21 H battery pack
This is the heavy duty (high capacity) battery back used with the
TH-21 series HTs. The batteries in it are dead, but it can be sued to
put a new "insert" in, or for building a 12 V DC adapter. Physically
it is in good shape. $10

Kenwood RA-6 Rubber duck antenna for the TH-21 HT
This is the original 2 meter rubber duck. $15
As above, but shorter "Stubby Duck" $20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - About 7 inches long
BNC - Original from Kenwood TH-215, 5 inches long
BNC - Stubby about 4.5 inches long
-

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Rubber Duck Antennas with SMA Connectors:

All of these have SMA connectors as used by most modern
multiband HTs. All work fine, and look very close to new.

All provide gain over the standard rubber duck.

MFJ 1720 S, for 6 meters, 2 meters and 440 MHz
This MFJ Triple Band HT FlexiDuck antenna is 19 inches tall. It is a 5/8 Wave on 440 MHz to give you 3.2 dB gain. On 2 Meters it is 1/4 Wave antenna with 2.15 dBi gain. On 6 Meters you get an efficient full size 1/4 Wave antenna for full-size performance. $25

Full size SMA for 2 meters and 440 MHz
This is a very flexible antenna that is a quarter wave on both 2 meters and 440 MHz. $20

Two meter vertical antenna:

This 2 meter antenna is made for base station or for portable use. It is a 5/8 wave antenna (so it has about 3 db gain), with four radials. It is made to be mounted to a 1 1/4 or 1 1/2 inch mast pipe. It has an SO-239 connector on it, for connection to a PL-259.

The construction of this is relatively light duty. To put it another way, this one will not survive 100 MPH winds! It appears to be a commercially made unit, but I can not find any name on it. It goes together very quickly, with each radial screwing into a bolt, and then simply attaching the whole thing to a mast. As such, it would be great for portable work.

While the construction is light duty, it appears to be quality hardware. Some appears to be stainless, and some of it anodized. There is no corrosion evident on it. $25

Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that needs 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS.
It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic
regulation, EMI filter, fold back current limiting for protection
from excessive current and shorted output, and crowbar over-voltage
protection.

This particular supply works 100% and looks the same. I can not find
a scratch on it. With paper work for $50.

Prices do not include shipping from Florida.

Thanks.

1397. Heil Mics and accessoires, Mic Stands, other mics and accessories FS

Yahoo group: hamstuff
Date: 2010-12-31 14:06:39 UTC
From: Ken Simpson, W8EK
Topic: 1397 Message: 1397

A variety of Microphones and Microphone accessories,
including Heil Mics and accessories, other Desk Microphones,
Hand Microphones, DTMF Touch Tone Microphones, and HT
speaker microphones for sale:

Heil Microphones:

Heil GM-5 "Goldline" Professional Microphone

The "Gold Standard" Studio Microphone for Amateur Radio

The GM Series of microphones is a unique, innovative
microphone renowned for its gorgeous audio production. It's
crystal clear response made it an instant best-seller, and
it is the microphone of choice in thousands of Ham shacks
around the world today.

The GM includes the Heil-exclusive "Light Touch" PTT switch,
and is encased in a beautifully-finished high-gloss black
lacquer enclosure. The GM is fitted with a 4-pin XLR connector
compatible with the Heil CC-1 Series of adapter cables.

This GM5 version is equipped with the new full-range mic element
and the famous HC-5 element. It works with most rigs, but is NOT
made to be used with Icom rigs. See HM-I below if you have an
Icom radio.

This one works fine and looks like new. No defects of any
sort. $95

Heil HM-I for Icom Radios

The Heil Sound HM-I is a microphone that is specifically made
for Icom transceivers (green band). It is basically equivalent
to the GM-5 (above), except it is made specifically to work with
Icom rigs. It has a switch to switch between the wide and
narrow elements.

This one works fine, and looks like new. $80

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

Heil CH-1 I8:
4 pin XLR connector (for GM-5 or HM-I) to round 8 pin mic
connector wired for Icom. It also has a 1/4 jack for a PTT

switch. $20

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

AD-1-iCM Headphone Adapter
AD-1 iCM: iC modular, no cap (for use with iC elements only)
It has a modular connector for Icom on one end, with a 1/8 and 1/4 jack on the opposite end. $15

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Icom OPC-589
Icom round 8 pin microphone jack on one end with a modular 8 pin connector on the other end. Made to convert your mic with the round connector, so it can be use on a rig that requires the modular connector. $22

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Rectangular desk stand
Approx 4 inch by 5 inch heavy black base, with a 2 1/2 inch chrome tube from the center. Standard 5/8 inch threaded. $15

Gooseneck Extension
Male connection on one end and female on the other, so it can be used as an extension. Standard 5/8 inch threaded. 7 inches long. $10

Solid 12 inch Tube
Male connection both ends. Chrome plated threaded tubing, with a small hole so that a mic cable can be brought out of the center of the tube. Standard 5/8 inch threads. 12 inches long. $10

Triangle Flange
This is a trangle shaped flange that will mount to a desk, board, or other flat wood or metal object. It is about 2 1/2 by 2 inches, chrome plated, with mounting hardware. Standard 5/8 inch threads. $8

Heil Wind Screen

This windscreen can be used with a variety of microphones, including the GM-5 and HM-I above. Excellent condition. $5

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Desk Microphones:

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphone.
The unit consists of a die-cast zinc shell with molded sliding PTT on/off switch, dynamic microphone element and detachable multi-wire connection cable.
It has an 8 pin connector as used on the Orion, Eagle and newer TenTec rigs.
This particular mic works 100% and is still in its original box. $60

Johnson equivalent to a Shure 444 desk microphone:

Although the front of this mic says Johnson on it, it looks like a Shure 444. My assumption is that it is a 444 with a Johnson label.

Of course most of us know that the 444 is an extremely good communications microphone with great articulation.

It appears that this one has a low impedance element in it, making it a better match for the more modern rigs.

This one works fine, and looks nice. $45

Gooseneck Microphone:

Astatic Model 810-6.
This mic is on a 12 inch gooseneck. The mic itself is brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

It is similar to the one found here:
http://www.focusedtechnology.com/1191-19.html

This one works fine and looks good. $45

Hand Microphone:

Generic Low Impedance Hand Microphone
This is a low impedance hand microphone, black in color.
Looks and works great. With 4 pin connector. $25

DTMF Touch Tone Microphones:

Icom HM-8 hand mic with Touch Tone (DTMF) Pad:
The HM-8 has a 12 digit touch tone (DTMF) pad on the front
of it, along with an on-off switch for the tones. Of course
it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S,
451, 471A, plus other rigs.
This particular microphone has an 8 pin round connector,
works fine, and includes paper work for $40.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the
mic, and "speed dial". 12 digit touch tone pad on the front,
with the microphone part above the pad. With an 8 pin modular
plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has stripped and tinned ends. Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $38

HT Speaker Microphones:

Azden SDX-316
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that needs 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ-286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. The coiled cord has been stretched a bit, but
it works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Prices do not include shipping from Florida.

Thanks.

1398. FS: Heathkit Crystal

Yahoo group: hamstuff
Date: 2011-01-03 12:46:32 UTC
From: Bry Carling
Topic: 1398 Message: 1398

FOR SALE: Heathkit SB-line / HW-line Crystal

This is a new, unused, original heathkit part intended for extended range on 40m for MARS use.

Comes in the Heath box, and is marked "HEATH" in bold letters on the crystal.

This is a special 40 m crystal that covers 6.900 - 7.200 MHz
Crystal Frequency is 15.7950 MHz

Price reduced to $4.00 plus shipping.

Please contact me off the list to arrange purchase.

1401. 2 m rig, dual band HT, multimode, and wattmeters FS

Yahoo group: hamstuff
Date: 2011-01-07 21:13:03 UTC
From: Ken Simpson, W8EK
Topic: 1401 Message: 1401

Two meter mobile transceivers, dual band HT, Multiband Multimode
transceiver, and VHF and HF Wattmeters For Sale:

Alinco DR-150T VHF FM Mobile Transceiver:

The DR-150 is a 50 watt 2 meter transceiver that will also
receive on the 440 MHz band, as well as wide band receive for VHF.

Specs include
Tx: 144.00-147.995 MHz FM
Rx: 108.000-173.995/440.000-449.995 MHz FM/AM
Channel Scope
Sweep Scan
CTCSS Tone encoder
Time-out-timer
DSQ selective call
9600bps connector
100 memory channels
Autodialer
S-meter squelch
Remote DTMF control
Plus many other bells and whistles

This one works fine and looks fine also. I do not find any
scratches on it. Mobile bracket with hardware, DTMF Microphone,
power cord and paper work are included in the original box
for $150.

Kenwood TR-7400 Two Meter FM Transceiver:

The Kenwood TR-7400 is a digitally synthesized high performance,
2 meter mobile FM transceiver. It features a full frequency digital
LED display. Transmit power may be set for 5 or 25 watts. Frequency
range is 144-147.995 MHz. It is 7.3 x 2.875 x 10.6 inches in size
and requires 13.8 VDC at 8 amps.

One of the really nice things about the TR-7400 is that the
frequency selection is by means of a rotary switch that has a stop
at each end. It can be turned from 0 to 9 for both 10s and 100s
of KHz. The MHz switch is a 4 position switch with a detent.
This means that someone who is blind or vision impaired can
easily count the clicks and know the frequency.

This particular unit works 100%. The front panel is very nice and
the digital readout is crisp and clear. It includes a hand mic,
DC cord, and tilt bail.

With paper work for $45.

Yaesu VX-3 dual band HT:

The compact VX-3R 2m/70cm FM HT Transceiver is loaded with convenience features. In additon to top quality performance on 2m and 70cm, you will also be able to enjoy stereo FM and AM broadcast band reception.

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive frequency coverage, providing local-area two-way amateur communications along with unmatched monitoring capability. The VX-3R receives: 500 - 1800 kHz (AM Band), 1.8 - 30 MHz (Shortwave), 30 - 76 MHz (VHF Lowband with 6M), 76 - 108 MHz (FM band), 108 - 137 MHz (Air Band), 137 - 174 MHz (VHF High band with 2M), 174 - 222 MHz, 222 - 420 MHz (VHF band with 220), 420 - 470 MHz (440), 470 - 800 MHz and 800 - 999 MHz (800 band [cellular blocked]). You get a huge 1000 channel memory system.

Power output with the supplied Lithium Ion battery is 1.5 watts VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like new, with no scratches. It has its original box, rubber duck antenna, LiIon Battery, charger, and paper work all for only $155.

Icom IC-706 Mk II G 160 thru 440 MHz transceiver:

The '706' Series represents one of the most popular transceivers in amateur radio histroy. The latest version is the incredibly small Icom IC-706 Mark II G which adds many new features and capabilities not found in previous versions. The "G" is an all-mode transceiver that provides 100 watts on HF and 6 meters and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a removable, remoteable, front panel that allows control of all features. The large LCD display features alphanumeric memory names (9 character) and soft key descriptions. The LCD even supports a simple band scope display. Other advanced features include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker, Speech Compressor, Mini Spectrum Scope and Electronic Keyer. This latest version in the 706 series includes the UT-106 DSP module as a standard feature. Despite its compact size (6.56" x 2.28" x 7.88"), it has big, easy to use control dials. With HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B

* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work are included for $650.

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

I also have many other accessories available.
Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1402. DSP Signal Processors and Audio Filters FS

Yahoo group: hamstuff
Date: 2011-01-08 15:34:08 UTC
From: Ken Simpson, W8EK
Topic: 1402 Message: 1402

DSP Signal Processors and Audio Filters For Sale:

Timewave DSP-599zx Deluxe DSP Processor / Audio Filter:

Calling it an audio filter does not tell the whole story.
It is really much more. It represents the latest generation
of Digital Signal Processing (DSP) audio filtering, incorporating
the newest high speed CPU. The LCD display, push buttons and
Visible Memory let you see the exact settings of the filters.
The DSP-599zx works in all modes. It is a dream for the non-voice
modes, as well as voice and CW modes. Data filters supported
in the filter are RTTY, Amtor, PACTOR, G-TOR, HF Packet, SSTV,
WeFax, SITOR and Clover. It needs 13 V DC at 1 amp.

This particular unit works fine and looks very nice. A wall
wort power supply and paper work are included for $300.

JPS NIR-10 DSP Audio Filter

The JPS NIR-10 audio filter allows reception of difficult to
read signals and reduces listener fatigue. It operates on
radio receiver audio outputs, then provides its own volume
adjustable processed audio to an external 3 to 8 ohm speaker.
The NIR-10 reduces or eliminates white/pink noise, ignition
noise, static interference, RTTY interference, and power line
noise. PEAK function reduces white noise interference. The
Notch Filter mode removes multiple heterodynes and acts in
3 milliseconds. Band Pass mode has continuously adjustable
center frequency, selectable bandwidths (0.25, 0.6 and 1 kHz),
vertical-skirted filters, and greater than 60 dB ultimate
rejection. The rear panel has RCA phono jacks for Audio Input,
Speaker Output, Remote Bypass, and Inverted Remote Bypass.
There is also a jack for 12 VDC Input (1 amp). The front
panel has a 1/4 inch headphone jack.

This unit works fine, and looks very close to new. I can not
find a scratch on it. With paper work for $75.

Grove SP-200 Speaker and Audio Filter

The Grove SP-200 speaker with filter has extensive audio
filtration capability which includes peak and notch functions,
with variable bandwidth and frequency. In this respect, it
seems to be similar to the Autek QF-1 filter, but it is built
in to the speaker enclosure. It also has a tape recorder
activation feature with a variable hold. Tape out and
activation are on the rear panel.

In addition, it has an audio amplifier in it with a volume control and separate bass and treble controls. A noise limiter is also included. To put it another way, it is quite sophisticated!

It is all housed in a nice woodgrain cabinet, about 11 inches wide by 7 high and 8 deep. $175

Prices do not include shipping from Florida.

Thanks.

1403. FS: Variety of Radio Items

Yahoo group: hamstuff
Date: 2011-01-09 23:35:46 UTC
From: Bry Carling
Topic: 1403 Message: 1403

FOR SALE - Various Radio Items:

Hallicrafters Sky Buddy S19, Excellent - $165.00

Yaesu FT-101E, may need some work - $225.00

KLM ECHO 70 SSB-CW Transceiver for UHF 70cm Band - $95.00

RL Drake Company receiver 100 kHz - 30.0 MHz PRN1000 - $145.00

Two 250 watt variacs - Each designed for 0 - 250 V AC at 1 amp.
Can be used at 120V AC also.
Available for $27.00 each

Heath HD-15 Phone Patch - cherry, $15.00

Panel meter - 0 to 200 mA DC, 2" diameter with hardware - $5.00

Group of variable capacitors -
Consists of TWO DUAL 500pf air variable capacitors and TWO 350 pF
single air variable capacitors.
ALL FOUR for a total of $20.00 plus shipping.

MFJ-760 notch filter - 80 to 180 MHz... $4.00

Hamtronics 800 MHz receiving converter $4.00

14V DC at 4.5 Amps power supply.
AC operated supply. Based on a circuit Board. Rugged design - great
for filaments or for use with other projects. Excellent working condition.
QTY 1 available for $8.00 plus shipping.

More parts and accessory items will be added soon...

1406. FS: PAIR OF 811A Tubes for $6.00

Yahoo group: hamstuff
Date: 2011-01-22 19:43:13 UTC
From: Bry Carling
Topic: 1406 Message: 1406

For sale:

Two 811A Tubes for $6.00 total.

These are good looking used tubes, but don't look overheated
or anything. Great for tube homebrew. One is a nice RCA tube and
the other is a Sylvania, but they look the same inside. No boxes
but will pack them carefully for safe shipment.

"Why are these so inexpensive?" you may ask!

Well, the Sylvania one is missing the plate cap, and I don't have it.
Just the wire on top so you will need to connect to that, which is easy
enough.

I figured the RCA one is easily worth the $6 and the other is a freebie.

So - let me know ASAP if you'd like tyhese and they are all yours!

1407. FS: Compactron Tube Sockets

Yahoo group: hamstuff
Date: 2011-01-22 20:43:38 UTC
From: Bry Carling
Topic: 1407 Message: 1407

FOR SALE:

More homebrew parts delight...
A group of 8 unusual tube sockets and one male plug.
Most of these appear to be for compactron tubes as noted.

All are new and unused except one.

Two 12-pin sockets - new
One 11-pin socket - new
One 11-pin plug - new
One 11-pin socket - used
Two 9-pin sockets, new (one missing a pin, easily replaced from
a smaller donor socket)

One larger vented socket, sems to be a 4X150A style socket.

I don't want to ship these out separately, so will sell the entire group
for $24.00 plus shipping.

1410. Digital Controllers, DSP Filters, and other items FS

Yahoo group: hamstuff
Date: 2011-01-29 14:32:44 UTC
From: Ken Simpson, W8EK
Topic: 1410 Message: 1410

Digital Controllers and interfaces, DSP Signal Processors
and Audio Filters, and other items For Sale:

"Rigblaster Plus / USB" Digital Interface:

Rigblaster Plus / USB by West Mountain Radio
A RIGblaster is the easiest way to connect your radio to
a computer so that you may operate using over 100 existing
and future ham radio sound card software programs.
You will be able to operate over 20 exciting modes that
your radio could not operate otherwise.

Presently available ham radio sound card software, a RIGblaster,
a radio and a computer is the easy and modern way to operate
with every existing or future Amateur Radio sound card program.

This particular unit is complete, in its original box, with all
of the items listed on the enclosed paper work. Software CD is
included, along with many cables. It looks like this unit may
not have ever been used. Most bags appear that they have not
been opened.

West Mountain sells these for about $160. Buy this one for
only $110.

Heath HD-15 digital interface / phone patch

This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface for PSK31, and other digital modes that use
a sound card. The meter makes it great for setting levels.
-
One is in excellent condition. Cosmetically, I can not
find a scratch on it. Everything on it is original.
Paper work included for $25.

I have another available, but it shows some minor wear.
With paper work for $22.

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the

sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Timewave DSP-599zx Deluxe DSP Processor / Audio Filter:

Calling it an audio filter does not tell the whole story. It is really much more. It represents the latest generation of Digital Signal Processing (DSP) audio filtering, incorporating the newest high speed CPU. The LCD display, push buttons and Visible Memory let you see the exact settings of the filters. The DSP-599zx works in all modes. It is a dream for the non-voice modes, as well as voice and CW modes. Data filters supported in the filter are RTTY, Amtor, PACTOR, G-TOR, HF Packet, SSTV, WeFax, SITOR and Clover. It needs 13 V DC at 1 amp.

This particular unit works fine and looks very nice. A wall wort power supply and paper work are included for $300.

Grove SP-200 Speaker and Audio Filter

The Grove SP-200 speaker with filter has extensive audio filtration capability which includes peak and notch functions, with variable bandwidth and frequency. In this respect, it seems to be similar to the Autek QF-1 filter, but it is built in to the speaker enclosure. It also has a tape recorder activation feature with a variable hold. Tape out and activation are on the rear panel.

In addition, it has an audio amplifier in it with a volume control and separate bass and treble controls. A noise limiter is also included. To put it another way, it is quite sophisticated!

It is all housed in a nice woodgrain cabinet, about 11 inches wide by 7 high and 8 deep. $175

Code Practice Oscillator:

MFJ 557 code practice oscillator with key

This is a traditional code practice oscillator, with adjustable volume and tone. It includes a straight key on a nice base. It

operates from a 9 volt battery or from a wall wort (not included).

This one works fine and looks fine also.

With paper work for $25.

CW Key and Cables:

Nye Viking Speedex 310-001 "Oval Base" Key
Nice action, with nickel hardware. This originally had a black
base, but someone painted the base to look like it is brass.
Nye sells these for $58. This one is only $35.

Cables for CW keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Prices do not include shipping from Florida.

Thanks.

1411. FS: Two aluminum chassis

Yahoo group: hamstuff
Date: 2011-01-31 23:40:52 UTC
From: Bry Carling
Topic: 1411 Message: 1411

For sale: Two small aluminum chassis

These are two new boxes intended for use with an intercom case, but would work great for a small ham project too. Shaped and constructed like any conventional chassis, except painted white.

Dimensions: 8" X 6-1/4" X 2-3/4" tall. The lip on the bottom is 1/2" wide and has six handy threaded holes for mounting. There are four small holes in the top of the chassis.

QTY 2 available for $5.00 each.

E-mail for a picture if you need to see one first.

From: Ken Simpson, W8EK
Topic: 1413 Message: 1413

HF Antenna related items For Sale --
SWR Bridges, Legal Limit Balun, Low Pass TVI Filters,
Vertical antennas, Tower, Connectors and more

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so is ideal for the new
rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna. They were made in Japan, and labeled with various
names, including Swan, Siltronix, and Quement. Both have SO-239
connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that
reads SWR has a crack on the very right edge of it. Strictly
cosmetic. $25

Heavy Duty Legal Limit Plus Balun:

HyGain BN-4000 D Balun

A balun is used to convert an unbalanced load such as coax
to a balanced load such as a beam or dipole. It will also
help reduce radiation from the coax feedline, that could
reduce TVI and other interference.

The BN-4000 D is a 1 to 1 ratio broadband 50 Ohm current balun,
and is potted to seal out moisture. It is rated at 4000 Watts

for increased power handling capabilities. Frequency range is 1 MHz to 54 MHz. It has stainless steel hardware and comes with a SO-239 connector.

This particular unit works fine and looks really great. It would appear that it has not been used. All connections are clean and shiny; the case also shines. It is the latest "D" model of the BN-4000.

Paper work is included for $80.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors and include paper work.

Drake TV-3300
This is a modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
It looks very close to new. $40.

Hustler 4BTV "Base station" HF vertical antenna

The 4BTV covers 10, 15, 20, and 40 meters.
It can also cover 75/80 meters by using an RM-80 S resonator.

This one is in extremely good shape. It actually still shines! No corrosion evident. Penetrox was used on the original assembly, so it comes apart easily.

Paper work is included. but connection points are well marked for easy reconstruction. $120

I would prefer pickup near Ocala, Florida, just off of I-75. It will easily fit inside a minivan, or it can be broken down more to go inside a car. It is possible to ship it, but the cost is high due to it being oversize. Obviously, shipping is not included in the price.

Gap "Titan DX" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so

that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny.

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Antenna tower for sale in Florida:

A total of 35 feet of antenna tower is available, consisting of one top section, 2 "middle" sections, and a 5 foot section for the base.

This tower is "American" tower, which has a horizontal brace about every 22 inches. It is suitable for VHF antennas, very large TV antennas, or small tribanders.

This particular tower is in good condition, although there is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters For Sale:

Prices are per connector. Several of each are available. These are NOS (have not been used).

"N" Connector - Double Male - $8

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

1414. Microphones and related items FS

Yahoo group: hamstuff
Date: 2011-02-04 17:59:26 UTC
From: Ken Simpson, W8EK
Topic: 1414 Message: 1414

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker
Microphones, and Microphone Stands and other Microphone
Accessories

Desk Microphones:

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser
"gooseneck" desk mic. It has UP-DOWN tuning plus a built-in
pre-amp. There is a switch for PTT and also a lock feature.
The mic impedance is 700 ohms so it can be used with a wide
range of models, and it has a frequency response of 200 Hz
to 7 KHz. There is a potentiometer adjustment on the back
of the mic stand to adjust the output level. The mic
terminates to a standard 8 pin Kenwood mic plug. It requires
voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen,
and is in its original box. With paper work for $75.

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphones designed for
use as a communications station microphone for Amateur Radio and
other transmitting applications. The unit consists of a die-cast
zinc shell with molded sliding PTT on/off switch, dynamic
microphone element and detachable multi-wire connection cable.
The element has tailored frequency response from 30 Hz to 12 kHz
designed for excellent transmit audio in SSB, AM, and FM modes.
It has an 8 pin connector as used on the Orion, Eagle and newer
TenTec rigs.
This particular mic works 100% and is still in its original box. $60

DTMF Touch Tone Microphones:

Icom HM-56 DTMF Deluxe Microphone:

The Icom HM-56 is a DTMF touchtone microphone with up-down
switches and a lot of sophisticated functions built in. This
was the original mic that was furnished with an IC-229.

This electret mic has a 16 digit DTMF touchtone pad on it along
with other special buttons. It also has 14 memories included
in it for remembering phone numbers to dial. It has a round
8 pin connector on it, and works with the Icom 28, 38, 228, 229,
449, 901, 1201, 2330, 2400, 2410, 2500 and others. This mic

also has an up and a down switch on it. Basically, it is like an HM-12, but with DTMF pad and memories added. These are about $170 new, so that gives some idea of its sophistication!

This one works on all of its functions, including the dialing memories. It looks extremely nice, with no scratches.
With paper work for $90.

Alinco DTMF Touch Tone Microphones:

I have two Alinco hand microphones with 16 digit DTMF Touch Tone Pads, and Up-Down switches on them. Neither have an Alinco number on them, but simply say "Alinco". These have the round 8 pin connector on them, and will also work with most Kenwood and ADI rigs, as well as Alinco. Both work 100% on all 16 tones, and Up-Down switches, plus the mic and PTT switch.

One is a more rectangular shape, with only the PTT, 16 digits, and Up-Down switches. It does have a scratch on the side with the DTMF pad, but is in nice shape. $40

The second one is more of a tear drop shape, and has a lock switch and a switch to turn the DTMF pad off, in addition to the other buttons. I think it is an EMS-12, but that number is not on the mic any place. It is in very good condition. $45

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $35

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $36

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that need 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5 above. Excellent condition. $10

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Rectangular desk stand
Approx 4 inch by 5 inch heavy black base, with a 2 1/2 inch chrome tube from the center. Standard 5/8 inch threaded. $15

Gooseneck Extension
Male connection on one end and female on the other, so it can be used as an extension. Standard 5/8 inch threaded. 7 inches long. $10

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that
attaches to the mic stand and holds the mic. It includes the
chrome screw/bolt, and looks like new. Ideal if yours is broken.
It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

Thanks.

FOR SALE: R.L. Drake Company Model 1280 / PRN-1000 Shortwave
Receiver

Desktop shortwave receiver. Excellent working condition. Looks like new.
Covers 100 kHz to 30.000 MHz continuous.
Sensitivity < 2.0 uV for 10 dB S+N/N. Has readout to nearest 1 kHz.
Selectivity
5.5kHz at -6 dB and 12 kHz at -60 dB. First i.f. 45 MHz, and second i.f. 455
kHz.
Tuning steps are: fast 5kHz, slow, 1 kHz. Audio output 700 mW. Has
headphone jack.
Powered from 12V or use the supplied Wall wart for 120V AC operation
(included.)

Synthesized, Microprocessor Controlled Tuning For Enhanced Reception.
Easy Tuning With Tuning Dial, Up/Down Buttons, Or Direct Frequency Entry
Via Keypad.
Bright LED Display Indicates Frequency. This large green digital display is
easy to read in any lighting situation. Receiver a built-in speaker, front-firing.
Has signal strength indicator and RF gain control switch.

Weight 4.7 lbs. Dimensions: 10-7/8" W x 4-3/8" H x 7-5/8" D

This is a USA MADE, General Coverage receiver also known as model
1280.
MINT condition. Great little Drake receiver... Similar to the Drake SW1
receiver.

Available for $145.00 plus shipping

Yahoo group: hamstuff
Date: 2011-02-06 03:13:06 UTC
From: Bry Carling
Topic: 1416 Message: 1416

FOR SALE: FS: Yaesu FT101E Transceiver

Covers 160m through 10m, AM-CW-USB-LSB 260 watts p.e.p.

Frequency Range: 3.5-30 MHz (160/80/40/20/15/10 meters)
27.0-27.5 MHz (11/AUX)
10.0-10.5 MHz (WWV receive only)
Modes: USB, LSB, CW, AM
Power Input: SSB 260 watts PEP DC Input (130-150 watts output)
CW 260 watts DC Input (130-150 watts output)
AM 80 watts PEP DC Input (40 watts output)
TX Freq Response: 300 Hz - 2700 Hz
RX Freq Response: 300 Hz - 2400 Hz Standard Yaesu SSB Filter
500 Hz Optional Yaesu CW Filter
Optional Filters: 300 Hz - 1800 Hz SSB Narrow(Fox Tango Filter)
250 Hz CW Narrow (Fox Tango Filter)
Audio Output: 3 watts
AC Power: Rx 35 watts, Tx 300 watts
DC Power: Rx 0.5 amps, Tx 20.0 amps
Weight: 35 lbs
Size: 13-1/2" x 6" x 11-1/2"

Looks good overall. Untested, but complete and in good cosmetic
conmdition.
All of the knobs and controls are original and in good working condition.
The radio is complete and looks clean inside. Front and rear panels both
look
very good. Has a few marks on the sides and top typical of a rig of this age.

Missing the original AC power cord but comes with a power CONNECTOR
that can be
used with this rig, ADD WIRE to the plug to easily make the AC power
cable.

Manual copy of the Operators manual and the service manual will be
supplied as a printable file.

Available for $225.00 plus shipping.

Topic: 1418 Message: 1418

FOR SALE: Hallicrafters S19 Receiver

This is an exceptionally nice example of this early shortwave,
all-band receiver. Has 6 Tubes, covers 540 kHz - 50.0 MHz in 4 bands.
Modes: AM, CW, SSB. Has bandspread tuning,
logging scale, original S-meter, internal speaker all in great shape.
Serial number H-96701
Dimensions: 17 1/2" wide X 9" high X 10" deep

Exceptionally nice, working condition. Very clean inside and out.
Original paint. All functions working.
I have seen a lot of these that are repainted or scuffed up badly, but
this one is exceptionally nice. Great for re-creating that early novice station.
Comes with two original manuals and a special Hugo Gernsback book "The
Sky Buddy Sage" - 26 pages about this receiver.

Available for $149.00 plus shipping.

REDUCED: Hallicrafters Sky Buddy

Beautiful old shortwave all-band receiver. This may
be an S19 or S19R. I don't know.
6 Tubes, manufactured 1938 and 1939 in Chicago,
Illinois, USA.
Covers 540 kHz - 50.0 MHz in 4 bands. Modes: AM,
CW, SSB. Has bandspread tuning,
logging scale, original S-meter, internal speaker
all in great shape.
Serial number H-96701
Dimensions: 17 1/2" wide X 9" high X 10" deep

Exceptionally nice, working condition. Very clean
inside and out.
Original paint. All functions working.

This receiver is not repainted or scuffed up, all
original and is exceptionally nice. Great for re-
creating an early novice station.

Comes with two original manuals and a special Hugo
Gernsback book "The Sky Buddy Saga" - 26 pages
about this receiver.

Reduced to $129.00 plus shipping.

Picture and details here:

1434. FS: 50 MHz Linear Amplifier, AM-1180/GRC

Yahoo group: hamstuff
Date: 2011-02-26 22:01:17 UTC
From: Bry Carling
Topic: 1434 Message: 1434

FOR SALE: 50 MHz Linear Amplifier, AM-1180/GRC

250 watt linear amplifier - conservatively rated.
Designed to cover 50-100 MHz, and has 250 Watts max input. Used with
T-302/PRC transmitter. Complete with 4X150A tube and everything needed
except the bottom cover is missing. Excellent condition, Easily modified to
run more power with a 4CX250 as W4DEX has done. Simple, basic, military
workhorse amplifier. Easy to get at everything internally and not a huge unit.
Needs external power supply approx: 1250V DC at 200 mA, and 6V AC at
2.5 A
Uses N connectors for RF in and out. Dimensions: 12" X 6.25" X 13.5" deep.

Pictures and details at:
http://www.af4k.com/radios.htm

Yahoo group: hamstuff
Date: 2011-02-26 22:22:01 UTC
From: Bry Carling
Topic: 1435 Message: 1435

FOR SALE: Heathkit HR10B Receiver

Covers the amateur bands, 80 through 10 meters. Each band is separately calibrated on a large easy-to-read slide-rule dial. The dial is illuminated and provides about 6 inches of bandspread for each band.

The receiver features a signal strength "S" meter, a front panel dial calibration control that operates in conjunction with the 100 kc crystal calibrator provisions (optional), a tuned RF amplifier stage, a crystal filter (2 pole), and an automatic noise limiter circuit. It was introduced in 1968 as color-upgrade successor to the HR-10 introduced in 1961. Coverage is ham-band only. The HR-10B color matches the DX-60B transmitter while the HR-10 matches the DX-60. A review of the HR-10 can be found in the July 1963 QST magazine. A clear copy of the schematic diagram is included.
Available for $115.00 plus shipping

I also have a nice little Heathkit external speaker that would work nicely with this receiver for another $15.00

1441. REDUCED: Drake TR3 Transceiver

Yahoo group: hamstuff
Date: 2011-03-05 14:15:54 UTC
From: Bry Carling
Topic: 1441 Message: 1441

FOR SALE: Drake TR3 Transceiver

The R. L. Drake model TR-3 is an SSB-CW-AM transceiver designed for the transmission and reception of upper and lower sideband signals on the 80 through 10 meter amateur bands. AM and CW capabilities are included.

Ideal for both fixed station use in conjunction with the model AC-3 or AC4 120 volt AC Power Supply, or for mobile installations using the DC-3 or DC4 12 volt DC Power Supply.

The 300 watt PEP input on SSB enables the TR-3 to give an excellent account of itself barefoot and it will drive the highest powered ham linear amplifiers.

Upper and lower sideband selection is accomplished by switching between two Drake designed and manufactured 9 MC crystal lattice filters with 2.1 kc pass-bands. Among the other features included on the TR-3 are VOX and PTT, shifted carrier CW, separate RF and AF gain controls, linear permeability tuned VFO with vernier scale, transmitting and receiving AGC, and separate receiver S-meter and transmitter plate ammeter. The addition of the accessory RV- 3 remote VFO speaker combination enables the operator to receive, transmit or transceive throughout the band being used without disturbing the setting of the TR-3 tuning dial. This is useful for working DX stations operating outside the United States Phone Bands, or for working near your own frequency in search of a clear spot under crowded band conditions.

FREQUENCY COVERAGE: Full coverage on all amateur bands 10 thru 80 meters, in seven 600 k c ranges ; 3.5-4.1 mc, 7.0 to 7.6 mc, 13.9 to 14.5 mc, 21 to 21.6 mc, 28 to 28.6 mc, 28.5 to 29.1 mc, 29.1 to 29.7 mc.
bullet LINEAR PERMEABILITY TUNED VFO: Tunes 4.9 to 5.5 mc for all ranges, 9 mc I.F. minus VFO range overs 80 meters, 9 mc I. F. plus VFO range covers 20 meters. VFO and crystal oscillator heterodyned in premixer for 40, 15, and three 10 meter ranges.
bullet
DIAL CALIBRATION: 10 kc divisions on main tuning dial and interpolation to 1 kc on tuning knob skirt . Effective length of circular dial scale is over 14 inches.
bullet
FREQUENCY STABILITY: High stability permeability tuned VFO tunes same range on all bands . Drift is less than 100 cycles after warm-up, and less than 100 cycles for plus or minus 10% line voltage change.
bullet
FRONT PANEL CONTROLS:
bullet Main Tuning has fluted knob with adjustable 25 division skirt. Tunes VFO and rotates main dial.

bullet RF Tune tunes the RF circuit common to receiver RF amplifier and transmitter driver stages. 0-10 scale.
bullet Plate and Load tuning adjust pi-network capacitors in transmitter for proper resonance and loading on each band.
bullet Band switch selects desired ham band (see frequency coverage).
bullet Function switch has four positions CAL, SSB, X-CW, X-AM. CAL operates built-in 100 kc crystal calibrator for accurate setting of main tuning hair line indicator and knob skirt SSB provides SSB operation, either VOX or PTT, and is receive position for SSB, CW, and AM. X-CW (transmit CW) inserts carrier , converts `Xmtr Gain´ control to carrier injection for tuning and CW transmitting. X-AM (transmit AM) inserts carrier and screen modulator for AM transmitting.
bullet XMTR GAIN functions as mike audio gain on SSB and AM, and as carrier injection control on X-CW for tune and CW.
bullet RCVR GAIN knob controls receiver AF gain and power ON-OFF switch. Lever behind knob controls setting of RF gain.
bullet Sideband switch in conjunction with indicator lights marked Upper and lower selects desired sideband by connecting into the circuit either the upper or lower sideband filter.

There is no power supply with this radio.

1446. Transceivers, Power Supplies, Mics, DSP Filter FS

Yahoo group: hamstuff
Date: 2011-03-25 13:00:41 UTC
From: Ken Simpson, W8EK
Topic: 1446 Message: 1446

Several Transceivers, Power Supplies, Desk Microphones,
and DSP Filter For Sale:

Icom IC-746 Pro, 160 thru 2 meter Multi mode transceiver:

The Icom IC-746 Pro covers 160-10 meters plus 6 and 2 meters
all mode. 100 Watts of output is available on all bands - HF,
50 MHz and 144 MHz, making the IC-746 Pro a practical choice
for all-around base station use. The die-cast aluminum chassis
and a large cooling fan help to stabilize the PA circuit,
providing 100% full duty cycle operation. The new Pro version
features 32 bit floating point DSP and 24-bit AD/DA converter.
There are NO more expensive optional filters to buy. The
digital IF filter allows one to select 51 filter bandwidths.
There are three user selectable filter memories per mode.
Soft and sharp filter shapes can be selected in both SSB and
CW modes independently. You can also change the settings on
the fly and compare! For repeater operation theres is a
built-in tone encoder and decoder with 50 CTCSS and 108
DTCS based tones. There is even a built-in Baudot RTTY
demodulator.

It has 100 alphanumeric memories, digital RF speech
compression, spectrum display, Manual and Automatic Notch,
digital Twin PBT, Noise Blanker, CTCSS encode/decode, APF,
two stage preamp, automatic antenna tuner and electronic
keyer. A built-in automatic antenna tuner operates on the
HF bands plus 6 meters. The 746 Pro requires 12 VDC at 23
amps. It is 11.3 x 4.8 x 12.5 inches in size and weighs
20 Lbs. See the May 2002 issue of QST for a review of
this radio.

Features
* Spectrum Scope
* 102 Memories
* RIT/XIT
* Digital Noise Reduction
* Manual and Automatic Notch
* Digital Twin PBT
* Dual Display
* 100 Watt Output
* 40 Watt Output (AM)
* Digital RF Speech Compressor
* Microphone Equalizer
* Monitor Transmit Audio
* SWR Plotting

* Built-in Automatic Antenna Tuner 180-6 Meters
* Full Break-In CW
* SSB/CW Synchronous Tuning
* 100% Duty Cycle
* Rx Antenna Jack
* 32 bit DSP
* 1 Hz Readout
* 4 Channel Memory Keyer
* RF Attenuator 6/12/18 dB
* RTTY Demodulator
* CW Pitch and CW Reverse
* Adjustable Transmit Bandwith
* Triple Band Stack Registers

This one works 100% as best I can tell, and looks close to the same. I can not find a scratch on it. With paper work for $1050.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one is in exceptional condition. It also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Icom PS-125 Switching 25 amp power supply
The ICOM PS-125 switching power supply provides 13.8 VDC, at 25 amps. The output cord has the Molex plug prewired for many Icom radios such as the IC-746Pro (above), or any of the rigs (including Kenwood and Yaesu) that require the heavy duty 6 pin molex connector. It is 4.4 x 3.7 x 11.3 inches in size and weighs under 7 pounds. With paper work for $135

Shure 444 D Dual Impedance Desk Microphone:

The Shure 444 D has voice shaping built in to it, providing greater articulation at communications frequencies. Of course it has a PTT switch on the base, that can be used as a momentary switch, or can be locked in position. Also under the base are switches for High or Low Z. It also has a switch for VOX or PTT under the base.

This mic is the black color, has a coiled cord, and is in very nice shape. It works fine, and looks great. It presently has stripped and tinned ends, ready to add the connector of your choice.

With paper work for $75.

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome
tube coming up from the middle. Standard 5/8 inch threaded. $15

Timewave DSP-599zx DSP Processor / Audio Filter:

Calling it an audio filter does not tell the whole story.
It is really much more. It represents the latest generation
of Digital Signal Processing (DSP) audio filtering, incorporating
the newest high speed CPU. The LCD display, push buttons and
Visible Memory let you see the exact settings of the filters.
The DSP-599zx works in all modes. It is a dream for the non-voice
modes, as well as voice and CW modes. Data filters supported
in the filter are RTTY, Amtor, PACTOR, G-TOR, HF Packet, SSTV,
WeFax, SITOR and Clover. It needs 13 V DC at 1 amp.

This particular unit works fine and looks very nice. A wall
wort power supply and paper work are included for $300.

I also have many other accessories available such as many
different types of microphones, wattmeters, keyers, and many
other ham accessories. Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1449. Many HT Accessories FS

Yahoo group: hamstuff
Date: 2011-03-31 13:17:49 UTC
From: Ken Simpson, W8EK
Topic: 1449 Message: 1449

Many HT Accessories For Sale:

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge
like new. $22

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

Icom BC-110 A Wall Wort Charger:
It produces 12 V DC at 200 ma.
I am not sure of all the units that use this charger. I know
it is used by many of the aircraft HTs, and also to charge the
R-10, T2H, T7H, T70, T80AD, T90A, T91A, T92AD, W32A, and I am

sure others. Apparently it is also known as a BC-167 in
addition to BC-110 A. This is NOT one of the switching units,
so you will not have RFI from this one.
This one works fine and appears very close to new.
Icom charges almost $40 for this. Buy this one for $15.

Icom batteries and DC accessories:

Icom DC-25
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24
battery packs. It takes 13 V DC (such as from a cigarette
lighter), and converts it to the 9.4 V DC voltage needed for
the HT. It is used in place of a battery. This one works
fine and looks fine. $20

Icom BP-21
This battery pack is DEAD and sold for rebuilding, building
a DC converter, or whatever. $10

Icom BP-22
This battery pack is DEAD and sold for rebuilding, building
a DC converter, or whatever. $10

Icom MB-20 Belt clip
This belt clip is used on the Icom µ 2AT series of HTs, and
probably on others as well. This one appears to be new,
with hardware, still in its original plastic bag. $10

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - About 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

Full size SMA for 2 meters and 440 MHz
This is a very flexible antenna that is a quarter wave on

both 2 meters and 440 MHz. $20

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. $25

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood BH-3 belt clip and hardware for Kenwood TH-21 / 31 / 41 series HTs. $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries

for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

DEAD Kenwood PB-21 battery pack
This battery pack is used on the TH-21 series HTs. This one is
dead, but can be used for rebuilding. It is in good physical
condition, with no cracks. $10

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for TR-2500, TH-205, TH-215, and many others
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Icom MB-20 Belt clip
This belt clip is used on the Icom µ 2AT series of HTs, and probably on others as well. This one appears to be new, with hardware, still in its original plastic bag. $10

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Duplexer / Diplexer :

This unit is designed to split transmit and receive signals between the 2 meter and 440 MHz bands. Some rigs have only one output connector; you may want to use separate antennas for 2 meters and for 440 MHz. Or, you might have a combination 2m/440 MHz antenna, and your rig has two outputs. This unit can be used either to combine or separate the two bands.

Maldol HS-770
2 m and 440 Mhz ports have a foot long coax with PL-259 connectors. Common is a case mounted SO-239 connector. It works fine and looks good as well. $50

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $36

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $35

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

I also have many other items, including HF rigs, power supplies, microphones, and other items too numerous to list. Please let me know what you need. I might have it.

Prices do not include shipping from Florida.

Thanks.

1450. Microphones FS - Desk, DTMF, HT Speaker Mics, Mic accessories

Yahoo group: hamstuff
Date: 2011-04-02 13:26:25 UTC
From: Ken Simpson, W8EK
Topic: 1450 Message: 1450

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and Microphone Stands and other Microphone Accessories

Desk Microphones:

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Shure 444 D Desk Microphone:

The Shure 444 D has voice shaping built in to it, providing greater articulation at communications frequencies. Of course it has a PTT switch on the base, that can be used as a momentary switch, or can be locked in position. Also under the base are switches for High or Low Z. It also has a switch for VOX or PTT under the base.

This mic is the black color, has a coiled cord, and is in very nice shape. It works fine, and looks great. It presently has stripped and tinned ends, ready to add the connector of your choice.

With paper work for $75.

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has stripped and tinned ends. Nice condition. $35

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $36

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Viking 2000, Model 709
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. $35

Regular Hand Microphone:
This one says Midland on the front, but no model number
given. It has a transformer inside, so it can be used for
either Hi Z or Low Z. Stripped and tined leads. $25

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5. Excellent condition. $10

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706 $15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that attaches to the mic stand and holds the mic. It includes the chrome screw/bolt, and looks like new. Ideal if yours is broken. It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

Thanks.

1451. Reduced: RF Tank Coils

Yahoo group: hamstuff
Date: 2011-04-08 12:52:40 UTC
From: Bry Carling
Topic: 1451 Message: 1451

Reduced - RF Tank Coils for sale.

Group of 4 useful RF power amplifier tank coils, suitable for QRO applications etc.

GROUP OF 4 TANK COILS

Here are four surplus RF tank coils. Two are plug-in,
jackbar types with center tap and coupling coil. One has
the banana plugs missing but these are easy to replace
with standard banana plug parts. The other two comprise
a ceramic coil, and a phenolic core coil.

Available for $9.00 each or will sell all four for
$30.00 plus shipping.

1453. REDUCED: Military Sirplus VHF power amplifier

Yahoo group: hamstuff
Date: 2011-04-09 20:30:36 UTC
From: Bry Carling
Topic: 1453 Message: 1453

REDUCED: MIlitary Sirplus VHF power amplifier
VHF Linear Amplifier, 50 - 100 MHz, AM-1180/GRC

This military surplus workhorse was designed to cover 50-100 MHz, and the power level is officially 250 Watts max input. Great for 6 meter DX. It was originally
used with the T-302/PRC transmitter. Complete with 4X150A tube and everything
needed. Excellent condition, Easily modified to run more power with a 4CX250B
tube as W4DEX and others have done. Simple, basic workhorse amplifier. Easy to
get at everything internally and not a huge size. Needs power supply of approx:
1250V DC at 200 mA, and 6V AC at 2.5 A. You could sSimply add a regulated
screen supply for all-mode linear amplifier operation. Uses N connectors for RF in
and RF out. Dimensions: 12" X 6.25" X 13.5" deep.

Was $115.00

Now available for $75.00 plus shipping

Picture and details at:

http://www.af4k.com/radios.htm

73 and thanks for looking at this electronic marvel!

From: Bry Carling
Topic: 1454 Message: 1454

FOR SALE: RCA All-American Five Receiver

This is going to look great on the bedside table - a dear old bakelite 1940s receiver by RCA. This All-American Five Receiver covers 550 kHz to 1700 kHz.
The radio is complete and in good condition, and the
case and knobs are fine,
except for a smallish crack in the top. Should be easy to repair.
The receiver is available for only $15.00 plus shipping.

Picture and details at:
http://www.af4k.com/radios.htm#RCA

1455. FS: LAFAYETTE HA-600 RECEIVER

Yahoo group: hamstuff
Date: 2011-04-10 11:36:42 UTC
From: Bry Carling
Topic: 1455 Message: 1455

FOR SALE: Lafayette HA600 Amateur Bands Receiver

This is a nice amateur bands communications receiver. Covers 80/75m,
40m, 20m, 15m, 10 AND 6 meters.
Many young radio enthusiasts in the early 1970s saved up all their pay from
mowing lawns to buy one of these and then used it as their first novice
receiver.
Model is 99-2595WX. This was the later model of these type receivers and
it has significant improvments over earlier versions.
Requires an external speaker. Modes AM/SSB and CW. Coverage 80 - 6m.
Produced 1970-1975. Comes with a handy digital PDF copy of the manual.
Excellent, like-new cosmetic condition, looks beautiful. One knob is not
original. Looks like new otherwise.

Available for $89.00 plus shipping

Pictures and details at:
http://www.af4k.com/radios.htm#HA600

1456. HF Antennas and related items FS

Yahoo group: hamstuff
Date: 2011-04-12 15:10:45 UTC
From: Ken Simpson, W8EK
Topic: 1413 Message: 1456

HF Antenna related items For Sale -- Vertical antennas,
SWR Bridges, Low Pass TVI Filter, Connectors and more

Hustler 4BTV "Base station" HF vertical antenna

The 4BTV covers 10, 15, 20, and 40 meters.
It can also cover 75/80 meters by using an RM-80 S resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. Penetrox was used on the original
assembly, so it comes apart easily.

Paper work is included. but connection points are well marked
for easy reconstruction. $120

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a minivan, or it can be broken down
more to go inside a car. It is possible to ship it, but the
cost is high due to it being oversize. Obviously, shipping
is not included in the price.

Solarcon A-99 vertical antenna:

The Solarcon A99 is a half wave over a quarter wave variable
mutual inductance antenna for 10 to 17 meters. It features
the Solarcon twin ring Adjust-A-Match system to obtain the
optimum SWR. Simply raise the rings to raise the frequency
or lower the lower rings to lower the resonant frequency.
The rugged three-piece white fiberglass construction features
triple plated brass fittings.

This antenna is 17.75 feet high. It has 3 dBi gain and the
power limit is 2000 watts. It accepts a PL-259 and mounts on
a 1.5 inch mast.

This particular unit is in good condition, with no corrosion.
With paper work for $50.

Pick up of this antenna near Ocala, FL, just off of I-75 is
preferred. It could be shipped, but it is long enough that
it may be considered oversize. Shipping is not included in
the price.

SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $40.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors and include paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
It looks very close to new. $40.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

"N" Connector - Double Male - $8

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Reduced: HALLICRAFTERS SX101 AMATEUR BANDS RECEIVER

AM, CW and SSB coverage of the 80m through 10m ham bands with slide rule dial.
Excellent - many extra features including noise blanker etc.
Designed for rack mount, and hence no cabinet with this one. One knob is missing.

The main dial and knob are in good condition. It has been re-capped and is in overall decent condition. Normally supplied with the calibrator but will sell without to save someone money. Easily mounted in a standard rack cabinet with front opening measurement of 19" width.

Let me make it cleart that this receiver normally came with the 100 kHz crystal calibrator.
Will sell without the calibrator for anyone who so desires, for an even further reduced price, as shown bleow.

If left over, the calibrator will be available for $29.00 plus shipping.

SX101A Now available without calibrator for $75.00 plus shipping
SX101A with calibrator for $95.00 plus shipping

FOR SALE:

Isolation transformer 115V AC to 115V AC at 500 watts.
Also has taps for 10V, 14V and 22V. Conservatively rated.
With power on-off switch, cables and IEC adapters for receptacles.
Like new. Available for $25.00 plus shipping.

Crystal ovens - octal style, brand new 6.3V power needed. Hold two
type hc6u metal can crystals. Brand new. Picture available.
QTY 15 available for $5.00 each or buy ALL 15 for $50.00

Group of RF chokes:
QTY 12 of 0.5 mH rf chokes at 50 mA plus.
QTY 26 of 0.35 mH rf chokes at 50 mA plus.
These are all brand new with full length leads, great for homebrew
applications.

Group of antique radio dials 2 (they look like Johnson? Hallicrafters?)
and knobs 5 - again they are special, no doubt. Two are brand new,
rare knurled knobs made for those variable capacitors with the 3/8"
diameter shaft. Picture and details available on web site below.
Will sell this group for $20.00 plus shipping

TO-3 heat sink - like new. Hold a single TO-3 device such as a 2N3773
power transistor etc.
Finned aluminium heatsink with dimensions: 4-1/2" X 3-5/8" X 2-1/2"
Includes mounting hardware. Available for $1.00

QTY 10 crystals on 25.000 MHz - surface mount. Ears that are
easily soldered to with standard non-smd soldering equipment and
wires.
Will sell all 10 for $2.00 plus shipping

Box of new old stock silicon power transistors and hardware
All ne win packages, Includes:
SK3024, ECG175, 2N3053 (HEP), 1N645, a small audio transformer,
Six RCA 40511 power transistors in boxes. Also a 7.5V - 10 watt
zener diode, plus some electrolytic capacitors, resistors, a large
bag of mixed, new and used transistors, a box of 5 amp cartridge fuses,
two "F" connector high pass filters, etc. etc.
Entire box of goodies for $12.00 plus shipping.

I will post some of the pictures soon at:
http://www.af4k.com/miscpart.htm

First come, first served.

Thanks for reading,

Yahoo group: hamstuff
Date: 2011-05-12 02:13:16 UTC
From: Bry Carling
Topic: 1466 Message: 1466

For sale: MFJ-40T QRP Transmitter for 40m CW.

Has three crystal positions, and VFO input. 3-position switch selects
frequency source to the front socket or the two internal crystal sockets.
Uses standard FT243 crystals. Or plug in a VFO to the front panel phono
jack. 50 ohm output. Requires 9 to 12 V DC power.

Comes one 40m crystal and the operating info sheet plus schematic diagram.
Optional additional crystals available also.

Picture here:
http://www.af4k.com/imag/ham/343045.jpg

Available for $32.00 plus shipping

1468. REDUCED: Two 250 watt "Variacs"

Yahoo group: hamstuff
Date: 2011-05-12 11:05:52 UTC
From: Bry Carling
Topic: 1468 Message: 1468

REDUCED:

Two 250 watt variacs - Each designed for 0 - 250 V AC at 1 amp, 60 Hz.
Can be used at 120V AC also.

These are conservatively rated and can probably handle 1.5 to 2.0 Amps at 120V easily.
They are three terminal, open frame Powerstat variable transformers with 1/4" shaft.
One has a knob.

Now available for $22.00 each plus shipping

[Non-text portions of this message have been removed]

1473. FS: Slatboard Transmitter

Yahoo group: hamstuff
Date: 2011-05-19 23:17:42 UTC
From: Bry Carling
Topic: 1473 Message: 1473

FOR SALE: Slatboard Transmitter
Beautiful homebrew device built by WD4NKA. Uses hardwood and angle aluminum for a fine, compact chassis. Most parts in this are new.

Has silver mica capacitors, two large RF chokes. Nice ceramic 140 pF variable capacitor, two large RF chokes, 30 pF trimmer cap and a 3" diameter copper tank coil. Appears to be for a 6V6 or 6AG7 etc. - tube missing. Includes key terminals, (binding posts) - barrier strip marked for B+, Ground and filament power connections.

(Crystals and a Power Supply are available separately.)

Will sell for $25.00 plus shipping.

Send for pictures.

1474. FS: Two tube type power supplies etc...

Yahoo group: hamstuff
Date: 2011-05-19 23:44:37 UTC
From: Bry Carling
Topic: 1474 Message: 1474

FOR SALE: Two tube type power supplies etc. etc.

POWER SUPPLY NUMBER ONE:
First is a homebuilt 117V AC, slat-board style station power supply, built by WD4NKA and appears to match the little transmitter mentioned earlier. It has a nice, large AC power transformer that willl supply way more power than needed for just the little transmitter. Secondaries are 750V c.t. at about 200 ma, 6.3V, 5V etc.
This is also slat board construction, with hardwood, and aluminum angle stock.
Has fuse, ON-OFF switch with knob, 6X5 rectifier, two VR tubes and two
40 uF at 450V DC Mallory FP style can capacitors.

Has barrier strip output terminals marked for B+, Filament and Ground.

Available for $25.00 plus shipping.

POWER SUPPLY NUMBER TWO:
117V AC primary, B plus and 6.3V AC supply. 445V c.t. AC at about 100 mA.
This is a commercial or surplus supply on a compact chassis. Suitable for QRP xmtr or for a use with receiver. It has two 20 uF at 350 WVDC can capacitors, and a 6X% rctifier plus a regulator tube.

Available for $19.00 plus shipping.

More power supply components:
TWO AEROVOX Electrolytic plug-in capacitors (Octal Sockets) each is 10+10+10 uF at 450 WVDC.
Will sell the pair for $5.00

High Voltage POWER SUPPLY Board. Has FIVE 100 uFD at 450V capacitors in series for 20 uF at 2250 WVDC, and also has balancing / bleeder resistor across each one - These are each 50 kilohms at 20 watts. All new parts mounted on a nice phenolic board with mounting hardware. Picture available on request.
Available for $16.00 plus shipping.

Coming soon - s0me antique knobs, dials, transmitting and receiving tubes etc.

73 & Thanks for looking!

From: Bry Carling
Topic: 1475 Message: 1475

FOR SALE: Antenna Selector Switches

1) Phasing switch used for selecting XMTR - AUX - HORIZONTAL - VERTICAL
Has four SO-239 connectors. Perhaps used with a Moonraker or similar
antenna. $5.00 plus shipping

2) OLSON 2-way coaxial antenna switch - with three SO-239 connectors for
ANT 1, ANT 2, and radio. Slide switch. Very good condition. $5.00 plus shipping

3) WATERS Coaxial Selector Switch with faceplate and mounting hardware.
This is a 5 position switch with SO-239 connectors and a grounding position to help
protect the antennas. Available for $20.00 plus shipping

4) WATERS 2-way Coaxial Selector Switch with faceplate. This is a 2 position switch
with FOUR SO-239 connectors (interestingly!). Available for $16.00 plus shipping

5) PACE 3-position coaxial switch. Model 5621 it is 1KW rated. Has 4 SO-239 connectors.
Available for $10.00 plus shipping

6) DOWKEY COAXIAL Antenna Selector Switch model DK78-2. Two positions with
faceplate. Ultimate in beautiful antenna switches. Excellent condition.
Built like a tank. Available for $30.00 plus shipping

7) Homebrew 2-way coaxial antenna switch - with three SO-239 connectors for
ANT 1, ANT 2, and radio. Rotary selector switch.Good condition. $3.00 plus shipping.

1481. FS: Tube type preamp with tone controls

Yahoo group: hamstuff
Date: 2011-05-27 21:21:04 UTC
From: Bry Carling
Topic: 1481 Message: 1481

FOR SALE: Tube type preamp / tone controls.

Here is a cool "signal processor" of sorts.

It has those screw-on coaxial mono audio connectors of yore, usually used for mic level signals.

Has two tubes, 6SQ7 and 6SN7. Two Allen Bradley pots with black "chicken head knobs" for bass and treble cut-boost, and has beautiful construction using cloth-covered wire. No AC supply on board but DOES have a dual 20 uF + 20 uF at 450V DC can capacitor. Requires about 250V DC at 25 mA and 6.2V AC at 1A. Includes numerous capacitors and carbon composition resistors.

Small aluminum chassis dimensions: 6.5" X 5.5" X 1" tall.
Overall 4" tall with parts. Pictures available on request.

Available for $15.00 plus shipping.

Thanks & 73 de AF4K, Bry

1488. HF Rigs, Desk Mics, Coax Switches, Wattmeters FS

Yahoo group: hamstuff
Date: 2011-06-11 12:41:48 UTC
From: Ken Simpson, W8EK
Topic: 1488 Message: 1488

HF Transceivers, Power Supply, Desk Microphones, Coaxial
Antenna Switches, Wattmeters and SWR Bridges For Sale:

TenTec 561 Corsair II, HF transceiver:

Many consider the Corsair to be the best rig that TenTec
ever made, before the Orion or Eagle. It is not a
synthesized rig, so phase noise is virtually nonexistent.
This means that it has a really superb receiver that is
far better than most of the Japanese rigs. It covers 160
thru 10 meters, including the WARC bands, and has such
things such as band pass tuning, notch filter, QSK, noise
blanker, etc. It has 8 pole filter in the 9 MHz IF, for
additional selectivity. It has up to 100 watts output,
with front panel adjustment for QRP, and is all solid
state. It also has a built in keyer.

Electrically, everything works 100%. It is an exceptional
performing unit. The PTO is smooth and works great.
Cosmetically, it is also in great condition. No defects
that I can find. Manual is included for $550.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one is in exceptional condition. It also has the
Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that

matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $175

TenTec 705 desk microphone
This electret desk mic has the PTT and "hold" buttons.
It works great, and looks close to new.
With paper work for $75.

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Coaxial antenna switches:

B & W CS-3 G "Protax" (formerly called Model 593)
This is a 3 position antenna switch with the four SO-239 connectors coming out the back of the rectangular enclosure. It does ground all unused connections.
This one works fine and looks like new. With paper work for $30.

B & W CSR-5 G "Protax" (Formerly known as Model 376)
This is a five position antenna switch with the six SO-239 connectors coming out of the switch like the spokes of a wheel. Unused connections are grounded.
This switch is in its original box, with paper work, and appears unused. These go for about $75 new. Buy this one for only $55.

B & W Model 550 G coax switch
This model will switch up to 5 antennas, and DOES ground unused antennas. It has SO-239 connectors on the sides, with the coax coming out like spokes of a wheel. It is in good condition and works fine. Mounting bracket is included for $30.

Wattmeters:

Dentron W-2 Dual Meter HF Wattmeter:
This wattmeter has two separate meters and is designed for use on the HF bands (1.8 to 30 MHz). It has full scale readings of 2000 Watts and 200 Watts. It has a separate sensor that can either be used remotely, or can be attached to the enclosure for a more compact unit. It is in a nice black enclosure that will match most ham gear.
This one works fine, and looks very close to new. No scratches, dents, or dings.
With paper work for $75.

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a remote pickup sensor with about 3 feet of cable to the dual meter control head. It reads both SWR and forward watts at the same time, on the dual meters, which are fairly large. This one is in extremely nice, close to new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out. This particular meter works great, looks great and includes paper work for $45.

SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so are ideal for the new rigs with 6 meters and 2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $40.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1489. Coaxial Antenna Switches, Wattmeters, FS

Yahoo group: hamstuff
Date: 2011-06-18 15:00:00 UTC
From: Ken Simpson, W8EK
Topic: 1489 Message: 1489

Coaxial Antenna Switches, Wattmeter/SWR Bridges For Sale:

Coaxial antenna switches:

B & W CS-3 G "Protax" (formerly called Model 593)
This is a 3 position antenna switch with the four SO-239
connectors coming out the back of the rectangular enclosure.
It does ground all unused connections.
This one works fine and looks like new. With paper work
for $30.

B & W CSR-5 G "Protax" (Formerly known as Model 376)
This is a five position antenna switch with the six SO-239
connectors coming out of the switch like the spokes of a
wheel. Unused connections are grounded.
This switch is in its original box, with paper work, and
appears unused. These go for about $75 new. Buy this
one for only $55.

B & W Model 550 G coax switch
This model will switch up to 5 antennas, and DOES ground
unused antennas. It has SO-239 connectors on the sides,
with the coax coming out like spokes of a wheel. It is
in good condition and works fine. Mounting bracket is
included for $30.

Wattmeters:

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a
remote pickup sensor with about 3 feet of cable to the
dual meter control head. It reads both SWR and forward
watts at the same time, on the dual meters, which are
fairly large. This one is in extremely nice, close to
new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter.
SO-239 connectors in and out. This particular meter works
great, looks great and includes paper work for $45.

SWR Bridges:

Both of these SWR Meters will operate from 160 thru 2 meters, and have an SO-239 connector on each end.
All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2

This SWR Bridge features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement.
It works fine and looks great. With paper work for $40.

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
Covering HF, 6 meters, and 2 meters, it is ideal for the new rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.

1490. REDUCED: Midland SWR / Power Meter

Yahoo group: hamstuff
Date: 2011-06-20 12:37:10 UTC
From: Bry Carling
Topic: 1490 Message: 1490

For Sale: Midland 13-126 SWR Meter

Gives accurate SWR readingsand relative FWD/REF power readings on
any 50 ohm antenna system using two standard SO239 connectors.

This is the one one that we ALL used in the 1960s! Rebuild your novice station just like the old days.

This one looks brand new and comes with the original box. Similar to the one pictured here, only better:

http://www.mudman98.com/Maintenance/SWR/SWR2.JPG

Available for $22.00 plus shipping.

73 - Bry, AF4K

1493. REDUCED: Group of Six Military radio ham band crystals

Yahoo group: hamstuff
Date: 2011-06-22 11:14:35 UTC
From: Bry Carling
Topic: 1493 Message: 1493

REDUCED:

GROUP OF USAF military aircraft crystals for 40m amateur band.
Most are marked "862nd USAF"

QTY 6 type CR-1A/AR same as HC-11/U crystals (rare) -

7028 kHz (QTY 2)

7039 kHz (QTY 3)

7128 kHz (QTY 1)

Will sell the whole group for $36.00 plus shipping

Similar to picture seen here:
http://farm6.static.flickr.com/5068/5645540051_50204276ec_b.jpg

Dimensions: CR-1A/AR - Crystal Unit 1-1/8" wide X 3/8" X 1-1/8" tall.
Pin spacing 1/2" and pin diameter 1/8" X 11/16" long
Used in a variety of military radios,
Overall Size: 1.125" wide X 0.375" X 1.125" high.
Pin spacing 0.5" and pin diameter is 0.125" X 1.0625" long

Thanks for looking - 73 & good DX!

1495. Digital Interfaces and related items FS

Yahoo group: hamstuff
Date: 2011-06-24 12:22:35 UTC
From: Ken Simpson, W8EK
Topic: 1495 Message: 1495

Digital Interfaces and related items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor, ASCII, CW, etc. It has version 7 firmware, which I think is the latest. It includes Pactor in it. It works fine, and looks very close to new. The large, inch thick manual is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc.
This is a "regular" wall wort -- not the new switching type that creates all sort of noise in your receiver. Get this one, and leave the noise behind. $14

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 phone patch / digital interface
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as

an interface for PSK31, and other digital modes that use
a sound card. The meter makes it great for setting levels.
This one is all original. It is in excellent condition.
Cosmetically, I can not find a scratch on it.
Paper work included for $25.

Heath HD-15 as above, but shows slight wear. $22

I also have parts from an HD-15 donor unit available.
Please let me know what parts you need.

Books related to digital modes:

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

ARRL Your Packet Companion
by Steve Ford, WB8IMY; like new. $8

ARRL Specialized Communications Techniques
1975, First Edition, $15

ARRL Learning to Work with Integrated Circuits,
First edition $10

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

Ham CD:

Ham Exams
Software for studying for Tech, General and Extra Class License
exams. It also includes Morse Code Software, plus a variety of
other nice ham programs, including digital programs. $15

MFJ 484 C "Grandmaster" Memory Keyer:

MFJ 484 C "GrandMaster" Keyer with Memories
This keyer has a built in sidetone, with volume and tone
adjustable on the front panel. Speed and weighting are
also adjustable from the front panel.
It has 4 large memories. You may install a 9 volt battery
to preserve memory contents during a power failure. It can
be powered by either a 9 Volt battery, a 9 V DC wall wart,
or your station 12 V DC power supply.

It is a nice eggshell white and wood grain enclosure that matches the TenTec KR-2 paddle. This one works fine and looks great.

With paper work for $55.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1496. Mobile FM Rigs, Dual Band HTs FS

Yahoo group: hamstuff
Date: 2011-06-26 13:21:09 UTC
From: Ken Simpson, W8EK
Topic: 1496 Message: 1496

Dual Band mobile FM transceivers, 2 meter FM transceivers,
and Dual Band HTs, For Sale:

Kenwood TW-4100 A, Dual Band mobile FM transceiver:

The Kenwood TW-4100A is a high powered dual-band transceiver
providing 45 watts on 2 meters and 35 watts on 70 cm (440 MHz).
A low power setting of 5 watts may also be selected. Ten memories
with offset recall and lithium battery backup are provided. There
are separate antenna output jacks on the back panel for 2 meters
and 440 MHz. It is supplied with an MC-48, 16 key DTMF hand mic,
mobile mounting bracket and DC power cord. Requires 13.8 VDC at
7.5 amps.

Features
* 10 Memories
* Scanning
* Priority Watch
* Lithium battery backup
* Frequency Lock
* Auto Repeater Offset
* Large LCD Display
* MC-48 DTMF Microphone with up/down switches

This particular unit works great and looks fine. It has a
subaudible tone encoder added where the speaker would normally
be. That means that an external speaker needs to be used with
it.

With DTMF Mic, tone encoder, mobile bracket, power cord, and
paper work for $160.

Icom IC-228 H, 45 watt 2 meter mobile transceiver:

The Icom 228H is a 45 watt 2 Meter mobile FM transceiver.
There is also a setting for 5 watts output when less power is
needed. The multi-colored backlit LCD display is readable
over a wide range of light. This radio has 20 memories and
priority watch. It also has programmed scanning or memory
scanning. This radio requires 13.8 VDC and receives from
138 to 174 MHz. It has a built in tone encoder.

This particular unit works great and looks very close to new.
It is in its original box, with mobile bracket, power cord,
and DTMF Touch Tone Microphone. It even has the bag of misc
hardware that I don't think has ever been opened.

With paper work for $110.

Icom IC-28 H, 2 meter FM mobile transceiver:

The Icom IC-28 H is a well-built 2 meter FM mobile transceiver
providing 45 watts of power. There is also a setting for 5
watts output when less power is needed. The backlit LCD display
is readable over a wide range of light. This radio has 21 memories.
It also has programmed scanning or memory scanning. This radio
requires 13.8 VDC and received from 138 to 174 MHz. It has a
built in tone encoder.

It works fine and looks fine also. No mobile bracket or "extras"
with this one -- just the radio and paper work for $80.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

Covers 110 to 174 MHz in the VHF position, which
includes the AM Aircraft band. 440 to over 480 MHz
in the UHF position. It is my understanding that it
can also be modified to cover into the 800 and 900
MHz region. It will also cross band repeat, and is
a very rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$150

Yaesu VX-3 dual band HT:

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive
frequency coverage, providing local-area two-way amateur
communications along with unmatched monitoring capability.
The VX-3R receives 500-1800 kHz (AM Band), 1.8-30 MHz
(Shortwave), 30-76 MHz (VHF Lowband with 6M), 76-108 MHz
(FM band), 108-137 MHz (Air), 137-174 MHz (VHF with 2M),
174-222 MHz, 222-420 MHz (VHF with 220), 420-470 MHz (440),
470-800 MHz and 800-999 MHz.
You get a 1000 channel memory system, and can enjoy
stereo FM and AM broadcast reception.

Power output with the supplied Lithium Ion battery is 1.5 watts
VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output
jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like new, with no scratches. It has a rubber duck antenna, LiIon Battery and charger in its original box, with paper work all for only $155.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1499. Microphones of many types FS

Yahoo group: hamstuff
Date: 2011-07-01 17:32:45 UTC
From: Ken Simpson, W8EK
Topic: 1499 Message: 1499

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and Microphone Stands and other Microphone Accessories

Note: There are new listings, and also deletions.

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Hand Microphone:

Azden PCM-463
I think this mic was used on the Azden PCS-4000 and probably other Azden rigs as well. It has an up/down switch on it, and a round 8 pin connector. This one works fine and looks very close to new. $35

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. 16 digit touch tone pad. This one works fine, and includes paper work for $40.

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector (TM-201, TM-211, TM-221, TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870, TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN switches and PTT, along with 16 digit touch. This one works fine, and looks close to new. With paper work for $45.

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It has been rewired with a round 8 pin connector for Kenwood. Nice condition. $40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that need 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5. Excellent condition. $8

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that
attaches to the mic stand and holds the mic. It looks like
new. Ideal if yours is broken.
It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of HTs, VHF and UHF rigs, HF and VHF/UHF
antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

1500. FS: Crystal ovens

Yahoo group: hamstuff
Date: 2011-07-02 14:49:45 UTC
From: Bry Carling
Topic: 1500 Message: 1500

FOR SALE: CRYSTAL OVENS

QTY 2 - COMCO Octal OCTAL plug-in type crystal ovens. These are made to hold
TWO hc6u crystals, and include retakner hardware 12 Volt operation.
QTY 2 available for $3.00 each

Shipping additional

I have some other crystal ovens here somewhere. Will hunt for them if anyone is interested.

1502. Wattmeters, TVI Filters FS

Yahoo group: hamstuff
Date: 2011-07-13 22:25:58 UTC
From: Ken Simpson, W8EK
Topic: 1502 Message: 1502

Wattmeter/SWR Bridges, Low Pass TVI Filters For Sale:

Wattmeters:

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a
remote pickup sensor with about 3 feet of cable to the
dual meter control head. It reads both SWR and forward
watts at the same time, on the dual meters, which are
fairly large. This one is in extremely nice, close to
new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter.
SO-239 connectors in and out. This particular meter works
great, looks great and includes paper work for $45.

SWR Bridges:

Both of these SWR Meters will operate from 160 thru 2 meters,
and have an SO-239 connector on each end.
All will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2

This SWR Bridge features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time. They were made in Japan, and
labeled with various names, including Swan, Siltronix, and
Quement.
It works fine and looks great. With paper work for $40.

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
Covering HF, 6 meters, and 2 meters, it is ideal for the new
rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Full Power Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are 50
ohm filters.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. It has paper work.
Bencher currently sells these for about $90. This one is only $60.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Lower power Low Pass Filters:

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is only 100 Watts.
Use this one after your rig, and before
your amplifier. Nice shape for $18.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1509. Crystals FS

Yahoo group: hamstuff
Date: 2011-07-26 15:29:13 UTC
From: Ken Simpson, W8EK
Topic: 1509 Message: 1509

Crystals For Sale:

FT-243, HC-6, etc.:

FT-243 Crystals for 40, 20, 15, and 10 meter ham bands

Crystals can be used at fundamental, or multiplied for
20, 15, or 10 meters. E.g. the 7081 could be used at 7081,
14162, 21243, or 28324 KHz.

7094 (HC-6), 7174 (HC-6), 7175, 7186, 7189, 7198.5 (HC-6),
7200 (HC-6), 7200, 7207, 7225, 7236.2 (HC-6), 7248,
7261, 7283.33 (HC-6), 7325, 7375, 7395, 7400, 7404, 7410,

HC-6 Crystals
These may be used as heterodyning crystals in many
Collins, Drake, Heath, Yaesu, and other rigs.
Freq of crystal in MHz.
7.98, 12.0, 15.0, 16.0, 30.75, 32.5, 39.0, 42.7,
44.5, 46.0, 46.7, 49.9, 51.1,

All crystals above are $8 each.

Crystals for 2 meter ham rigs For Sale:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both
transmit and receive. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the 144 MHz
segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the
solid state 2 meter mobiles and HTs. Please e-mail the operating
frequency you need. I have them listed by operating frequency and rig,
and not by actual xtal frequency. Send the frequencies you need
(transmit or receive), and the rig that you have, and I will see if
I can help. I have cross references for the various rigs, so I will
know what you need if you give the rig. These crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1510 Message: 1510

Dual Band HT and Dual Band mobile FM transceivers;
DTMF Touchtone Microphones, and Speaker Mics, For Sale:

Alinco DJ-580 dual band (2m and 440 MHz) HT:

Covers 110 to 174 MHz in the VHF position, which
includes the AM Aircraft band. 440 to over 480 MHz
in the UHF position. It is my understanding that it
can also be modified to cover into the 800 and 900
MHz region. It will also cross band repeat, and is
a very rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$150

Kenwood TW-4100 A, Dual Band mobile FM transceiver:

The Kenwood TW-4100A is a high powered dual-band transceiver
providing 45 watts on 2 meters and 35 watts on 70 cm (440 MHz).
A low power setting of 5 watts may also be selected. Ten memories
with offset recall and lithium battery backup are provided. There
are separate antenna output jacks on the back panel for 2 meters
and 440 MHz. It is supplied with a 16 key DTMF hand mic,
mobile mounting bracket and DC power cord. Requires 13 VDC at
7.5 amps.

Features
* 10 Memories
* Scanning
* Priority Watch
* Lithium battery backup
* Frequency Lock
* Auto Repeater Offset
* Large LCD Display
* DTMF Microphone

This particular unit works great and looks fine. It has a
subaudible tone encoder added where the speaker would normally

be. That means that an external speaker needs to be used with it.

With DTMF Mic, tone encoder, mobile bracket, power cord, and paper work for $160.

Icom IC-281 H, 2 meter transceiver with 440 MHz receive:

The Icom IC-281H 2 meter mobile FM transceiver boasts 50 watts output plus 440 band receive (440-450 MHz) for full duplex crossband operation. Other features include 60 regular memories, 10 scratch pad memories, 14 auto dialer memories, built-in pager and code squelch functions and auto memory channel advance. The IC-281H is packet ready. A data jack is available for direct TNC connection, supporting speeds up to 9600 baud. It features a huge heat sink. Requires 10.5 amps at 13 VDC.

Features
* 440 MHz Band Receive
* Tone Scan
* 60 Memories
* 10 Scratch Pad Memories
* Scanning
* Call Channel
* 50/10/5 Watts Output
* Auto Power Off
* Priority Watch

This one works 100% and looks extremely nice.
With DTMF Mic, tone encoder, mobile bracket, power cord, and paper work for $150.

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. 16 digit touch tone pad. This one works fine, and includes paper work for $40.

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector (TM-201, TM-211, TM-221, TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870, TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN switches and PTT, along with 16 digit touch tone pad.
This one works fine, and looks extremely nice.
With paper work for $45.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in

the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood. Nice
condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1513. Antennas and related items FS

Yahoo group: hamstuff
Date: 2011-07-30 17:24:54 UTC
From: Ken Simpson, W8EK
Topic: 1253 Message: 1513

Antennas and related items For Sale, such as HF Antenna Tuner, 2 meter and 440 MHz mobile antennas, mobile antenna mounts, VHF Wattmeter, SWR Bridges, HT Rubber Duck Antennas, Coax Connectors, and Low Pass TVI Filters:

TenTec 229 Full Power HF antenna tuner:

This roller inductor tuner will handle full legal power. It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match. The "L" match is also more efficient. Electrically, it is the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.

It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni series (Omni 546, series A, B, and C) with the black vinyl covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect. I can not find a scratch on it.

Paper work is included for $325.

Two meter mobile antennas:

Larsen LM-150, 2 meter antenna
Has 3 db gain on 2 meters.
This coil is still in its original box, & appears to never have been used. It even has its rubber washer with it. Coil only for $20.
Coil, with 4 foot used whip. $29

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $9

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other antenna that requires a 5/16 inch stud. Coax is included for $18.

Buy the LM-150 with 5/8 whip, the 1/4 wave whip, and the
mount for $50.

Larsen VHF and UHF Mobile antennas:

All are in very nice condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.
Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Coil and stacked whip are included. $15

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud. It can be cut for 2 meters,
220 MHz, or 450 MHz bands. $9

UHF (440 MHz) Mobile Antennas:

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $30

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $15

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $25.

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other
antenna that requires a 5/16 inch stud. Coax is included.
Very nice for $18.

Heath HM-2102 VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with 250
and 25 watt scales. It can also be used to check SWR, and

has a remote sensor that can either be left inside the
meter, or separated from the actual meter. SO-239
connectors in and out.

This particular meter works great. It looks very close
to perfect with no defects that I can find.

Paper work included for $50.

HF and VHF SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $40.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Standard length, about 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector. Several of each are
available. It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cable
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, are 50
ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
This one works great, and looks close to new. Bencher
currently sells these for about $90. This one is only $60.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

B & W FL-10/100 low pass filter
Similar to FL-10/1500, except power rating is only 100 Watts.
Use this one after your rig, and before your amplifier.
Nice shape for $18.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1515. FS: Antique radio parts and accessories

Yahoo group: hamstuff
Date: 2011-08-10 11:30:34 UTC
From: Bry Carling
Topic: 1515 Message: 1515

FOR SALE: Collection of 38 antique radio dials, knobs and escutcheon scale plates etc.
Includes two large dials for the amateur bands, Some Collins style knobs,
black fluted knobs, chicken head knobs, a large bakelite 0 - 100 knob etc. etc.
Picture on request.
Will sell all for $25.00 plus shipping.

REDUCED: Midland SWR / Field Strength Meter - new in box.
New old stock HF swr meter in perfect condition, shows
relative power and SWR. Also a useful field strength meter for antenna
measurements. A great nostaligia piece too, for those reconstructing their
1960s novice station. Picture on request.
Now available for $15.00 plus shipping

FOR SALE: Box of 30 RF chokes. This assortment includes several 2.5 mH chokes
and others handy for building RF circuits. Two boxes of these available. Picture on
request.
Will sell these for $15.00 plus $6.00 shipping.

FOR SALE: Group of three 40m crystals, type hc6u
Frequencies - 7050, 7072, 7094 kHz
Will sell this group for $19.00 plus shipping

FOR SALE: Group of three 160m crystals, type hc6u
Frequencies - 1801, 1843, 1942 kHz
Will sell this group for $19.00 plus shipping

FOR SALE: Two Drake crystals, type hc6u
Frequencies 24.600 MHz and 31.600 MHz
Will sell this group for $19.00 plus shipping

Thanks for looking & 73 - Bry, AF4K

1520. Bench Power Supplies FS

Yahoo group: hamstuff
Date: 2011-08-16 11:59:25 UTC
From: Ken Simpson, W8EK
Topic: 1520 Message: 1520

Several Variable Bench Type Power Supplies For Sale:

Kepco CK 18-3 Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which means
that it will produce up to 18 V DC at up to 3 amps. This is
an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero,
up to almost 20 volts. There is a fairly large analog meter that
reads the voltage. Built in current limiting is adjustable with
a 10 turn pot from a few ma to up to about 3 amps. A separate
meter reads the current, so both voltage and current can be read
at the same time. Also, there are connections on the back to
allow remote sensing and remote programming. This is a quality
regulated power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $190 to $200 (plus shipping) in this
condition on that e place. Buy this one for $160.

Kepco Model ABC 40-0.5 Variable Bench Power Supply:

This variable power supply is a Kepco Model ABC 40-0.5, which means
that it will produce up to 40 V DC at up to 1/2 amp. This is
an ideal bench power supply.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $125 to $150 (plus shipping) in this
condition on that e place. Buy this one for $90.

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.

Just too many to list here. Please e-mail your requests.

Thanks.

1521. FS: Groups of FT243 crystals

Yahoo group: hamstuff
Date: 2011-08-18 21:51:01 UTC
From: Bry Carling
Topic: 1521 Message: 1521

FOR SALE: Groups of FT243 crystals as used in all the typical ham AM and CW rigs like Heathkit, Drake 2NT, Hallicrafters HT40, etc. etc.

Back by popular demand.

GROUP 01 - (8) FT243 crystals - original ones on
7028, 7038, 7068, 7075, 7130, 7156, 7185, 7196 kHz
Available for just $25.00 total for all eight plus shipping.

GROUP 2 - (8) FT243 crystals - original ones on
7049, 7072, 7075, 7083, 7093, 7130, 7133, 7156 kHz
Available for just $25.00 total for all eight plus shipping.

GROUP 3 - (8) FT243 crystals - original ones on
7125, 7140, 7161, 7222, 7233, 7240, 7247, 7284kHz
Available for just $18.00 total for all eight plus shipping.

GROUP 4 - (8) FT243 crystals - original ones on
7162, 7172, 7192, 7243, 7273, 7277, 7284, 7289 kHz
Available for just $18.00 total for all eight plus shipping.

See lists and buy hrere:
http://www.af4k.com/basementcrystals.htm

Plenty of other ham band crystals on a wide variety of useful frequencies listed here:
http://www.af4k.com/crystals.htm

1522. Digital Interfaces and related items FS

Yahoo group: hamstuff
Date: 2011-08-20 16:02:26 UTC
From: Ken Simpson, W8EK
Topic: 1495 Message: 1522

Digital Interfaces and related items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor, ASCII, CW, etc. It has version 7 firmware, which I think is the latest. It includes Pactor in it. It works fine, and looks very close to new. The large, inch thick manual is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc.
This is a "regular" wall wort -- not the new switching type that creates all sort of noise in your receiver. Get this one, and leave the noise behind. $14

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 phone patch / digital interface
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as

an interface for PSK31, and other digital modes that use
a sound card. The meter makes it great for setting levels.
This one is all original. It is in excellent condition.
Cosmetically, I can not find a scratch on it.
Paper work included for $25.

Heath HD-15 as above, but shows slight wear. $22

I also have parts from an HD-15 donor unit available.
Please let me know what parts you need.

Books related to digital modes:

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

ARRL Your Packet Companion
by Steve Ford, WB8IMY; like new. $8

ARRL Specialized Communications Techniques
1975, First Edition, $15

ARRL Learning to Work with Integrated Circuits,
First edition $10

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1523. CW Items FS

Yahoo group: hamstuff
Date: 2011-08-28 11:44:52 UTC
From: Ken Simpson, W8EK
Topic: 1523 Message: 1523

CW Items For Sale -- Keyer Paddles, Keyers, etc.

TenTec KR-20 A Single Paddle Electronic Keyer:

The KR-20 A is a single paddle keyer with the paddle
actuation force factory adjusted. It is basically the
same as a KR-5 A keyer, with the addition of a 110 V AC
power supply.

Contact spacing adjustments are on the front. The weighting
factor is factory set for optimum smoothness and articulation.
An Over-ride "straight key" is conveniently located on the
top for emphasis, QRS sending or tune-up. It has reed relay
output and a side-tone generator with adjustable level.
117 VAC or 6-14 V DC. Finished in an etched aluminum panel
and black textured top and sides that matches the TenTec
Triton IV and others of similar vintage.

This particular unit works fine and looks extremely nice.
It has had a 1/4 inch jack added to the left side so that
an external paddle can be used if desired.

Paper work for the KR-5 A is included for $45.

MFJ 8043 Electronic Keyer:

This is an electronic keyer that uses the Curtis 8043
Keyer IC. It has speed, weight, tone, and volume adjustments.
It is capable of fully automatic or semiautomatic (like
a bug) operation. Also, it can emit a solid "key down"
for tuning up. It works with tube or solid state transceivers.
It has sidetone with a front panel volume and tone control.
Weighting is adjustable from the front panel. It can be powered
via four internal C cells or an external 6 to 9 volt DC
power supply.

The styling of this unit is the wood grain and eggshell color
that TenTec used with their early equipment. TenTec made the
enclosure for MFJ, so it is an exact match.

This particular unit looks really great, and of course
it works. Paper work is included for $35.

TenTec KR-2 A Vintage Keyer Paddle:

The KR-2 A keyer paddle dates to the 1960's and 70's. It
is a keyer paddle only -- no electronics. The styling is
wood grain and eggshell that matches the early TenTec equipment.

The KR-2 A also has a a button on the top (known as over ride switch) that can be used as a straight key, or to tune up a tuner, or whatever you might want to use it for.

This is the same paddle mechanism that TenTec used in the KR-5 and KR-20 keyers.

In addition, there is a heavy weight in it, to keep in in place, so you do not need to chase it across your operating table. It would be a great match with the MFJ 8043 keyer above.

This one works fine, looks good, and even includes the single sheet instruction manual for $25.

MFJ 407 B Electronic Keyer:

This is an electronic keyer that uses the Curtis 8044 ABM Keyer IC. It has TONE, VOL, WEIGHT and SPEED adjustments. It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. Iambic switch on the back selects Iambic keyer mode. It can be powered via an internal 9 v battery or an external power supply.

This particular unit looks really great, and of course it works. Paper work is included for $40.

MFJ 1312 Wall Wart power supply
This unit provides 12 V DC at 500 ma. It has a small 2.5 mm male plug, and is often used for keyers, lighting tuner lights, and other small misc jobs where 12 V DC at low current is needed. $10

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1524. FS: 455-457 kHz crystals etc.

Yahoo group: hamstuff
Date: 2011-09-02 14:52:20 UTC
From: Bry Carling
Topic: 1524 Message: 1524

FOR SALE:

As used in the BC-684 military transmitter.

These are the closest you can get to 455 kHz in FT241 crystals and great for making i.f. filters, BFOs etc.

Quantity 7 - Channel 327 - 32.7 MHz / 454 to 455 kHz crystals, Type FT241,
and also Quantity 1 - Channel 329 - 32.9 MHz / 457 kHz

Will only sell these all as a group (all 8) for $22.00 plus shipping

ALSO:

FT243 Crystal on 2000 kHz - $14.00
FT243 Crystal on 5000 kHz - $14.00

hc13/u frequency standard (like tall hc6u metal can crystals) - $19.00 each

QTY 10 - 1843 kHz crystals - type hc33/u with wire leads (like hc6u) - $2.00 each
QTY 12 - 3742 kHz crystals, type hc6/u metal can, thin pins. - $2.00 each

Shipping additional.

Thanks for looking - Bry, AF4K

1527. Two meter & Dual band mobiles and HTs and related items FS

Yahoo group: hamstuff
Date: 2011-09-05 11:56:08 UTC
From: Ken Simpson, W8EK
Topic: 1527 Message: 1527

Two meter and dual band mobile rigs and HTs and
related items For Sale:

Icom IC-281 H, 2 meter transceiver with 440 MHz receive

The Icom IC-281H 2 meter mobile FM transceiver boasts 50
watts output plus 440 band receive (440-450 MHz) for full
duplex crossband operation. Other features include 60
regular memories, 10 scratch pad memories, 14 auto dialer
memories, built-in pager and code squelch functions and
auto memory channel advance. The IC-281H is packet ready.
A data jack is available for direct TNC connection,
supporting speeds up to 9600 baud. It features a huge
heat sink. Requires 10.5 amps at 13 VDC.

Features
* 440 MHz Band Receive
* Tone Scan
* 60 Memories
* 10 Scratch Pad Memories
* Scanning
* Call Channel
* 50/10/5 Watts Output
* Auto Power Off
* Priority Watch

This one works 100% and looks extremely nice.
With mic, tone encoder, mobile bracket, power cord,
and paper work for $150.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very

crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$150

Alinco EDC-43, DC cord / cigarette lighter plug:

This DC cord is used with the Alinco DJ-G7T, DJ-F1T, DJ-160,
DJ-180, DJ-196, DJ-580, and other Alinco HTs. In fact
it appears that it works with most Alinco HTs, except the
"credit card" size HTs. It plugs into a cigarette lighter,
and has a small coaxial power connector on the other end.

This one works 100% and looks like new. $12

Several HT Speaker Microphones:

Speaker-mic for Yaesu Vertex VX-6 / VX-7 / VX-8
This speaker mic has a 4 conductor 3.5 mm connector, with
the threads as used by the VX-6 / VX-7 / VX-8.
Looks to be unused. $15

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $18

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41 series HTs. $8

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries for the TH-21 series, and also on other Kenwood radios. It produces 10.5 V DC at 42 ma, with a standard 2.1 mm coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Yaesu HT Accessory Items:

Speaker-mic for Yaesu (Vertex) VX-6 / VX-7 / VX-8
No number on this speaker-mic, but it has a 4 conductor 3.5 mm connector, with the threads, as used by the VX-6 / VX-7 / VX-8. Looks to be unused. $15

Yaesu E-DC-5 B Cigarette Lighter Cord
DC Cable with voltage regulation, filtering and cigarette lighter plug. For many Yaesu handheld radios including FT-530/415/50R/FT-60R, VX-5/VX6/VX-7/VX-8/VX-170, etc. These sell new for $27. Buy this one for only $18.

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more. Small 2.5 mm male plug. $10

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom BC-110 A, Wall Charger:

I am not sure of all the units that use this charger. I know
it is used by many of the aircraft HTs, and also to charge the
R-10, T2H, T7H, T70, T80AD, T90A, T91A, T92AD, W32A, and I am
sure others. Apparently it is also known as a BC-167 in
addition to BC-110 A. This is NOT one of the switching units,
so you will not have RFI from this one.

This one works fine and appears very close to new.

Icom charges almost $40 for this. Buy this one for $12.

Icom DC adapter, and battery packs:

Icom DC-25 DC Adapter
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24
battery packs. It takes 13 V DC (such as from a cigarette
lighter), and converts it to the 9.4 V DC voltage needed for
the HT. It is used in place of a battery. This one works
fine and looks fine. $20

Icom BP-21
This battery pack is DEAD and sold for rebuilding, or
whatever. $8

Icom BP-22
This battery pack is DEAD and sold for rebuilding, or
whatever. $8

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a

service pack. It has schematics, circuit explanations,
voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

SubAudible Tone (CTCSS or PL) Encoder:

This unit is designed to add subaudible tones (sometimes
called PL tones or CTCSS) to a rig that does not have them
internally. This is usually used on some of the older 2
meter FM or 440 MHz FM rigs produced before the tones were
included in the rig.

This particular unit can be used on most any rig, although
it came from an Icom IC-22 S, and I think was also used with
an Icom IC-230. It has a 9 pin plug on it that looks like
the base of a miniature 9 pin tube. This was the type of

socket used on these Icom rigs, but it could be changed.

This unit has a switch for 6 different tone on the front panel. Each of the tones are internally adjustable. It is presently set up for 71.9, 74.4, 94.8, 100, 123, and 179.9 Hz tones, although they could be changed. It is housed in a black box about 6.2 W, 2 H, X 4 inches deep.

This unit works fine. $35

Heath HM-2102 VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks really terrific -- very close to perfect, with no defects that I can find.

Paper work included for $50.

HF and VHF SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so are ideal for the new rigs with 6 meters and 2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $38.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $30

Two meter mobile antennas:

Larsen LM-150, 2 meter antenna
Has 3 db gain on 2 meters.
This coil is still in its original box, & appears to never have been used. It even has its rubber washer with it. Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $9

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other
antenna that requires a 5/16 inch stud. Coax is included
for $18.

Buy the LM-150 with 5/8 whip, the 1/4 wave whip, and the
mount for $50.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.
Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Coil and stacked whip are included. $15

UHF (440 MHz) Mobile Antennas:

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $25.

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other
antenna that requires a 5/16 inch stud. Coax is included.
Very nice for $18.

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Standard length, about 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1528. FS: Enamel covered copper wire

Yahoo group: hamstuff
Date: 2011-09-09 20:05:22 UTC
From: Bry Carling
Topic: 1528 Message: 1528

FOR SALE: Spool of new old stock enamel covered copper wire, excellent condition.

This appears to be pretty old but looks new. Seems to be 20 or 22 awg wire. No micrometer.

Marked "B.D. Land, New York" on the end of spool. Alkso marked: "Dudlo Manufacturing, Ft. Wayne, IN" under the labels. Great for making coils, rewinding transformers and chokes etc.

Spool is about 4.5" tall X 4.5" diameter. Weighs almost 4 lbs. and seems to be a huge roll with many hundreds, if not thousands of feet of wire.

One spool only - available for $20.00 plus shipping.
(or will trade for large quantity of unwanted FT243 crystals)

Thanks for looking and 73 de AF4K, Bry

FOR SALE: Antenna Selector Switch

Phasing switch used for selecting XMTR - AUX - HORIZONTAL - VERTICAL
Has four SO-239 connectors. Perhaps used with a Moonraker or similar
antenna. $5.00 plus shipping

[Non-text portions of this message have been removed]

1530. FS: Power Transformer

Yahoo group: hamstuff
Date: 2011-09-10 17:16:59 UTC
From: Bry Carling
Topic: 1530 Message: 1530

FOR SALE:

Power Transformer - looks to be older USA made item,
Upright mount with black end bells. No part number or label.
Dimensions: 3-3/4" X 3-3/4" X 4-1/2" tall.

I connected 120V AC and got 860V CT at est. 100 mA plus.
Also has secondaries of
SEC 2 = 10.0 V CT,
SEC 3 = 6.3 V AC CT
and 5.0 V CT
each with thick wires and unknown amps.

Nicely built with the typical flanges and four mounting holes for above chassis installation.

QTY 1 available for $12.00 plus shipping.

[Non-text portions of this message have been removed]

1534. FS: $1.00 ham band crystals

Yahoo group: hamstuff
Date: 2011-09-14 22:21:53 UTC
From: Bry Carling
Topic: 1534 Message: 1534

FOR SALE: $1.00 ham band crystals etc.
Limited quantities. Please consider buying 4 or more to make the shipping costs worthwhile.

1942 kHz - Type hc6u crystals - QTY 2 available

3547 kHz hc33u crystals (same as hc6u with wire leads) - QTY 10 available

3579 kHz hc33u crystals (same as hc6u with wire leads) - QTY 4 available

7072 kHz - Type hc6u crystal - QTY 1 available

7094 kHz - Type hc6u crystal - QTY 1 available

The above are all just $1.00 each.

Also available:

1835 kHz - Type hc6u crystal - QTY 1 available for $6.00

7050 kHz - Type hc6u crystal - QTY 1 available for $6.00

13.600 MHz Drake crystal - Type hc6u crystal - QTY 1 available for $9.00

Shipping additional for each of these. Combine to save on shipping.

1541. Alinco Dual Bander, 2 m rig, HT and other Alinco FS

Yahoo group: hamstuff
Date: 2011-09-28 15:03:00 UTC
From: Ken Simpson, W8EK
Topic: 1541 Message: 1541

Alinco dual bander and 2 meter FM transceivers and
dual band HT, plus other Alinco items For Sale:

Alinco DR-605 T Dual Band Mobile Transceiver

The Alinco DR-605 T is a dual band FM transceiver covering
both the 2 meter and 440 MHz ham bands, plus extended receive
outside of the ham bands for weather, police, fire, etc.
It will cross band repeat, receive both 2 m and 440 at the
same time, and many other neat things. Subaudible (PL) tones
are built in. A DTMF microphone with up/down switches is
included.

You can find details at
http://www.alinco.com/Archives/Mobile/dr-605t.shtml

This one works 100% as best I can tell. Cosmetically, one
of the lights behind the display is burned out, but the
others work, so there is plenty of light to read the
display. It looks great.

Paper work is included for $170.

Alinco DR-110 T, 2 meter FM Transceiver

The Alinco DR-110T is a full-featured 2 Meter FM mobile
transceiver with 14 memory channels. Power output is
selectable at 45 or 5 watts. Subaudible tone encoder
and decoder is included. Tuning steps may be selected
at 5, 10, 12.5, 15, 20 or 25 kHz. It is 5.5 x 2 x 6.75
inches. With hand mic.

Features:
* 14 Memories
* VFO Scaning
* Memory Scanning
* Odd Offsets
* CTCSS Encode/Decode
* Large LCD
* Function Lock
* Reverse Key

This unit works fine, and looks extremely nice. It
includes a mic, power cord, internal tone unit, and
paper work for $90.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$140

Alinco EDC-43, DC cord / cigarette lighter plug:

This DC cord is used with the Alinco DJ-G7T, DJ-F1T, DJ-160,
DJ-180, DJ-196, DJ-580, and other Alinco HTs. In fact
it appears that it works with most Alinco HTs, except the
"credit card" size HTs. It plugs into a cigarette lighter,
and has a small coaxial power connector on the other end.

This one works 100% and looks like new. $12

Hand Microphone that can be used with Alinco rigs:

Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others, and also on most
Alinco rigs with the round 8 pin plug..
It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood/Alinco.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1543. MFJ Items FS

Yahoo group: hamstuff
Date: 2011-09-30 13:53:10 UTC
From: Ken Simpson, W8EK
Topic: 1543 Message: 1543

MFJ Items For Sale -- "Amplifier Saver", HF Antenna Tuner,
Coax Switches, CW Keyers, Wall Wart, HT Speaker Microphones

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier
for full power output and best linearity. It protects your
expensive amplifier during tune-ups from over-heating, tube
damage, power supply stress and arc-over. MFJs innovative
pulse tuning technology lets you tune your amplifier at full
peak output power. It can also be used to evaluate wattmeters
and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune
button and tune your amplifier normally for maximum power
output. It has Duty Cycle and Pulse Rate controls on front
panel, and is in a fully shielded all metal case. Uses 9 V
battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells
these for $80. But this one for $60.

MFJ 941 E HF Antenna Tuner

MFJ 941 E antenna tuner for 160 thru 10 meters
This tuner has a "cross needle" SWR bridge built into
it, so one can read both forward power, reflected power,
and SWR at the same time. The meter has a switched back
light, assuming 12 Volts is applied to the tuner. The
wattmeter portion will read either 30 W or 300 W full
scale, either peak or average power.

An antenna switch will switch between either balanced
line, two coax antennas, or an external dummy load.
Antennas can be operated thru the tuner, or the tuner
can be bypassed. This tuner will operate on 160 thru
10 meters, including the WARC bands.

This particular unit works 100%. It looks extremely nice.
I can not find a scratch on it.
Paper work is included for $110.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing
that utilizes "stripline" construction to keep the impedance
very close to 50 ohms. It also permits good operation at

higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antenna are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great also. $24

MFJ 8043 Electronic Keyer:

This is an electronic keyer that uses the Curtis 8043 Keyer IC. It has speed, weight, tone, and volume adjustments.
It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. It can be powered via four internal C cells or an external 6 to 9 volt DC power supply.

The styling of this unit is the wood grain and eggshell color that TenTec used with their early equipment. TenTec made the enclosure for MFJ, so it is an exact match.

This particular unit looks really great, and of course it works. Paper work is included for $35.

MFJ 407 B Electronic Keyer:

This is an electronic keyer that uses the Curtis 8044 ABM Keyer IC. It has TONE, VOL, WEIGHT and SPEED adjustments. It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. Iambic switch on the back selects Iambic keyer mode. It can be powered via an internal 9 v battery or an external power supply.

This particular unit looks really great, and of course it works. Paper work is included for $40.

MFJ 1312 Wall Wart power supply
This unit provides 12 V DC at 500 ma. It has a small 2.5 mm male plug, and is often used for keyers, lighting tuner lights, and other small misc jobs where 12 V DC at low current is needed. $10

Cables for CW keys and keyers:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Several HT Speaker Microphones:

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $18

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Yaesu Items For Sale -- Filtered speaker, microphones,
cables, HT accessories, and more

Yaesu SP-6 Speaker with phone patch and Filters:

This Yaesu SP-6 speaker has the phone patch and filters in it.
It is the matching speaker for the Yaesu FT-990 and many others.
It permits one to switch between two different rigs, and has
adjustable filters on both the high and low end to permit one
to get rid of QRM, and have a great sound.

This one is in extremely nice condition and works 100%. Not
a single scratch or mark on it. You will not find a nicer one
unless it just came out of the box.

With paper work for $150.

Yaesu MH-1 Hand Microphone:

The Yaesu MH-1 b8 is the hand mic that is used on most of
the Yaesu HF and some of the Yaesu VHF rigs. It is a hand
mic that has a switch on the back with two audio frequency
responses -- one for rag chewing, and one for more punch
for DX. It has up and down switches, in addition to a
"fast" switch. Of course it also has the normal PTT
switch. It has a round 8 pin mic connector, wired for
Yaesu.

This particular microphone looks like it might not have
ever been used. I think it was probably put in a drawer
when new, and left there. Of course it works fine. $38

Heil HM-10 Deluxe Microphone:

The Heil HM-10-5 is a beautiful microphone resembling the
"gold line series". It has the HM-5 wide element for good
frequency response, and good articulation.
This particular microphone looks very close to new.
It includes paper work in its original fancy Heil box. $75

Cables for Heil (and other) Microphones:

Heil CC-1 Y cable for Yaesu (yellow)
Connects to Heil mics with the 4 pin XLR connector (most
Heil mics), and has a round 8 pin connector wired for Yaesu,
plus a jack for PTT. $25

Hand held PTT switch
The Heil Microphones require a separate PTT switch -- either a hand switch or a foot switch. This is a home made hand switch. It is similar to the Heil, except it is in a 1 x 1 x 2 inch minibox, with about a 3 foot cord. It works and looks fine. $12

Heil CC-1 XLR 4
4 pin XLR Female to 3 pin XLR Male $25

3 pin XLR to stripped ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the HM-10 and others. Like new condition. $8

Yaesu CT-20 Adapter Cable:

The CT-20 adapter cable is made to be used with the Yaesu MD-1 desk microphone. As the MD-1 c 8 comes from Yaesu, it has a round 8 pin connector on it to plug into the rig. The CT-20 cable is used in place of the regular cable, to adapt to one of the Yaesu rigs that takes the newer 8 pin modular (like a computer LAN) connector. The CT-20 has a round 8 pin connector on one end that goes into the desk mic, and a modular connector on the other end for the rig.

This particular cable is still sealed in its original package, unused, unopened. $20

Yaesu HT Accessory Items:

Yaesu E-DC-5 B Cigarette Lighter Cord
DC Cable with voltage regulation, filtering and cigarette lighter plug. For many Yaesu handheld radios including FT-530/415/50R/FT-60R, VX-5/VX6/VX-7/VX-8/VX-170, etc. These sell new for $27. Buy this one for only $18.

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack fits both the VX-2 and the VX-3. 3.7 volts, 1200 mahr, works great, and holds a charge like new. $15

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more. Small 2.5 mm male plug. $10

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of HTs, VHF and UHF rigs, HF and VHF/UHF
antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

1545. Several Wattmeters and SWR Bridges FS

Yahoo group: hamstuff
Date: 2011-10-11 15:28:55 UTC
From: Ken Simpson, W8EK
Topic: 1545 Message: 1545

Several Wattmeters and SWR Bridges For Sale:

Swan WM-2000 Wattmeter / SWR Bridge:

The Swan WM-2000 power meter and SWR bridge covers 3.5 to 30 MHz. Power scales are 200, 1000, 2000 watts. It has a very large (over 5 inch) meter, for easy visibility. The rear panel has SO-239 input and output connectors.

This is an extremely nice meter, primarily due to its large physical meter, making it easy to read.

This one is in extremely good condition. It works 100% and looks very close to new.

With paper work for $80.

Autek WM-1 Computing HF Wattmeter:

The WM-1 Meter doesn't make you stare at crossed needles or make adjustments or do any calculations to read SWR. Instead, like magic, it shows SWR instantly and continuously. So it's a snap to do SWR plots, adjust antenna tuners, or just glance at the SWR occasionally to see that it's still low.

This meter has scales of 20, 200, and 2000 watts. It will measure either peak or average power. And peak is true peak, with a slowly decaying display that can really can be read. It also has a separate sensor that can be separated from the actual meter. It covers from 1.5 to 30 MHz, and will cover to 54 MHz at reduced power, so it will cover all of the HF bands, plus 6 meters.

This particular meter works 100% and looks fine. Paper work is included for $100.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

Heath SB-634 Station Console, with Wattmeter and more:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

HF and VHF Standing Wave Ratio Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Carter Craft 90-300 HF SWR Bridge:
The Carter Craft 90-300 is a single Meter SWR Bridge /
Field Strength Meter. It covers from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so is ideal for
the new rigs with 6 meters and 2 meters in them.
SO-239 connectors.
Although this has a Carter Craft name on it, it is the
same meter that was sold years ago under a couple dozen
different names, including Vanco, Midland, Quements,
Olson, and many others.
This one works fine, and looks extremely nice. I do not
see any scratches on it, and I am 99% certain it has not
been used, except for my testing of it.
In its original box with original instructions and little
field strength antenna. $30

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name

on it. In its original box with original instructions. $28

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Heath Items For Sale - HF transceiver, Station Console,
Wattmeters, Misc Parts, and Original Manuals:

Heath SB-1400 HF Transceiver:

This is a 100 watt multimode HF transceiver covering 160 to
10 meters (including WARC bands). It operates on SSB, CW,and
AM. The receiver is very sensitive. This rig has noise blanker,
squelch, adjustable AGC and attenuator, as well as memories
and two VFOs. A narrow CW filter is included. It even has a
computer interface and is very similar to the Yaesu FT-747.

This one works 100% and looks very, very nice.
It includes power cord and paper work for $300.

Heath SB-1400-2 hand microphone:
This hand mic is basically the same as a Yaesu MH-1, but with a
Heath label. Use it with the SB-1400 above, or with Yeasu rigs
with the round 8 pin connector. Like new for $40.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and
SWR (forward and reflected power). It will measure either
average power, or peak power (PEP) with a 9 volt battery.
Power ranges are 200 and 2000 watts. Frequency range is
from 160 thru 10 meters. It has a remote sensor, which
permits the meter to be separated from the coax connection
by up to 3 feet. This is the "A" model of this meter, which
is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

Heath HD-15 phone patch / digital interface:

This unit can be used to interface a sound card in a
PC to your transceiver. It was originally designed to
be used as a phone patch, but many have converted them
to a digital interface.

This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. The meter makes it great
for setting levels.

This one is all original. It is in great condition.
Paper work included for $22.

I also have parts from a Heath HD-15 phone patch available.
This includes an audio transformer used for digital
interfacing, VU meter, and other parts. Outer cover and
knobs are gone. What do you need?

Miscellaneous Heath Parts:

I have many Heath SB-630 Station Console parts available.
Most of the internal parts are available, but no clock.
Front panel and outer case are gone, but reflectometer
assembly, switches, etc. are still available.
Please let me know what you need.

I also have parts from a Heath HD-15 phone patch available.
This includes an audio transformer used for digital
interfacing, VU meter, and other parts. Outer cover and
knobs are gone. What do you need?

RCA VT-138 / 1629 Magic Eye Tube:

This magic eye tube is a RCA VT-138 that is also known as
a JAN-CRC-1629, or simply a 1629.

The RCA 1629 / VT-138 is a military spec magic eye tube
for use as a tuning level indicator. It has a green phosphor
element.

This tube is often used as an indicator in capacitor checking
instrumentation. I know it is used in some of the Heathkit
units, and probably others.

This one works fine and is $17.

ORIGINAL Heath manuals For Sale:

These are manuals / brochures / schematics only.
They are all originals, not copies, and all are in
extremely nice condition.

Brochure "Heathkit Specials" featuring the
Twoer, Sixer, SB series, and others. $4

GD-600 Photoelectric Light Switch, 1972, $5

HM-102 HF Wattmeter
1971, Schematic in book $10

HW-29 A "Sixer" 6 meter transceiver
1964, Schematic in book, $12

HW-2021 2 meter hand held transceiver
1975, No check marks $9

SB-620 Scanalyzer
Schematic Only, Large fold out page, $4

These are original manuals / brochures / schematics only.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1547. 2 m rig, HF Amp, Filter, Mics, and more FS

Yahoo group: hamstuff
Date: 2011-10-15 13:28:34 UTC
From: Ken Simpson, W8EK
Topic: 1547 Message: 1547

2 meter FM transceiver, HF Solid State Amplifier, Active
Audio Filter, Speaker Microphones, Amplifier Saver, Charger,
Manuals, Coax Switches and other Miscellaneous For Sale:

Icom IC-229 H, 2 meter mobile transceiver

The Icom IC-229 H is a 2 meter FM mobile transceiver
providing 50 watts of power. There is also a setting for
25, 10, or 5 watts output when less power is needed. The
LCD display is easy to read. This radio has 20 memories
and priority watch. It also has programmed scanning or
memory scanning. This radio requires 13 V DC at 10 amps,
measures 5.5 x 1.6 x 6.1 inches, and weighs 2.2 lbs.

Features:
* SubAudible (CTCSS, PL) tones
* 20 Memories
* Priority Watch
* Call Channel
* Memory Skip
* Scan
* Backlit LCD
* Receive 138-174 MHz
* 4 RF Output Levels

This particular unit has extremely low power output in
all power positions. I am 99% sure that the problem is
the output power module. It receives great and functions
fine in all other respects. It was used for packet and
does not include a microphone. Cosmetically, it is in
nice condition. It does have a bulb burned out. $60

Ameritron ALS-600 HF Solid State No Tune Amplifier:
-
This is a solid state, HF no tune linear amplifier, including
coverage of the WARC bands, and is supplied with a separate
power supply. It is a great match to Icom gear.

Features:
No Tubes - all solid state
Instant band switching, no tuning, no warm up
Output Power 600 Watts PEP, 500 Watts CW
Continuous HF Coverage
SWR Protection
Over Power Protection
Extremely quiet low speed fan

Very Compact
Illuminated Cross-Needle SWR/Wattmeter
Operate / Standby Switch
Transmit, ALC & SWR LED indicators
Step Start Inrush Protection
Power Supply has voltage & current cross needle meter

This is a really great amplifier. It has full output, working 100%. The amp proper looks extremely nice, although a bit of the very bottom of the laxan panel on the power supply has a bubble. It ends up on the floor out of sight anyhow, so does not mater.

With paper work for $900.

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $50.

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Pryme Speaker Microphone
It works fine and look line new. $20

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $ 20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier for full power output and best linearity. It protects your

expensive amplifier during tune-ups from over-heating, tube damage, power supply stress and arc-over. MFJs innovative pulse tuning technology lets you tune your amplifier at full peak output power. It can also be used to evaluate wattmeters and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune button and tune your amplifier normally for maximum power output. It has Duty Cycle and Pulse Rate controls on front panel, and is in a fully shielded all metal case. Uses 9 V battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells these for $80. But this one for $60.

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Wall Wart Power supplies:

All are standard "non-switching" types, with no noise like the switching types have.

AEA AC-1 "Wall Wart" Power Supply
This "Wall wart" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc. $14

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more.
Small 2.5 mm male plug. $10

Icom DC adapter and batteries:

Icom DC-25
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24 battery packs. It takes 13 V DC (such as from a cigarette lighter), and converts it to the 9.4 V DC voltage needed for the HT. It is used in place of a battery. This one works fine and looks fine. $18

Icom BP-21 and Icom BP-22
Neither of these battery packs hold a charge and are sold
for rebuilding, for using the case, etc. $7 each

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-22 S, 2 m FM transceiver $12
IC-28 H, 2 m FM transceiver $12
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing
that utilizes "stripline" construction to keep the impedance
very close to 50 ohms. It also permits good operation at
higher frequencies up to 500 MHz, and gives over 50 db
isolation. Unused antenna are grounded, with an additional
position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas, and has lightning protection built
in. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great
also. $24

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cable
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Topic: 1548 Message: 1548

Amplifier Saver, Active Audio Filter,
Wattmeters/SWR Bridges, Coax Antenna Switches,
Microphones, HT Speaker Mics, DTMF Touch Tone
Microphones, Accessories for Kenwood HTs, original
Kenwood Manuals, and other Kenwood items For Sale:

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier for full power output and best linearity. It protects your expensive amplifier during tune-ups from over-heating, tube damage, power supply stress and arc-over. MFJs innovative pulse tuning technology lets you tune your amplifier at full peak output power. It can also be used to evaluate wattmeters and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune button and tune your amplifier normally for maximum power output. It has Duty Cycle and Pulse Rate controls on front panel, and is in a fully shielded all metal case. Uses 9 V battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells these for $80. But this one for $60.

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $50.

Swan WM-2000 Wattmeter / SWR Bridge:

The Swan WM-2000 power meter and SWR bridge covers 3.5 to 30 MHz. Power scales are 200, 1000, 2000 watts. It has a very large (over 5 inch) meter, for easy visibility. The rear panel has SO-239 input and output connectors.

This is an extremely nice meter, primarily due to its large physical meter, making it easy to read.

This one is in extremely good condition. It works 100% and looks very close to new.

With paper work for $80.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit. It contains a 24 hour digital clock (6 large digits, including seconds), 10 minute interval timer (3 digits -- minutes and seconds), phone patch and an SWR/Power meter. The large wattmeter reads either 200 watts or 2000 watts full scale, in addition to SWR. It matches the Heath SB series of equipment (Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely nice. I can not find a scratch on it, but there is very slight (and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new. With paper work for $100.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing that utilizes "stripline" construction to keep the impedance very close to 50 ohms. It also permits good operation at higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antenna are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. With lightning protection. This one works 100% and looks great also. $24

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Kenwood, Icom, Alinco, Radio Shack, some Yaesu,

and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.
It works fine, and looks close to new. $15

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch.
Stripped and tinned ends. Great condition. $40

Cables for CW keyers and keys:

NEW listing of additional cables

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41
series HTs. $8

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:
New ones have been added.

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15

Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1549. Various Microphones - Hi & Low Z; Desk & Hand; Mic Accessories

Yahoo group: hamstuff
Date: 2011-10-20 13:58:35 UTC
From: Ken Simpson, W8EK
Topic: 1549 Message: 1549

Various Microphones For Sale:
Desk Mics, Hand Mics, DTMF Touch Tone Mics, Speaker
Mics, and Miscellaneous Mic accessories

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop, stuck
into a gray base. The chrome PTT switch is a bar that is
parallel to the "stick" of the lollypop. This is the
unamplified version.

This particular D-104 is in extremely nice condition.
Of course it works well, and has good frequency response.
Cosmetically, it is extremely nice. The chrome seems
perfect, with no scratches or defects of any sort.
The gray base has a couple of very minor scratches.
It presently has a 4 pin connector, but that obviously
could be changed. $55

Another Astatic D-104
This D-104 is the mic element and chrome housing, but does
not have the base with it. It has a short (about 3 inch)
tube that is made to screw into a regular mic stand (see
stands available in this listing). It has an in line PTT
switch, and presently has the 2 pin Amphenol plug as used
by Heath, Johnson, Hallicrafters, and others.
It works well, and looks great. $35

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed
metal about 5 1/4 inches long, and is actually part of the
gooseneck. The cable goes thru the gooseneck. This has a
2 conductor shielded cable, so it is a quality balanced
microphone with about a 4000 ohm impedance. The gooseneck
terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Turner 350, High Impedance Hand Microphone
This is a Hi Z hand mic, that looks like a Turner 350. The
label is off of it, but I am 99% certain it is a 350. This
one is the grayish color, and has a right angle 1/4 inch
stereo plug on it, as used by many rigs in the 1970's. It
has a great pattern on the scope, and looks fine as well. $28

Deluxe Desk Microphone - Kenwood round 8 pin:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal! This one has a round 8 pin connector
wired for Kenwood on it, but that can be changed.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $75

Heil HM-10-5 Deluxe Microphone:

The Heil HM-10-5 is a beautiful microphone resembling the
"gold line series". It has the HM-5 wide element for good
frequency response, and good articulation.
This particular microphone looks very close to new.
It includes paper work in its original fancy Heil box. $75

Cables for Heil (and other) Microphones:

Heil CC-1 Y (also known as Yellow)
4 pin XLR connector on one end, to Yaesu round 8 pin connector
(Yellow cable) $25

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $8

Microphone Stands and holders:

Microphone Stands:

Heil SB-2 small boom
The Heil Sound SB-2 Small Boom is ideal for mounting your
Heil microphone.
The SB-2 includes the 'stealth' C-Clamp.
This one is in extremely nice condition. $50

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle.
Standard 5/8 inch threaded. $15

Microphone holders:

Heil Mic Holder
Black plastic holder, for 1 inch diameter mics.
Standard 5/8 inch threads. $8

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $8

Hand Microphone with round 8 pin plug for Kenwood:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-5-, TS-60, TS-430,
TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no
model number. It is very similar to an MC-47, but the
4 buttons are at the top instead of the bottom.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

Kenwood Mic with modular connector:

This mic is basically the same as the one with the round
8 pin connector above, except it has the modular plug on it,
as used by the TM-261, TM-271, and many others.
It looks like new. $30

Yaesu Hand Microphones:

Yaesu MH-1 Hand Microphone
The Yaesu MH-1 b8 is the hand mic that is used on most of the Yaesu HF and some of the Yaesu VHF rigs. It is a hand mic that has a switch on the back with two audio frequency responses -- one for rag chewing, and one for more punch for DX. It has up and down switches, in addition to a "fast" switch. Of course it also has the normal PTT switch. It has a round 8 pin mic connector, wired for Yaesu.
This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $40

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

Heath SB-1400-2 hand microphone
This hand mic is basically the same as a Yaesu MH-1, but with a Heath label. Use it with the SB-1400, or with Yeasu rigs with the round 8 pin connector. Like new for $40.

DTMF Touch Tone Microphones:

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

Several HT Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu HT with the 4 conductor 1/8 inch (3.5 mm) plug, such as the VX-5, VX-3, etc.
This one is just like new. $35

Pryme Speaker Microphone
This is the equivalent of the Yaesu MH-34 (above). It has the 4 conductor 1/8 inch plug on it. It works 100% and looks like it has not been used. $28

Yaesu YM-24 A speaker microphone
This speaker mic fits the Yaesu FT-207, 208, plus many others. It can be modified for Santec, Wilson, and others. It has the odd little round connector on it like Yaesu, Wilson, Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

All of the following speaker mics have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF

and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1550. Antenna related items FS

Yahoo group: hamstuff
Date: 2011-10-21 22:37:27 UTC
From: Ken Simpson, W8EK
Topic: 1550 Message: 1550

Antenna related items For Sale:
Coaxial Antenna Switches, SWR Bridges and Wattmeters,
VHF and UHF Mobile Antennas and Mounts, Coax Connectors
and Adapters, Rubber Duck HT Antennas, etc.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing
that utilizes "stripline" construction to keep the impedance
very close to 50 ohms. This means it permits good operation
at higher frequencies up to 500 MHz, and gives over 50 db
isolation. Unused antennas are grounded, with an additional
position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. Lightning protection is built
in. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great
also. $24

HF and VHF SWR Bridges For Sale:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300 HF SWR Bridge
The Carter Craft 90-300 is a single Meter SWR Bridge /
Field Strength Meter.
Although this has a Carter Craft name on it, it is the
same meter that was sold years ago under a couple dozen
different names, including Vanco, Midland, Quements,
Olson, and many others.
This one works fine, and looks extremely nice. I do not
see any scratches on it, and I am 99% certain it has not
been used, except for my testing of it.
In its original box with original instructions and little
field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Heath SB-634 Station Console w/ Wattmeter:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and
SWR (forward and reflected power). It will measure either
average power, or peak power (PEP) with a 9 volt battery.
Power ranges are 200 and 2000 watts. Frequency range is
from 160 thru 10 meters. It has a remote sensor, which
permits the meter to be separated from the coax connection
by up to 3 feet. This is the "A" model of this meter, which
is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.
Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Coil and stacked whip are included. $12

UHF (440 MHz) Mobile Antennas :

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $25.

Larsen NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any of the many NMO types of antennas. Coax included.
It is in close to new condition. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cable
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Standard length, about 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

FOR SALE:

1000 watt Isolation Transformer. for 120V AC.

by Northlake Engineering Co. This is a 1:1 transformer.
120V AC in = 120V AC out. Very conservatively rated.
Actually is rated for 12 Amps (1400 watts.)

Has four IEC outlets and heavy duty power cable.
Heavy gauge, light gray metal case with rubber feet.
Like new condition. Supplied with cables.

Has a nice breaker switch for power ON/OFF.

Available for $45.00 plus shipping

[Non-text portions of this message have been removed]

FOR SALE: Heathkit Parts

Heathkit DX100 Front panel (NOT B) - $35.00
Heathkit DX100 54-30 LV Power Transformer 634VCT 5V 120VCT 12.6V - $35.00
Heathkit DX100 46-11 LV Filter Choke 150 mA - $15.00
Heathkit DX100 pair of H.V. Electrolytic Capacitors 125 uF at 450V DC - $10.00
Heathkit DX100 - 15K + 15K Bleeder resistor, plus two 10K, 10 watt power resistors - $6.00
Heathkit DX100 - Pair of 1625 tubes - $10.00
Heathkit DX100 - 5V4 tube - $9.00
Heathkit DX100 - Some other individual tubes are still available (inquire)
Heathkit DX100 - Pair of ceramic 1625 tube sockets - $10.00
Heathkit DX100 - Pair of ceramic 6146 tube sockets - $10.00
Heathkit DX100 - Pair of ceramic 5R4GY tube sockets - $10.00
Heathkit DX100 - single ceramic 5V4 tube socket - $5.00
Heathkit DX100 - Plate tuning Capacitor, 350 pF, EF JOHNSON - $25.00
Heathkit DX100 - Output loading variable Capacitor, with concentric switch and caps - $15.00
Heathkit DX100 - PA RF Tank Coil, bandswitching - $15.00
Heathkit DX100 - RFC final Plate Choke - $10.00
Heathkit DX100 - VFO - with 6AU6 tube $25.00
Heathkit DX100 - VFO - no tube $18.00
Heathkit DX100 - CRYSTAL SOCKET ASSY - 4 positions, FT243 - $24.00
Heathkit DX100 - CHASSIS (Copper) includes about 30 smaller parts - $25.00
Heathkit DX100B - CHASSIS (silver color) includes about 30 smaller parts - $25.00
Heathkit DX100 - BANDSWITCH Assembly - $12.00
Heathkit DX100 - DRIVER COIL - Band-switching type - $12.00
Heathkit DX100 - DRIVER variable Capacitor, 75 pF - $12.00
Heathkit DX100B - 25K-ohm / 4 Watt Driver Potentiometer - $9.00
Heathkit DX100 - 25K-ohm / 4 Watt Driver Potentiometer - $9.00
Heathkit DX100 - AUDIO GAIN POTENTIOMETER - $4.00
Heathkit DX100 - VFO - with tube - $25.00
Heathkit DX100 - VFO - no tube - $18.00
Heathkit DX100 - FUNCTION SWITCH assy - AM/CW - $8.00
Heathkit DX100 - XTAL-VFO SWITCH assy - $5.00
Heathkit DX100 - METER with rotary Meter Function switch - $12.00
Heathkit DX100 - PAIR of switches: AC ON-OFF (SPST) & PLATE ON-OFF (DPDT) - $5.00
Heathkit DX100 - Microphone jack and key jack assys - $5.00
Heathkit DX100 - AC input filter assy - $5.00
Heathkit DX100 - Rear accessory socket and filters assy - $4.00

DX100 Manual copy available with any of the items above. Shipping additional on the parts.

Updates and details:
http://www.af4k.com/miscpart.htm

From: Ken Simpson, W8EK
Topic: 1558 Message: 1558

Many Miscellaneous Accessory Items For Sale
Coaxial Antenna Switches; Active Audio Filter; Amplifier Saver; CW Keys, Keyers, Cables, and Tapes; Deluxe Speaker; Digital Controller; Station Console; Wattmeter; SWR Bridges; Station 24/12 hour clock; Power Supplies (both for rig and for bench), and more

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing that utilizes "stripline" construction to keep the impedance very close to 50 ohms. This means it permits good operation at higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antennas are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. Lightning protection is built in. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great also. $24

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $50.

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier for full power output and best linearity. It protects your expensive amplifier during tune-ups from over-heating, tube damage, power supply stress and arc-over. MFJs innovative pulse tuning technology lets you tune your amplifier at full peak output power. It can also be used to evaluate wattmeters

and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune button and tune your amplifier normally for maximum power output. It has Duty Cycle and Pulse Rate controls on front panel, and is in a fully shielded all metal case. Uses 9 V battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells these for $80. But this one for $60.

CW Keys and cables:

Generic brass colored, oval base key
This is similar to a J-38 (without the bakelite base), but is a Japanese copy. It is brass colored, but is not real brass. Includes shorting switch.
It works fine and looks fine. $18

Generic straight key
This is a generic CW straight key with a plastic base.
It is nothing fancy, but it will do the job. $10

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

MFJ 8043 Electronic Keyer:

This is an electronic keyer that uses the Curtis 8043 Keyer IC. It has speed, weight, tone, and volume adjustments. It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. It can be powered via four internal C cells or an external 6 to 9 volt DC power supply.

The styling of this unit is the wood grain and eggshell color that TenTec used with their early equipment. TenTec made the enclosure for MFJ, so it is an exact match.

This particular unit looks really great, and of course it works. Paper work is included for $35.

Autek MK-1 Memory Keyer:

The Autek MK-1 is a keyer which runs on 120 V AC or on DC
from 9 to 14 V. It has four programmable memories, two of
which can be bridged by throwing a switch on the front
panel. Memories are selected by front panel switches.
Another switch selects "record" or "play". There are two
outputs on the back for negative and positive keying,
which means this unit will key most ham gear including
older tube transceivers.

It also has a built in side tone with volume control on
the front panel and an internal tone control. Of course
there is also a speed control on the front panel.

Cosmetically, this unit looks very nice. Electrically,
it emits a solid tone, so it will need some repair. All
of the ICs are socketed, which should make repair easier.

With complete paper work, including schematic diagram and
parts placement diagram for $20.

Cassette Tapes for learning the code:

These tapes came from a silent key estate, and are the only
ones we found.

ARRL "Increasing your code speed -- 10 to 15 WPM"
This is a set of two cassette tapes, but only the first tape
is in the original packing. It includes the booklet listing
what is on the tapes, but only has the first tape.
Great condition. $7

"The Radio Code by the Word Method"
Side 3 and Side 4
Apparently side 1 and side 2 are missing!
This cassette tape is in good condition. $5

Buy both of these for $10.

Yaesu SP-6 Speaker with phone patch and Filters:

This Yaesu SP-6 speaker has the phone patch and filters in it.
It is the matching speaker for the Yaesu FT-990 and many others.
It permits one to switch between two different rigs, and has
adjustable filters on both the high and low end to permit one
to get rid of QRM, and have a great sound.

This one is in extremely nice condition and works 100%. Not
a single scratch or mark on it. You will not find a nicer one
unless it just came out of the box.

With paper work for $150.

AEA items:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, etc. It has version 7 firmware, which I think
is the latest. It includes Pactor in it. It works fine,
and looks very close to new. The large, inch thick manual
is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at
up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc.
This is a "regular" wall wort -- not the new switching
type that creates all sort of noise in your receiver.
Get this one, and leave the noise behind. $14

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and
SWR (forward and reflected power). It will measure either
average power, or peak power (PEP) with a 9 volt battery.
Power ranges are 200 and 2000 watts. Frequency range is
from 160 thru 10 meters. It has a remote sensor, which
permits the meter to be separated from the coax connection
by up to 3 feet. This is the "A" model of this meter, which
is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_w...0a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

HF and VHF SWR Bridges:

These cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Carter Craft 90-300 HF SWR Bridge:
The Carter Craft 90-300 is a single Meter SWR Bridge /
Field Strength Meter. It covers from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so is ideal for
the new rigs with 6 meters and 2 meters in them.
SO-239 connectors.
Although this has a Carter Craft name on it, it is the
same meter that was sold years ago under a couple dozen
different names, including Vanco, Midland, Quements,
Olson, and many others.
This one works fine, and looks extremely nice. I do not
see any scratches on it, and I am 99% certain it has not
been used, except for my testing of it.
In its original box with original instructions and little
field strength antenna. $30

MFJ 108 B, dual digital clock:

The MFJ 108 B is actually two digital clocks on one base --
a 12 hour clock for local time, and a 24 hour clock for
universal (GMT) Time.

Read both UTC and local time at a glance with the dual 12 / 24
hour LCD clock that displays 12 / 24 hour time simultaneously!
Mounted in a brushed aluminum frame, the 12 / 24 Hour LCD Clock
features huge, easy-to-read 5/8 inch LCD numerals and a sloped
face that makes it easy-to-read across the room. One can
synchronize the two clock faces to WWV for split-second timing.
The clocks are quartz controlled for excellent accuracy. It
measures 4.5W x 2.5H x 2D inches.

This unit works fine, and looks very close to new.
Paper work (if you can call a single sheet paper work) is
included for $18.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $175

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which
means that it will produce up to 18 V DC at up to 3 amps.
This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero,
up to almost 20 volts. There is a fairly large analog meter that
reads the voltage. Built in current limiting is adjustable with
a 10 turn pot from a few ma to up to about 3 amps. A separate
meter reads the current, so both voltage and current can be read
at the same time. Also, there are connections on the back to
allow remote sensing and remote programming. This is a quality
regulated power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $190 to $200 (plus shipping).
Buy this one for $160.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell for $125 to $150 (plus shipping).
Buy this one for $90.

Olson RA-472 Bench Type Power Supply:

This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.

This unit is not a "top of the line" unit, but is a
utility type power supply. $15

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1562. FS: 32 New Electrolytic Caps

Yahoo group: hamstuff
Date: 2011-11-24 14:47:10 UTC
From: Bry Carling
Topic: 1562 Message: 1562

FOR SALE: QTY 32 - New Electrolytic Caps, radial leads.

QTY - Capacitance / DC Voltage

1 - 10 uF / 400V
1 - 33 uF / 350V
13 - 33 uF / 400V
1 - 47uF / 400V
4 - 47 uF / 450V
4 - 82 uF / 400V
2 - 220uF / 400V
3 - 270uF / 200V
2 - 330uF / 63V
1 - 470uF / 63V

Total of 32 new capacitors, great for amateur radio and other electronic applications.

Will sell the whole box for $12.00 plus shipping

73 - Brian, AF4K

1566. Yaesu Items FS

Yahoo group: hamstuff
Date: 2011-12-11 21:47:08 UTC
From: Ken Simpson, W8EK
Topic: 1544 Message: 1566

Yaesu Items For Sale -- HF transceiver,
microphones, cables, HT accessories, and more

Heath SB1400 HF Transceiver (similar to Yaesu FT-747):

This is a 100 watt multimode HF transceiver covering 160 to
10 meters (including WARC bands). It operates on SSB, CW,and
AM. The receiver is very sensitive. This rig has noise blanker,
squelch, adjustable AGC and attenuator, as well as memories
and two VFOs. A narrow CW filter is included. It even has a
computer interface and is very similar to the Yaesu FT-747.

This one works 100% and looks very, very nice.
It includes power cord and paper work for $300.

Heath SB-1400-2 hand microphone
This hand mic is basically the same as a Yaesu MH-1, but with a
Heath label. Use it with the SB-1400 above, or with Yeasu rigs
with the round 8 pin connector. Like new for $40.

Heath HN-31 "Cantenna" RF Dummy Load:

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

It is in good shape both electrically and cosmetically. The
cantenna has no rust, dents or dings.

I can ship it either with or without oil. The cost to purchase
is the same, but of course the shipping will be higher with
the oil.

Paper work is included for $40.

Heath SB-634 Station Console with Wattmeter:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it.
In its original box with original instructions and little
field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
I do not find a scratch on it.

With paper work for $60.

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
4 pin XLR Female to 3 pin XLR Male $25

3 pin XLR to stripped ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end. Ideal to add your own connector.
Can be used with the CC-1 XLR-4 above. $20

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle.
Standard 5/8 inch threaded. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Yaesu MH-1 Hand Microphone:
The Yaesu MH-1 b8 is the hand mic that is used on most of the Yaesu HF and some of the Yaesu VHF rigs. It is a hand mic that has a switch on the back with two audio frequency responses -- one for rag chewing, and one for more punch for DX. It has up and down switches, in addition to a "fast" switch. Of course it also has the normal PTT switch. It has a round 8 pin mic connector, wired for Yaesu.
This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $38

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6, VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think it also fits the FT-50 and FT-60, and maybe others. It has a single 4 conductor, 3.5 mm plug on it. This one is just like new. $35

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd little round connector on it like Yaesu, Wilson, and others used in the 1970s and 80s. This particular unit works fine, and looks great also. $20

Pryme Speaker Microphone
This is the equivalent of the Yaesu MH-34 (above). It has the 4 conductor 1/8 inch plug on it. It works 100% and looks like it has not been used. $28

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Pryme Speaker Microphone
This speaker mic has the 2.5 mm and 3.5 mm molded connector as used by Icom, Alinco, Radio Shack, some Yaesu, and others. It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

Yaesu HT Accessory Items:

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack fits both the VX-2 and the VX-3. 3.7 volts, 1200 mahr, works great, and holds a charge like new. $15

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more. Small 2.5 mm male plug. $10

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

1569. Kenwood and other ham items FS

Yahoo group: hamstuff
Date: 2011-12-13 23:27:46 UTC
From: Ken Simpson, W8EK
Topic: 1569 Message: 1569

HF Rig, Power Supplies, Dummy Load, Station Console,
Wattmeters/SWR Bridges, Coax Antenna Switch,
Microphones, HT Speaker Mics, DTMF Touch Tone
Microphones, Accessories for Kenwood HTs, original
Kenwood Manuals, and other Kenwood items For Sale:

Kenwood TS-130 HF rig, and PS-30 Power Supply:

Kenwood TS-130 HF SSB / CW transceiver
This rig covers 80 thru 10 meters, including the WARC bands.
It has about 100 watts out, with slightly lower on 12 and 10
meters. Of course it has IF shift, speech processor, and other
features. It is all solid state.
This one works fine, and looks fine. With paper work for $350.

Kenwood PS-30, 20 amp (at 13 V DC) power supply:
This power supply will furnish up to 20 amps at 13 V DC to power
most 100 W output HF transceivers. It also has auxiliary
terminals on the back to power an additional rig, such as a
2 m rig. The main connector is the 6 pin molex connector
that will match most Kenwood, Icom, and Alinco HF radios,
as well as some Yaesu.
This particular unit works 100% and looks very nice.
Paper work included for $90.

Buy both of the above for $425.

Pyramid PS-25 Power Supply:

The Pyramid PS-25 is a 13 Volt DC power supply with both a
voltmeter and an ammeter built in. The output voltage is
adjustable over a range from about 11.5 to 15.5 volts DC.
There is also an adjustment to set the current limiting,
up to 25 amps. This means it can be set so that it will
protect the finals of a solid state rig. In addition, a
buzzer is activated if it goes into over current limiting.
This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

It is in good shape both electrically and cosmetically. The cantenna has no rust, dents or dings.

I can ship it either with or without oil. The cost to purchase is the same, but of course the shipping will be higher with the oil.

Paper work is included for $40.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit. It contains a 24 hour digital clock (6 large digits, including seconds), 10 minute interval timer (3 digits -- minutes and seconds), phone patch and an SWR/Power meter. The large wattmeter reads either 200 watts or 2000 watts full scale, in addition to SWR. It matches the Heath SB series of equipment (Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely nice. I can not find a scratch on it, but there is very slight (and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new. With paper work for $100.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used, except for my testing it.
In its original box with original instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

MFJ "Strip Line" Coaxial antenna switch:

This antenna switch is in a heavy diecast housing that utilizes "stripline" construction to keep the impedance very close to 50 ohms. This means it permits good operation at higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antennas are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great also. $24

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.

It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them,
as used by Kenwood, Icom, Alinco, Radio Shack, some Yaesu,
and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.
It works fine, and looks close to new. $15

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch.
Stripped and tinned ends. Great condition. $40

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone Stands and holders:

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle. This one has
a 1/4 inch hole in the base, half way between the center and
the edge, where I think someone might have had a PTT switch
in the past.
Standard 5/8 inch thread. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Cables for CW keyers and keys:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone

plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5
Vintage cotton covered cord, with brass PL-55-A
(1/4 inch) plug (probably from WW2) $10

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41
series HTs. $8

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:
New ones have been added.

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Microphones and Vintage Publications For Sale:

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Deluxe Desk Microphone - Kenwood round 8 pin:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal! This one has a round 8 pin connector wired for Kenwood on it, but that can be changed.

This one looks like new, and works the same. It has a long (approx 6 foot) cord. $75

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone Stands and holders:

Microphone Stand:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with a 3 inch chrome tube coming up from the middle.

Standard 5/8 inch threaded. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Hand Microphone with round 8 pin plug for Kenwood:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

Kenwood Mic with modular connector:

This mic is basically the same as the one with the round
8 pin connector above, except it has the modular plug on it,
as used by the TM-261, TM-271, and many others.
It looks like new. $30

Yaesu Hand Microphones:

Yaesu MH-1 Hand Microphone
The Yaesu MH-1 b8 is the hand mic that is used on most of
the Yaesu HF and some of the Yaesu VHF rigs. It is a hand
mic that has a switch on the back with two audio frequency
responses -- one for rag chewing, and one for more punch
for DX. It has up and down switches, in addition to a
"fast" switch. Of course it also has the normal PTT
switch. It has a round 8 pin mic connector, wired for
Yaesu.

This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $40

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

DTMF Touch Tone Microphones:

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

ARRL Handbooks and other Publications:

ARRL Handbooks:

1973 - 50th edition - This one is in the smaller format.
It is in very nice condition, although the pages have
yellowed some. $14

1988 - 65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

ARRL Antennas Books:

1970 - 12th edition
Nice condition - $12

1984 - 14th edition
Great condition - $12

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12

ARRL How to Become a Radio Amateur,
1970, 26th edition
Extremely nice, close to new condition,
with many vintage ads in the back, $15

Single Sideband for the Radio Amateur
1970, Fifth edition, $12

Specialized Communications Techniques
1975, First Edition, $15

ARRL "FCC Rulebook"
1986, Seventh edition, $3
1988, Eighth Edition, $4
As above, but "Newly Revised to include Codeless Technician" $6
2004, 13th edition $10

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1572. REDUCED: Heathkit DX100 parts

Yahoo group: hamstuff
Date: 2011-12-19 00:38:15 UTC
From: Bry Carling
Topic: 1572 Message: 1572

FOR SALE: DX100 Parts / updated list as of DEC 18, 2011

QTY 4 - 120 uF at 450V DC Capacitors

QTY 1 - 20 + 20 + 20 uF at 450V Capacitor

QTY 2 - Switch, plate ON-OFF

QTY 1 - Switch main power ON-OFF

QTY 1 - Bleeder resistor - 15 K plus 15K-ohms

QTY 2 - 10K at 10 Watts resistor

QTY 1 - Drive level potentiometer 25 K at 4 watts with shaft

QTY 1 - Ceramic feedthru and coil for underside of 6146 tube feed from driver stage.

QTY 1 - Driver coil assembly, bandswitching

QTY 4 - 1625 Plate Caps - ceramic

QTY 4 - 1625 socket, 7-pin

QTY 2 - 5U4 sockets

QTY 5 - ceramic octal socket for 5V4 tube etc.

QTY 1 - Sub-chassis for 6146 tubes with bracket, tube sockets etc.

QTY 1 - RF Final tank coil assembly

QTY 1 - Loading Variable Capacitor, 0 - 250 pF

QTY 1 - Plate Tuning Variable Capacitor, 0 - 150 pF with shaft extension

QTY 2 - Driver Tuning Variable Capacitor, 0 - 100 pF with shaft extension

QTY 3 - Mode Switch - AM, CW etc.

QTY 1 - VFO control shaft and bushing - 3/4"

QTY 2 - Meter selector switch - rotary

QTY 1 - CW Key jack

QTY 2 - Audio input jack assembly with bracket, 5 capacitors, 3 resistors, terminal strips etc.

QTY 2 - Audio Gain potentiometer for microphone input level

QTY 1 - AC Input filter assembly

QTY 2 - Accessory jack assembly with coils

QTY 2 - AC power cable with fused plug

BOX OF TUBES:
5U4 X 3
OA2 X 3
6AQ5 X 1
12BY7A X 5
5763 X 1
12AX7A X 6
12AU7A X 2
6AL5 X 2
6AU6A X 1

Various couplings, control shafts and small parts, red bezel lamp glass, etc.

2 bags of small hardware parts etc.

Several extra capacitors and odds-ends such as 0.1 uF at 600V DC caps etc.

For details and pricing - see web page:

1573. FS: Crystal Sockets

Yahoo group: hamstuff
Date: 2011-12-19 15:11:01 UTC
From: Bry Carling
Topic: 1573 Message: 1573

FOR SALE: Crystal Sockets

FT243 Crystal Sockets - 1/2" spacing X 0.094" diameter pins

Single FT243 Socket - two hole mount - classic style with shoulder - $8.00 each
(24 available)

Single FT243 Socket - smaller black type - single hole mount - $6.00 each
(4 available)

DUAL FT243 socket - square phenolic, Cinch, single hole mount, accepts two crystals - $10.00
(1 available)

QUAD in-line FT243 socket for multiple crystals, end to end on nice small copper subchassis - as used in DX100 - $24.00
(1 available)

HC6U Crystal Sockets - 1/2" spacing X 0.050" diameter pins
These are new ceramic sockets, single hole mount.
Available for $3.00 each or ten for $25.00 plus shipping
(60 available)

Triple hc6u socket - black or white - $5.00 each
(2 available)

Used hc6u sockets available for $2.00 each
(4 available)

CR1A (20C, DC30) crystal sockets, rare - pin spacing 0.5" and pin diameter 0.125" - for $4.00 each
(2 available)

DC34 / DC35 crystal sockets, Ceramic. rare - pin spacing 0.75" and pin diameter 0.125" - for
$4.00 each
(14 available)

DC34 / DC35 crystal sockets, Plastic. Rare - pin spacing 0.75" and pin diameter 0.125" - for
$4.00 each
(24 available)

CR-15/U Crystal socket, 3 pins New, Rare - 1-5/8" X 1-3/16" X 2" tall.
3 pins are 1/8" dia. Two are spaced 1/2" apart. third pin
is offset by 7/8" from each othe other two. $8.00 each
(2 available)

hc25 / hc50 crystal sockets, for the smaller metal can crystals, pc mount or attach wires $2.50 each.
(5 available)

1574. FS: Boxes of Electrolytic Capacitors

Yahoo group: hamstuff
Date: 2011-12-20 12:45:02 UTC
From: Bry Carling
Topic: 1574 Message: 1574

FOR SALE: ELECTROLYTIC CAPACITORS

Mix of radial, axial, upright can - some NOS. Almost all are new.
(one or two may be good, tested caps)

BOX #1 = QTY 35 electrolytic CAPACITORS
QTY 2, 0.068 uF at 630 V
QTY 2, 0.056 uF at 630 V
QTY 1, 4 uF at 600 V
QTY 2, 8 uF at 450 V
QTY 1, 8 + 8 uF at 450 V
QTY 2, 16 uF at 450 V
QTY 1, 125 uF at 450 V
QTY 1, 10 + 10 uF at 450 V
QTY 2, 820 uF at 450 V
QTY 1, 40 uF at 450 V
QTY 1, 68 uF at 400 V
QTY 4, 220 uF at 400V
QTY 2, 33 uF at 400V
QTY 1, 40 + 20 + 10 uF at 350 V
QTY 1, 22 uF at 350 V
QTY 1, 10 uF at 350 V
QTY 1, 100 uF at 250 V
QTY 1, 100 uF at 200 V
QTY 1, 4700 uF at 35 V
QTY 1, 4.7 uF at 35 V
QTY 2, 2200 uF at 25 V
QTY 4, 100 uF at 25 V
Total of 35 excellent capacitors for $45.00 plus $12.00 shipping

BOX #2 = QTY 40 electrolytic CAPACITORS
Mix of radial, axial, upright can - some NOS. Almost all are new.
QTY 2, 0.068 uF at 630 V

1578. FS: Heathkit test equipment - GDO

Yahoo group: hamstuff
Date: 2012-01-14 15:48:14 UTC
From: Bry Carling
Topic: 1578 Message: 1578

FOR SALE: Two complete Heathkit Grid Dip Oscillator sets:

1) Heathkit GD1A - covers 2.0 - 250.0 MHz. in above average condition, with all 5 of the coils
in their original box. Used to determine the resonant frequency of tuned circuits, antennas etc.
Also useful for aligning receivers, transmitters etc. The lower range can be extended down to 350 kHz. with an optional coil (not included) as described in the manual. 120V AC operation. Manual included - a copy of the original 21 page manual with schematic.
Exceptionally nice, works great - available for $50.00 plus shipping
(photos available)

2) Heathkit HD1250 Solid State Dip Meter in excellent condition with all 7 coils in great shape, covering 1.6 MHz to 260.0 MHz. Used to determine the resonant frequency of tuned circuits, antennas etc. Also useful for aligning receivers, transmitters etc.
This one includes the nice plastic carry caseand is all in excellent shape. Looks great.
Uses a standard 9V DC battery. Works fine as it should and is an exceptionally nice set.
Includes a copy of the 76 page manual with schematic (pdf).
Available for $50.00 plus shipping.
(photos available)

Date: 2012-01-14 18:45:32 UTC
From: Bry Carling
Topic: 1580 Message: 1580

FOR SALE:

MFJ-812 VHF Wattmeter / SWR meter.
This is the worlds most popular and most affordable VHF SWR/Wattmeter.
It has a built-in Field strength Meter. Covers 144 and 220 MHz.
Read forward and reflected power in 2 ranges - 30 or 300 Watts. Reads SWR from
144 thru 220Mhz. Also reads relative field strength from 1 to 220 MHz. Has binding
post for field strength antenna. Measures 4.5 x 2.25 x 3 inches. Eggshell White.
Excellent appearance and in working condition.
Available for $24.00 plus shipping
(photo available)

RL DRAKE Low Pass Filter model TV1000LP rated for 1000 Watts up to 30 MHz, 52 Ohms.
Has the two standard SO-239 connectors for attaching coaxial cables. These typically go
for around $35.00 on eBay.
Available for $20.00 plus shipping
(photo available)

1581. FS: Panel Meters

Yahoo group: hamstuff
Date: 2012-01-14 20:38:31 UTC
From: Bry Carling
Topic: 1581 Message: 1581

FOR SALE: Panel Meters - all in excellent condition except as noted.

Simpson Square Panel Meter model 37, 0 - 1 Amperes "radio frequency" .
Three inches square with traditional rounded corners.
QTY 1 available for $10.00 plus shipping.

Jewell Electrical round panel meter Pattern No. 66 for 0 - 1 Amperes "radio frequency."
Thermocouple type. Round 3.25" diameter for 2-1/2" hole.
QTY 1 available for $10.00 plus shipping.

Weston Electrical Instrument Model 425 for 0 - 5 Amperes RF.
Round panel meter with 3.5" diameter and uses a 2.75" diameter hole.
Since the outer case has a crack in it, the price is set
accordingly. Seems to still work fine though.
QTY 1 available for $3.00 plus shipping.

General Electric 0 - 50 mA DC meter, 3" X 3-1/8" square type with rounded corners.
QTY 1 available for $10.00 plus shipping.

Jewell Electrical panel meter Pattern No. 53. 0 - 10V DC. Round 3.25" diameter for 2-1/2"
hole.
QTY 1 available for $6.00 plus shipping.

General Electric Elapsed Time Meter for 120V AC. Reads Hours on a 0 -99999 scale.
Has already had 192 hours usage. This is a round panel meter - 3.5" diameter.
Uses a 3" hole. Since the outer ring of the case has a chip out of it, the price is set
accordingly.
QTY 1 available for $3.00 plus shipping.

Weston Electrical Instrument Model 301 Voltmeter, with scales for 0 - 140V and
0 - 7V DC
QTY 1 available for $5.00 plus shipping.

Weston Electrical Instrument Model 478 round panel meter for 0 - 5V AC.
with 3.5" diameter and uses a 2.75" diameter hole.
QTY 1 available for $8.00 plus shipping.

Triplett Model 321 round panel meter for 100 - 0 - 100 microAmperes DC, dual polarity.
Has center zero. 3.25" diameter for 2.75" hole.
QTY 1 available for $10.00 plus shipping.

Weston Electrical Instrument - Model 476 round panel meter- rear mount, no flange.
Scales for 0 - 60V and 0 - 120V AC. Has 2.75" outer diameter and 2.5" inside diameter.
QTY 1 available for $8.00 plus shipping.

Jewell Electrical panel meter Pattern No. 70. Round panel meter for 0 - 15V AC.
3.25" diameter for 2-1/2" hole.
QTY 1 available for $6.00 plus shipping.

This next one is a beauty - WESTERN ELECTRIC 0 - 1mA, MODEL ADK84 with scales for:
P.A. Plate 0 - 200 mA segmented as CW in the 80-120mA range and MCW in the 120 - 200 mA range. Also has a scale in the center for P.A. Grid and Battery.
Has 2.75" diameter and uses a 2.25" diameter hole.
QTY 1 available for $15.00 plus shipping.

Jewell Electrical Company dual scale meter for 0 - 12V DC and 0 - 120V DC.
3.75" diameter for 3" hole. The case looks fine but has a small chip out of the glass, and the so price is set accordingly.
QTY 1 available for $3.00 plus shipping.

Combine to save on shipping. Thanks for looking.

1582. FS: Pair of EIMAC 4-125A Tubes

Yahoo group: hamstuff
Date: 2012-01-15 02:48:51 UTC
From: Bry Carling
Topic: 1582 Message: 1582

FOR SALE: Pair of EIMAC 4-125A Tubes

A pair of these will typically produce 300 - 400 watts output when used with a 2500V plate supply. These are good, used / tested tubes. They come in original EIMAC boxes and have plenty of life left in them.

I will sell these for $20.00 each plus shipping

73 - Brian, AF4K

1583. FS: 6146 Tubes

Yahoo group: hamstuff
Date: 2012-01-16 12:15:46 UTC
From: Bry Carling
Topic: 1583 Message: 1583

For sale 6146 tubes:

QTY 4 - type 6293 / 6146 tubes. Used, good tested. RCA Brand.
This is the rare heavy duty version of the 6146 much sought after. To quote K9STH, these are a very heavy duty version of the 6146 and can be substituted without any problems. This is the 6293. A 6293 will outlast a "plain" 6146 by at least 5 times the life (over 10 times is not that unusual!). We would "kill" back in the late 1950s and early 1960s to get our hands on a pair of 6293 tubes for our DX-100s, etc.

Available for $7.00 each plus shipping

QTY 2 - 6146A / 8298 Tubes. Used, good tested. Westinghouse brand.

Available for $6.00 each plus shipping

73 - Brian, AF4K

1590. FS: Allen-Bradley Pot Assortments etc.

Yahoo group: hamstuff
Date: 2012-01-23 15:39:09 UTC
From: Bry Carling
Topic: 1590 Message: 1590

FOR SALE: Allen-Bradley Pot Assortments

While I could never be accused of selling pot, I do have a large number of good potentiometers to sell. Most of us kno wthat Allen-Bradley makes som of the very best potentiometers ever.

Most of these are new, USA made items, several are removed from working equipment.

POT ASSORTMENT #1 - Mostly TYPE J and TYPE P.
QTY 55 A-B pots, maybe a couple of Ohmite that look jusy the same. All 1/4" shafts. Many full length. Some are trimmer length. Includes 250, 1K, Dual 1K, 3.5K, 5K, 10K, 15K, 25K, 250K, 1.0M, 1.5M, Dual 10 M - total of 55 potentiomeneters available for $25.00 plus shipping.

POT ASSORTMENT #2 - Mostly TYPE J and TYPE P.
QTY 55 A-B pots, a couple of them are Ohmite. All have the standard 1/4" shafts. Many full length. Several are trimmer length pots. Includes: 50, 1K, 10K, 50K, 100K, 250K, Dual 500K full shaft, Dual 500K shorter shaft, 1.0 M, 2.5 M, 5 M, 10 M - total of 55 potentiomeneters available for $25.00 plus shipping.

POT ASSORTMENT #3 - Allen Bradley Type J yellow plastic pots with 1/4" shafts.
QTY 7 A-B pots with 200 ohms
QTY 3 A-B pots with 1000 ohns
QTY 2 CTS 250K pots New in Box pots with long 1/4" shafts
QTY 1 Centralab 1000 Ohms, new in box, long shaft, mix of new and used.
Total of 13 potentiometers available for $8.00 plus shipping

POT ASSORTMENT #4 - Precision multiturn pots - Bourns, Spectrol and Clarostat.
QTY 12 total, including 1K, 10K, 20K and 100K pots, mix of new and used.
Total of 12 potentiometers available for $8.00 plus shipping

POT ASSORTMENT #5 - QTY 18 slider pots - nos, audio faders by Stackpole, Dale etc.
QTY 5 X 10K
QTY 5 X 20K
QTY 5 X 30K
QTY 3 X 100K
Total of 18 potentiometers available for $9.00 plus shipping

NON-Allen-Bradley potentiometer asortments -

POT ASSORTMENT #6 - QTY 30 Various brands of potentiometers, mix of new and used.
Some dual pots. All 1/4" shafts, mostly full length. Includes values such as:
1K, 25K, 100K, 1 M, 5M etc.
Total of 30 potentiometers available for $12.00 plus shipping

POT ASSORTMENT #7 - QTY 30 Various brands of potentiometers, mix of new and used.
Some dual pots. All 1/4" shafts, mostly full length. Includes values such as:

1K, 25K, 100K, 1 M, 5M etc.
Total of 30 potentiometers available for $12.00 plus shipping

Please don't ask me if these are audio taper (logarithmic) or linear taper (I have NO idea!)
Also - please don't ask me if I have specific pots. I don't really have a way to hunt for them.

Contact me off the list to arrange purchase.

Thanks & 73 - Brian, AF4K

1596. FS: Military Surplus Crystal cases and crystals

Yahoo group: hamstuff
Date: 2012-02-03 20:16:40 UTC
From: Bry Carling
Topic: 1596 Message: 1596

FOR SALE:

TYPE BX40 crystal case - holds 120 standard FT243 crystals or similar.
Excellent condition - QTY 4 available for $29.00 each plus shipping

Excellent condition - TYPE CS-137 crystal case - holds 120 standard FT243 crystals or similar.
QTY 2 available for $29.00 each plus shipping

Pictures available for both...

Numerous FT243 crystals available, many for the ham bands, including 7025, 7050, 7075, 7100 kHz etc. Available for $14.00 each plus shipping.

Thanks for looking and 73 - Brian Carling, AF4K

1597. FS: Ham band hc6u crystals

Yahoo group: hamstuff
Date: 2012-02-04 11:12:35 UTC
From: Bry Carling
Topic: 1597 Message: 1597

FOR SALE: hc6/u crystals for the amateur radio bands.

These are for Hallicrafters radios:

5.0 MHz, 6.0 MHz, 6.5 MHz, 7.0 MHz, 7.5 MHz, 8.0 MHz, 8.5 MHz, 9.0 MHz, 10.0 MHz,
11.0 MHz, 12.0 MHz, 12.5 MHz - Available for $16.00 each plus shipping.
(others available = inquire)

These are available for Drake 4 Line radios:
12.6 MHz, 13.6 MHz, 14.1 MHz, 14.6 MHz, 17.1 MHz, 17.6 MHz, 18.1 MHz, 19.1 MHz,
19.6 MHz, 20.6 MHz, 20.8 MHz (Drake recommended for 30m band), 22.1 MHz,
22.6 MHz, 29.1 MHz, 31.6 MHz, 32.6 MHz, 35.6 MHz, 38.1 MHz, 39.1 MHz, 39.6 MHz,
40.1 MHz, 40.6 MHz, 43.6 MHz

These are available for Drake 2 Line radios:
13.5 MHz, 17.5 MHz, 24.0 MHz, 24.5 MHz, 25.0 MHz, 30.0 MHz

Collins: Most are now available including 10.5775 MHz, 13.155 MHz, 13.9775 MHz,
15.7275 MHz, 15.8275, 15.9275 MHz and many more.

Others available: (many more also)
1000 kHz, 1400 kHz, 1600 kHz, 1700 kHz, 5355 kHz, 5360 kHz, 8998.5 kHz, 9.0 MHz,
10.0 MHz, 10.7 MHz, 15.0 MHz, 15.2 MHz, 16.0 MHz, 18.0 MHz, 20.0 MHz, 21.0 MHz,
21.1 MHz, 21.5 MHz, 27.0 MHz, 28.0 MHz, 30.0 MHz, 30.52 MHz, 32.0 MHz,
33.52 MHz, 34.5 MHz, 34.7 MHz, 35.0 MHz, 35.5 MHz, 36.0 MHz, 38.0 MHz, 42.5 MHz,
43.0 MHz, 43.5 MHz,

Most of the above are available now for $16.00 each plus shipping.
(some of the non-amateur-band Collins ones are $12.00 each)

For details see:

FOR SALE: Two Vintage Ham Transmitters

AMECO TX62, a 75 watt AM-CW Transmitter in excellent shape.
This TX-62 is one of the best I have seen. This is a dual band VHF transmitter for the 6m, and 2m amateur bands. Comes with a copy of the manual.

Pictures available.
Will sell for $75.00 plus shipping.
http://www.n4mw.com/TX62.pdf

= = =

GONSET COMMUNICATOR II CIVIL DEFENSE Transceiver, in excellent shape.
Delightful bright yellow case is all original. Everything looks to be in great shape inside and out. One original small knob is missing. Otherwise complete in every way and in good shape. This is a 2m AM Transmitter. Includes one crystal for popular AM calling frequency of 144.450 MHz (the crystal is at 8025 kHz) - it's an original FT243 crystal. These
crystals normally sell for around $12 - $15 each.
Comes with a copy of the manual. Pictures available.
Will sell for $65.00 plus shipping

1614. Power Supplies FS

Yahoo group: hamstuff
Date: 2012-03-06 20:25:04 UTC
From: Ken Simpson, W8EK
Topic: 1614 Message: 1614

Power Supplies For Sale:

Astron VS-35 M Power Supply:

Astron power supplies feature solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output. Crowbar over-voltage protection is also provided.

This supply is rated for provide 35 amps ICAS, or 25 amps continuous at 13.8 V DC, so it is more than enough for all of the 100 watt rigs. This model has the voltage adjustable from the front panel from about 5 volts to 15 volts. Current limiting is also adjustable from the front panel, permitting one to set it to protect your solid state rig. Voltmeter and ammeter are included.

This particular unit works 100%, and looks really great. I can not find any scratches on it, although there is one very small defect on the top that one can see if the light is just right.

These sell for about $250 new. Buy this one, with the paper work, for $145.

Kenwood PS-30, 20 amp (at 13 V DC) power supply:
This power supply will furnish up to 20 amps at 13 V DC to power most 100 W output HF transceivers. It also has auxiliary terminals on the back to power an additional rig, such as a 2 m rig. The main connector is the 6 pin molex connector that will match most Kenwood, Icom, and Alinco HF radios, as well as some Yaesu.
This particular unit works 100% and looks very nice.
Paper work included for $90.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is electrically very quiet, and well shielded. It does not produce any electrical noise

that I could find.

Of course it works fine, and looks fine also. $175

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a voltmeter and an ammeter built in. The output voltage is adjustable over a range from about 11.5 to 15.5 volts DC. There is also an adjustment to set the current limiting, up to 25 amps. This means it can be set so that it will protect the finals of a solid state rig. In addition, a buzzer is activated if it goes into over current limiting. This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which means that it will produce up to 18 V DC at up to 3 amps. This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero, up to almost 20 volts. There is a fairly large analog meter that reads the voltage. Built in current limiting is adjustable with a 10 turn pot from a few ma to up to about 3 amps. A separate meter reads the current, so both voltage and current can be read at the same time. Also, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $160

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell for $125 to $150 (plus shipping).
Buy this one for $90.

Radio Shack 22-124 Regulated Power Supply
This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply
This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.
This unit is is a utility type power supply. $15

AEA AC-1 "Wall Wart" Power Supply

This "Wall wart" power supply will supply 12 V DC at
up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.

This unit has a 2.1 mm coaxial power plug, with the
center positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc.

This is a "regular" wall wart -- not the new switching
type that creates all sort of noise in your receiver.
Get this one, and leave the noise behind. $14

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs,
including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209,
FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more.
Small 2.5 mm male plug. $10

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Icom DC-25 DC adapter :
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and
BP-24 battery packs. It takes 13 V DC (such as from a
cigarette lighter), and converts it to the 9.4 V DC voltage
needed for the HT. It is used in place of a battery.
This one works fine and looks fine. $18

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1615. Antennas and related items FS

Yahoo group: hamstuff
Date: 2012-03-10 15:21:12 UTC
From: Ken Simpson, W8EK
Topic: 1253 Message: 1615

Antennas and related items For Sale:

Doublet Antenna and "Window Line":

Doublet antenna consisting of about 110 feet of wire, with
center insulator, 2 end insulators, and 2 center supporting
insulators. This antenna is made to be fed with "open wire"
450 ohm transmission line, and used with an antenna tuner.
It should be able to tune from 80 thru 10 meters, with the
proper tuner. $20

"Windows Line" 450 ohm transmission line
This is similar to "open wire" transmission line, but has
some plastic insulation on it instead of being open, so it
is protected more. The openings look like windows, hence
the name. I have three lengths available. Two are about
50 feet long, and are $15 each. The third is over 80 feet
long, and is $25.

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

MFJ 989, 3000 Watt rated, HF Antenna Tuner:

The 3 KW MFJ-989 features two massive transmitting capacitors
and a roller inductor with a three digit counter. You won't
have arcing problems with this roller inductor, because firm
springs put considerable pressure on a plated contact wheel.

You can tune your SWR down to the absolute minimum from 1.8 to 30 MHz, including MARS and the WARC bands. It has a super heavy duty balun for balanced lines.

You can select two coax antennas direct or through the tuner, balanced line or random wire, plus a built-in 50 ohm 300 watt dummy load. A wattmeter is also included.

This one works fine, and looks good, although there is some slight wear. The meter light has burned out. Paper work included for $175.

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power. It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match. The "L" match is also more efficient. Electrically, it is the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.

It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni series (Omni 546, series A, B, and C) with the black vinyl covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect. I can not find a scratch on it. Paper work is included for $325.

W2AU "Big Signal" 1 to 1 balun:

W2AU baluns operate at a low VSWR from 1.8 to 40 mHz, and handle powers up to 2 KW PEP (at SWRs of less than 3:1). W2AU Baluns are transformer designs with ferrite cores to provide 95% minimum coupling efficiency. Each has a built-in lightning arrestor, hang up hook, and 600 lbs of pull-apart strength in a weatherized, rugged package using only stainless steel hardware and quality materials.

This is the 1 to 1 model.
It appears that this one was never used. W2AU sells these for about $30. Buy this one for only $20.

MFJ 207 HF Antenna Analyzer:

The MFJ-207 10-160 Meter Antenna SWR Analyzer gives you a direct readout of your antennas SWR without the need for

formulas or indirect readings. The MFJ-207 can also be used
to adjust a tuner to match your antenna without the need
for transmitting. Its frequency coverage is approximately
from 1.75 MHz to 30 MHz in five bands.
The bands and coverage are approximately:
BAND A: 1.75 - 3.00 MHz
BAND B: 3.00 - 5.00 MHz
BAND C: 6.50 - 11.70 MHz
BAND D: 11.65 - 20.00 MHz
BAND E: 18.00 - 30.00 MHz

The MFJ-207 uses a 9V battery or 110VAC from a wall wart
power supply.

This one works fine, and looks fine. It is in its original box,
with paper work for $60.

Wall Wart power supply for use with the MFJ 207. $12

Buy both of the above for $70.

Heath HN-31 "Cantenna" RF Dummy Load:

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

It is in good shape both electrically and cosmetically. The
cantenna has no rust, dents or dings.

I can ship it either with or without oil. The cost to purchase
is the same, but of course the shipping will be higher with
the oil.

Paper work is included for $40.

Heath SB-634 Station Console, with Wattmeter and more:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.
With paper work for $150.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it. In its original box with original
instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Heath HM-2102 VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.

This particular meter works great, looks really great,
and includes paper work for $50.

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $25.

Larsen NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $15

Larsen NLA Type VHF Mobile Antenna for 2 meters:

This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Avanti "On Glass" mobile antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

This one is still in its original tube, unopened. $33

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, are 50 ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new. Bencher currently sells these for about $90. Only $60.

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more

attenuation in the 40 MHz region, where many TVs have their
IF. It is good for 1000 Watts "average" according to the manual,
and has over 80 db attenuation at 41 MHz. This one looks great,
and includes the paper work. $30

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 W "average" below
30MHz, and about 200 W up to 52 MHz. $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but
looks ugly. With paper work. $25

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

1970 ARRL Antenna Book
This is the 12th edition of this classic ARRL publication.
This one is in the older, smaller size, and is in very
nice condition. $12

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cables
tandard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1618. FS: Heathkit SB200 Linear Amp

Yahoo group: hamstuff
Date: 2012-03-20 02:43:32 UTC
From: Bry Carling
Topic: 1618 Message: 1618

FOR SALE:

Heathkit SB200 Linear Amplifier
Looks great. 600 watts RF output with 100 watts of drive. Covers 80 through 10m amateur bands. SO-239 RF Output suitable for 50 - 75 ohm antennas.

Power requirements: 120 / 240V AC. This one is wired for 240V, and is in very good working condition.

Dimensions: 378 × 168 × 340 mm (15" X 6.5" X 13.5 inches)
Weight approximately 36 pounds plus crating.
This one is in excellent condition. PTT line is not tripping but all other functions are good and
it works.

Pictures and details at:

http://www.af4k.com/radios.htm

1619. FS: TEMPO ONE HF TRANSCEIVER

Yahoo group: hamstuff
Date: 2012-03-20 02:51:57 UTC
From: Bry Carling
Topic: 473 Message: 1619

FOR SALE: Henry Radio TEMPO ONE HF TRANSCEIVER

80m through 10m bands (No WARC) - Covers the 80m, 40m, 20m, 15m and 10m amateur bands on SSB and CW.
240 Watts Input power.
Carrier suppresion -40 dB.
A.F. Bandwidth 300-2700 Hz
Power Supply - 120V AC or 12 V DC using external power supplies (See below)
16 Tubes, 15 diodes and 7 transistors.
Dimensions: 13.25" wide X 5.5" high x 11" deep
Approx. weight: 18 pounds.
Cables will be included with the power supply below.
Comes with a copy of the operators manual.

Henry Radio AC/One Power Supply extra nice condition.
With built-in 3" X 5" speaker for audio out from the Tempo One Transceiver.
Any of the following AC Voltages may be used: 110 - 120V AC or 200 - 240V AC
Dimensions: 8" wide X 5.5" tall X 11" deep / 22 pounds.
Cables are included.

1621. Microphones FS

Yahoo group: hamstuff
Date: 2012-03-23 15:21:20 UTC
From: Ken Simpson, W8EK
Topic: 1621 Message: 1621

A large variety of microphones For Sale -- Desk Mics,
Hand Mics, DTMF Touch Tone mics, speaker mics, etc.

Kenwood MC50 / MC-60 Desk Microphone:

I know. How can the mic be an MC-50 and also an MC-60?
Actually, it is an MC-50 desk mic, configured like an MC-60.
It is an MC-50, but to the right of the main stem coming
from the base, a bat handle toggle switch has been added
for Up / Down selection. This has been done very neatly,
and it looks good, as well as functioning well. In
addition, the connector has been changed to a round 8 pin,
wired for Kenwood. So it functions like an MC-60.
Of course the MC-50 can have the connector to the mic
reversed for either high or low impedance.

This one works fine and looks fine also. I will include
both MC-50 and MC-60 paper work with it for $60.

Deluxe Desk Microphone:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal!

This one has stripped and tinned ends on it, which means
any connector can easily be added.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $70

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed
metal about 5 1/4 inches long, and is actually part of the
gooseneck. The cable goes thru the gooseneck. This has a
2 conductor shielded cable, so it is a quality balanced
microphone with low impedance. The gooseneck terminates
in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood MC-30 noise canceling hand microphone:

The Kenwood MC-30S noise cancelling mic is used on many of
the older Kenwood rigs, including the TS-120, TS-130, TS-520,
TS-820, and many, many more.

Most had a 4 pin connector, but this one has a 5 pin connector
on it. It looks original. Apparently this was the original mic
on the Kenwood TR-7600/7625, and maybe others. The 5 pin
connector also matches some of the 10 meter ham rigs.
Of course the connector can be changed.

The mic works fine and looks very close to new.

Paper work included for $35.

Hand Microphone with round 8 pin plug for Kenwood / Alinco / ADI

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others, including Alinco and
ADI. It says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. They will function on some rigs, and
are completely useless on others. There is also a "Lock"
switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

As above, but with 8 pin modular connector. $30

Shure EM-33D, controlled magnetic hand microphone:

The Shure EM-33D was used by GE on many of their rigs.
This mic has a controlled magnetic cartridge, similar to
the Shure 444 desk microphone, but this one is a hand mic.
Apparently it is tailored for voice communications "punch"
like the 444's.

This one works fine and looks OK, although it does show some
use. It presently has a 1/4 inch stereo connector on it as
used by early TenTec, Swan, and many others.

The cartridge alone is worth $40. Buy this entire mic for $40.

Yaesu Hand Microphones:

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch. Stripped and tinned ends. Great condition. $40

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug.
Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.Stripped and tinned ends. Great condition.
$40

Speaker Microphone / Antenna Extender:

Niche MS-105 Speaker Microphone, plus extender for BNC Rubber Duck antenna. This is the speaker mic that is often clipped up high on the shoulder by police and fire personnel. In addition to being a speaker mic, it has a BNC connector on both the speaker mic end, and on the opposite end, so that the BNC rubber duck can be raised to a higher location. The speaker mic connection is the 2.5 mm and 3.5 mm combo connector as used in most Icom, Alinco, some Yaesu, and many others.

This one works fine and looks very close to new. $30

Speaker Microphone for Yaesu VX-1, VX-2, VX-3, VX-5, etc.

Pryme Speaker Microphone
This is the Pryme equivalent of the Yaesu MH-34. It has
the 4 conductor 1/8 inch plug on it. It works 100% and
looks like it has not been used. $25

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them,
as used by Icom, Alinco, Radio Shack, some Yaesu, and
other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.It works fine, and looks close to new. $15

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

I also have many other items available such as many
different types of various ham accessories, microphones,
HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1623. VHF & UHF items FS

Yahoo group: hamstuff
Date: 2012-03-28 20:22:17 UTC
From: Ken Simpson, W8EK
Topic: 1623 Message: 1623

VHF and UHF (2 meter and 440 MHz) Equipment For Sale -
2 meter HT, dual band HT, 2 m mobile rig for parts,
HT accessories such as speaker mics, rubber ducks, etc.,
SWR Bridges, mobile antennas and mounts, DTMF Touch
Tone and regular Microphones, and more:

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $115.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes desk charger,
rubber duck antenna, belt clip, wrist strap, battery,
and paper work. $130

Alinco Protective Battery Plate
This is a "dummy" plate that slides on to the HT in place
of the battery. It is used when powering the HT from an
external power source (such as the EDC-36), to
prevent the battery terminals from being exposed and
causing accidents. $10

Alinco Carrying strap - Like new. $4

Speaker Microphone for Yaesu VX-1, VX-2, VX-3, VX-5, etc.

Pryme Speaker Microphone
This is the Pryme equivalent of the Yaesu MH-34. It has
the 4 conductor 1/8 inch plug on it. It works 100% and
looks like it has not been used. $25

Other HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them,
as used by Icom, Alinco, Radio Shack, some Yaesu, and
other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.It works fine, and looks close to new. $15

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works

fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used, except for my testing it. In its original box with original instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

Larsen NLA Type VHF Mobile Antenna for 2 meters:

This antenna fits the Larsen NLA mobile mount, which is a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $22.

Mag mount with 1/4 inch stud
Male 1/4 inch 20 thread stud sticking out the top, with
about 15 feet of RG-58 coax. $12

NMO "Luggage rack mount"
This NMO mount will attach to a luggage rack. The bracket
is made so it can attach to either a vertical or horizontal
portion. It is heavy chrome plated, with stainless steel
hardware, and is quite heavy duty for NMO. With 17 feet coax
and PL-259. It looks to be new. $18

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

DTMF Touch Tone Microphones:

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch.Stripped and tinned ends. Great condition.
$40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug.
Looks to be unused. $38

Hand Microphone with round 8 pin plug for Kenwood / Alinco / ADI

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TM-241,
TM-2530, TW-4000, and others, including Alinco and
ADI. It says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. They will function on some rigs, and
are completely useless on others. There is also a "Lock"
switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

As above but with 8 pin modular connector. $30

Yaesu Hand Microphones:

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch. Stripped and tinned ends. Great condition. $40

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply
This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply
This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.
This unit is is a utility type power supply. $15

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood
TH-21/31/41series HTs. $6

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200, ST-142,
ST-144, ST-440, etc. The real leather case includes a built
in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

Icom DC-25 DC adapter:

This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and
BP-24 battery packs. It takes 13 V DC (such as from a
cigarette lighter), and converts it to the 9.4 V DC voltage
needed for the HT. It is used in place of a battery.

This one works fine and looks fine. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both
transmit and receive. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the 144 MHz
segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the
solid state 2 meter mobiles and HTs. Please e-mail the operating
frequency you need. I have them listed by operating frequency and
rig,and not by actual xtal frequency. Send the frequencies you need
(transmit or receive), and the rig that you have, and I will see if
I can help. I have cross references for the various rigs, so I will
know what you need if you give the rig.
Crystals are $6 each.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF

and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1624. FS: Sweep Tubes etc.

Yahoo group: hamstuff
Date: 2012-03-31 14:01:58 UTC
From: Bry Carling
Topic: 1624 Message: 1624

For Sale: Sweep Tubes - some New No Box, New In Box... some Used Tested or Used Tested w/Box.
(NNB, NIB / UT / UTB) - Quantity 1 unless stated otherwise.

Ameritron AL-84 used four 6JM6 tubes in it. Sweep tubes were used one Yaesu linear amp. Many amplifiers and radios use 6KD6es and the Yaseu FL-1000 used 6JS6A's. Yaesu used sweep tubes in the finals of the FT-101 series, 6JS6C. Swan used sweep tubes. The Siltronix 1011c and many other CB amplifiers use sweep tubes of various voltages. They say that Galaxy WRL made a 10 sweep tube legal limit amplifier. I never saw one.

6CD6GA - RCA - UT - $1.50

6DQ5 - Westinghouse - NIB - $5.00
6DQ5 - Westinghouse - New, NB - $5.00

6GV5 - Zenith USA - UT - $1.00

6JB5 / 6HE5 - General Electric - NIB - $2.50

6JB6 - RCA - USA - UTIB - $5.00
6JB6 - Sylvania USA - UTIB - $5.00

6JE6B - General Electric USA - UT - $8.00
6JE6 - USA - UT - $6.00
6JE6 - RCA, USA - UIB - $8.00
6JE6C / 6LQ6C - Magnavox USA - UT - $8.00
6JE6C - Westinghouse USA - UT - $8.00

6JM6A - RCA, USA - NIB - $3.00

6JS6C SYLVANIA USA - UT - $15.00
6JS6C USA - UT - QTY 3 - $15.00 each
6JS6C NEC JAPAN - UT - $15.00

6JZ6 - USA - UT - $1.50

6KD6 ITT, Japan - UTB - $10.00
6KD6 Raytheon, Japan Green Stripe - UTB - $10.00

6KM6 - RCA USA - NIB - $5.00

6LB6 - General Electric USA - NIB - $15.00
6LB6 - USA - UT - $7.00

6LF6/6MH6 - International Servicemaster USA - UT - $15.00

6LQ6 - Sylvania USA - UT - $12.00
6LQ6 - RCA - USA - UT - $12.00

1625. Ham Publications FS

Yahoo group: hamstuff
Date: 2012-04-01 12:38:30 UTC
From: Ken Simpson, W8EK
Topic: 1625 Message: 1625

Vintage Ham Publications For Sale:
Mainly ARRL, but some others

ARRL Handbooks

1973 - 50th edition -
This one is in the smaller format, which means it has
tube charts and vintage ads.
It is in very nice condition, although the pages have
yellowed slightly. $14

1985 - 62nd edition
This one is in the larger format. It has been "well used"
and has some loose pages, but I think they are all there.
The binding has duct tape on it, but the important info
is still there. $7

1988 - 65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

1992 - 69th edition - Hard Bound
Several inches thick with a lot of information.
This one looks like new, except for a previous owner's
call sign on the inside cover. $22

Other Vintage ARRL Publications:

These are in the smaller 6.5 x 9.5 inch format.
Most have some very nice vintage ads in them.
All are very pristine, in close to new condition.

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12

ARRL Hints and Kinks for the Radio Amateur
1968, Close to new condition, Collectible. $12

ARRL Single Sideband for the Radio Amateur
1970, Fifth edition, $12

ARRL Specialized Communications Techniques
1975, First Edition, $15

The next two are in the larger 8.5 x 11 inch format.

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

ARRL Learning to Work with Integrated Circuits, First edition $10

ARRL Books about Operating your ham station:

ARRL "Radio Amateurs Operating Manual"
2nd edition, $8
5th edition, over an inch thick, $12

ARRL "Operating an Amateur Radio Station"
1972 - 53rd edition $4
1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, $3

ARRL Amateur Radio Field Resources Directory
First edition, $7

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

Vintage ARRL Licensing materials:

Check and see what the FCC tests were like in the past!

All books are in excellent condition, with some in very
close to new condition.

ARRL Tune in the World with Amateur Radio
1976, First Edition $3

ARRL Now You're Talking
1993, 2nd edition $10

ARRL Tech Q & A, 1997, First Edition $8

ARRL License Manuals - $3 each
1977, 76th edition, All classes
1984, 80th edition, All classes

Technician Class
1989, First Edition
1993, Second Edition

General Class
1989, First Edition

Advanced Class
1985, First Edition
1990, Third Edition
1996, Fourth Edition

Extra Class, 1988, Third edition

Vintage Ameco Ham Licensing Publications:

These are all Ameco Publications that are in
extremely nice, close to new, condition.

Ameco "Complete Technician Radio Amateur FCC Test Manual"
1992 $3

Ameco "General Class Radio Amateur FCC Test Manual"
1984, Like new $4
As above, but includes 1988 questions and answers $4

Ameco "Advanced Class Radio Amateur License Guide"
First Edition, 1981, like new $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
Copyright 1987, with added 1991 material
First Edition, Like New $6

Miscellaneous Licensing material:

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Radio Amateur "Flying Horse" Callbooks:

All are in extremely nice condition, close to new.

1981 Foreign "DX" Callbook - $5

1994 International "DX" Callbook - $8

1995 North American "US" Callbook with over
700,000 listings, including Canadian - $10

Digital and Satellite Books:

Your Packet Companion by Steve Ford, WB8IMY
ARRL, 1995, First Edition, $5

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

FCC Rule Books and other ham publications:

ARRL "FCC Rulebook"
Seventh edition, $3
Eighth Edition, $4
As above, but "Newly Revised to include Codeless
.....Technician" - Like New, $6
13th edition $10

W5YI
"Ham Operator Education Package" $4
"Rules and Regulations - Part 97 Amateur Radio Service"
Fourth Edition $3
17th Revised Edition $4

ARRL Public Service Communications
Ninth edition, $3
no edition number listed, but fairly recent $3

World Atlas, World Map, and DXCC List:

Radio Amateur World Atlas - 13th edition
Includes many different maps of the world with
ham prefixes on them.
Nice condition $8

The Radio Amateur World Map by Yaesu
This wall map is approx 34 x 24 inches in size.
It includes the ham prefixes on the various countries.
It appears to never have been used. $8

ARRL DXCC Countries List
This is a large check list for working the various
countries, and also includes other information such
as prefixes, applications, etc. New condition $4

Ham CDs:

Set of Extra Class CDs
This is a set consisting of six CDs. I am not certain who
made them or where they came from, other than they came
from the drawer of a silent key. They simply say "Extra
Class, Volume 1", "Extra Class Volume 2", etc. on them.
$18 for the set of six.

ARRL Morse Code Exam
5 WPM version, sent at 15 WPM, but spaced for 5 WPM, with
750 hz tone $7

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

1626. FS: Greenlee Punch

Yahoo group: hamstuff
Date: 2012-04-06 14:57:21 UTC
From: Bry Carling
Topic: 1626 Message: 1626

FOR SALE:

Greenlee Punch - 5/8 inch diameter punch for round holes.
Perfect for installing most 7-pin miniature tube sockets or other similar sized items into an aluminum chassis, front panel etc.

New price for these seems to be around $45.00 to $46.00.

One available for $25.00 plus shipping

1627. FS: Groups of PL259 - SO239 Connectors

Yahoo group: hamstuff
Date: 2012-04-06 15:10:22 UTC
From: Bry Carling
Topic: 1627 Message: 1627

FOR SALE:

Over PL259 / SO239 plugs, sockets, adapters etc. for RF coaxial connections.

Each group has about 15 - 20 pieces of mostly new / new old stock PL259 and SO 239 connectors and adapters of all kinds. These normally sell for several
dollars a piece. Some of these include a few odd 'N' connector or adapter etc. I have added a couple of other pieces
to these kits to sweeten the deal.

The remaining groups are each available for $12.00 per group plus shipping.

Pictures and details with ordering buttons are available here:

http://www.af4k.com/connects.htm

73 & thanks for looking - Bry, AF4K

1629. FS: Carbon Comp Resistors etc.

Yahoo group: hamstuff
Date: 2012-04-09 16:21:44 UTC
From: Bry Carling
Topic: 1629 Message: 1629

FOR SALE: CARBON COMPOSITION RESISTORS

Here are some grab bag assortments of ALL NEW 2 WATT, 1 WATT and 1/2 WATT resistors, with a good mix of values from 1 ohm to 15 Megohms. Authentic parts made by Ohmite, IRC etc. Ideal for homebrewing and repairs tube radio transmtters and receivers etc.
1 Watt and 2 Watt resistors usually cost around $1.50 to $3.00 each when you can find them... Half watt resistors are $2.00 each at Radio Shack. A Surplus Place in Nebraska sells
them for $10 to $15.00 for a 50 pack.

SPECIAL: The first 5 orders will get a free bag of 100 new resistors.

2 WATT Resistors Packs - Quantity 50 - $10.00 each
1 WATT Resistor Packs - Quantity 100 - $10.00 each
1/2 WATT Resistors Packs - Quantity 100 - $8.00 each
LARGE MIXED BAG of 500 - 2 Watt, 1 Watt and 1/2 WATT mix of mostly New and Good Used Resistors - Quantity over 500. All for $12.00

Also: LARGE BLEEDER RESISTORS FOR LARGE TRANSMITTER PROJECTS:
Examples:
12Kohms at 40 Watts $9.00
50,000 ohms at 100 watts $18.00
25,000 ohms at 100 watts $19.00
15,000 ohms at 120 watts $16.00
16,000 ohms at 50 watts $13.00

ALSO - most "Common Values" of the 2 Watt and 1 Watt resistors are available. From 1 ohms to 22 Megohms.
A few exceptions are unavailable such as 100 K, but I do have some 110 K which will work fine in most applications.
These are brand new resistors with full lead length and are excellent 5% and 1% components.
Available for the following prices:
2 Watt = $2.00 each / ten or more of same value for $1.75 each
1 Watt = $1.00 each / ten or more of same value for $0.80 each
1/2 Watt = $0.70 each / ten or more of same value for $0.60 each
Shipping additional.

Pictures and details:

1632. FS: Crystal Converters

Yahoo group: hamstuff
Date: 2012-04-14 22:22:13 UTC
From: Bry Carling
Topic: 1632 Message: 1632

FOR SALE: Brand new Peterson Radio Co. Crystal Converters.

Several of these for sale, and they are brand new. All are made for 455 kHz i.f. output, and
offer fixed local oscillator and rf amp-mixer stage for conversion to popular i.f of 455 kHz.
See pictures at web site below. I do not have a diagram, but perhaps it is stll available from
Peterson. In any event, it is going to be easy to figureout, since these two transistor converters have input, output and power connections on the PC boards, that should be fairly obvious. Fun project - these could easily be adapted to 6m, 10m and 30m operation - or use as an oscillator or other project.

Input receive frequency is shown. Crystal frequency will be 455 kHz away. You will find ordering the ordering buttons at link below.

One each: 10.000 MHz, 39.050 MHz, 45.060 MHz and 48.150 MHz, ALSO: for 39.500 MHz -
I have an initial quantity of 3. All others are one each. Price is $3.00 each plus shipping, while
they last!

Pictures, details and ordering page here:
http://af4k.com/miscpart.htm

1633. HF Antennas and related items FS

Yahoo group: hamstuff
Date: 2012-04-17 13:24:16 UTC
From: Ken Simpson, W8EK
Topic: 1413 Message: 1633

HF Antennas and related items For Sale -- Dipoles,
Verticals, Dummy Load, SWR Bridges, Antenna Tuner,
Low Pass TVI Filters, and Connectors

B & W Broadband HF Dipole Antenna:

B & W states that this broadband dipole will tune from 3.5
thru 30 MHz. From their web site: "Our field proven
broadband HF antennas operate all frequencies continuously
from 1.8 to 30 Mhz without an antenna tuner, plus 6 meters.
If you are participating in various programs such as MARS,
ARES, RACES or CAP these antennas will work all of your
frequencies all the time. If your frequencies get reassigned,
it does not matter."

This particular antenna is the AC 3.5-30, which is also
called the BWD-65. It does not cover 160 meters. It is
about 65 feet long, and has a special balun and loading
coil, plus the wire and spreaders.

This particular antenna works fine, and looks very close
to new. It was installed inside an attic, so has not been
exposed to the weather.

These sell for over $300 new. Buy this one that is close
to new, with paper work, for only $175.

Broadband Dipole Antennas:

These antennas are sometimes call "Bazooka" dipoles, but
also go by other names. They are made from RG-8 coax
instead of just wire. They are fed differently, with
both halves of the coax used. The result is an antenna
that is more broad banded than a regular wire dipole,
permitting one to cover all, or most, of a ham band with
a reasonable SWR. Of course these can be put into an
inverted V configuration as well. They have been described
in the ARRL Handbook and ARRL antenna book at various times.

I have antennas for two different bands:

40 meter antenna as described above (approx 66 feet long)
with about 25 feet of RG-8 coax feedline attached, terminated
in a PL-259 connector. $50

10 meter version, about 16 feet long. No feedline on this
one, but there is a place for you to attach your own coax.

$15

Buy both of the above for $60.

MFJ 1796 Halfwave Vertical Antenna:

The MFJ 1796 covers the 40, 20, 15, 10, 6, and 2 meter bands,
with no radials needed.

It is only 12 feet high and can be mounted anywhere -- ground
level to tower top -- apartments, small lots, trailers.
Perfect for vacations, field day, DXpedition, camping.

Efficient end-loading, with no lossy traps
Full size halfwave on 2 & 6 Meters
High power air-wound balun eliminates feedline radiation
Adjusting 1 band has minimum effect on others
Automatic band switching
Low radiation angle for great DX
Omnidirectional
Handles 1500 watts PEP
Low SWR
Stainless steel hardware

This antenna was used in a restricted community, and only
put outside when being used, so it is in terrific shape.
Paper work included.

These sell for over $300 new. Buy this one for only $175.
Pick up near Ocala FL, just off of I-75.

Doublet Antenna:

Doublet antenna consisting of about 110 feet of wire, with
center insulator, 2 end insulators, and 2 center supporting
insulators. This antenna is made to be fed with "open wire"
450 ohm transmission line, and used with an antenna tuner.
It should be able to tune from 80 thru 10 meters, with the
proper tuner. $20

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

Hustler Resonators for Hustler Mobile HF Antenna Systems:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
40 meter resonator RM-40
This resonator has tape on the bottom. I assume the
tape was used to tell the silent key which frequency
the RM-40 was tuned to, being he had two of them. $15

Dentron "Big Dummy" RF Dummy Load:

This is Dentron's equivalent to the the traditional Heath
"Cantenna" dummy load that will handle a kilowatt. It has
a derating curve with it.

It is in good shape both electrically and cosmetically.
It has no rust, dents nor dings.

I measured the resistor and it is 53 ohms, so obviously it
is in good shape. I have never seen any others this close
to 52 ohms!

I can ship it either with or without oil. The cost to
purchase is the same, but of course the shipping will be
higher with the oil.

With derating curve paper work for $45.

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --

one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time. It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used, except for my testing it. In its original box with original instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power. It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match. The "L" match is also more efficient. Electrically, it is the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.
-
It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni series (Omni 546, series A, B, and C) with the black vinyl covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect. I can not find a scratch on it.

Paper work is included for $325.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, are 50 ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new. Bencher currently sells these for about $90. Only $60.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular situation, and also to more closely match your specific impedance. It cuts off at about 52 MHz (if adjusted as such) so it can be used on 6 meters, and will handle 1500 watts. $35

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W "average" below 30MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly. With paper work. $25

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.In very nice condition, it looks close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz. 5 x 6 x 2 inch black box, instead of the more familiar long enclosure. It looks like new. $25

Coax connectors and adapters:

Prices are per connector. Several of each are available. It looks like these have not been used.

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

"N" Connector - Double Male $8

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1634. FS: Western Electric Tubes

Yahoo group: hamstuff
Date: 2012-04-17 23:20:50 UTC
From: Bry Carling
Topic: 1634 Message: 1634

FOR SALE:

Western Electric 717A tubes - These are great little Miniature Octal base tubes often used to soup up front end RF stage on the Hammarlund HQ129 series receivers or the 2-40D for higher gain in the HF bands.

These typically go for about $17.00 each. For example:
Item# 110845315197 at that place.

Good used, tested condition, like the others... only far less. I will sell the pair for $10.00 plus shipping.

73 - Bry, AF4K

1635. FS: Four 80m crystals $24.00

Yahoo group: hamstuff
Date: 2012-04-19 02:13:40 UTC
From: Bry Carling
Topic: 1635 Message: 1635

FOR SALE:

Group of four nice, new condition 80m ham band crystals, like new.

These are hc6u crystals on:

3.777 MHz
3.778 MHz
3.781 MHz
and
3.787 MHz

Will sell the whole bunch for $24.00 plus shipping.

http://af4k.com/hc6u_crystals.htm#group4

1636. REDUCED: Ham Band hc6u Crystals

Yahoo group: hamstuff
Date: 2012-04-22 13:29:55 UTC
From: Bry Carling
Topic: 1636 Message: 1636

REDUCED: Ham Band hc6u Crystals
(prices are for these groups only)

$2.50 crystals for 80m band:
Group of four nice, new 80m ham band hc6u crystals on 3742.0 kHz.
QUANTITY of 4 - 3742.0 kHz crystals - Type hc6u - Share some with a friend!
Will sell as groups of 4 for $10.00 plus shipping.

ALSO REDUCED Group of SIX ham band crystals under $5.00 each.
Group of six nice, new condition 80m and 40m ham band crystals, like new.
Not available individually at this price. SIX hc6u crystals on:
QTY 1 - 3742.0 kHz
QTY 1 - 3777.5 kHz
QTY 1 - 3778.7 kHz
QTY 1 - 3781.2 kHz
QTY 1 - 3787.5 kHz
QTY 1 - 7011.0 kHz
Note: this is only for this one group of crystals as listed.
Will sell this whole group of 6 for $29.00 plus shipping.

Pictures, details and Ordering Page here:

1637. REDUCED: Panel Meters - under $3.00

Yahoo group: hamstuff
Date: 2012-04-22 14:30:19 UTC
From: Bry Carling
Topic: 1637 Message: 1637

REDUCED: Panel Meters

Here is a nice box of six panel meters in very good condition.

These are all the typical 3.25" diameter meters you see on older ham equipment, test equipment etc.

1) Weston model 476 with 0 - 120V AC with an additional scale for 60V AC

2) Weston model 301 with 0 - 140V DC with an additional scale for 7 V DC.

3) General Electric model ADK84 - cool 0 - 200 mA PA Plate with markings for CW, MCW, PA Grid and Battery.

4) General Electric with 0 - 50mA DC

5) Weston model 147866 with 0 - 5V AC

6) General Electric Time Meter - model 8KT8E3 / USN type 120V AC 60 Hz (small case chip)

I do not want to sell these individually. I will sell these as a group. The whole box for $16.00
plus $12.00 for USA shipping

73 - Bry, AF4K

1638. Power Supplies FS

Yahoo group: hamstuff
Date: 2012-04-23 19:10:47 UTC
From: Ken Simpson, W8EK
Topic: 1614 Message: 1638

Power Supplies and related items For Sale:

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a
voltmeter and an ammeter built in. The output voltage is
adjustable over a range from about 11.5 to 15.5 volts DC.
There is also an adjustment to set the current limiting,
up to 25 amps. This means it can be set so that it will
protect the finals of a solid state rig. In addition, a
buzzer is activated if it goes into over current limiting.
This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $175

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
I do not find a scratch on it.

With paper work for $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell used for $125 to $150 (plus shipping). Buy this one for $88.

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which means that it will produce up to 18 V DC at up to 3 amps. This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero, up to almost 20 volts. There is a fairly large analog meter that reads the voltage. Built in current limiting is adjustable with a 10 turn pot from a few ma to up to about 3 amps. A separate meter reads the current, so both voltage and current can be read at the same time. Also, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $160

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply:

This power supply is suitable for low current bench use. It provides a variable voltage source from about 5 V DC up to about 15 V DC. It has one knob for course voltage that is labeled 6 V, 9 V and 12 V. An additional knob will fine tune the voltage.

I do not have specs on this supply, but I would guess
that it is good for maybe 1/3 to 1/2 amp current. It
has an analog meter that seems to be fairly accurate;
at least it compares favorably to my lab type DMM.

This unit is a great utility type power supply. $15

"Wall Wart" Power Supplies:

All of these are "regular" wall warts -- not the new
switching type that create all sort of noise in your
receiver. Get one of these, and leave the noise behind.

MFJ 1312 B
This unit provides 12 V DC at 300 ma. It has a 2.1 mm
coaxial plug with the center positive, and is often used
for keyers, lighting tuner lights, and other small misc
jobs where 12 V DC at low current is needed. $12

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it. $12

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Kenwood MS-1 charger / DC power supply:

The MS-1 is designed to be used with the Kenwood TR-2500
and TR-2600 HTs. The HT slips into the unit, and will
charge the battery, or power the unit, or both. The HTs
use 9.6 volts DC to operate. This unit converts 13 V DC
down to the required 9.6 V DC. It also functions as a
holder for the HT in the car, and as a light to illuminate
the LCD display on the HT.

This one works fine, and looks OK.
With paper work for $20.

Kenwood BC-2 Charger for PB-2 batteries.
In Original box for $12.

Icom DC-25 DC adapter:

This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and
BP-24 battery packs. It takes 13 V DC (such as from a
cigarette lighter), and converts it to the 9.4 V DC voltage

needed for the HT. It is used in place of a battery.

This one works fine and looks fine. $18

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1639. REDUCED: HENRY RADIO TEMPO ONE

Yahoo group: hamstuff
Date: 2012-04-29 21:11:39 UTC
From: Bry Carling
Topic: 1639 Message: 1639

REDUCED: HENRY RADIO TEMPO ONE HF TRANSCEIVER

The Tempo One wasoriginally built by the Yaesu Musen company
in Japan in the 1970s. Same as a Yaesu / Sommerkamp FT200.
I couold piucture using this at a camp too - lots of fun for
portable HF or as a home station. Henry Radio Tempo One HF
transceiver in very good condition.

Input Power - 240 Watts
Covers the 80m, 40m, 20m, 15m and 10m amateur bands on SSB and
CW.
Antenna 50-100 ohms.
Carrier suppresion -40 dB.
A.F. Bandwidth 300-2700 Hz
Receiver Sensitivity 0.5 uV
Image ratio -50dB.
Audio output 1 watt into 8 ohms.
Power Supply - 120V AC or 12 V DC using external power
supplies (See below)
16 Tubes, 15 diodes and 7 transistors.
Dimensions: 13.25" wide X 5.5" high x 11" deep
Approx. weight: 18 pounds.
Cables are included with the power supply below.

Comes with a copy of the operators manual.
Service manual copy available for an additional $5.00

Transceiver only - Now reduced from $145.00 to $105.00
AC Power Supply is available too:

Also I have the Henry Radio Tempo One POWER SUPPLY in very
good condition.
With built-in 3" X 5" speaker for audio out from the Tempo One
Transceiver.
Has 9 diodes.
Any of the following AC Voltages may be used: 110 - 120V AC or
200 - 240V AC
Dimensions: 8" wide X 5.5" tall X 11" deep
Approx. weight: 22 pounds.
Cables are included. REDUCED from $85.00 to $65.00

AC/ONE Power supply is available for $65.00 plus shipping.
OR BUY BOTH TOGETHER FOR $160.00 plus shipping

Pictures and details at:

1640. Coax cable and connectors, HF antennas and related FS

Yahoo group: hamstuff
Date: 2012-04-29 21:23:19 UTC
From: Ken Simpson, W8EK
Topic: 1640 Message: 1640

It is "Antenna Season."

HF Antennas and related items For Sale -- Coaxial
Cable, Connectors, Dipoles, Verticals, SWR Bridges,
Antenna Tuner, Low Pass TVI Filters, etc.

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous
lengths of coaxial cable. Most of the cable is RG-8
(.405 inches in diameter) or equivalent. Most has a
PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an
analyzer, and its loss has been confirmed to be within
10% of new specs which is as close as I can measure.
Lengths under 20 feet have been checked for continuity,
because loss is almost impossible to measure for lengths
this short.

I have a large amount in many different lengths, varying
from 1 foot to 160 feet. To put it another way, I have
jumpers for in your shack, and lengths to run up your
tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit

a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3
-
Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Broadband Dipole Antennas:

These antennas are sometimes call "Bazooka" dipoles, but
also go by other names. They are made from RG-8 coax
instead of just wire. They are fed differently, with
both halves of the coax used. The result is an antenna
that is more broad banded than a regular wire dipole,
permitting one to cover all, or most, of a ham band with
a reasonable SWR. Of course these can be put into an
inverted V configuration as well. They have been described
in the ARRL Handbook and ARRL antenna book at various times.

I have antennas for two different bands:

40 meter antenna as described above (approx 66 feet long)
with about 25 feet of RG-8 coax feedline attached, terminated
in a PL-259 connector. $50

10 meter version, about 16 feet long. No feedline on this
one, but there is a place for you to attach your own coax.
$15

Buy both of the above for $60.

MFJ 1796 Halfwave Vertical Antenna:

The MFJ 1796 covers the 40, 20, 15, 10, 6, and 2 meter bands,
with no radials needed.

It is only 12 feet high and can be mounted anywhere -- ground
level to tower top -- apartments, small lots, trailers.
Perfect for vacations, field day, DXpedition, camping.

Efficient end-loading, with no lossy traps
Full size halfwave on 2 & 6 Meters
High power air-wound balun eliminates feedline radiation
Adjusting 1 band has minimum effect on others
Automatic band switching

Low radiation angle for great DX
Omnidirectional
Handles 1500 watts PEP
Low SWR
Stainless steel hardware

This antenna was used in a restricted community, and only
put outside when being used, so it is in terrific shape.
Paper work included.

These sell for over $300 new. Buy this one for only $175.
Pick up near Ocala FL, just off of I-75.

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

Hustler Resonators for Hustler Mobile HF Antenna Systems:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
40 meter resonator RM-40
This resonator has tape on the bottom. I assume the
tape was used to tell the silent key which frequency
the RM-40 was tuned to, being he had two of them. $15

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it. In its original box with original
instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power.
It uses an "L" match instead of a "T" match, which means
there is only one spot that will give the correct match.
The "L" match is also more efficient. Electrically, it is
the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading
of 200 and 2000 watts. It also has an SWR bridge with
lighted meter, plus a 4 position antenna switch.
-
It can be used on any HF frequency, including the WARC
bands, as it is continuously adjustable. It has a built
in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni
series (Omni 546, series A, B, and C) with the black vinyl
covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect.
I can not find a scratch on it.

Paper work is included for $325.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, are 50

ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts. $35

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 W "average" below
30MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly.
With paper work. $25

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more
attenuation in the 40 MHz region, where many TVs have their
IF. It is good for 1000 Watts "average" according to the manual,
and has over 80 db attenuation at 41 MHz. This one looks great,
and includes the paper work. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1641. FS: Hallicrafters S38C Receiver

Yahoo group: hamstuff
Date: 2012-05-02 20:19:36 UTC
From: Bry Carling
Topic: 1641 Message: 1641

FOR SALE: Extra nice S38C shortwave receiver - many hams used these as their very first receiver.

Very good condition. All original knobs etc. The S38C uses six tubes, and has a metal cabinet and built-in speaker. Its compact size and low cost maakes this a very attractive set. The S-38 models were in production until 1961.

Despite its simplicity, the S-38 is a "hot" radio, offering good sensitivity. Like more expensive shortwave receivers, it has a separate bandspread tuner, automatic noise limiter (ANL), and beat frequency oscillator (BFO) for CW listening. It covers frequencies from .54 Mhz to 32 Mhz in four bands.

With distinctive semi-circular dials, the S-38 through S-38C models are very recognizable. The S-38C has cool-looking shiny gray, hammertone paint. Excellent working condition.

Available for $65.00 plus shipping. USA only.

73 - Bry, AF4K

1643. FS: More 2W, 1W and 1/2 W Carbon Resistor Packs

Yahoo group: hamstuff
Date: 2012-05-06 11:44:54 UTC
From: Bry Carling
Topic: 1643 Message: 1643

Hi guys,

I know a lot of people asked me for some more of these resistors and I found some.

As of right now, I have found 6 more assortments of New 2 Watt Carbon Compopsition Resistors (50 in each.)
I have 3 more packs of the 1 Watt carbon composition resistors (50 in each.)
and I have another 8 packs of the 1/2 Watt composition resistors (100 in each.)

I have posted these on my web pages for easy purchase for whomever would like some.
2W - $15 each
1W - $10 each
1/2W - $8 each
For anyone who buys 2 or more of these I will throw in a surprise pack of 50 - 100 new resistors of my choice. FYI - one or two of the 2 watt resistor packs might contain a couple of
good used looking resistors or shorter lead ones but you won't be disappointed.

http://af4k.com/resistors.htm

There are also some very excellent, useful power resistors and bleeder resistors etc. at that
link.

Thanks for looking & 73 - Bry AF4K

1644. FS: New HV Capacitors 10c - 35c each

Yahoo group: hamstuff
Date: 2012-05-06 13:33:33 UTC
From: Bry Carling
Topic: 1644 Message: 1644

NEW Mallory and Sprague, USA-made HV Disk ceramic capacitors:
(These are all brand new, prime quality USA parts), Most are RMC = Mallory

CAPACITANCE - VOLTAGE - Price each
8.2 pF 20% at 1KV Sprague Temp Stable - QTY 4 - $0.20 each
22 pF 10% - 3KV - RMC Type - QTY 1 - $0.25 each
75 pF 10% -at 1KV - N150 - QTY 10 - $0.20 each
82 pF 5% - 1KV - RMC Type NPO - QTY 6 - $0.25 each
82 pF 5% - 1KV - RMC Type N750 - QTY 2 - $0.20 each
82 pF 5% - 1KV - RMC Type N1500 - QTY 2 - $0.20 each
200 pF at 1KV 5% - RMC Type N750 - QTY 1 - $0.20
200 pF 5% at 1KV RMC type JF200 - QTY 1 - $0.15 each
200 pF 5% at 1KV type NPO - QTY 5 - $0.25 each
360 pF 10% - 1KV - RMC Type - QTY 5 - $0.20 each
400 pF 10% - 1KV - RMC Type - QTY 8 - $0.20 each
600 pF 10% at 1KV - RMC - QTY 9 - $0.20 each
750 pF 10% at 1KV Sprague Temp Stable - QTY 4 - $0.20 each
750 pF 10% - 1KV - RMC Type - QTY 4 - $0.20 each
Dual 1500 pF 20% at 2KV in one package type Z5U - QTY 5 $0.15 each
Dual 3000 pF 20% at 2KV in one package type Z5U - QTY 5 - $0.15 each
0.005 uF at 500 V +80/-20% - Type Z5U - QTY 1 $0.15
7500 pF (= 0.0075 uF) 20% at 500V - QTY 15 - $0.15 each
0.02 uF 10% at 100V RMC - QTY 1 - $0.10 each
0.02 uF at 100V +80/-20% RMC - QTY 12 - $0.15 each
0.02 uF at 1400 V 20% - Type Z5U - QTY 1 $0.30

Also some Tubular Capacitors:
Elmenco 0.1 uF at 600V DC and 0.5 uF at 200V DC
These are 35c and 25c each

You can purchase all of the above at web page:

http://af4k.com/capacitors.htm

Thanks & 73 de AF4K, Bry

1645. VHF and UHF equipment and accessories FS

Yahoo group: hamstuff
Date: 2012-05-08 22:51:24 UTC
From: Ken Simpson, W8EK
Topic: 1645 Message: 1645

VHF and UHF (2 meter and 440 MHz) Equipment For Sale -
2 meter HT, dual band HT, HT accessories such as
speaker mics, rubber ducks, SWR Bridge, mobile
antennas and mounts, DTMF Touch Tone and regular
Microphones, and more:

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes desk charger,
rubber duck antenna, belt clip, wrist strap, battery,
and paper work. $130

Alinco Protective Battery Plate
This is a "dummy" plate that slides on to the HT in place
of the battery. It is used when powering the HT from an
external power source (such as the EDC-36), to
prevent the battery terminals from being exposed and
causing accidents. $10

Alinco Carrying strap - Like new. $4

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came out of the box new. It came from a silent key who I don't think ever used it. This one includes the desk charger, rubber duck antenna, belt clip, and paper work for $115. I added a new PB-36 battery, as the old one had been in the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Kenwood MS-1 charger / DC power supply:

The MS-1 is designed to be used with the Kenwood TR-2500 and TR-2600 HTs. The HT slips into the unit, and will charge the battery, or power the unit, or both. The HTs use 9.6 volts DC to operate. This unit converts 13 V DC down to the required 9.6 V DC. It also functions as a holder for the HT in the car, and as a light to illuminate the LCD display on the HT.

This one works fine, and looks OK. With paper work for $20.

Speaker Microphone for Yaesu VX-1, VX-2, VX-3, VX-5, etc.

Pryme Speaker Microphone
This is the Pryme equivalent of the Yaesu MH-34. It has the 4 conductor 1/8 inch plug on it. It works 100% and looks like it has not been used. $25

Other HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others. It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.It works fine, and looks close to new. $15

Coaxial Cable For Sale:

I accumulated a fairly large amount of miscellaneous lengths of coaxial cable. Most of the cable is RG-8 (.405 inches in diameter) or equivalent. Most has a PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an analyzer, and its loss has been confirmed to be within 10% of new specs which is as close as I can measure. Lengths under 20 feet have been checked for continuity, because loss is almost impossible to measure for lengths this short.

I have a large amount in many different lengths, varying from 1 foot to 160 feet. To put it another way, I have jumpers for in your shack, and lengths to run up your tower. I can not list all of the lengths. Please let me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus $2 for each installed PL-259, plus shipping from Florida.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,and 2 meters. SO-239 connectors.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is about 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Larsen NLA Type VHF Mobile Antenna for 2 meters:

This antenna fits the Larsen NLA mobile mount, which is a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

Mag mount with 1/4 inch stud
Male 1/4 inch 20 thread stud sticking out the top, with
about 15 feet of RG-58 coax. $12

NMO "Luggage rack mount"
This NMO mount will attach to a luggage rack. The bracket
is made so it can attach to either a vertical or horizontal
portion. It is heavy chrome plated, with stainless steel
hardware, and is quite heavy duty for NMO. With 17 feet coax
and PL-259. It looks to be new. $18

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug.
Looks to be unused. $38

Hand Microphone with round 8 pin plug for Kenwood / Alinco / ADI

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TM-241,
TM-2530, TW-4000, and others, including Alinco and ADI.
It says "Electret Condenser Mic" on the back, and Kenwood
on the front, with no model number.

Basically, this mic is like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. They will function on some rigs, and
are completely useless on others. There is also a "Lock"
switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

As above but with 8 pin modular connector. $30

Yaesu Hand Microphones:

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It is ideal for the lower powered 2 meter
rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

Olson RA-472 Bench Type Power Supply
This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.
This unit is is a utility type power supply. $15

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the

TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Special Antenna adapter that fits the TH-21 series HTs,
and has a BNC on the other end. $10

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood
TH-21/31/41series HTs. $6

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.

It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

Icom DC-25 DC adapter:

This is a pack that is used on the Icom µ2AT, Icom µ4AT, and on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24 battery packs. It takes 13 V DC (such as from a cigarette lighter), and converts it to the 9.4 V DC voltage

needed for the HT. It is used in place of a battery.

This one works fine and looks fine. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both transmit and receive. Most are in the 146 and 147 MHz band segments, with very, very few in the 145 MHz segment, and none in the 144 MHz segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the solid state 2 meter mobiles and HTs. Please e-mail the operating frequency you need. I have them listed by operating frequency and rig,and not by actual xtal frequency. Send the frequencies you need (transmit or receive), and the rig that you have, and I will see if I can help. I have cross references for the various rigs, so I will know what you need if you give the rig.
Crystals are $6 each.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1647. FS: Yaesu FTDX100 and FTDX150 Crystals

Yahoo group: hamstuff
Date: 2012-05-10 10:46:45 UTC
From: Bry Carling
Topic: 1647 Message: 1647

FOR SALE: Yaesu FTDX100 and FTDX150 Crystals

Currently available are the 20m and all four 10m band crystals for
14.0 - 14.5 MHz
28.0 - 28.6 MHz
28.5 - 29.0 MHz
29.0 - 29.5 MHz
29.5 - 29.7 MHz

These are available online for $12.00 each. Other bands will be available soon.

1648. FS: ARC5-looking 40m transmitter

Yahoo group: hamstuff
Date: 2012-05-13 01:05:06 UTC
From: Bry Carling
Topic: 1648 Message: 1648

FOR SALE - Navy transmitter for 40m band.
Dial reads from about 7.0 - 9.0 Megasickles.

Includes two 1625 FInal RF power tubes for plenty of oomph.

To me it looks just like any other ARC5 style radio, but the experts warn that his is not actually an "ARC5" as far as purists are concerned. For someone who enjoys military radios or actually getting something fun on the air with tiubes it will be just fine I am sure!

One place that I read (maybe a web site) says that it is part of the AN/ARC-5 Command Radio Set. Analogous to type BC-459-A, T-22/ARC-5 transmitters. It would have typically been paired with a CBY-46106 receiver, similar to the BC455-B and R-27/ARC5 receivers.

It also stated that the AN/ARC-5 Command Radio Set is a series of radio receivers, transmitters, and accessories used to provide two-way Morse code and AM radiotelephone communication for U.S. Navy aircraft during World War II and the years following. It was an improvement of the Navy's ARA/ATA command set. Similar units designated SCR-274-N were used in U.S. Army aircraft. The Army set is based on the Navy ARA/ATA, not the later AN/ARC-5. (perhaps this one is part of the ARA/ATA instead of ARC5? You be the judge!

Covers 7.0 to 9.1 MHz. Comes with all tubes, including the magic eye tube, the covers, all coils, etc. There are some paint chips off the top and front, but can be easily restored. Overall
in very good condition for its age. SERIAL number is 665.
Technical Data: The transmitter can run 40 watts on CW, and would draw approx. 9 amps at 28 volts in operation although it works satisfactorily between 22 - 30 volts input. The circuits
of the transmitter are as follows: A master oscillator (1626) excites a pair of beam tetrode
power tubes (1625) connected in parallel. An antenna coupling control is used to vary the coupling between the output tank and the roller inductor loading coil. The transmitter could be
modulated using screen grid modulation or plate modulation. This style of transmitter was used by many amateurs after world war two, but many were modified or stripped for their high quality components, particularly the variable capacitors. The sets had an extremely good
name for their frequency stability. This unit uses tubes which look great. The two 1625 tubes
test good. There is no crystal, as in most of these radios. It appears to be missing the VFO
shield and inductor trim slug. Otherwise, complete with all original knobs and tubes, and is in
above-average condition.

Available for $75.00 plus shipping.

Pictures and details at:
http://www.af4k.com/radios.htm#ARC5

1651. Coax Switches, Wattmeter, SWR Bridges FS

Yahoo group: hamstuff
Date: 2012-05-15 23:56:15 UTC
From: Ken Simpson, W8EK
Topic: 1651 Message: 1651

Coax Switches, Wattmeter, and SWR Bridges For Sale:

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all metal cavity construction for maximum efficiency, high isolation and minimum resistance. Isolation is better than 60 dB at 300 MHz. Insertion losses are less than 0.2 dB. The Daiwa CS-401 permits the selection of up to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Heath HD-1234 Coaxial Antenna Switch:

This coax switch has SO-239 connectors arranged so the coax comes out like the spokes of a wheel. It will switch up to 4 antennas, and also ground all of the antennas. It will handle full legal power.

This particular switch works 100% and looks fine also.

With paper work for $35.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks

very nice.

With paper work for $100.

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Monarch FSI-5
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1652. FS: Hallicrafters S94 Civic Patrol RCVR $39

Yahoo group: hamstuff
Date: 2012-05-17 00:22:53 UTC
From: Bry Carling
Topic: 1652 Message: 1652

I have for sale, THREE Hallicrafters Civic Patrol S-94 VHF RECEIVERs

Superhet with RF-stage; IF frequency is 10700 kHz; 2 AF stage(s)

Includes 8 tubes:
6BH6, 12AT7, 12BA6, 12BA6 12AL5, 12AU7, 6BH6 and 50L6 AF out.

Has a built-in 5 inch Permanent Magnet Loudspeaker.
Cabinet dimensions: 12.9 x 7 x 7.25 inch / 328 x 178 x 184 mm
Coverage: 30 to 50 MHz
Will include a copy of the manual with schematic.

Two of these are available in EXCELLENT condition for $65.00 each plus shipping.
There is a third one that is also nice but has a non-original knob or two, and needs minor work - for $39.00 plus shipping. - see below

Pictures and details here:

1653. Dual band rigs, 2 m rigs, HF rig and more FS

Yahoo group: hamstuff
Date: 2012-05-22 16:42:46 UTC
From: Ken Simpson, W8EK
Topic: 1653 Message: 1653

Dual band (2 m and 440 MHz) transceivers (Mobile and
HT), 2 meter FM transceivers (mobile and HT), HF
transceiver, HF Linear amplifier, Power Supplies,
Coaxial antenna switch, coaxial cable, and related items
For Sale:

Icom IC-2350 dual band FM transceiver:

The Icom IC-2350H features large dual LCD displays,
simultaneous dual-band receive, simultaneous two
frequency reception on the same band, built-in
duplexer, separate volume and squelch controls,
high power output, built-in programmable tone encoder,
auto repeater shift function and compact size. This
radio supports sub band mute, three output levels,
tone encode, built-in duplexer and dual volume and
squelch. Enjoy extended receive on the 2 meter band
from 118 to 174 MHz. Includes DTMF hand mic and DC
power cable.

Features:
Two Call Channel
Tone Scan
110 Memories
Scanning
Time-Out Timer
Multi Function Mic
50/10/5 Watts Output 2 M
35/10/5 Watts Output 440
Two Call Channels
Priority Watch
Extended receive
Auto-repeater Function
Air band Receive [AM]

This particular unit works 100% and looks the same.
I can not find a scratch on it. With paper work for $275.

Alinco DR-610 dual band FM Transceiver w/ cross band repeat:

The Alinco DR-610TQ dual-band FM transceiver (144/440 MHz)
combines a Hi-Tech rugged design with exceptional user
friendliness. The front panel can be separated from the
main body for custom installation. Full duplex cross-band
operation and cross-band repeater function are standard.
It has two VFOs, 120 memories plus split channel, call

channel and program scan mem. The DR-610 also utilizes Alinco's advance channel scope display with real time monitor to give you a visual indication of activity on up to 11 frequencies. Mono band dual receive is also supported, along with aircraft receive.

Power output on VHF is 50/10/5 watts and on UHF is it 35/10/5 watts. Receive range: 108-173.995 MHz and 420-470 MHz. Size: 5.5 x 1.6 x 6.4 inches 2.4 Lbs

Features:
120 Memories
Encode/Decode
DSQ
TOR and APO
Bell Function
Cross Band Repeat
Air band Receive [AM]
5 Channel Auto Dialer
Remote Front Panel
9600 bps I/O Jack

This one works 100% and looks very close to perfect. With paper work for $275.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position, which includes the AM Aircraft band. 440 to over 480 MHz in the UHF position. Of course it transmits in the 2 meter and 440 MHz ham bands. It is my understanding that it can also be modified to receive into the 800 and 900 MHz region. It will also cross band repeat, and is an extremely rugged radio.

Power output has 3 different levels. With the 7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W. If used with the larger 12 V batteries, it will produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both electrically and cosmetically. The keyboard has very crisp and clear lettering. It includes desk charger, rubber duck antenna, belt clip, wrist strap, battery, and paper work. $130

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W in low power) covering the entire 2 meter band. This is the "A" model that has four memories. It has provisions for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40.

Kenwood TR-7730, 2 meter FM Transceiver:

The Kenwood TR-7730 is 2 meter mobile transceiver that has
CTCSS subaudible tone capability (tone board not installed).
It has 25W or 5W output, with 5 memories and scan functions
(band & memory).
This is an easy to operate radio! It is a great radio for
APRS or packet.

This one works 100% and looks OK, but certainly not mint.
It does have some scratches. Paper work is included.

I will sell it one of two ways.
With the MC-46 DTMF touch tone mic (which works fine and
looks really great), it is $80.
With a generic, non DTMF touch tone, regular mic, it is $50.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $115.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Yaesu FT-990 Deluxe HF Transceiver:

The Yaesu FT-990 features multiple direct digital synthesizers
for pure local signals and high performance. It has an
automatic antenna tuner. A 500 Hz CW filter is built in.

It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
Multi-function illuminated analog S-meter
90 Memories
Dual VFOs
Built-in AC Power Supply
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $895

Ameritron AL-84 HF Amplifier:

The Ameritron AL-84 is a grounded grid linear amplifier using four 6MJ6 tubes driven thru an impedance matching and power swamping network. It has a pi net output, and an illuminated meter that reads plate current and voltage. There is a connector on the back that will furnish 12 V DC at low current for such things as lights on an antenna tuner, powering a keyer, etc. The AL-84 is rated to deliver 400 watts when driven with a 100 watt rig.

This particular unit has had the 10 meter mod done, so it covers 160 thru 10 meters. It works fine, producing rated power, and looks almost perfect.

With paper work for $400.

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a voltmeter and an ammeter built in. The output voltage is adjustable over a range from about 11.5 to 15.5 volts DC. There is also an adjustment to set the current limiting, up to 25 amps. This means it can be set so that it will protect the finals of a solid state rig. In addition, a buzzer is activated if it goes into over current limiting. This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally adjustable from 11 to 15 V DC) at up to 16 amps continuous and 20 amps ICS. The RS-20 features crowbar over voltage protection and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new. I do not find a scratch on it.

With paper work for $60 plus shipping from Florida.

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all metal cavity construction for maximum efficiency, high isolation and minimum resistance. Isolation is better than 60 dB at 300 MHz. Insertion losses are less than 0.2 dB. The Daiwa CS-401 permits the selection of up to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks very nice.

With paper work for $100.

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1 ??
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous
lengths of coaxial cable. Most of the cable is RG-8
(.405 inches in diameter) or equivalent. Most has a
PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an
analyzer, and its loss has been confirmed to be within
10% of new specs which is as close as I can measure.
Lengths under 20 feet have been checked for continuity,
because loss is almost impossible to measure for lengths
this short.

I have a large amount in many different lengths, varying
from 1 foot to 80 feet. To put it another way, I have
jumpers for in your shack, and lengths to run up your
tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259, plus shipping from Florida.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6
-
UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Power Cord:

This is a two pin power cord that is used on some 2 meter,
and other VHF/UHF rigs. The connector looks very similar
to a round 2 pin female mic connector.

This type cord was used by KDK, Kenwood, Yaesu and probably
others, typically back in the 1990's. I know it was used
on the KDK 2015 and 2016, Kenwood TR-9000 and others, Yeasu
FT-720 and 727 series, plus many others.

This cable works fine, and looks fine. $15

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1654. FA: Weston 120V AC LINE MONITOR Item 110887188019

Yahoo group: hamstuff
Date: 2012-05-26 21:44:08 UTC
From: Bry Carling
Topic: 1654 Message: 1654

For auction:

WESTON AC LINE VOLTAGE METER 0 - 150V AC in a beautiful case. This is a first class test instrument with a large reflecting galvanometer scale from zero to 150 volts AC. It also has a scale for 0 - 15 V AC and separate terminals on the side for both ranges. Model is 433 / serial number 30418. It includes highly calibrated markings for the internal resistance.

The last calibration was conducted by the U.S. Navy Calibration program and it has the stickers from their standards calibration laboratory in Indianapolis,. Indiana dated October 1962. I checked it against a modern digital meter and it appears to be very accurate.

Dimensions are approx. 6" X 3" X 5-1/2" tall.
The rubber feet are there and in very good condition.. There is no handle.

It will be carefully packed and insured.

Starting price is $25.00 for this beautiful precision instrument.

From: Ken Simpson, W8EK
Topic: 1320 Message: 1655

Kenwood Items For Sale
Two meter FM HT, 440 MHz HT "Tech Special", chargers
and other HT accessories, desk and hand microphones,
cable for switching linear amp, power cord, coaxial
cable, coax switch, original Kenwood manuals, etc.:

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $110.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Kenwood TH-41 BT HT for 440 MHz:

The Kenwood TH-41 BT is an easy-to-use and compact 440
MHz HT. Frequency selection is via thumbwheel switches
on the top of the radio. There is a DTMF touch tone pad
on the front, along with DIP switches for selection of
the built in PL subaudible tone.

This HT is a "Tech Special" or could be used for parts.
It could also be used to get subaudible PL tone if you
have one of the older "AT" models that lack the tones.
Basically, this unit transmits fine. On receive it sounds
like it is working (squlech action is OK, it has audio,
etc.) but a signal is not received. It acts like the

receiver may be off frequency. Of course it could also
be used for "fox hunts" since the transmitter works fine.

I am selling the HT only, with no accessories.
Cosmetically it is nice. I will include both operating
and service manuals on CD. $25

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Special Antenna adapter that fits the TH-21 series HTs,
and has a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Kenwood MS-1 charger / DC power supply:

The MS-1 is designed to be used with the Kenwood TR-2500
and TR-2600 HTs. The HT slips into the unit, and will
charge the battery, or power the unit, or both. The HTs
use 9.6 volts DC to operate. This unit converts 13 V DC
down to the required 9.6 V DC. It also functions as a
holder for the HT in the car, and as a light to illuminate
the LCD display on the HT.

This one works fine, and looks OK. With paper work for
$20.

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries.
In Original box for $12.

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Hand Microphone with 8 pin modular plug for Kenwood:

This hand mic says "Electret Condenser Mic" on it, with no model number.

This mic has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

This mic has the 8 pin modular plug (like a computer LAN)
on it, as used by the Kenwood TM-261, TM-271 and others.
It has been tested on a TM-261, but probably works on
many others.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous
lengths of coaxial cable. Most of the cable is RG-8
(.405 inches in diameter) or equivalent. Most has a
PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an
analyzer, and its loss has been confirmed to be within
10% of new specs which is as close as I can measure.
Lengths under 20 feet have been checked for continuity,
because loss is almost impossible to measure for lengths
this short.

I have a large amount in many different lengths, varying
from 1 foot to 80 feet. To put it another way, I have
jumpers for in your shack, and lengths to run up your
tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259.

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1 ??
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all
metal cavity construction for maximum efficiency, high
isolation and minimum resistance. Isolation is better
than 60 dB at 300 MHz. Insertion losses are less than
0.2 dB. The Daiwa CS-401 permits the selection of up

to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Linear Amp Switching Cable for Kenwood Rigs:

This cable goes from a Kenwood transceiver to a
linear amplifier to switch the amp from transmit
to receive.

One end has a DIN connector, as is used with most
Kenwood rigs. The other end has an RCA phono plug,
as used by most linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver.

This cable has one coax for switching the relay. $15

Power Cord:

This is a two pin power cord that is used on some 2 meter,
and other VHF/UHF rigs. The connector looks very similar
to a round 2 pin female mic connector.

This type cord was used by KDK, Kenwood, Yaesu and probably
others, typically back in the 1990's. I know it was used
on the KDK 2015 and 2016, Kenwood TR-9000 and others, Yeasu
FT-720 and 727 series, plus many others.

This cable works fine, and looks fine. $15

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TS-130 S/V HF xcvr $20
Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TH-235, 2 m HT $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TM-221/421 mobile $15
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

From: Bry Carling
Topic: 1656 Message: 1656

FOR SALE:

New hc6u crystals and "tall hc6u" = hc13u calibrator crystals.

100 kHz calibrator style = $19.00 each

455 kHz hc6u = reduced to $30.00 each

1000 kHz hc6u = $16.00 each

1700 kHz hc6u = $16.00 each

E-mail me to arrange purchase or use web page at:

1657. VHF and UHF antennas and related items FS

Yahoo group: hamstuff
Date: 2012-06-12 12:28:29 UTC
From: Ken Simpson, W8EK
Topic: 1657 Message: 1657

VHF and UHF Antennas (2 m and 440 MHz) and related equipment
For Sale:

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the
6 meter, 2 meter, and 440 MHz ham bands. This makes it
ideal for some of the newer multiband and dual band rigs
available today.

The antenna is about 3 feet long and has a very strong
magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna is made to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz

This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

NMO "Luggage rack mount"
This NMO mount will attach to a luggage rack. The bracket
is made so it can attach to either a vertical or horizontal
portion. It is heavy chrome plated, with stainless steel
hardware, and is quite heavy duty for NMO. With 17 feet coax
and PL-259. It looks to be new. $18

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks very nice.

With paper work for $100.

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF, 6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owner's name on it.

In its original box with original instructions. $25

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end, so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end female UHF on one end and male on the other). $10

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am not sure if it is rated at 3000 watts or 5000 watts, but it is the big one. It is 4 inches in diameter and about 3 1/2 inches high. It has an SO-239 connector on the bottom, that has a gold plated center pin, and silver plated outer. It has "pigtails" coming out of the top to connect to your balanced antenna.

It is designed so that it can easily be used with a beam. It has a bracket from each side, and then a U bolt that can attach to up to a 2 1/2 inch diameter mast or boom. All hardware is stainless steel. This is a quality balun!

This one works fine and looks fine. $60

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous
lengths of coaxial cable. Most of the cable is RG-8
(.405 inches in diameter) or equivalent. Most has a
PL-259 on at least one end, and many on both ends.

All of the coax over 20 feet has been checked with an
analyzer, and its loss has been confirmed to be within
10% of new specs which is as close as I can measure.
Lengths under 20 feet have been checked for continuity,
because loss is almost impossible to measure for lengths
this short.

I have a large amount in many different lengths, varying
from 1 foot to 80 feet. Most long lengths are gone. I have
jumpers for in your shack, and lengths to run up your
tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259, plus shipping from Florida.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, and are 50 ohm filters.

This first one works on 6 meters as well as HF:

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W "average" below 30 MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly. With paper work. $25

Others for HF:

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long enclosure. It looks like new. $25

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1658. Many miscellaneous items FS

Yahoo group: hamstuff
Date: 2012-06-16 13:18:02 UTC
From: Ken Simpson, W8EK
Topic: 1658 Message: 1658

I have a variety of "new" miscellaneous items that
are now available --
Rotor Control Box, Rotor cable, HF Balun, Lightning
Arresters, Wattmeter, 2 m FM Rig, Linear Amp Switching
Cable, Scope Probes, Variac, and other miscellaneous things:

Alliance HD-73 Rotor Control Box:

This is the control box only for an Alliance HD-73 rotor.

It has been checked and works fine. It looks extremely nice.

With paper work for $60.

Heavy Duty 8 conductor Rotor Cable:

I have approximately 45 to 50 feet of heavy duty 8
conductor rotor cable. I think that all 8 conductors
are number 18 wire; at least it is much heavier than
the standard cable. $25

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am
not sure if it is rated at 3000 watts or 5000 watts, but
it is the big one. It is 4 inches in diameter and about
3 1/2 inches high. It has an SO-239 connector on the
bottom, that has a gold plated center pin, and silver
plated outer. It has "pigtails" coming out of the top
to connect to your balanced antenna.

It is designed so that it can easily be used with a beam.
It has a bracket from each side, and then a U bolt that
can attach to up to a 2 1/2 inch diameter mast or boom.
All hardware is stainless steel. This is a quality balun!
$60

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Small Wattmeter:

This wattmeter is made by Gold Line, and is designed for
27 MHz. It reads 5 watts full scale. It is small --
only about 3 x 2 x 2 inches, with SO-239 connectors on
each end.

This one works, but I can not vouch for its accuracy
on all frequencies. I would think it should be fine
for 10 or 12 meters, if not more. It looks fine. $8

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W
in low power) covering the entire 2 meter band. This is
the "A" model that has four memories. It has provisions
for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a
linear amplifier to switch the amp from transmit
to receive.

One end has a DIN connector, as is used with most
Kenwood rigs. The other end has an RCA phono plug,
as used by most linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver.

This cable has one coax for switching the relay. $15

Tektronix Oscilloscope Probes:

Both work fine and look fine.

Tektronix P 6008 Probe
10 X, 10 Meg ohm, 7 pf
$20

Tektronx P 6101 A Probe
Direct, 60 MHz. 1 Meg ohm, 32 pf
$20

"Electronic Variac":

Technically, this is not a variac. It is not made by the
Variac Corporation, and it is not a physical autotransformer.
But the function of this device is the same as what most of
us call a variac.

This unit has about 8 feet of heavy power cord, going to a
small enclosure (about 4 x 2 x 2 inches), and then another
foot of heavy power cord. The box has a dial on it that
permits one to go from essentially zero voltage output,
to full line voltage. There is a large bat handle switch
that has a center off position, with a normal position
(full voltage, bypassing the unit) or "On", using the control.

This unit works fine and looks fine. $20

AC to DC power supply unit:

This is sort of an unusual unit. It is in a gray hammer
tone box that measures 7 x 5 x 3 inches. It has an AC
input (lamp cord with alligator clips). The output is
red and black binding posts. Inside is a full wave
bridge rectifier, a huge filter cap, and bleeder resistor.
I think the SK probably used it with a Variac to give
him a variable DC power supply for testing things. It
has a maximum output voltage of 100 V DC, as that is the
rating of the filter cap. $5

"Y" Cable for AEA PK-232 Digital Controller

This is the cable that came with the original PK-232's.
One end plugs into the serial port of your computer.
There are two other connectors at the opposite end.
One goes to the PK-232, and the other has a connector
for a parallel printer.
This cable is like new. $20

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made
to set your rig on top, at an angle for good viewing and
sound. It is good for about 3 amps, or to put it another
way, would be great for powering 2 meter rigs in the 10
to 15 watt category.

This one is a "Tech Special". It produces no output
voltage. It looks fine, however. $5

Books about DXing:

All are in "like new" condition.
It appears they have never been read!

Secrets of Ham Radio DXing
by Dave Ingram, K4TWJ - Tab Books
Hardbound First Edition $12

DX Power - Effective Techniques for the Radio Amateur
by Eugene Tilton, K5RSG - Tab Books and ARRL
First Edition $10

Where do we go Next?
by Marti Laine, OH2BH $10

Repeater Directories:

ARRL Repeater Directory
1985-86 edition
Like New Condition. $4

US Repeater Map Book
by Art Sci, Inc.
1992-93 Edition
Instead of listing the repeaters,
this book shows them on a map.
Like New. $6

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1660. Yaesu Items--440 rig, 2 m rig, speakers, HF rig, and more FS

Yahoo group: hamstuff
Date: 2012-06-22 20:06:50 UTC
From: Ken Simpson, W8EK
Topic: 1660 Message: 1660

Yaesu Items For Sale:
440 MHz FM Transceiver, Two meter FM transceiver,
Communications Speakers, HF transceiver, Coax Jumpers,
Microphones, HT accessories, and more

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz
FM. It has about 10 watts out, with a good receiver. It is
especially immune to intermod. This unit is built like a
tank. Of course it has memories, memory scan, etc. The
mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter)
version, a UHF (440 MHz) version, and a dual band version
that used the first two units, plus a switch box. This is
the UHF unit only.

The rig includes a connector for PL subaudible tones. This
unit has a Comm Specs SS-32 attached to it, with the DIP
switches replaced with toggle switches, so that the tone
can be set, and changed easily.

This one works fine, and looks great. It includes the
chrome bail and paper work for $100.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W
in low power) covering the entire 2 meter band. This is
the "A" model that has four memories. It has provisions
for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40.

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up
to 7 watts, and has a 8 ohm impedance. It works fine,
sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great, and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep. It is black with a gimbal mount. 4 ohm impedance. $15

Poly Planar MB-41
This cream colored 4 inch square speaker is about 2 inches thick and is rated at 10 watts. It has a mobile mounting bracket. $15

Yaesu FT-990 Deluxe HF Transceiver
The Yaesu FT-990 features multiple direct digital synthesizers for pure local signals for high performance. The triple-conversion, general coverage receiver tunes from 100 kHz to 30 MHz. It has an automatic antenna tuner. A 500 Hz CW filter is built in. It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). The top panel provides access for special user adjustments. A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Multi-function illuminated analog S-meter
Computer Aided Transceiver (CAT) allows computer control via a serial cable with a DIN jack
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
90 Memories
Dual VFOs
Built-in AC Power Supply
100 Watts Power
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $900

Deluxe Desk Microphone:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it

(the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one has stripped and tinned ends on it, which means any connector can easily be added.

This one looks like new, and works the same. It has a long (approx 6 foot) cord. $70

Coaxial Cable "Jumpers" for your shack:

I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax, with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 5 feet long. Send me the lengths that you would like, and I will see how close I can come.

Although most are RG-8 (the larger, approximately 0.4 inch coax that takes full legal power), I also have some that are RG-8 X (the medium coax approximately 1/4 inch in diameter). Please ask for RG-8 X, if that is what you would like.

All jumpers are $6 each.

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end, so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am not sure if it is rated at 3000 watts or 5000 watts, but it is the big one. It is 4 inches in diameter and about 3 1/2 inches high. It has an SO-239 connector on the bottom, that has a gold plated center pin, and silver plated outer. It has "pigtails" coming out of the top to connect to your balanced antenna.

It is designed so that it can easily be used with a beam.
It has a bracket from each side, and then a U bolt that
can attach to up to a 2 1/2 inch diameter mast or boom.
All hardware is stainless steel. This is a quality balun!

This one works fine and looks fine. $60

Antennas West "Maxi-J" 2 meter antenna:

The "Maxi-J" is a specialized version of the J pole antenna,
and is made by Antennas West. It is made to be used for
portable applications, although it could be used in a more
permanent situation. Basically, the antenna needs only one
support; a suction cup is included so that it can be attached
in many places. Of course it can also be hung from a tree
limb in a portable situation. It is very versatile. It
provides a significant amount of gain, compared to the
normal rubber duck antenna used on an HT.

The radiating portion of the antenna is just under six feet
long, with an additional six feet of coax, that terminates
in a BNC connector.

This particular antenna works fine and looks very close to
new. It includes paper work, plus a carrying case, for $25.

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Cariole Headphones:
This is a nice pair of headphones of the type that
completely cover your ear. These are true monophonic
headphones, and not a pair of stereo headphones that
have been converted to mono. They have a molded mono
1/4 inch plug on them.
These work fine, and look extremely nice. $20

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It is ideal for the lower powered 2 meter
rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1661. MFJ and related items FS

Yahoo group: hamstuff
Date: 2012-07-17 20:59:19 UTC
From: Ken Simpson, W8EK
Topic: 1661 Message: 1661

MFJ and related Items For Sale
Wall Wart power supplies, Speakers, speaker
microphones, Coaxial cable, connectors, and more

"Wall Wart" Power Supplies:

All of these are "regular" wall warts -- not the new
switching type that create all sort of noise in your
receiver. Get one of these, and leave the noise behind.

MFJ 1312 B
This unit provides 12 V DC at 300 ma. It has a 2.1 mm
coaxial plug with the center positive, and is often used
for keyers, lighting tuner lights, and other small misc
jobs where 12 V DC at low current is needed. $12

Heathkit "Converter Charger"
9 Volts DC at up to 100 ma.
No Heath number on this, and I don't know what it was used
on. It has a 2.5 mm male plug on it, with the tip positive,
so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it. $12

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up
to 7 watts, and has a 8 ohm impedance. It works fine,
sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and

is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great, and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep. It is black with a gimbal mount. 4 ohm impedance. $15

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others. It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.It works fine, and looks close to new. $15

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

Coaxial Cable "Jumpers":
I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax, with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 3 feet long. Send me the lengths that you would like, and I will see how close I can come.
All jumpers are $6 each.

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Topic: 1544 Message: 1663

Yaesu Items For Sale:
Two meter FM transceiver, 440 MHz FM Transceiver,
HF transceiver, Communications Speakers, Microphones,
HT accessories, and more

Yaesu "Landliner" SP-101 P Speaker and Phone Patch:

This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as well
as controls for both transmit and receive gain.
I realize many people do not use a phone patch much any
more, but even if you do not use the phone patch portion,
you still have an excellent speaker.

This particular unit works fine, and looks extremely nice
as well. It is in its original box.

With paper work for $90.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W
in low power) covering the entire 2 meter band. This is
the "A" model that has four memories. It has provisions
for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40.

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz
FM. It has about 10 watts out, with a good receiver. It is
especially immune to intermod. This unit is built like a
tank. Of course it has memories, memory scan, etc. The
mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter)
version, a UHF (440 MHz) version, and a dual band version
that used the first two units, plus a switch box. This is
the UHF unit only.

The rig includes a connector for PL subaudible tones. This
unit has a Comm Specs SS-32 attached to it, with the DIP
switches replaced with toggle switches, so that the tone

can be set, and changed easily.

This one works fine, and looks great. It includes the chrome bail and paper work for $100.

Yaesu FT-990 Deluxe HF Transceiver
The Yaesu FT-990 features multiple direct digital synthesizers for pure local signals for high performance. The triple-conversion, general coverage receiver tunes from 100 kHz to 30 MHz. It has an automatic antenna tuner. A 500 Hz CW filter is built in. It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). The top panel provides access for special user adjustments. A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Multi-function illuminated analog S-meter
Computer Aided Transceiver (CAT) allows computer control via a serial cable with a DIN jack
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
90 Memories
Dual VFOs
Built-in AC Power Supply
100 Watts Power
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $875

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up to 7 watts, and has a 8 ohm impedance. It works fine, sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great,

and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep.
It is black with a gimbal mount. 4 ohm impedance. $15

Deluxe Desk Microphone:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal!

This one has stripped and tinned ends on it, which means
any connector can easily be added.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $70

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Cariole Headphones:
This is a nice pair of headphones of the type that
completely cover your ear. These are true monophonic
headphones, and not a pair of stereo headphones that
have been converted to mono. They have a molded mono
1/4 inch plug on them.
These work fine, and look extremely nice. $20

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Surge Station and Noise Filter:

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $12

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is well regulated. It has a switch and LED power light on the front, with a circuit breaker and output terminals on the back. The case (left and right side and top) is basically all a heat sink, so it should cool the regulator well.

This one works fine and looks like new. No scratches. $30

A R R L Handbooks:

All of these are in the larger format.

1984 - 61st edition
It looks close to new. $15

1988 - 65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

1992 - 69th edition - Hard Bound
Several inches thick with a lot of information.
This one looks like new, except for a previous owner's call sign on the inside cover. $22

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, and many miscellaneous accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1664. RigBlaster Plus For Sale.

Yahoo group: hamstuff
Date: 2012-08-05 20:19:24 UTC
From: ka0kaf@bellsouth.net
Topic: 1664 Message: 1664

Up for sale is the RigBlaster plus used with a Kenwood TS-130s. I no longer have the TS-130s and the RigBlaster is not easily matched to the newer Yaesu FT-950. The items include the RigBlaster, matching DC power supply, software CD, Male-Female DB9 RS-232 cable, 2 4 pin mic adapter cables and RJ45 connector cable along with the original owner's manual.

Asking price is $60 plus shipping.

Payment via PayPal.

Thanks & 73

Topic: 1667 Message: 1667

Miscellaneous Items For Sale:
Power Supplies, Speakers, Headphones, 440 MHz
transceiver, 2 meter transceiver, Lightning
Arrestors, Wattmeters, Linear Amp Switching
Cable, and many other miscellaneous things:

Yaesu "Landliner" SP-101 P Speaker and Phone Patch:

This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as well
as controls for both transmit and receive gain.
I realize many people do not use a phone patch much any
more, but even if you do not use the phone patch portion,
you still have an excellent speaker.

This particular unit works fine, and looks extremely nice
as well. It is in its original box.

With paper work for $90.

Communications Speaker:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Cariole Headphones:

This is a nice pair of headphones of the type that
completely cover your ear. These are true monophonic
headphones, and not a pair of stereo headphones that
have been converted to mono. They have a molded mono
1/4 inch plug on them.

These work fine, and look extremely nice. $20

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz FM.
It has about 10 watts out, with a good receiver. It is
especially immune to intermod. This unit is built like a
tank. Of course it has memories, memory scan, etc. The
mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter) version, a UHF (440 MHz) version, and a dual band version that used the first two units, plus a switch box. This is the UHF unit only.

The rig includes a connector for PL subaudible tones. This unit has a Comm Specs SS-32 attached to it, with the DIP switches replaced with toggle switches, so that the tone can be set, and changed easily.

This one works fine, and looks great. It includes the chrome bail and paper work for $100.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W in low power) covering the entire 2 meter band. This is the "A" model that has four memories. It has provisions for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent APRS or packet rig. It works fine and looks fine. Since it was used on packet, there is no microphone included, but it does include power cord and paper work for $40

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear amplifier to switch the amp from transmit to receive.

One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers.

Before using this cable, please check the switching capabilities of your transceiver.

This cable has one coax for switching the T/R relay. $15

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) has been repainted black hammertone, and
looks very nice.

With paper work for $100.

Small Wattmeter:

This wattmeter is made by Gold Line, and is designed for
27 MHz. It reads 5 watts full scale. It is small --
only about 3 x 2 x 2 inches, with SO-239 connectors on
each end.

This one works, but I can not vouch for its accuracy
on all frequencies. I would think it should be fine
for 10 or 12 meters, if not more. It looks fine. $8

Icom HM-4 Hand Microphone:

The Icom HM-4 is a 600 ohm dynamic hand microphone that can
be used on most rigs requiring a low Z mic. It is a dark
gray color, with "Icom" on the front.

This one works fine, and looks great. It has stripped
and tinned ends, so that any connector can easily be added.
$22

20 meter trap:

This is an LC "Trap" to eliminate 20 meter interference.
Nominal frequency is 14.250 MHz, but it has a variable

capacitor to adjust it for best signal rejection. It
is in a minibox about 5 x 2 1/2 x 2 1/2 inches, with
an SO-239 connector on each end. It looks as if it
would handle 100 watts, but not a linear amplifier.

A note on it says "14.250 MHz Trap. Use on 10 m and 15 m"
$10

"Y" Cable for AEA PK-232 Digital Controller

This is the cable that came with the original PK-232's.
One end plugs into the serial port of your computer.
There are two other connectors at the opposite end.
One goes to the PK-232, and the other has a connector
for a parallel printer.
This cable is like new. $20

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are 50
ohm filters.

This first one works on 6 meters as well as HF:

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 W "average" below 30
MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks
ugly. With paper work. $25

Others for HF:

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts

PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It is ideal for the lower powered 2 meter
rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made
to set your rig on top, at an angle for good viewing and
sound. It is good for about 3 amps, or to put it another
way, would be great for powering 2 meter rigs in the 10
to 15 watt category.

This one is a "Tech Special". It produces no output
voltage. It looks fine, however. $5

Repeater Directories:

ARRL Repeater Directory
1985-86 edition
Like New Condition. $4

US Repeater Map Book
by Art Sci, Inc.
1992-93 Edition
Instead of listing the repeaters,
this book shows them on a map.
Like New. $6

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1668. VHF and UHF antennas and related items FS

Yahoo group: hamstuff
Date: 2012-09-15 18:24:38 UTC
From: Ken Simpson, W8EK
Topic: 1668 Message: 1668

VHF and UHF Antennas (6 m, 2 m and 440 MHz) and
related equipment For Sale:

Comet "Impulse" Z-780 dual band mobile antenna:

The Comet Z-780 dual band is a 2 meter and 440 MHz mobile
antenna. It is 5/8 wave center loaded on 2 meters providing
4.5 dB gain and 5/8 x 3 wave on 440 MHz providing 7.2 dB
gain. VSWR 1.5 : 1 or less. This antenna can handle up to
150 watts.

The antenna is 5 feet high. The connector type is gold-plated
UHF PL-259 (for PO mount).

This particular antenna works fine and looks very close to
new. $60

Larsen PO-MM mobile magnetic mount:

This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

Buy both of the above for $80.

Mobile Magnetic Mount Antenna for 6 and 2 Meters:

There are no markings on this antenna indicating who made it,
but it has an extremely strong magnetic mount, complete with
coax and PL-259 connector. The antenna is about 4 feet long,
with a spring at the base of the antenna. It does not appear
that the coil at the base is removable.

Since there are no markings, I put it on the antenna analyzer.
The SWR is below 1.1 to 1 with no reactance at both 52 MHz,
and at 146.5 MHz, so apparently it is a dual band 6 and 2
meter antenna. Probably a 5/8 wave on two meters (which
would have about 3 db gain), and a quarter wave on 6 meters.

$30

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the
6 meter, 2 meter, and 440 MHz ham bands. This makes it
ideal for some of the newer multiband and dual band rigs
available today.

The antenna is about 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Metz 214, 2-Meter Mobile Antenna, with Mag Mount:

This is a very high quality two meter antenna. It is a half wave antenna, which means it does not require a ground plane, and would have about 3 db gain. The magnetic mount includes 20 feet of quality RG-8 X coax (not the smaller, more lossy RG-58), with a PL-259 connector. Apparently Metz is well known for its marine antennas designed to hold up well in a salt water environment.

Features:
Stainless Steel 17-7ph Whip
Stainless Steel Housing
Silver Plated Brass Whip Post
UV resistant Cap
All connections soldered
Compression Whip retainer

Technical Specifications:
SWR Less than 1.2:1
1/2 Wavelength, Shunt Fed
Frequency Range 144-148 Mhz
Whip length 37 inches
No Ground plane required

This particular antenna works extremely well. It looks really great -- close to new.

HRO sells these for a discounted price of about $70. Marine dealers sell the marine equivalent for well over $100. Buy this one for only $50.

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz band and UHF public service bands. Good condition. $10

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna is made to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

BNC Magnetic Mount
This mag mount has a BNC connector on the top of it, and a
BNC connector on the coax. Among other things, it can be
used to put a BNC rubber duck outside on the roof of your
car, instead of using it inside the car on your HT. I think
this is really what it was designed for. It is in nice
condition. $20

Larsen PO-MM mobile magnetic mount:
This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It looks to be in new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) has been repainted black hammertone, and
looks very nice.

With paper work for $100.

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

Prices do not include shipping from Florida.

Thanks.

1669. Wattmeters FS

Yahoo group: hamstuff
Date: 2012-11-07 16:40:10 UTC
From: Ken Simpson, W8EK
Topic: 633 Message: 1669

Various Wattmeters For Sale:
Peak reading, average reading, Cross needle,
regular meter, HF, VHF, UHF, and more

Daiwa CN-101 L cross needle Wattmeter:

The Daiwa CN-101 L cross-needle meter displays both forward
and reflected power over a frequency range of 1.8-150 MHz
so it will cover all of the HF bands, plus 6 and 2 meters.
The power range is 15/150/1500 watts forward and 5/50/500
watts reflected. With the cross needle meter, it also reads
SWR. Minimum power for SWR detection accuracy is 4 watts.
Accuracy is ±10% at full scale. There are SO-239 connectors
on the rear panel.

This meter will read either peak or average power at the
flip of a switch. Back lighting is provided when using a
12 V power source.

This meter works 100% and looks very close to new.
With paper work for $65.

Daiwa CN-465m Cross Needle 140 to 450 MHz Wattmeter:

The Daiwa CN-460M compact cross-needle meter displays both
forward and reflected power over a frequency range of 140 to
450 MHz in ranges of 15 and 150 watts forward and 5/50 watts
reflected. Accuracy is ±15% at full scale. SO-239 connectors.
This meter includes a mobile mounting bracket and meter
illumination. 12 V is required for the light.

This particular meter works 100% and looks close to new. It
is in its original box, with the styrofoam packing, and
includes paper work for $50.

Heath Wattmeters / SWR Bridges:

Heath HM-2102 VHF Wattmeter / SWR Bridge:
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.

This particular meter works great, looks great, and
includes paper work for $45.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) is black hammertone, and looks very nice.

With paper work for $90.

Heath HM-102/HM-2102 Wattmeter Parts:

Outer clam shell cabinet (left and right sides plus top)
that fits either of these wattmeters. This one is in
extremely nice condition, with no scratches or blemishes.
$12

Front panel and bottom of HM-2102 VHF Wattmeter
Great condition with no blemishes, and very nice crisp
lettering. $12

Reflectometer Assembly for HM-2102 VHF Wattmeter
This is the complete reflectometer assembly, including
the aluminum case, and the cable. $15

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Small Wattmeter:

This wattmeter is made by Gold Line, and is designed for
27 MHz. It reads 5 watts full scale. It is small --
only about 3 x 2 x 2 inches, with SO-239 connectors on
each end.

This one works, but I can not vouch for its accuracy
on all frequencies. I would think it should be fine
for 10 or 12 meters, if not more. It looks fine. $8

Keithley Model 179 A True RMS DMM:

The 179A is a 4 1/2 digit True RMS reading DMM that
runs off of 115 V AC. It has DC voltage ranges
up to 1200 volts, with AC voltage ranges to 1000
volts. Ohms readings go up to 20 Meg, with both
DC and AC current ranges up to 2000 ma. This is
a true precision DMM, designed for bench/lab use.

This particular unit works 100% and looks extremely
nice. Probes are included, as is the paper work for
$100.

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1670. Mobile Antennas FS

Yahoo group: hamstuff
Date: 2013-01-06 01:07:59 UTC
From: Ken Simpson, W8EK
Topic: 1670 Message: 1670

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas,
plus a variety of antenna mounts

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
15 meter resonator RM-15 $14

Hustler mobile mast:
Hustler MO-3.5 mobile mast.
Hustler makes the MO-3 mast for use with their series of
mobile HF resonators. They also make an MO-4. The MO-3
is 54 inches long, and the MO-4 is a "shorty" only 22
inches long. This particular mast has been modified and
is between the two -- it is 34 inches long. It would be
ideal if you have the room for slightly more length than
the MO-4, but not enough for the MO-3. Of course this
one would result is more efficiency than the MO-4. $18

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

BNC Magnetic Mount
This mag mount has a BNC connector on the top of it, and a
BNC connector on the coax. Among other things, it can be
used to put a BNC rubber duck outside on the roof of your
car, instead of using it inside the car on your HT. I think
this is really what it was designed for. It is in nice
condition. $20

Larsen PO-MM mobile magnetic mount:
This is a mobile mount that takes antennas with a PL-259.
Coax is included. This one works great. $25

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It looks to be in new condition. $12

NMO-MM Magnetic Mount
For use with any of the Larsen, Motorola, and many others that use the NMO Mount. This is a magnetic mount with a good strong magent, coax, and PL-259 connector. $18

NMO-TLM Trunk Lip Mount
For use with any of the NMO type of antennas, this is a trunk lip mount, with a short coax. $10

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter band. Unless listed otherwise, all are for what is normally called an "Antenna Specialists" mount, which is sort of a reversed PL-259 type of connection. All have a spring just above the coil, at the bottom of the whip. All are about 3 to 3.5 feet long. I have checked each with an antenna analyzer, to determine resonant frequency. I am sure that mounting and surrounding objects might shift this frequency slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is on the order of 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Comet "Impulse" Z-780 dual band mobile antenna:

The Comet Z-780 dual band is a 2 meter and 440 MHz mobile antenna. It is 5/8 wave center loaded on 2 meters providing 4.5 dB gain and 5/8 x 3 wave on 440 MHz providing 7.2 dB gain. VSWR 1.5 : 1 or less. This antenna can handle up to 150 watts.

The antenna is 5 feet high. The connector type is gold-plated
UHF PL-259 (for PO mount).

This particular antenna works fine and looks very close to
new. $60

Larsen PO-MM mobile magnetic mount:

This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

Buy both of the above for $80.

Larsen NMO type antennas
These provide about 3 db gain over a quarter wave, and are a
very rugged antenna. About 4 feet long.

NMO-150 - for use on 2 meters
This has been the standard of the industry for a very long time.
Coil only $12
Coil with whip $19

NMO-150 B for use on 2 meters
Same as NMO-150 above, but Black in color,
Coil only $15
Coil with whip $24

NMO-Q - Quarter wave whip for 2 meters
about 19 inches long. $10

NMO-50 for use on six meters
Quarter wave loaded antenna.
Coil only $12
Coil with whip $19

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-250 connector. $25

Mobile Magnetic Mount Antenna for 6 and 2 Meters:

There are no markings on this antenna indicating who made it,
but it has an extremely strong magnetic mount, complete with
coax and PL-259 connector. The antenna is about 4 feet long,
with a spring at the base of the antenna. It does not appear
that the coil at the base is removable.

Since there are no markings, I put it on the antenna analyzer.
The SWR is below 1.1 to 1 with no reactance at both 52 MHz,
and at 146.5 MHz, so apparently it is a dual band 6 and 2
meter antenna. Probably a 5/8 wave on two meters (which
would have about 3 db gain), and a quarter wave on 6 meters.
$30

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1671. President HR-2510 10/11 Meter Radio Works Great

Yahoo group: hamstuff
Date: 2013-01-08 21:07:10 UTC
From: Stephen M
Topic: 1671 Message: 1671

I have a nice looking President HR-2510 10/11 meter radio. I dont know to much about these radios, but I did hook it up and got great reports from the locals. The coverage range is 26.0000-29.9999.

Sale For $200 I Accept Paypal, U.S. Postal Money Order, Money Gram, Western Union.

If Interested Or For Pics Send Me A Message.

1672. Icom HF rig, power supply and more FS

Yahoo group: hamstuff
Date: 2013-01-24 19:40:58 UTC
From: Ken Simpson, W8EK
Topic: 1672 Message: 1672

Icom and related items For Sale --
HF transceiver, Power Supply, Clock, Speaker
Microphones, Speakers, Charger and DC Adapter,
Manuals, cables, and other Miscellaneous Items

Icom IC-738 HF transceiver:

This all band HF transceiver features a 500 kHz to 30
MHz general coverage receiver, and a built-in automatic
antenna tuner. 10 to 100 watts full duty RF output
SSB/CW/FM (40W AM). Double band stacking registers
store 2 frequencies along with modes in each band so
it can be used like 2 VFO's in one band. Ten electronic
'memo pads' are available for DX hunting or contests.
The frequency tuning resolution is 1 Hz. This is
particularly useful when dealing with AMTOR, PACTOR
and other digital modes. Other enhancements include:
PBT (Passband Tuning), Notch, RIT and XIT.
Requires 12 VDC at 20 amps.

Features:
All Mode
Analog S/RF Meter
160-10 Meters
1 Hz Tuning
All Mode Squelch
IF Notch
10 Hz Display
Automatic Antenna Tuner
Electronic Keyer
101 Memories

This one works 100%, and looks very close to new. Immaculate.
Paper work and original box are included for $575.

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide low amperage 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.

With paper work for $200.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Radio Shack 19-310 speaker mic
This speaker mic fits most HTs that require the 3.5 mm and 2.5 mm plugs, such as Icom, Alinco, Radio Shack, some Yaesu, and others.
This one works fine and looks very close to new. $15

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

Communications Speaker:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. 3.5 mm (1/8 inch) mono plug. It is black in color, looks great, and sounds great. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom DC adapter:

Icom DC-25
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24
battery packs. It takes 13 V DC (such as from a cigarette
lighter), and converts it to the 9.4 V DC voltage needed for
the HT. It is used in place of a battery. This one works
fine and looks fine. $18

CW Key and Keyer cables:

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original manuals only.

Mobile transceiver manuals:
IC-22 S, 2 m FM transceiver $12
IC-28 H, 2 m FM transceiver $12
IC-281 H, 2 m FM Transceiver $12
IC-2350 H, Dual Band FM transceiver $15
IC-3200 A/E, Dual Band FM Transceiver $15

Other Icom manuals:
BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF

and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1673. Mobile antennas FS

Yahoo group: hamstuff
Date: 2013-01-26 13:01:02 UTC
From: Ken Simpson, W8EK
Topic: 1673 Message: 1673

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas,
plus a variety of antenna mounts

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
20 meter resonator RM-20 $16
15 meter resonator RM-15 $14

Hustler mobile mast:
Hustler MO-3.5 mobile mast.
Hustler makes the MO-3 mast for use with their series of
mobile HF resonators. They also make an MO-4. The MO-3
is 54 inches long, and the MO-4 is a "shorty" only 22
inches long. This particular mast has been modified and
is between the two -- it is 34 inches long. It would be
ideal if you have the room for slightly more length than
the MO-4, but not enough for the MO-3. Of course this
one would result is more efficiency than the MO-4. $18

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

BNC Magnetic Mount
This mag mount has a BNC connector on the top of it, and a
BNC connector on the coax. Among other things, it can be
used to put a BNC rubber duck outside on the roof of your
car, instead of using it inside the car on your HT. I think
this is really what it was designed for. It is in nice
condition. $20

Larsen PO-MM mobile magnetic mount:
This is a mobile mount that takes antennas with a PL-259.
Coax is included. This one works great. $25

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It looks to be in new condition. $12

NMO-MM Magnetic Mount
For use with any of the Larsen, Motorola, and many others that use the NMO Mount. This is a magnetic mount with a good strong magent, coax, and PL-259 connector. $18

NMO-TLM Trunk Lip Mount
For use with any of the NMO type of antennas, this is a trunk lip mount, with a short coax. $10

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter band. Unless listed otherwise, all are for what is normally called an "Antenna Specialists" mount, which is sort of a reversed PL-259 type of connection. All have a spring just above the coil, at the bottom of the whip. All are about 3 to 3.5 feet long. I have checked each with an antenna analyzer, to determine resonant frequency. I am sure that mounting and surrounding objects might shift this frequency slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is on the order of 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Comet "Impulse" Z-780 dual band mobile antenna:

The Comet Z-780 dual band is a 2 meter and 440 MHz mobile antenna. It is 5/8 wave center loaded on 2 meters providing 4.5 dB gain and 5/8 x 3 wave on 440 MHz providing 7.2 dB gain. VSWR 1.5 : 1 or less. This antenna can handle up to 150 watts.

The antenna is 5 feet high. The connector type is gold-plated
UHF PL-259 (for PO mount).

This particular antenna works fine and looks very close to
new. $60

Larsen PO-MM mobile magnetic mount:

This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

Buy both of the above for $80.

Larsen NMO type antennas
These provide about 3 db gain over a quarter wave, and are a
very rugged antenna. About 4 feet long.

NMO-150 - for use on 2 meters
This has been the standard of the industry for a very long time.
Coil only $12
Coil with whip $19

NMO-150 B for use on 2 meters
Same as NMO-150 above, but Black in color,
Coil only $15
Coil with whip $24

NMO-Q - Quarter wave whip for 2 meters
about 19 inches long. $10

NMO-50 for use on six meters
Quarter wave loaded antenna.
Coil only $12
Coil with whip $19

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-259 connector. $25

Mobile Magnetic Mount Antenna for 6 and 2 Meters:

There are no markings on this antenna indicating who made it,
but it has an extremely strong magnetic mount, complete with
coax and PL-259 connector. The antenna is about 4 feet long,
with a spring at the base of the antenna. It does not appear
that the coil at the base is removable.

Since there are no markings, I put it on the antenna analyzer.
The SWR is below 1.1 to 1 with no reactance at both 52 MHz,
and at 146.5 MHz, so apparently it is a dual band 6 and 2
meter antenna. Probably a 5/8 wave on two meters (which
would have about 3 db gain), and a quarter wave on 6 meters.
$30

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1675. HTs and HT accessories FS

Yahoo group: hamstuff
Date: 2013-02-18 17:03:15 UTC
From: Ken Simpson, W8EK
Topic: 1675 Message: 1675

HTs and HT accessories For Sale:

Yaesu VX-7 RS TriBand HT:

The Yaesu VX-7R is a triple band (6M, 2M & 440 MHz) HT with extensive receive coverage, and leading-edge features. The American version even transceives with 300 mW on the 220 band. Power output on 6 meters, 2 meters and 440 MHz is 5/2.5/1/0.5 watts. It receives the AM and FM broadcast bands, shortwave (AM), VHF and UHF TV audio, VHF Air and public service frequencies. This model features a rugged magnesium case with rubber bumpers and gaskets. Only 2.5 x 4 x 1.2 inches.

Features:
24 hour clock
900 Memories
changeable icons
weather alert
AM/FM
BCB AM band and full SW to 30 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
True Dual Receive
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD
Internet Key for Access to WIRES?

This one works 100%, looks very nice and includes the rubber duck with the 6 m extension, good battery, charger and paper work for $275.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read LCD, 60 channel memories with scanning and ten DTMF memories. Extended receive is 136-174 MHz so it includes the weather frequencies. When used on external DC power you will get a full 5 watts output. With the included PB36 battery pack, it produces 1.5 watts. The low power setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning

Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came out of the box new. It came from a silent key who I don't think ever used it. I added a new PB-36 battery, as the old one had been in the drawer long enough that it is not in good condition. This one includes the desk charger, rubber duck antenna, belt clip, and paper work for $95.

Cigarette lighter power cord for TH-235 above. $12

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) is black hammertone, and looks very nice.

With paper work for $85.

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:

This charger charges the NiCads or NiMH for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This one appears to be new, unused, still in its bag. Icom lists them at $21. Buy this one for $10.

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in this series:

MFJ 287 Speaker Microphone This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It works fine, and the mic itself looks close to new, but there is SLIGHT deterioration of the cord from the Florida sun. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine, and the mic itself looks close to new, but there is SLIGHT deterioration of the cord from the Florida sun. $8

Kenwood W09-0315 charger This charger is used to charge the larger PB-21 H batteries for the TH-21 series, and also on other Kenwood radios. It has a standard 2.1 mm coaxial connector. $12

Accessories for Realistic HTX-202, 2 meter HT:

DC cigarette lighter cord for the HTX-202. $12

Radio Shack 19-310 speaker mic
This speaker mic fits most HTs that require the 3.5 mm and 2.5 mm plugs, such as Icom, Alinco, Radio Shack, some Yaesu, and others. This one works fine and looks very close to new. $15

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long Centurion,
still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna

This is a telescoping antenna that pulls out to about a 3
foot length. If covers both 2 meters and 440 MHz, and has
a BNC connector on it. It is rated to have 3.2 dbi gain on
2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400 Yaesu
FT-209

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.It works fine, and looks close to new. $15

Communications Speaker:

Realistic 21-549 A

This speaker is about 4 inches square and about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance,
and is listed as a 300 to 3000 Hz frequency response,
making it ideal for communications. It has a 3.5 mm
(1/8 inch) mono plug, as used by most modern rigs. It
is black in color, looks great, and sounds great. $17

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available --
both transmit and receive. Most are in the 146 and 147 MHz
band segments, with very, very few in the 145 MHz segment,
and none in the 144 MHz segment. These are for ham rigs only,
and not commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail the
operating frequency you need. I have them listed by operating

frequency and rig,and not by actual xtal frequency. Send the frequencies you need (transmit or receive), and the rig that you have, and I will see if I can help. I have cross references for the various rigs, so I will know what you need if you give the rig.

Crystals are $6 each.

Two position coax switch:

B & W 550 A 2 Coax Switch

This coax switch will switch between two different coaxial cables, such as two antennas, or switch one antenna between two rigs. It has SO-239 connectors.

Although this one is an older switch, it is also more heavy duty, and will easily handle 1500 watts.

This one is in its original box, and obviously works well and looks great also. $22

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF, 6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owner's name on it.

In its original box with original instructions. $25

Coaxial Lightning Arrestor:

This lightning arrestor is made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug". It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other).
Simply unscrew the PL-259 on your coax, insert this lightning arrestor, and you are all set. $10

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" -
Double female, as above, but for mounting thru a window,
siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
(BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables standard type $2 crimp on type $3

Chassis mount BNC female square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

Heath Items For Sale - Code Practice Oscillator,
Vintage SWR Bridge, Wattmeters, Desk Mic, Phone
Patch, Speaker, Miscellaneous Parts, power supplies,
original manuals, and other miscellaneous items:

Additional original manuals have been added.

Heath HD-1416 code practice oscillator For Sale:

This is a small code practice oscillator that is
powered by a 9 volt battery. It has an internal
speaker, but also provisions for headphones.
The volume is adjusted on the front panel, with
the tone adjustable by an internal control. The
key connects to binding posts on the front panel.

This one works fine, and looks fine also. Paper
work is included for $20.

Heath AM-2 HF SWR Bridge:

This HF SWR Bridge matches the DX-40, although it can be
used with any HF transmitter. It is about 8 inches wide
and 4.5 inches high, with the meter in the middle, and a
gray colored knob at each side near the bottom. It covers
160 thru 2 meters and will handle full power.

This particular unit works fine and is in very good shape.

Paper work is included for $25.

Heath HM-2141 Dual Meter VHF PEP Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz, and also has
a battery test position (9 volt battery needed for "peak"
operation). It has a remote sensor with about 3 feet
of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks very nice.

With paper work for $90.

Heath HM-2102 VHF Wattmeter /SWR Bridge:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter by about 3 feet. SO-239 connectors in and out.
This particular meter works great, looks great, and includes paper work for $45.

Heath HM-102/HM-2102 Wattmeter Parts:

Outer clam shell cabinet (left and right sides plus top) that fits either of these wattmeters. This one is in extremely nice condition, with no scratches or blemishes. $12

Front panel and bottom of HM-2102 VHF Wattmeter
Great condition with no blemishes, and very nice crisp lettering. $12

Reflectometer Assembly for HM-2102 VHF Wattmeter
This is the complete reflectometer assembly, including the aluminum case, and the cable. $15

Heath HD-15 phone patch / digital interface:

This unit can be used to interface a sound card in a PC to your transceiver. It was originally designed to be used as a phone patch, but many have converted them to a digital interface.

This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. The meter makes it great for setting levels.

This one is all original. It is in great condition. Paper work included for $22.

I also have parts from a Heath HD-15 phone patch available. Outer cover and knobs are gone. What do you need?

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and

is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. 3.5 mm (1/8 inch) mono plug. It is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $15

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many of the older rigs, and is often seen pictured with them. It looks somewhat like a giant chrome plated lollypop, stuck into a gray base. The chrome PTT switch is a bar that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition. With paper work for $60.

Coaxial Lightning Arrestor:

This lightning arrestor is made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other).
Simply unscrew the PL-259 on your coax, insert this lightning arrestor, and you are all set. $10

Miscellaneous Heath Parts:

I have many Heath SB-630 Station Console parts available. Most of the internal parts are available, but no clock. Front panel and outer case are gone, but reflectometer assembly, switches, etc. are still available.
Please let me know what you need.

I also have parts from a Heath HD-15 phone patch available. What do you need?

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sort of noise in your receiver. Use one of these, and leave the noise behind.

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used on originally. It can be used either as a 9 Volt DC "power

pack" or as a charger. It has a 2.5 mm male plug on it, with the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power other items needing 9 V DC at low current. It has a 2.5 mm male plug on it, tip positive. $12

AEA AC-1
This unit supplies 12 V DC at up to 1 amp.
It has a 2.1 mm coaxial power plug, with the center positive, so it can be used on many different things that require about 12 V DC at up to an amp. $14

Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Surge Station and Noise Filter:

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $20

ORIGINAL Heath manuals:

These are original manuals only, for Heath equipment.
They are in very nice condition. Schematic is in the book.

Brochure "Heathkit Specials" featuring the
Twoer, Sixer, SB series, and others. $4

How to Understand and use your VTVM
Spiral Bound Educational series, $8

GD-600 Photoelectric Light Switch, 1972, $5

HD-1234 Coaxial Switch, 1972, $5

HD-1426 Relative Field Strength Meter, 1977, $5

HD-1481 Remote Coax Switch, 1984, $8

HM-15 Reflected Power and SWR Bridge, 1965, $5

HM-102, HF Wattmeter, $8

HW-2021 2 meter HT, 1975, No check marks $9

ID-1290 Weather Station, $10

IM-11 VTVM, $8

IM-36 Transistor Tester, $6

IM-5284 Multimeter, 1977, $8

These are original Heath manuals only.

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about a 3
foot length. If covers both 2 meters and 440 MHz, and has
a BNC connector on it. It is rated to have 3.2 dbi gain on
2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Kenwood and related Items For Sale:

Two meter FM HT, DTMF Microphone, speakers, chargers
and other HT accessories,desk and hand microphones,
original Kenwood manuals, Coax connectors, etc.:

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $100.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.
So you get the HT with the normal accessories, plus a
desk charger, plus a new battery for $100.

Cigarette lighter power cord for TH-235 above. $12

Kenwood MC-48 B, DTMF Touch Tone Microphone:

This is a DTMF Touch Tone microphone with a 16 digit pad.
It works with most Kenwood rigs with the round, 8 pin
connector, such as TM-201, TM-211, TM-221, TM-231, TM-241,
TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870,
TS-930, TS-940, TS-950, TW-4000, etc. It will also work
with most Alinco and many Radio Shack rigs with the round
8 pin plug.

It has UP and DOWN switches and PTT, along with 16 digit
touch tone pad.

This one works 100%, looks great, and includes paper work
for $50.

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a gray base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition.
With paper work for $60 plus shipping from Florida.

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Special Antenna adapter that fits the TH-21 series HTs,
and has a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as
well as others. It has a 3 conductor 3.5 mm plug and a
2 conductor 2.5 mm plug. It works fine, and the mic
itself looks close to new, but there is SLIGHT
deterioration of the cord from the Florida sun. $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as
well as others. It has a 3 conductor 3.5 mm plug and a
2 conductor 2.5 mm plug. It works fine, and the mic
itself looks close to new, but there is SLIGHT
deterioration of the cord from the Florida sun. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.

This adapter can be used on any HT with a BNC connector. $5

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug.
Looks to be unused. $38

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. It is black in color, looks great,
and sounds great. 3.5 mm (1/8 inch) mono plugs. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TS-130 S/V HF xcvr $20
Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TH-235, 2 m HT $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TM-221/421 mobile $15
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1680. Two meter and 440 MHz rigs and related items FS

Yahoo group: hamstuff
Date: 2013-03-20 15:44:52 UTC
From: Ken Simpson, W8EK
Topic: 1680 Message: 1680

Two meter and 440 MHz rigs and associated items For Sale:

HTX-242 Two meter FM transceiver:

The HTX-242 Two-Meter Mobile Transceiver is a great
two meter rig, with many features.

Features include:
Auto Memory Store
45 Watt and 10 watt power settings
True FM Modulation
41 Memory Channels
Priority Memory Channel
Individually Programmable Repeater Offsets
Subaudible Tone on both Transmit and Receive (CTCSS)
DTMF Page with Group Calling
DTMF Transmit and Memory
Programmable Frequency Steps
Extended Band Coverage, receiving from 136 to 174 MHz
Dual VFO and Duplex Modes

This one works 100%, and looks extremely nice. It does have
tape around the mic cord near the connector to reinforce a
potential weak point. It is in its original box.

It includes the rig, power cord, DTMF touch tone mic, and
miscellaneous hardware, in the original box.
With paper work for $95.

Yaesu VX-7 RS TriBand HT:

The Yaesu VX-7R is a triple band (6M, 2M & 440 MHz) HT
with extensive receive coverage, and leading-edge features.
This American version even transceives with 300 mW on the
220 band. Power output on 6 meters, 2 meters and 440 MHz
is 5/2.5/1/0.5 watts. It receives the AM and FM broadcast
bands, shortwave (AM), VHF and UHF TV audio, VHF Air and
public service frequencies. This model features a rugged
magnesium case with rubber bumpers and gaskets.
Only 2.5 x 4 x 1.2 inches.

Features:
24 hour clock
900 Memories
changeable icons
weather alert
AM/FM BCB

AM band and full SW to 30 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
True Dual Receive
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD
Internet Key for Access to WIRES?

This one works 100%, looks very nice and includes the rubber duck with the 6 m extension, good battery, charger and paper work for $275.

Yaesu VX-5 R tri-band HT:

The VX-5 will cover the 6m, 2m, and 440 MHz ham bands, with receive almost from DC to light. Actually receive starts at the AM broadcast band, and goes to about 1000 MHz, so that means it includes all of the public service bands outside of the ham bands, weather, FM commercial, commercial TV, SW bands, and much more. Power output is up to about 5 watts, in 4 steps. Of course PL tones (encode and decode) are included, plus much, much more.

Features:
220 Memories
AM/FM BCB
CTCSS/DCS
Wideband Receive
Dual Watch
ARTS-Automatic In-Range Transponder
Backlit Keypad

This particular unit is in nice shape. It includes the things that came with it originally, including charger and Lithium Ion battery that seems to last forever. The rubber duck antenna is complete with the 6 meter "extension" that is often lost and not included. Of course it works fine.

With paper work for $190.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read LCD, 60 channel memories with scanning and ten DTMF memories. Extended receive is 136-174 MHz so it includes the weather frequencies. When used on external DC power you will get a full 5 watts output. With the included PB36 battery pack, it produces 1.5 watts. The low power setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came out of the box new. It came from a silent key who I don't think ever used it. I added a new PB-36 battery, as the old one had been in the drawer long enough that it is not in good condition. This one includes the desk charger, rubber duck antenna, belt clip, and paper work for $95.

Cigarette lighter power cord for TH-235 above. $12

Icom MB-17 A, Quick Release Mobile Mounting Bracket:

The Icom MB-17A "Quick Release" mobile mounting bracket fits the Icom 207, 281, 481, 800, 2100, 2200, 2340, 2350, 2410, 2700, 2710, 2800, and likely other rigs that are about 5 1/2 inches wide.

Since it is the "quick release" type where the rig just slides in, it likely can be used with many other rigs, made by many different manufacturers. This means you can use it with a Kenwood, Yaesu, Alinco, etc. in addition to Icom.

This particular unit is new, in its original box, complete with all hardware. $30

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and covers from 25 MHz thru 1300 MHz, and includes "Signal Stalker" and triple trunking. It can also function as a weather radio with full alerting capabilities. There are more scanning and searching facilities than one can imagine! Of course it covers the 6 meter, 2 meter, 220 MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears that it was not used, but that the manual was examined. I have tested it and everything seems to work perfectly, although it has so many features I was not able to test everything. This is a terrific immaculate scanner!

Only $125.

Heath Wattmeters/SWR Bridges:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covering
50 to 160 MHz., with 250 and 25 watt scales. It can
also be used to check SWR, and has a remote sensor
that can either be left inside the meter, or separated
from the actual meter. SO-239 connectors in and out.
This particular meter works great, looks great, and
includes paper work for $45.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) is black hammertone, and looks very nice.

With paper work for $85.

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC Connector about 7 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging
-
PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna

This is a telescoping antenna that pulls out to about a 3
foot length. If covers both 2 meters and 440 MHz, and has

a BNC connector on it. It is rated to have 3.2 dbi gain on
2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

1681. New Super Mod Kit With Variable Power Control For Cobra 25-29 Uniden 66-68-76-78

Yahoo group: hamstuff
Date: 2013-03-23 21:27:09 UTC
From: Stephen M
Topic: 1681 Message: 1681

MONEY BACK GUARANTEE! NEW Super Mod Kit With Variable Power Simple Install. The Power Knob Is Included, Hook Up Only 3 Wires Install The Power Knob POT And Your Ready To Go. Very Easy To Do And Small In Size. This Mod Kit With Go From O Watts To Full Dead-Key Wattage With Full Super Swing/Pep Wattage. Comes With Easy To Follow Full Directions With Pictures.

All Wires Are Color Coded For An Easy Install. Fits Cobra 25, 29 Uniden 66, 68, 76, 78

As You Can See In The Pics We Use Heavier Gauge Wire Than You See In The Cheaper Mod Kits. Our Mod Kit Does Not Make The Wattage Jump All Over The Watt-Meter. Ours Works Great And Gives You Full Swing/Pep Wattage At Any Setting With A Smooth Power Adjustment, NO Jumping Around.

Comes With A FULL 100% Money Back Guarantee, If Your Not Pleased For Any Reason, Return The Item For A Full Refund...

Sale For $10.00 Shipped To The U.S. Only. Paypal Preferred Payment But May Take Other Payments, Ask And We Will Work Something Out.

Paypal Email Address Is steve25537@... If You Like To Pay By Another Way Send Me An Email.

The Kit Will Include Ever thing You Need For An Easy Install. I Will Also Include My Phone Number Just In Case You Need Help.

For Any Questions Or Pics Send Me An Email At steve25537@...

1682. 10 meter equipment FS

Yahoo group: hamstuff
Date: 2013-03-24 01:13:32 UTC
From: Ken Simpson, W8EK
Topic: 1682 Message: 1682

10 meter equipment For Sale:

Transceiver, antennas and related items

With 10 meters opening up more now, it is time to get
on the band!

Uniden President HR-2600 10 meter all mode transceiver:

Uniden?s Model HR2600 President 10-meter transceiver
features CW, LSB, USB, AM and FM modes for Amateur Radio
use, plus programmable CTCSS control tones for accessing
repeaters. Although it was designed primarily as a mobile
unit, it can also be used as a base station with a 5 amp
power supply.

This unit covers the entire 10 meter band, so you can operate
CW on the low end of the band, SSB a bit higher, or AM or
even FM. PL (subaudible) tones are included for FM repeater
use. Basically, this unit will do anything you want to do
on 10 meters.

This particular unit has no modifications. It functions just
as it should. Everything works 100%. It looks very good,
but does have a couple very minor scratches. It includes
the mobile mount which looks like new (possibly never used),
microphone with up/down switches, power cord, and paper work,
in its original box. It even has a pack of hardware with it,
just like a new one. There is even a CD with additional information
(service manual, etc.) on it. This is a terrific unit!

All of this for only $140.

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a gray base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition.
With paper work for $60.

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter
band. Unless listed otherwise, all are for what is normally

called an "Antenna Specialists" mount, which is sort of a reversed PL-259 type of connection. All have a spring just above the coil, at the bottom of the whip. All are about 3 to 3.5 feet long. I have checked each with an antenna analyzer, to determine resonant frequency. I am sure that mounting and surrounding objects might shift this frequency slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

HF Mobile Antennas:

All work fine and are in great cosmetic condition.

"Hamstick" Antennas:
Each antenna, when fully assembled and tuned, is about 7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so they fit a standard ball mount. No mast is required. Simply screw the antenna into the standard ball mount.
Each antenna covers a single band only.
These are true Lakeview original hamsticks and not one of the clones.
With paper work for only $20 each.
20 meter
10 meter
6 meter

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
10 meter resonator RM-10 $ 12

Hustler mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

Larsen 10 meter NMO type mobile antenna:

NMO-28 for use on ten meters
Quarter wave loaded antenna.
Coil only $12
Coil with whip $19

Larsen NMO-TLM Trunk Lip Mount
For use with any of the NMO type of antennas. This is a trunk lip mount, with a short coax. $10

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics Ltd in England. It appears to be an "L" network with a 12 tap inductor and a single tuning capacitor. Apparently back in the 1960's or 70's Partridge made an antenna they called the Joystick. This is an antenna tuner that could be used with it, but of course it can be used with other antennas as well. It would appear to work on 80 thru 10 meters (including WARC bands). L networks only match impedances one direction, i.e. only lower than 50 ohms, or only higher than 50 ohms. You can change the direction of match by swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like it would handle 100 watts.

This tuner works fine and looks great. $50

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 300/3000 watts forward and 60/600 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new. With paper work for $65 plus shipping from Florida.

HF and VHF SWR Bridges:

All of these cover from 3 thru 150 MHz, covering HF, 6 meters, and 2 meters. SO-239 connectors in and out on all.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owner's name on it.
In its original box with original instructions. $25

Monarch FSI-3
Appears to be the same SWR Bridge as above, but with a different faceplate and model number. Extremely nice condition. $18

Heath AM-2 SWR Bridge:
This SWR Bridge matches the DX-40, although it can be used with any HF or VHF transmitter. It is about 8 inches wide and 4.5 inches high, with the meter in the middle, and a gray colored knob at each side near the bottom. This particular unit works fine and is in very good shape. Paper work is included for $25.

Coax switches:

Homebrew Coaxial Antenna Switch
This coax switch has one common SO-239 on one side and six switched SO-239 connectors on the other side. It has been constructed in what appears to be a heavy solid copper box, about 3 1/4 inches wide X 2 high and 4 1/4 deep, plus knob and connectors. The switching is by three ganged ceramic rotary switches.
It does have one peculiarity, however. It appears that the way it is presently wired, one SO-239 is selected twice, and another one is not selected at all. $15

Workman CX-3, three position coax switch
Switch one rig to up to three antennas.
With SO-239 connectors.
It looks new, and is in its original box. $15

GC 2 position coax switch
This coax switch will switch between two different coaxial cables, such as two antennas, or switch one antenna between two rigs. It has SO-239 connectors.
This one looks like new. $12

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It has a 3.5 mm (1/8 inch) mono plug, as used by most modern rigs. Gimbal mount included.
It is black in color, looks great, and sounds great. $15

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and covers from 25 MHz thru 1300 MHz, and includes "Signal Stalker" and triple trunking. It can also function as a weather radio with full alerting capabilities. There are more scanning and searching facilities than one can

imagine! Of course it covers the 6 meter, 2 meter, 220 MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears that it was not used, but that the manual was examined. I have tested it and everything seems to work perfectly, although it has so many features I was not able to test everything. This is a terrific immaculate scanner!

Only $125 plus shipping from Florida.

I also have many other accessories available such as many different types of microphones, wattmeters, keyers, and many other ham accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1683. Yaesu and related items FS

Yahoo group: hamstuff
Date: 2013-03-29 13:49:43 UTC
From: Ken Simpson, W8EK
Topic: 1683 Message: 1683

Yaesu and related Items For Sale:
Automatic Antenna Tuner, Multi-Band HT, Communications
Speakers, Desk Microphones, HT accessories, and more

Yaesu FC-757 AT, Automatic HF Antenna Tuner:

The Yaesu FC-757 AT is a automatic antenna tuner designed
to be used on 160 thru 10 meters, including the WARC bands.
It is designed to work with the FT-757GX, FT-757GXII and
FT-747GX transceivers, but can work with virtually any HF rig.

The frequency range of this tuner is: 1.8-2, 3.5-4, 7-7.5,
10-10.5, 14-14.5, 18-18.5, 21-21.5, 24.5-25 and 28-29.9 MHz.
The maximum RF power is 150 watts. The built in wattmeter
has ranges of 15 and 150 watts. There is a 4-bit microprocessor
which allows for fast, accurate automatic tuning. Two SO-239
connectors are provided, and it includes a built-in dummy
load. It requires 13 V DC at 300 ma.

This unit works fine. Cosmetically it is not perfect;
it shows some use, but it is not bad.

With paper work for $190.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12
tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

Yaesu VX-7 RS TriBand HT:

The Yaesu VX-7R is a triple band (6M, 2M & 440 MHz) HT
with extensive receive coverage, and leading-edge features.
The American version even transceives with 300 mW on the

220 band. Power output on 6 meters, 2 meters and 440 MHz
is 5/2.5/1/0.5 watts. It receives the AM and FM broadcast
bands, shortwave (AM), VHF and UHF TV audio, VHF Air and
public service frequencies. This model features a rugged
magnesium case with rubber bumpers and gaskets.
Only 2.5 x 4 x 1.2 inches.

Features:
24 hour clock
900 Memories
changeable icons
weather alert
AM/FM BCB
AM band and full SW to 30 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
True Dual Receive
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD
Internet Key for Access to WIRES?

This one works 100%, looks very nice and includes the
rubber duck with the 6 m extension, good battery, charger
and paper work for $275.

Accessory Items for the Yaesu "VX series" HTs, including
the VX-1, VX-3, VX-5, etc.:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6,
VX-5, VX-3, VX-2, VX-1, and that series of HTs. I
think it also fits the FT-50 and FT-60, and maybe
others. It has a single 4 conductor, 3.5 mm plug on
it. This one is just like new. $25

Yaesu CT-44 Adapter
This adapter cable converts to 4 pin, 3.5 mm speaker mic plug on the
VX HTs to a more standard 3.5 mm and 2.5mm jacks as used on many
speaker mics. Like new. $10

Yaesu CD-15 Desk Charger
Fast desk charger used for the VX-5, etc.
Like new condition. $25

Yaesu FBA-23 "Empty" battery pack
This pack takes two AA cells (Alkaline, NiCad, or NiMH)
and lets you use them on yur VX-5, VX-7, etc. $25

Yaesu EDC-6 DC Cord
Provides power to the VX series HTs. $6

VX-5 Pocket Reference
Has most of the commands that everyone always forgets.
Permits one to have the info close at hand without needing
to carry the entire operating manual. Spiral bound.
Like new. $8

VX-7 Nifty Mini Manual
Similar to the VX-5 Pocket Reference above, but for the
VX-7 and slightly larger. Spiral bound. $18

Programming cable
This cable has the threaded connector as used by the VX-7,
but it can also be used on the VX-6, 5, 3, etc. Uses USB port.
It works great with the free "Chirp" program. I have not
tried it with others. $18

Yaesu YD-148 Dual Impedance Desk Microphone:

The Yaesu YD-148 is a very nice "gooseneck" type desk microphone.
It has both high and low impedances, which can be selected by a
switch. This means it can be used on some of the older rigs
requiring a high impedance mic, or with the more modern rigs
needing a low impedance mic.

This particular mic has had the mic element replaced with a
Heil HC-4 element, which is the "DX" element that Heil
designed for superior audio punch to get thru pileups.
These elements are no longer available, but are worth
$50 for just the element.

This particular mic is in very nice condition. It works 100%.
At the present time, it has an 8 pin connector, wired for
Kenwood, on it, which of course can be changed. $85

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a gray base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition.
With paper work for $60.

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are
50 ohm filters.

The first one works on 6 meters as well as HF:

Drake TV-1000
This filter may also be used on the low end of six meters,
as well as HF. It is good for 1000 W "average" below 30MHz,
and about 200 W up to 52 MHz. It works fine, but looks ugly.
With paper work for $22.

Bencher YA-1, high power, low pass TVI filter
If you need a heavy duty filter for the output of your amplifier,
this one is ideal. It will take full legal power plus, and has at
least 80 db signal attenuation at TV channel 2. This one works
great, and is in its original box.
Bencher currently sells these for about $90. Only $60.

Bencher YA-1
As above, not in original box. $45

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Yaesu HT Accessory Items:

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and
covers from 25 MHz thru 1300 MHz, and includes "Signal
Stalker" and triple trunking. It can also function as
a weather radio with full alerting capabilities. There
are more scanning and searching facilities than one can
imagine! Of course it covers the 6 meter, 2 meter, 220
MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears
that it was not used, but that the manual was examined.
I have tested it and everything seems to work perfectly,
although it has so many features I was not able to test
everything. This is a terrific immaculate scanner!
Only $125.

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - regular rubber duck

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Multi Band BNC Telescoping Antennas:

Two telescoping antennas are available. Both are in very
nice, close to new condition, and have BNC connectors.

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about
a 3 foot length. If covers both 2 meters and 440 MHz,
and has a BNC connector on it. It is rated to have
3.2 dbi gain on 2 meters and 5.6 dbi gain on 440 MHz.

It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1684. Transel 2000 Watt/SWR Meter With 12 Foot Jumper Cheap

Yahoo group: hamstuff
Date: 2013-04-03 04:06:18 UTC
From: Stephen M
Topic: 1684 Message: 1684

Transel SWR/Watt Meter With 3 Power Settings 20/200/2000 With Peak And Avg Setting. Everything Works Good Also Includes A 12 Foot Jumper.

Sale For $40.00 Shipped to The U.S. Only. If Interested Email Me At steve25537@yahoo.com

Paypal Accepted. Can Send Pics If Interested.

1685. HF Antenna Tuners FS

Yahoo group: hamstuff
Date: 2013-04-18 14:34:18 UTC
From: Ken Simpson, W8EK
Topic: 1685 Message: 1685

HF Antenna Tuners For Sale:

From very high power to lower power

Nye Viking MB-V Heavy Duty Antenna Tuner:

This antenna tuner is a "brute". Apparently it will take
on the order of 5000 watts -- at least far more power than
you should be running.

This tuner features a heavy-duty silver-plated variable
inductor with a 25:1 vernier dial, 7,000 volt variable
capacitor and 15,000 volt switch selected capacitors. The
frequency range is 1.8 to 30 MHz continuously.
Dual-metering provides for hands free SWR monitoring. The
backlit dual meters show SWR and power continuously.
You get push button antenna switching from the front panel.
The rear panel has inputs for 4 antennas (2 coax, single
wire and twin lead). There is a tuner bypass position for
the coax antenna input.

A 3kW triple core balun is included.
The extra heavy gauge aluminum cabinet provides effective
shielding.

This one works 100% and looks very close to new.

With paper work for $450.

MFJ 984 Versa Tuner IV Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160
thru 10 meters. It features a cross needle wattmeter
that will read forward and reverse power, and SWR
simultaneously. Full scale readings are 2000/200 watts
forward, and 500/50 watts reverse. An antenna switch
is built in, as is a balun. The meter has a back light
that may be turned on or off. You need 12 V DC to
power the light.

This tuner works fine, the meter works fine, and it
lights properly. The cosmetics are good. The case
looks great. The front panel shows some wear.
Wear, but not scratches.

With paper work for $160.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12
tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1686. Icom and related items FS

Yahoo group: hamstuff
Date: 2013-04-19 15:07:26 UTC
From: Ken Simpson, W8EK
Topic: 1686 Message: 1686

Icom and related items For Sale --
2 meter HT, HT Accessories, Power Supply, Speaker
Microphone, Wattmeters, Speakers, Charger and DC
Adapter, High Power Antenna Tuner, Mobile Mounting
Bracket, Scanner, Manuals, and other
Miscellaneous Items

Icom IC-2 AT, 2 meter HT:

The Icom IC-2 AT is a fairly generic HT for the 2 meter band.
It is fully synthesized, with the frequency controlled by thumb
wheel switches on the top; it has a touchtone pad on the front.
For a long time, this was the "standard", since it is such a
well built HT.

The HT has about 3 watts output in high power and just under a
watt in low. Instead of a NiCad pack that would likely be dead
anyhow, this HT has the "empty" battery pack that takes six AA
cells. You can use NiMHs in this, and then recharge the
batteries outside of the pack, or you can use alkaline cells.
Using this type battery pack is the only reasonable way to go.

This particular unit works 100% and looks very, very nice.

Rubber duck and paper work included for $35.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery pack.
If 13 V DC is applied, it converts the voltage to the proper
voltage for the HT. It can be used with the IC-2, IC-3, IC-4,
IC-02, IC-03, IC-04, and others. This one works fine, and
looks very nice. With paper work for $18.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items needing
the 2.1 mm coaxial power plug. The opposite end has a cigarette
lighter plug on it. $10

Multi Band BNC Telescoping Antennas:

Two telescoping antennas are available. Both are in very
nice, close to new condition, and have BNC connectors.

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about
a 3 foot length. If covers both 2 meters and 440 MHz,
and has a BNC connector on it. It is rated to have

3.2 dbi gain on 2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide low amperage 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.

With paper work for $200.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select either Peak or Average reading and
power ranges of 200/2000 watts forward and 50/500 watts
reflected. Frequency coverage is 1.8 to 60 MHz, so it covers
6 meters in addition to the HF bands, making it ideal for
some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light
require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

Diawa CN-101 L Peak Reading Cross Needle Wattmeter:

The CN-101 L covers frequencies from 1.8 thru 150 MHz, which
means it covers all of the way from 160 meters thru 2 meters
-- much more than most wattmeters. It has a cross needle meter,
so it will read forward power, reverse power, and SWR all
simultaneously. It has a switch for reading either peak or
average power. In addition, it has a very nice back lit
meter, if 13 V DC is applied.

This particular meter works 100% and looks very close to new.
It even has the rubber "bumpers" on the left and right ends.
It is pristine!

With paper work for $80.

HT Speaker Microphone:

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom MB-17 A, Quick Release Mobile Mounting Bracket:

The Icom MB-17A "Quick Release" mobile mounting bracket
fits the Icom 207, 281, 481, 800, 2100, 2200, 2340, 2350,
2410, 2700, 2710, 2800, and likely other rigs that are
about 5 1/2 inches wide.

Since it is the "quick release" type where the rig just
slides in, it likely can be used with many other rigs,
made by many different manufacturers. This means you
can use it with a Kenwood, Yaesu, Alinco, etc. in
addition to Icom.

This particular unit is new, in its original box,
complete with all hardware. $30

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and
covers from 25 MHz thru 1300 MHz, and includes "Signal
Stalker" and triple trunking. It can also function as

a weather radio with full alerting capabilities. There are more scanning and searching facilities than one can imagine! Of course it covers the 6 meter, 2 meter, 220 MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears that it was not used, but that the manual was examined. I have tested it and everything seems to work perfectly, although it has so many features I was not able to test everything. This is a terrific immaculate scanner!

Only $125.

Astron RS-35 A, 35 amp power supply:

Very heavy duty 13 V DC power supply ideal for powering HF rigs, with reserve for your 2 meter and other gear.

This one works sets at 13.8 Volts DC with no load, or with a load. Very well regulated.
It looks close to new, with no scratches, dents, or dings.
$100

Reference Data for Radio Engineers:

This book published by Sams / ITT is somewhat similar to an ARRL Handbook, but in much more depth and detail, since it is designed for engineers.

This book covers the fields of research, development, production, operation and education for radio engineers. It is loaded with tables and charts necessary in communications. Excellent resource book when looking for data,from the acoustic spectrum to radio wave propagation.

This one is the Sixth Edition printed in 1978, but the basic information has not changed much.

This one is hardback, and it is in excellent condition, close to new. The cover does not even appear to be worn. This exact book in this condition is selling on Amazon from between $123 and $338. Buy this one for only $80.

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals and are not copies. All are in very good condition. These are original manuals only.

Mobile transceiver manuals:
IC-22 S, 2 m FM transceiver $12

IC-28 H, 2 m FM transceiver $12
IC-281 H, 2 m FM Transceiver $12
IC-2350 H, Dual Band FM transceiver $15
IC-3200 A/E, Dual Band FM Transceiver $15

Other Icom manuals:
BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1687. Connex 3300-HP, Cobra 29 & 148 For Sale!

Yahoo group: hamstuff
Date: 2013-05-18 21:35:20 UTC
From: Stephen M
Topic: 1687 Message: 1687

3 Mobile/Car CB Radios For Sale For Best Offer.

Cobra 29 LTD Classic 40 Channels, Has Super Mod/Swing Kit With Variable Power And Talkback With On/Off Switch. Looks And Works Good, Comes With A Mic.

Cobra 148 Night-Watch Sound Tracker. 40 Channels And Has AM/USB/LSB been peaked and tuned. Looks And Works Good, Comes With Mic.

John Deere Edition Connex 3300-HP This Is A High Power Radio Does Around 45 To 50 Watts. Has 6 Bands Of Channels With AM/FM Modes. Has Echo And Talkback And More. The Radio Looks And Works Good, Comes With Mic.

Will Sale Each Or All For Best Offer. If Interested And For Pics Send Me An Email To steve25537@...

PayPal Is Accepted And Are Other Forms Of Payment.

Thanks

1688. HF Antenna Tuners and Wattmeters FS

Yahoo group: hamstuff
Date: 2013-06-07 15:29:42 UTC
From: Ken Simpson, W8EK
Topic: 1688 Message: 1688

HF Antenna Tuners and Wattmeters For Sale:

From very high power to lower power,
manual and automatic

Drake MN-2700 HF Antenna Tuner:

The Drake MN-2700 is a precision instrument covering 160
through 10 meters. It matches antennas fed with coax,
balanced line, or random wire. Front panel controls
allow for adjustment of resistive and reactive tuning,
antenna switching (with by-pass), and band switching.
A very nice wattmeter is build in, with calibration for
200 W and 2000 W.

This device can handle 2000 watts PEP, 1000 watts average.
Although this tuner matches the Drake "7 line" it can be
used with any HF rig.

This particular unit is immaculate. It does not have the
sticky paint. It includes the "riser feet" and is in its
original box and looks perfect. Of course it works 100%
as well.

With paper work for $300.

MFJ 984 Versa Tuner IV Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160
thru 10 meters. It features a cross needle wattmeter
that will read forward and reverse power, and SWR
simultaneously. Full scale readings are 2000/200 watts
forward, and 500/50 watts reverse. An antenna switch
is built in, as is a balun. The meter has a back light
that may be turned on or off. You need 12 V DC to
power the light.

This tuner works fine, the meter works fine, and it
lights properly. The cosmetics are good. The case
looks great. The front panel shows some wear.
Wear, but not scratches.

With paper work for $160.

Yaesu FC-757 AT, Automatic HF Antenna Tuner:

The Yaesu FC-757 AT is a automatic antenna tuner designed
to be used on 160 thru 10 meters, including the WARC bands.
It is designed to work with the FT-757GX, FT-757GXII and
FT-747GX transceivers, but can work with virtually any HF rig.

The frequency range of this tuner is: 1.8-2, 3.5-4, 7-7.5,
10-10.5, 14-14.5, 18-18.5, 21-21.5, 24.5-25 and 28-29.9 MHz.
The maximum RF power is 150 watts. The built in wattmeter
has ranges of 15 and 150 watts. There is a 4-bit microprocessor
which allows for fast, accurate automatic tuning. Two SO-239
connectors are provided, and it includes a built-in dummy
load. It requires 13 V DC at 300 ma.

This unit works fine. Cosmetically it is not perfect;
it shows some use, but it is not bad.

With paper work for $190.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12
tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle"
type, so it reads SWR at the same time it reads forward and
reflected power.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $65.

Coaxial antenna switch:

Homebrew Coaxial Antenna Switch
This coax switch has one common SO-239 on one side and
six switched SO-239 connectors on the other side. It
has been constructed in what appears to be a heavy solid
copper box, about 3 1/4 inches wide X 2 high and 4 1/4
deep, plus knob and connectors. The switching is by
three ganged ceramic rotary switches. $15

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1689. Mobile Antennas FS

Yahoo group: hamstuff
Date: 2013-07-05 00:17:15 UTC
From: Ken Simpson, W8EK
Topic: 1670 Message: 1689

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas, plus
a variety of antenna mounts and connectors

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
10 meter resonator RM-10 $ 12

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

Mobile Antenna Mounts:

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $25

Antenna Specialists Mag Mount
with short coax $15

Trunk Lip Mount
Male 3/8 inch stud, with coax. $12

Generic Mag Mount
has female 1/4 inch threaded connection, with coax $12

Mobile Antenna Springs:

I found several mobile antenna springs that appear to
be new. They are the chrome plated type, and designed
for light to medium duty use, i.e. use on VHF type antennas,
and not for heavy duty HF use.

These are about 3 inches long. I have some that are
for 1/4 inch diameter antenna mounts and some for 3/8 inch.

These appear to be new, or at least unused.
They are $5 each.

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter
band. Unless listed otherwise, all are for what is normally

called an "Antenna Specialists" mount, which is sort of a reversed PL-259 type of connection. All have a spring just above the coil, at the bottom of the whip. All are about 3 to 3.5 feet long. I have checked each with an antenna analyzer, to determine resonant frequency. I am sure that mounting and surrounding objects might shift this frequency slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is on the order of 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Larsen VHF (2 meter) mobile antennas:

The first two provide about 3 db gain over a quarter wave, and are very rugged antennas. About 4 feet long.

NMO-150 - for use on 2 meters
About 4 feet long.
This has been the standard of the industry for a very long time.
Coil only $18
Coil with whip $25

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

NMO-Q - Quarter wave whip for 2 meters
Obviously no gain on this one.
about 19 inches long. $10

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-259 connector. $25

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1690. HT s and HT accessories FS

Yahoo group: hamstuff
Date: 2013-07-06 16:51:38 UTC
From: Ken Simpson, W8EK
Topic: 1690 Message: 1690

HTs and HT accessories For Sale:

Azden PCS-300, 2 meter FM HT:

The PCS-300 HT covers the 2 meter band, and has 3 watts in high power or 1 watt in low. It has a very good receiver.

Of course it has memories, and scan features as one would expect. The LCD display is larger than some.

This particular HT is in its original box, and in pristine condition. It includes the desk stand charger, and the earphone is still in the box with it. It includes its manual, with the original warranty card.

All of this for only $60

Yaesu FT-209, 2 meter HT:

The Yaesu FT-209R operates on 2 meters from 144-148 MHz with 2.5 watts. The controls are easy to use. High/Low power and VOX on/off is selectable from the top panel of the radio. 19 soft rubber, dual-function keys provide flexible control. There is an analog meter and digital LCD display, along with 10 memories.

This particular radio is in need of repair, or it can be used for parts. It is dead. It does nothing when turned on. No display, no audio, nothing.

This is the HT only with no accessories for $10

Yaesu VX-7 Reference Manual and Programming cable:

VX-7 Nifty Mini Manual
Has most of the commands that everyone always forgets. Permits one to have the info close at hand without needing to carry the entire operating manual. Spiral bound with laminated pages. Like new. $18

Programming cable
This cable has the threaded connector as used by the VX-7, but it can also be used on the VX-6, 5, 3, etc. Uses USB port. It works great with the free "Chirp" program. I have not tried it with other programs. $18

HT Speaker Microphone:

This HT speaker microphone was made for the
Baofeng UV-3 dual band HTs, but it should fit
many other HTs as well. It has a single 4
conductor connector on it.

This one works fine and is still in its original
box. $8

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin c
ompatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $15.

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges the NiCads or NiMH for the IC-Q7 A
Dual band HT, and Icom R-2 receiver, and probably
others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $10.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Original Alinco EA0024 - 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC Connector about 7 inches long

Type F connector - 6.5 inches long

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Optoelectronics Model 7010.1 Precision Frequency
Counter:

The Opto 7010.1 freq counter is a really deluxe
unit. It operates up to 600 MHz. This particular
model features an extra precision TCXO, guaranteed
at 0.1 ppm. Most of these counters came with a
"standard" TCXO that was 1 ppm.

This unit has three frequency ranges -- 10 hz to
12 MHz, 10 MHz to 50 MHz, and 25 to 600 MHz. It
also has three time base counting periods of .1
second, 1 second, and 10 seconds.
This permits extreme precision!

This unit functions flawlessly, and looks like it
has never been used, other than for my testing of
it. It is in its original box, complete with power
cube, the original manual, the original warranty

card (not filled out), and certificate of calibration.

All of this for only $125.

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both transmit and receive. Most are in the 146 and 147 MHz band segments, with very, very few in the 145 MHz segment, and none in the 144 MHz segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the solid state 2 meter mobiles and HTs. Please e-mail the operating frequency you need. I have them listed by operating frequency and rig,and not by actual xtal frequency. Send the frequencies you need (transmit or receive), and the rig that you have, and I will see if I can help. I have cross references for the various rigs, so I will know what you need if you give the rig.

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1691. Power Supplies FS

Yahoo group: hamstuff
Date: 2013-07-11 15:57:53 UTC
From: Ken Simpson, W8EK
Topic: 1614 Message: 1691

Several Power Supplies For Sale
From high current to low current

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide lower current 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.
Absolutely pristine. It is in its original box, with paper work.
$200

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $140

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
There is one very small scratch that can be seen if the light
is just right, but is not normally visible.

With paper work for $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

Only $85.

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is well regulated. It has a switch and LED power light on the front, with a circuit breaker and output terminals on the back. The case (left and right side and top) is basically all a heat sink, so it should cool the regulator well.

This one works fine and looks like new. No scratches. $30

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made to set your rig on top, at an angle for good viewing and sound. It is good for about 3 amps, or to put it another way, would be great for powering 2 meter rigs in the 10 to 15 watt category.

This one is a "Tech Special". It produces no output voltage. It looks fine, however. $5

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sort of noise in your receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used on originally. It can be used either as a 9 Volt DC "power pack" or as a charger. It has a 2.5 mm male plug on it, with

the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it, tip positive. $12

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

1692. HF Antenna Tuners and Wattmeters FS

Yahoo group: hamstuff
Date: 2013-07-13 16:03:30 UTC
From: Ken Simpson, W8EK
Topic: 1688 Message: 1692

HF Antenna Tuners and Wattmeters For Sale:

From very high power to lower power,

MFJ 984 Versa Tuner IV, 3000 watt Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160
thru 10 meters. It features a cross needle wattmeter
that will read forward and reverse power, and SWR
simultaneously. Full scale readings are 2000/200 watts
forward, and 500/50 watts reverse. An antenna switch
is built in, as is a balun. The meter has a back light
that may be turned on or off. You need 12 V DC to
power the light.

This tuner works fine, the meter works fine, and it
lights properly. The cosmetics are good. The case
looks great. The front panel shows some wear.
Wear, but not scratches.

With paper work for $160.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12

tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle"
type, so it reads SWR at the same time it reads forward and
reflected power.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $65.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1694. Need help identifying this Diskcone Antenna

Yahoo group: hamstuff
Date: 2013-07-24 03:55:41 UTC
From: schneiderandrew
Topic: 1694 Message: 1694

I need some help .....

I had this antenna given to me recently with no details or information provided.

The antenna has 4 allen wrench set screws to old a PVC pipe or mast.

Is this a Diskcone Antenna?

What is the Make/Model?

What Frequency?

What is the fitting type for the coax connection?

http://wmsinc.org/N7EBG/diskcone.html

Thank you for your time and support.

Andy, N7EBG

1695. HF Linear Amplifiers FS

Yahoo group: hamstuff
Date: 2013-08-03 16:43:01 UTC
From: Ken Simpson, W8EK
Topic: 1695 Message: 1695

HF Linear Amplifiers For Sale:

Amp Supply LK-500 Z A, HF Amplifier:

The LK-500 is an HF amp that runs a pair of 3-500 tubes, on the 160 thru 10 meter bands, producing close to the legal limit. On this amp, 30 watts of drive produces about 400 watts out of the amp; 50 watts gives about 650 Watts out; etc.

This amp has a MUCH heavier duty Peter Dahl power transformer, and covers 160 meters. It has a excellent tuned input matching circuit. It is a superior amplifier.

This particular amp works very well. It has a manual step start circuit added, and the electrolytic capacitors have been replaced. Cosmetically it looks very, very nice. I can not find a scratch on it. It looks like new.

Since this is heavy, I would much prefer pickup in the Ocala, FL area.

With paper work for $900.

Ameritron AL-572, HF Amplifier:

Ameritron's new class of Near Legal Limit Amplifiers give you nearly full legal SSB power output for a much lower price. You get 1300 Watts PEP SSB nominal power out on amateur bands 160-15M.

Two lighted Cross-Needle Meters
Grid current, plate current and forward PEP output power are continuously monitored to tell you of proper loading and alert you to abnormal conditions. A fourth scale switches among peak reflected power (and SWR), high voltage, ALC threshold and ALC output voltage.

It has a transmit LED, 12 VDC, 200 mA accessory jack, and 12 VDC keying relay for solid state/tube rigs.
It draws 16 amps at 120 VAC, but can also be used on 240 V AC.

Features:
Instantaneous RF Bias
Step-Start Inrush Protection
Heavy duty power supply
Pi/Pi-L network

Tuned input
Dual lighted Cross-Needle meters
6:1 vernier reduction drives
Four rugged 572 B Tubes

This particular amp is in extremely nice condition
both cosmetically and electrically. Everything works
100% and it looks very close to new.

Paper work included for $900.

TenTec Hercules II 420 HF Amplifier:

This is a fully solid state all-mode HF linear
amplifier covering 1.8 to 30 MHz continuously.
It requires 13.6 VDC at 100 A max. Drive power
is 50 to 80 W typical for 550 W output. Maximum
Power output on SSB/CW/RTTY is 550 W DC at 50%
duty cycle.

This amp features full QSK break in CW. It can
be remote controlled (bands switched remotely)
from many transceivers.

This particular amplifier looks extremely nice.
I can not find a scratch on it. Electrically, I
think all works fine. It requires a 13 V DC power
supply in the 80 to 100 amp category. I only have
a 35 amp supply to test it with. As a result, I
only get 250 watts out of it before the power supply
over current limit kicks off. But all of the QSK
and everything works fine, as long as I keep it low
enough for the power supply I have.

With paper work for $900.

Heath SB-200 HF Linear Amplifier:

The SB-200 uses a pair of 572B tubes, and operates
on 80 thru 10 meters. It may be used on SSB, CW,
or digital modes.

This particular amplifier puts out about 750 watts
on 20 meters, and has been tested for operation on
all bands.

Cosmetically, it is in extremely nice condition.
I can not find a scratch on it.

Paper work is included for $475.

In all cases, pick up of the amplifier is first choice.
The amplifiers are heavy and hard to ship. I am located

near Ocala FL, not far off of I-75.

Obviously, if it necessary to ship, the cost is not
included in the prices listed.

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1696. Japan Radio Equipment FS

Yahoo group: hamstuff
Date: 2013-08-10 20:36:32 UTC
From: Ken Simpson, W8EK
Topic: 1696 Message: 1696

Japan Radio Equipment For Sale:

Deluxe HF Transceiver, Matching Speaker, and Headphones

Japan Radio JST-245 Deluxe HF Transceiver:

The Japan Radio Company JST-245 is an extraordinary rig providing 160 to 10 meter amateur band coverage plus 6 meters in all modes (AM/FM/SSB/CW/RTTY).

The built-in automatic antenna tuner is provided as standard equipment. Tuner settings are automatically stored in memory for fast QSY. Three antenna connections are user selectable from the front panel and can be stored in memory.

The general coverage receiver tunes from 100 kHz to 30 MHz plus 48 to 54 MHz. Electronically tuned front-end filtering, quad FET mixer and quadruple conversion (triple on FM) ensures excellent dynamic range (> 100 dB) and third order ICP of +20 dBm. Excellent I.F. bandwidth flexibility is assured with the variable Bandwidth Control. This permits the standard 2.4 kHz filter to be narrowed continuously to 800 Hz.

Other interference rejection features include Passband Shift (PBS), dual noise blanker, three step attenuation, I.F. notch, selectable AGC and all-mode squelch. Notch tracking is automatic. Once tuned, the I.F. notch filter will track the offending heterodyne (? 10 kHz) if the VFO frequency is changed. Very low phase noise is achieved through a single crystal Direct Digital Synthesis system.

The keypad can be used for band selection or frequency input. The rear panel has three antenna inputs.

The serious CW operator will appreciate the full break-in, variable CW pitch, and built-in electronic keyer. Two separate VFOs are featured for split frequency operation.

Memory registers store most recent VFO frequency, mode, bandwidth and other important parameters for each band. Each of the 200 memories stores frequency,

mode, AGC and bandwidth. A built-in interface
facilitates computer control.

The heavy duty, built-in power supply insures reliable
and continuous use. The ergonomic layout, colored LCD
display and thoughtful placement of controls ensure
ease of operation.

For a complete technical review of this product please
see the September 1995 issue of QST magazine.

This unit works 100%, looks perfect, and is still in
its original box. With power cord, and paper work
including the original multicolor brochure for $1400.

NVA-88 M speaker

This speaker matches the JST-245 above, plus most of
the other Japan Radio rigs. It is a very good sounding
speaker. It looks great, with no scratches, and is in
its original box. $100

ST-3 Headphones

These are very nice, comfortable monophonic communications
headphones. They have a 1/4 inch mono plug on them.
They work fine and look great cosmetically - like new.
No box on these, however. $50

Buy all three of the above items for $1500.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1697. Multimode Dual Band Xcvr and other Yaesu Items FS

Yahoo group: hamstuff
Date: 2013-08-29 13:38:02 UTC
From: Ken Simpson, W8EK
Topic: 1697 Message: 1697

Yaesu Items For Sale:

Dual Band Multimode transceiver, Desk Microphone,
Power Cord, VX-7 Accessories, several Microphones,
2 m HT, HT accessories, and more

Yaesu FT-736 R, Dual Band, Multimode Transceiver:

The Yaesu FT-736R all mode transceiver incorporates up to four band modules covering the 50, 144, 220, 440 and 1200 MHz amateur bands. It is supplied with 2 meters and 440 at 25 watts output. This radio has conveniences such as IF shift, IF notch, keypad entry, noise blanker, all mode VOX and three-speed AGC. The memory system includes 100 general purpose memories, 10 full duplex cross-band memories and 1 call channel, all of which store mode and frequency.

Features:
All Mode
Keypad Entry
100 Memories
IF Notch
IF Shift
Dual Digital VFO's
Semi Break-in CW
All Mode VOX
Built-in Power Supply
10 Duplex Memories

This particular unit works 100% and looks like new. It includes the optional tone unit for subaudible tone encode and decode, and the 600 Hz CW filter. It is still in its original box, with paper work for $775.

Yaesu MD-1 Desk Microphone:

The MD-1 desk mic is a deluxe, high quality desk mic. It features an UP-DOWN tuning function (assuming a compatible Yaesu model radio). Impedance may be selected at either 500 or 50,000 ohms. Round 8 pin connector. It can be used with most any of the Yaesu (and also TenTec) rigs that use the round 8 pin connector.

This particular mic is still in its original box. Not a scratch on it. It has been removed from the box, and verified that everything works 100%.

With paper work, in its original box for only $115.

Yaesu E-736 DC Power cord
The box says for the FT-736, but I am sure it will work
with others as well, as it is the standard 6 pin molex
connector used by many different rigs.
This one is new, still in its original box. $22

Yaesu NC-72 B
This is the wall charger that is used with the VX-5 series
HTs (VX-6, VX-7, etc.), and also the FT-817, and probably
others. It is also used to power the CD-15 desk chargers.
This one is in its original box, apparently unused. $15

Yaesu VX-7 accessories:

VX-7 Nifty Mini Manual
A pocket reference to all of those commands that no one
remembers! For the VX-7. Spiral bound. $18

Programming cable
This cable has the threaded connector as used by the VX-7,
but it can also be used on the VX-6, 5, 3, etc. Uses USB port.
It works great with the free "Chirp" program. I have not
tried it with others. $18

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin c
ompatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $15.

Yaesu FT-209, 2 meter HT:

The Yaesu FT-209R operates on 2 meters from 144-148 MHz with 2.5 watts. The controls are easy to use. High/Low power and VOX on/off is selectable from the top panel of the radio. 19 soft rubber, dual-function keys provide flexible control. There is an analog meter and digital LCD display, along with 10 memories.

This particular radio is in need of repair, or it can be used for parts. It is dead. It does nothing when turned on. No display, no audio, nothing.

This is the HT only with no accessories for $10.

World Map:
The Radio Amateur's World Map by Yaesu
This wall map is approx 34 x 24 inches in size.
It includes the ham prefixes on the various countries.
It appears to never have been used. $8

Yaesu MH-15 DTMF Touch Tone Microphone:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons. Of course the PTT is on the side. This one has the round 6 pin connector. It works fine and looks close to new. $40

Yaesu YM-17 hand microphone:
The YM-17 is a hand microphone with up/down switches on the top corner. It has the round 6 pin connector. This one works fine and looks really great. $30

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back.
It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu HT Accessory Items:

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original Alinco EA0024 - 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC "Stubby", about 4 1/2 inches long

BNC Connector, about 7 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on
2 m, 220, or 450 MHz. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1699 Message: 1699

HF Antenna Tuner, Wattmeters, and HF Antenna
related items For Sale:

MFJ 984 Versa Tuner IV, 3000 watt Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle"
type, so it reads SWR at the same time it reads forward and
reflected power.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $60.

Balun / Antenna Center Insulators:

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use
it to hang a dipole or inverted V, or a U-bolt can be added
to attach it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

VanGorden HiQ Balun
The Van Gorden HI-Q balun is designed to handle full legal
power with a low standing wave radio (SWR). It includes a
hanger for a dipole. Some rust on screw eyes. $10

W2AU ANsulator
The Unadilla W2AU ANsulator? Antenna Center Insulator is handy
for many types of antennas. It features a top eye-bolt for
support (if needed). There are strong eye bolts and spade
lugs on either side for the antenna wire.
It looks to be new. $12

Hustler HF Mobile Antennas:

All work 100% and are in good condition.

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball)
..... NEW, still sealed in the package, $30

"Super" Hustler resonators (high power version):
75 meter RM-75 S, $35
40 meter RM-40 S, $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

Amphenol PL-259
Still sealed in the original package. These are the silver
plated, teflon insulation variety. $3

Amphenol UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59. Still sealed in the package. $1

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC male to UHF female $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1614 Message: 1700

Several Power Supplies For Sale
From high current to low current
and also DC Power Distribution Strip

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide lower current 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.
Absolutely pristine. It is in its original box, with paper work.
$199

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $140

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
There is one very small scratch that can be seen if the light
is just right, but is not normally visible.

With paper work for $60.

MFJ 1118 DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe multiple DC power outlet. It lets you power two HF and/or VHF transceivers and six or more accessories from your transceiver's main 13 V DC power supply. You get two pairs of super heavy duty 30 amp 5-way binding posts for powering your transceivers. Each pair is individually fused and RF bypassed, capable of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty, RF bypassed 5-way binding posts lets you power your accessories. They handle a total of 15 amps and are protected by a master fuse, have an ON/OFF power switch and an LED power indicator.

You get 6 feet super heavy eight gauge color-coded cable with ring tongue terminals, plus a built-in 0 - 25 VDC monitor meter.

This unit sells new for around $85 plus shipping. This one is like new. Buy it for only $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

Only $85.

10 amp, 13 V DC, Power Supply:

This is basically a generic 10 amp power supply made by Stabylex Electronics Corp., and is model 10 SR. It has automatic short circuit protection, and a very large heat sink.

Obviously a supply with a 10 amp rating is ideal for most 2 meter and dual band rigs.

This one works fine and looks great also. $35

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

Homebrew Power Supply:

This power supply is in a very nice gray and black enclosure
with binding posts for the output on the front, along with
a pilot bulb and power switch. The back panel has a fuse
and the regulator. It looks to be good for 12 V DC at
about 1.5 amps.

It works fine and looks really great. No scratches or
defects on the cabinet. $15

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new
switching type that create all sort of noise in your
receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used
on originally. It can be used either as a 9 Volt DC "power
pack" or as a charger. It has a 2.5 mm male plug on it, with
the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it, tip positive. $12

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

1702. MFJ Items FS

Yahoo group: hamstuff
Date: 2013-12-19 14:02:00 UTC
From: Ken Simpson, W8EK
Topic: 1543 Message: 1702

MFJ Items For Sale:

Dual Audio Filter, Antenna Tuner, Wattmeter/SWR
Bridge, DC Power Distribution Strip, Speaker Mic,
and Wall Wart

MFJ 752 Dual Audio Filter

The MFJ 752 is a dual tunable audio filter that permits
one to zero in on a single sideband and Morse code signal
and notch out interference at the same time. It can also
be used for AM mode shortwave listening. The primary filter
has tunable peak, notch, low pass and high pass. The
auxiliary filter has peak and notch. The filter is
automatically bypassed when the unit is off. Speaker and
phone jacks are provided.
It requires 9-15 VDC @300 ma.

Two of these units are available.

One is a plain 752. It works fine and looks good, but
not perfect. With paper work for $45.

The second is the 752 C. The C model has an LED that
lights when power is applied. There are other minor
cosmetic changes. This one works fine and looks very
close to perfect. With paper work for $65.

MFJ 949 C HF Antenna Tuner / Wattmeter / Dummy Load:

This HF antenna tuner is rated by MFJ to handle 300 Watts,
although I really feel the standard 100 Watt rig is pretty
much the limit. It has an SWR bridge built in, along with
a cross needle wattmeter that reads 300 W and 30 W full
scale. This means it will read forward power, reverse
power, and SWR simultaneously.

It also will handle two coax antennas, which can be used
direct, or thru the tuner. A balun is included, as is a
separate antenna switch position for use with open wire
line. It has an internal dummy load that MFJ rates at
300 Watts, but again, 100 W is the practical limit.
This one measure 51 ohms, so it could not be much more
accurate.

This particular unit works fine, and looks good. I can
only find a very small scratch on the bottom that is not

normally visible. With paper work for $90.

MFJ 815 B Cross Needle Peak Reading Wattmeter:

This Wattmeter is a cross needle meter that reads forward
and reverse power simultaneously, also displaying SWR.
It has 300/3000 Watt forward and 60/600 Watt reverse scales,
and is a peak or average reading meter that covers 160
thru 6 meters. It needs 13 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $60.

MFJ 1118 Heavy Duty DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe
multiple DC power outlet. It lets you power two HF
and/or VHF transceivers and six or more accessories
from your transceiver's main 13 V DC power supply.
You get two pairs of super heavy duty 30 amp 5-way
binding posts for powering your transceivers. Each
pair is individually fused and RF bypassed, capable
of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty,
RF bypassed 5-way binding posts lets you power your
accessories. They handle a total of 15 amps and are
protected by a master fuse, have an ON/OFF power
switch and an LED power indicator.

You get 6 feet of super heavy eight gauge color-coded
cable with ring tongue terminals, plus a built-in
0 - 25 VDC monitor meter.

This one is like new. Buy it for only $60 with paper work.

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin
compatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $10.

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new
switching type that create all sort of noise in your
receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used
on originally. It can be used either as a 9 Volt DC "power
pack" or as a charger. It has a 2.5 mm male plug on it, with
the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current, including the
MFJ 752 audio filters above. It has a 2.5 mm male plug
on it, tip positive. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1703. HF Antenna related items - Ant Tuner, Wattmeter, and much more FS

Yahoo group: hamstuff
Date: 2013-12-20 17:48:59 UTC
From: Ken Simpson, W8EK
Topic: 1703 Message: 1703

Antenna Tuner, Wattmeter, and other HF Antenna related
items For Sale:

MFJ 949 C HF Antenna Tuner / Wattmeter / Dummy Load:

This HF antenna tuner is rated by MFJ to handle 300 Watts,
although I really feel the standard 100 Watt rig is pretty
much the limit. It has an SWR bridge built in, along with
a cross needle wattmeter that reads 300 W and 30 W full
scale. This means it will read forward power, reverse
power, and SWR simultaneously.

It also will handle two coax antennas, which can be used
direct, or thru the tuner. A balun is included, as is a
separate antenna switch position for use with open wire
line. It has an internal dummy load that MFJ rates at
300 Watts, but again, 100 W is the practical limit.
This one measure 51 ohms, so it could not be much more
accurate.

This particular unit works fine, and looks good. I can
only find a very small scratch on the bottom that is not
normally visible. With paper work for $90.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

HF and VHF SWR Bridges:

All cover from 3 thru 150 MHz and have SO-239
connectors in and out.

Royce 2-100 SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. No scratches,
but it does have a previous owner's name on it.
In its original box with original instructions. $20

Heath AM-2 SWR Bridge
Matches the DX-40, although it can be used with any HF

or VHF transmitter. About 8 inches wide and 4.5 inches
high, with the meter in the middle, and a gray colored
knob at each side near the bottom.
This particular unit works fine and is in very good shape.
Paper work is included for $22.

"Window Line" 450 ohm transmission line:

This is similar to "open wire" transmission line,
but has some plastic insulation on it instead of
being open, so it is protected more. The openings
look like windows, hence the name.

I have two lengths available. Both are new, never used.
One is 50 feet long, and is $20.
The other is 100 feet long and is $35.

Copper Antenna Wire:

Both coils are new, unused, shiny.

Coil of 100 feet of #12 stranded copper wire $20

Coil of 50 feet of # 14 stranded copper wire $8

Balun / Antenna Center Insulators:

All baluns are 1:1 ratio, and handle full legal power.

Unadilla W2AU "Big Signal" Balun
Use this as a center insulator for a dipole, or on a beam.
Built in lightning arrestor.
This one is new, still in its original box, with paper work. $20

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use
it to hang a dipole or inverted V, or a U-bolt can be added
to attach it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

VanGorden "HiQ" Balun
The Van Gorden HI-Q balun is designed to handle full legal
power with a low standing wave radio (SWR). It includes a
hanger for a dipole. Some rust on screw eyes. $10

W2AU ANsulator
The Unadilla W2AU ANsulator? Antenna Center Insulator is handy
for many types of antennas. It features a top eye-bolt for
support (if needed). There are strong eye bolts and spade
lugs on either side for the antenna wire.
It looks to be new. $12

VanGorden "Hi Q" Antenna Center Insulator
No balun included in this one, but it is designed to act as the
center insulator for a dipole or inverted V antenna, similar to
the W2AU Ansulator above. This one appears to be unused. $12

B & W 591 Coax Switch:
This switch is designed to switch an auxiliary piece of
equipment in and out (For example, bypass a linear
amplifier, transverter, preamp, etc.). It is round and
has four SO-239 connectors coming out the back of it.
With paper work for $35.

Hustler HF Mobile Antennas:

All work 100% and are in good condition.

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball)
..... NEW, still sealed in the package, $30

"Super" Hustler resonators (high power version):
75 meter RM-75 S, $35
40 meter RM-40 S, $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

Amphenol UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Still sealed in the package. $1
No longer sealed in package. 50 cents

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC male to UHF female $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1704. VHF Items FS

Yahoo group: hamstuff
Date: 2014-01-08 16:47:29 UTC
From: Ken Simpson, W8EK
Topic: 1704 Message: 1704

VHF related Items For Sale:

Antenna Tuner for 6 and 2 meters, VX-7 Accessories,
several Microphones, Wattmeters/ SWR Bridges,
Communications Speakers, Antenna connectors and
adapters, and more

Antenna Tuner for 6 meters and 2 meters:

This Comaire LM-62 tuner is different than any I
have ever seen!

Although the tuner is for 6 meters and two meters,
each tuner is completely separate, with no common parts,
other than the enclosure it is in, which is a nice black
hammertone enclosure with an off white / tan front panel.

The tuner has the standard SO-239 connector for an input,
but has dual outputs on each band for both balanced line
or for coax. This is where it is different. The balanced
line output does not use a balun, but instead is link
coupled. This is something not seen much any more, and
certainly indicates its age.

This arrangement is duplicated with the 6 meter tuner
on the left, and the 2 meter tuner on the right.

There is no indication of power handling capability on
it, but I would guess a couple hundred watts.

This one works fine and looks very nice. $100

Yaesu VX-7 accessories:

VX-7 Nifty Mini Manual
A pocket reference to all of those commands that no one
remembers! For the VX-7. Spiral bound. $18

Programming cable
This cable has the threaded connector as used by the VX-7,
but it can also be used on the VX-6, 5, 3, etc.
Uses USB port.
It works great with the free "Chirp" program. I have not
tried it with others. I am fairly sure it is Yaesu and
not aftermarket. $18

DTMF Touch Tone Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons. Of course the PTT is on the side. This one presently has the round 6 pin connector, which can be changed of course.
It works fine and looks close to new. $40

CES 810 L DTMF Mic
One can manually dial a number, or automatically store it in the mic, and "speed dial". It has a 12 digit touch tone pad on the front. With 8 pin modular plug (like computer LAN).
It looks to be unused. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

Thrust Bearing Bracket for Alliance Rotors:

This is a thrust bracket used on most all of the Alliance brand antenna rotors except the HD-73. This includes the popular U-100, along with the C-225, U-98, U-110, and most any of the other rotors used for VHF and TV arrays. This bracket increases the capacity of the rotor considerably.

This particular thrust bracket is NEW, unused.
It includes the manual with installation instructions.

Only $25.

B & W 591 Coax "Transfer" Switch:

This switch is designed to switch an auxiliary piece of equipment in and out (For example, bypass a linear amplifier, transverter, preamp, etc.). It has four SO-239 connectors coming out the back.

It works fine and is in great shape.

With paper work for $35 plus.

HF and VHF SWR Bridges:

All cover from 3 thru 150 MHz and have SO-239 connectors in and out.

Royce 2-100 SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. No scratches, but it does have a previous owner's name on it.
In its original box with original instructions. $20

Heath AM-2 SWR Bridge
Matches the DX-40, although it can be used with any HF or VHF transmitter. About 8 inches wide and 4.5 inches high, with the meter in the middle, and a gray colored knob at each side near the bottom.
This particular unit works fine and is in very good shape. Paper work is included for $22.

Heath Wattmeter/SWR Bridge:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covers 50 to 160 MHz., with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out. This particular meter works great, looks great, and includes paper work for $45.

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. 3.5 mm (1/8 inch) mono plug. It is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $15

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise cancelling speaker. 10 Watt rating. Still in original box, new. $18

10 amp, 13 V DC, Power Supply:

The Stabylex Electronics Corp., model 10 SR power supply has automatic short circuit protection, and a very large heat sink.

A 10 amp rating is ideal for most 2 meter and dual band rigs.

This one works fine and looks great also. $35

Low Pass TVI Filter:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, and are 50 ohm filters.

Drake TV-5200-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts "average" below 30MHz, and about 200 W up to 52 MHz. It is the newer version of the TV-1000. $30

MFJ 1118 DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe multiple DC power outlet. It lets you power two HF and/or VHF transceivers and six or more accessories from your transceiver's main 13 V DC power supply. You get two pairs of super heavy duty 30 amp 5-way binding posts for powering your transceivers. Each pair is individually fused and RF bypassed, capable of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty, RF bypassed 5-way binding posts lets you power your accessories. They handle a total of 15 amps and are protected by a master fuse, have an ON/OFF power switch and an LED power indicator.

You get 6 feet super heavy eight gauge color-coded cable with ring tongue terminals, plus a built-in 0 - 25 V DC monitor meter.

This one is like new. Buy it for only $60.

"Window Line" 450 ohm transmission line:

This is similar to "open wire" transmission line, but has some plastic insulation on it instead of being open, so it is protected more. The openings look like windows, hence the name.

I have two lengths available. Both are new, never used.
One is 50 feet long, and is $20.
The other is 100 feet long and is $35.

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end. It is about 60 feet long.

The coax is labeled 50-2 V, which obviously means it is 50 ohm cable, but I don't know what the 2 V means. It appears to be slightly larger in diameter than RG-8 X, but not quite as large as RG-8.

This piece is in good condition, with heat shrink around the connector for strain relief. $35

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58. 50 cents each

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Still sealed in the package. $1
Out of package, 50 cents.

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1705. Several Scanners FS

Yahoo group: hamstuff
Date: 2014-01-17 18:44:14 UTC
From: Ken Simpson, W8EK
Topic: 1705 Message: 1705

Several Scanners For Sale:

Realistic Pro-2023 Direct Entry Scanner:

The Pro-2023 is also called Model number 20-128.
It is a 20 channel scanner covering UHF, VHF Hi &
Lo and Air Bands.

Features & Specifications:
20 Programmable Channels With Memory Backup
Channel One Priority
Antenna and 3.5mm Earphone Jacks
Scan Delay Lets Your Hear The Return Calls
Automatic Weather Search
Telescoping Antenna
Search Function Finds New Unlisted Frequencies
Backlit LCD Display

Frequencies Automatically Scanned For Active Channels
29-29.7 MHz 10 Meter Ham Band
29.7-50 MHz VHF Lo Band
50-54 MHZ 6 Meter Ham Band
108-136 MHz Aircraft Band
136-144 MHz VHF Government Band
144-148 MHz 2 Meter Ham Band
148-174 VHF Hi-Band
406-420 MHz UHF Government Band
420-450 MHz 70cm Ham Band
450- 470 MHZ UHF-Lo Band
470-512 MHz UHF-T Hi Band

This one works fine and looks fine. It is in its original
box, complete with antenna and paper work for $35.

Regency Touch K100 Scanner:

The Regency Touch K100 is a programmable scanner that
covers the low VHF, Hi VHF, and UHF frequencies. Of
course this means it covers weather frequencies. It
has battery back up of the programmed frequencies and
also will do searches.

Frequencies covered include
30 - 50 MHz
144-148 MHz
148-174 MHz
440-450 MHz

450-470 MHz
470-512 MHz

More info can be found at
http://radiopics.com/Regency/Regency_Touch%20K100.htm

This one works fine and looks fine.

With telescoping antenna, power cord, and paper work
for $25.

Bearcat BC-560 XLT / PRO-2025 Scanner:

The Uniden Bearcat BC-560XLT 16 channel scanner (also known as
PRO-2025) covers VHF Low Band, VHF High Band and UHF. It has a
priority channel and channel lockout, plus weather search for
instant access to your local NOAA weather station.
Programming is easy. Just key in the desired frequency. You
can press the Review button to check each channel.

External jacks include: external antenna, external speaker
and 12 VDC power.
5.5 x 1.75 x 7 inches.

It covers
29-29.7 Amateur Band 10 Meters
29.7-50 VHF Low
50-54 Ham Band 6 Meters
136-144 Federal Government
144-148 Amateur Band 2 Meters
148-174 VHF High Band
406-420 Federal Government
420-450 Amateur Band 70 Cm
450-470 UHF Band
470-512 UHF "T" Band

This one works fine.
With paper work and power cord for $25.

Realistic PRO-56 Scanner:

The PRO-56 covers from 144 to 174 MHz and also 430
to 512 MHz. It is a small scanner with 8 channels,
and is powered by a 9 volt battery, or battery eliminator.

This one works fine and looks fine as well.

It includes a telescoping antenna for $15.

Regency Scanner:

I can not find a model number on this scanner.
It is a 10 channel, crystal control scanner,
for lo VHF, hi VHF, and UHF. There are jumpers

inside to select any of these three ranges.
There are no crystals installed. The audio
output is fine. The squelch is always open,
probably due to no crystals in it. It might
work fine, and it might not. Assume it does
not work and is for parts only. You may have
a pleasant surprise.

It runs off of 13 V DC. Power cord is included
for $5.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1706. FS: YAESU Amp Control Cable

Yahoo group: hamstuff
Date: 2014-01-23 12:33:34 UTC
From: Bry Carling
Topic: 1706 Message: 1706

For Sale: Yaesu Linear Amplifier Control Cable

Cable to key a linear amplifier with your Yaesu FT450, FT450D or FT950 Transceivers etc.

Control any linear amplifier such as SB200, FL2100B, Ameritron AL80B, AL811 etc. to the best of their capability with this dual control cable.

This is the better cable with both the PTT line AND the ALC signal. It is clearly labeled and
plugs right into the small, round 10-pin DIN connector This is unused - brand new.
These sell for $25.00 or more on eBay. Will sell for $16.00 plus shipping.

1707. FS: Transformers

Yahoo group: hamstuff
Date: 2014-01-24 13:38:56 UTC
From: Bry Carling
Topic: 1707 Message: 1707

FOR SALE: Transformers

1) HEATHKIT PLATE TRANSFORMER for DX100 Transmitter. Tested and in excellent condition.
$50.00 plus shipping

2) Heathkit DX100 Audio Driver Transformer - Tested and in Excellent condition.
$25.00 plus shipping

3) Isolation Transformer - 1000 watts - 120V to 120V housed in excellent cabinet with 20 Amp breaker switch and cables.
$45.00 plus shipping

4) 50V at 25 Amps power transformer with dual 120V or 240V AC primary - Like new.
$25.00 plus shipping.

5) Power Supply - 65V DC at 15 Amps and it also includes separate +15V DC and -15V DC supplies built in, and also +5V DC. Requires 120V AC at 10 A. Like new. Available for $25.00 plus shipping.

Contact me off list for details, photos etc.

1708. HF Antenna related items FS

Yahoo group: hamstuff
Date: 2014-01-25 18:20:32 UTC
From: Ken Simpson, W8EK
Topic: 1388 Message: 1708

HF Antenna related Items For Sale:

HF and VHF SWR Bridge:

Royce 2-100 SWR Bridge / Field Strength Meter

Covers from 3 thru 150 MHz, so it includes HF, 6 meters,
and 2 meters. It has SO-239 connectors in and out, and
will take full legal power.

This one works fine, and looks extremely nice. No scratches,
but it does have a previous owner's name on it.

It is in its original box with original instructions. $20

"Window Line" 450 ohm transmission line:

This is similar to "open wire" transmission line,
but has some plastic insulation on it instead of
being open, so it is protected more. The openings
look like windows, hence the name.

I have two lengths available. Both are new, never used.
One is 50 feet long, and is $20.
The other is 100 feet long and is $35.

HyGain BN-86 Balun:

This is a 1 to 1 HF balun, rated to handle full legal power.

Use it to hang a dipole, or add a U-bolt for an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

B & W 591 Coax Switch:
This switch is designed to switch an auxiliary piece of
equipment in and out (For example, bypass a linear
amplifier, transverter, preamp, etc.). It is round and
has four SO-239 connectors coming out the back of it.
With paper work for $35.

Hustler HF Mobile Antennas:

All work 100% and are in good condition.

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball)
..... NEW, still sealed in the package, $30

"Super" Hustler resonators (high power version):
40 meter RM-40 S, $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58. 50 cents each

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Still sealed in the package. $1
No longer sealed in package, 50 cents

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1709. FS: Original FT243 Crystals

Yahoo group: hamstuff
Date: 2014-02-20 13:06:05 UTC
From: Bry Carling
Topic: 1479 Message: 1709

FOR SALE:

Early non-modified 160m, 80m, 40m and 20m FT243 crystals. Build something!
These are original, WW2-era thru 1960s crystals, with the full size quartz element inside.
Great for Boatanchor SSB CW on the old tube rigs, or reliving the novice days.
Also great for running AM with rock solid crystal control. Most are available (while they last)
for $10.00 to 19.00 plus shipping.

Updated list now available for purchase on-line. Comeplete list of available frequencies at:

http://www.af4k.com/FT243_CRYSTALS_Originals.htm

73 & thanks for looking -

1711. Power Supplies and related items FS

Yahoo group: hamstuff
Date: 2014-03-11 19:50:46 UTC
From: Ken Simpson, W8EK
Topic: 1711 Message: 1711

Power Supplies and Related Items For Sale:

Arranged from highest current to lower current.

MFJ 1118 Heavy Duty DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe
multiple DC power outlet. It lets you power two HF
and/or VHF transceivers and six or more accessories
from your transceiver's main 13 V DC power supply.
You get two pairs of super heavy duty 30 amp 5-way
binding posts for powering your transceivers. Each
pair is individually fused and RF bypassed, capable
of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty,
RF bypassed 5-way binding posts lets you power your
accessories. They handle a total of 15 amps and are
protected by a master fuse, have an ON/OFF power
switch and an LED power indicator.

You get 6 feet of super heavy eight gauge color-coded
cable with ring tongue terminals, plus a built-in
0 - 25 VDC monitor meter.

This one is like new. With paper work for only $60.

Astron RM-50 M
This supply have a separate voltmeter and ammeter, and is
rated for 50 amps ICAS, or 35 amps continuous. It is a
real brute! It works 100% and looks close to new. With
paper work for $175. Pickup near Ocala FL is preferred.

Alinco DM-330MV
This Alinco Switching Mode DC Regulated Power Supply is rated
at 30 amps continuous and 32 amps intermittent. It has a
meter (both ammeter and voltmeter), and also a cigarette
lighter socket.
This one works fine, and looks like new. It is still in its
original box. $125

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243

remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $140

Clegg PS-20 A / Astron RS-20 A
This supply has an Astron name on it, but also has a Clegg
name added. It is rated 20 amps ICAS, and 16 amps continuous.
It works 100%. Cosmetically, it looks nice, but has a very
few droplets of "overspray" where a previous owner had it
too close to where he was spraying bronze colored paint.
With paper work for $65.

GSC 20 R, 20 amp supply
Although this supply is rated at 20 amps, it is not quite
as heavy duty as the Astron/Clegg 20 amp supply. A more
realistic rating would be 15 or 16 amps. This one works
fine, and looks fine, except for scratches on the bottom.
Made in USA. $50

10 amp, 13 V DC, Power Supply:

This is a basic 10 amp power supply made by
Stabylex Electronics Corp., and is model 10 SR.
It has automatic short circuit protection, and a
very large heat sink.

Obviously a supply with a 10 amp rating is ideal
for most 2 meter and dual band rigs.

This one works fine and looks great also. $35

TenTec Model 937 power supply
This supply is rated at 11 amps ICAS, and 7 amps continuous.
It is normally used the the "Scout" 555 HF transceiver,
although it certainly can be used with other rigs, including
VHF/UHF rigs.
This one works fine and looks close to new. It is still in
its original box, with paper work for $75.

Vintage Icom IC-3PA Power Supply / Speaker:

The Icom IC-3 PA was originally designed to be used
with Icom's 10 watt 2 meter rigs, such as the IC-22,
IC-230, IC-22 S, etc. It produces 13 V DC at 3 amps,
and shuts down at 4.5 amps.

In addition to being a power supply, it also has a front
facing speaker in the enclosure. It is designed so that

the 2 meter rig sets on top of the power supply. It has
four lights for power, normal, warning, and over current.

This particular unit is in extremely nice condition.
The normal and power lights work. I don't know about
"warning" and "Over current", but I expect that they
do. I do not find any scratches on it.

With the paper work for $40.

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

Homebrew Power Supply:

This power supply is in a very nice gray and black enclosure
with binding posts for the output on the front, along with
a pilot bulb and power switch. The back panel has a fuse
and the regulator. It looks to be good for 13 V DC at
about 1.5 amps.

It works fine and looks really great. No scratches or
defects on the cabinet. $15

Bench Type Power Supply:

This power supply is completely adjustable
with a multiturn pot, up to about 20 Volts DC.
It appears to be good for about 3/4 of an amp.
The analog meter reads 0 to 15 Volts DC or
0 to 30 V, switch selected.

It is housed in a very nice eggshell and wood
grain cabinet. Of course it works fine. $20

"Wall Wart" Power Supplies For Sale:

All of these are "regular" wall warts - not the new
switching type that create all sort of noise in your
receiver. Use one of these, and leave the noise behind.

Many uses for the 12 volt variety!
Both have 2.1 mm coaxial connectors with center positive.
12 V DC at 625 ma $14
12 V DC at 500 ma $12

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it, tip positive. $12

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.
Only $85.

Large 150 Volt AC Weston Analog Meter:

Weston Model 1934, 150 Volt AC meter
This meter is a nice large 3.5 inch modern meter.
The AC scale is expanded, so that 120 volts is
easier to read. This meter is new, never used,
still in its original box, complete with hardware.
$35

Weston Model 1931, 150 Volt DC Meter
This meter is similar to the one above, except
it is for DC instead of AC.
It is also new, in its original box, with hardware.
$20

Surge Stations and Noise Filters:

APC "Pro 7" Noise Filter and Surge Suppressor:

This unit has 7 outlets, with a 6 foot cord, and provides
surge suppressor for your equipment. It also provides
noise filtering / EMI / RFI suppression of 60 db. There
is $75,000 worth of insurance included. It comes with a
lifetime warranty, and I think this is APC's "Top of the
line" unit.

Detailed specs can be found at
http://www.apc.com/products/resource/include/techspec_index.cfm?base_sku=PRO7

This one appears to be new, unused, in its original box.
Only $18.

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $15

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1712. Coax switches and connectors FS

Yahoo group: hamstuff
Date: 2014-03-14 20:11:47 UTC
From: Ken Simpson, W8EK
Topic: 1712 Message: 1712

B & W Coax Switches, Coax Cable, and many
coax connectors and adapters For Sale:

Two position "Strip Line" Coax Switches:

These switches utilize professionally engineered all
metal cavity construction for maximum efficiency and
high isolation. Isolation is typically better than
50 dB at 300 MHz with insertion loss less than 0.2 dB.
All are two position and use SO-239 connectors, are
50 ohm impedance, are typically rated for 2.5 KW PEP,
and good to 600 MHz.

All work fine and look extremely nice.

Diawa CS-201 - $22

Opek CX-201 - $22

MFJ 1702 B
With Center position that grounds both antennas. $18

MFJ 1702 C
As 1702 B, but with added lightning protection. $25

B & W Coaxial Antenna Switches:

All have SO-239 connectors, and will handle full legal power.

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel.
This one works fine and looks fine as well. $40

B & W 592 two position coax switch
This switch has the coax coming out the back, and it does
NOT ground the unused antenna.
This one is in nice electrical and mechanical shape. $30

B & W CS-3 G three position coax switch
This switch DOES ground all of the unused positions.
It has the coax coming out the rear of a rectangular box.
It works and looks fine. $40

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end.
It is about 60 feet long.

The coax is labeled 50-2 V, which is slightly
larger in diameter than RG-8 X, but not quite
as large as RG-8.

This piece is in extremely good condition, with heat
shrink around the connectors for strain relief. $35

MFJ 260 "Dry" Dummy Load:

The MFJ 260 Dummy load is rated to handle up to 300 Watts
for 30 seconds, or 100 watts for just over a minute. It
is rated to be good up to 650 MHz.(SWR: 1.1:1 to 30 MHz,
1.5:1 30-650 MHz)
SO-239 input connector accepts a PL-259. 2? x 2? x 7 inches

This one works fine. It measures 55 ohms, so it is an extremely
good match for a 52 ohm load. Of course it looks fine as well.

With paper work for $25.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

I just got an assortment of "N Connectors" in.
Please let me know what you need.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package $1

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2

crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1713. VHF and related items FS

Yahoo group: hamstuff
Date: 2014-03-19 12:24:47 UTC
From: Ken Simpson, W8EK
Topic: 1713 Message: 1713

Wanted: Icom BP-90 "Empty" Battery Case

I am looking for an Icom BP-90 battery case.
This takes six AA cells, and is used on a variety
of Icom HTs, including the IC- 2SAT, 3SAT, 24AT,
W2/A, 2SRA, 4SRA, R1, and others.

Do you have one in good usable condition?

VHF related Items For Sale:

Yaesu VX-5 tri band HT, "Strip
line" constant Z coax switches, several Microphones,
Wattmeters, Communications Speakers, Chargers and
power supplies, VX-7 "Nifty Manual", Scanners,
Antenna connectors and adapters, and much more

Yaesu VX-5 R S tri-band HT:

The VX-5 will cover the 6m, 2m, and 440 MHz ham bands,
with receive almost from DC to light. Actually receive
starts at the AM broadcast band, and goes to about 1000
MHz, so that means it includes all of the public service
bands, weather, commercial FM, and much more.

It provides 5 watts out on 6M and 2M and 4.5 watts on 440 MHz,
at three power levels.

Features include 16 digit 9 memory DTMF autodialer, CTCSS/DCS,
220 memories, aluminum die-cast case and 8 character alphanumeric
display. It is a compact 2.3 x 3.4 x 1.1 inches.

This is the silver "R S" version of the VX-5.

To say that this is better quality and has more features than the
Chinese HTs would be an understatement!

This particular unit works 100%, and is in very nice condition.
It includes charger, a good Lithium Ion battery, rubber duck with
the 6 meter extension, and paper work for $145.

Two position "Strip Line" Coax Switches:

These switches utilize professionally engineered all
metal cavity construction for maximum efficiency and
high isolation. Isolation is typically better than
50 dB at 300 MHz with insertion loss less than 0.2 dB.
All are two position and use SO-239 connectors, are

50 ohm impedance, are typically rated for 2.5 KW PEP,
and good to 600 MHz.

All work fine and look extremely nice.

Diawa CS-201 - $22

Opek CX-201 - $22

MFJ 1702 B
With Center position that grounds both antennas. $18

MFJ 1702 C
As 1702 B, but with added lightning protection. $25

DTMF Touch Tone Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit
DTMF Touch Tone Pad on the back, along with a lock/unlock
switch. The top has up/down buttons. Of course the PTT
is on the side. This one presently has the round 6 pin
connector, which can be changed of course.
It works fine and looks close to new. $40

CES 810 L DTMF Mic
One can manually dial a number, or automatically store it in
the mic, and "speed dial". It has a 12 digit touch tone pad
on the front. With 8 pin modular plug (like computer LAN).
It looks to be unused. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

VHF Wattmeters:

Drake WV-4 Watt Meter
This wattmeter covers from 20-200 MHZ, up to 1000 watts
input continuous. Full scale readings of 100 W and 1000 W.
It has the type N input and output connectors, although
adapters are available, if you want.
This one works fine and looks like new. No scratches.
With paper work for $80.

Adapters from Type N connector to PL-259. $8 each

Heath Wattmeter/SWR Bridge:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covers
50 to 160 MHz., with 250 and 25 watt scales. It can
also be used to check SWR, and has a remote sensor
that can either be left inside the meter, or separated

from the actual meter. SO-239 connectors in and out.
This particular meter works great, looks great, and
includes paper work for $45.

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise
cancelling speaker. 10 Watt rating. Still in original
box, new. $18

10 amp, 13 V DC, Power Supply:

The Stabylex Electronics Corp., model 10 SR
power supply has automatic short circuit protection,
and a very large heat sink.

A 10 amp rating is ideal for most 2 meter and
dual band rigs.

This one works fine and looks great also. $35

Low Pass TVI Filter:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are
50 ohm filters.

Drake TV-5200-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 Watts "average" below
30MHz, and about 200 W up to 52 MHz. It is the newer version
of the TV-1000. $30

VX-7 Nifty Mini Manual
A pocket reference to all of those commands that no one
remembers! For the VX-7. Spiral bound. $18

Scanners:

Regency Touch K100 Scanner:

The Regency Touch K100 is a programmable scanner that covers the low VHF, Hi VHF, and UHF frequencies. Of course this means it covers weather frequencies. It has battery back up of the programmed frequencies and also will do searches.

Frequencies covered include
30 - 50 MHz
144-148 MHz
148-174 MHz
440-450 MHz
450-470 MHz
470-512 MHz

More info can be found at
http://radiopics.com/Regency/Regency_Touch%20K100.htm

This one works fine and looks fine.

With telescoping antenna, power cord, and paper work for $25.

Uniden Bearcat BC-50 XL Scanner:

The BC-50 is a handheld programmable scanner that covers the low VHF, high VHF and UHF bands. It can run off of five AA cells, or external 7.5 volts DC. It has a BNC antenna connector.

Frequency coverage:
66 - 88 MHz
136-174 MHz
406-512 MHz

More info at
http://www.rigpix.com/bearcat/bc50xl.htm

This one works fine with an external speaker, but not with the internal speaker. This could just be dirty connections, as the SK who had it stored it in his garage. It could stand some cleaning, but it does work.

With paper work for $10.
If you desire a rubber duck antenna with it, add $10.

Realistic PRO-56 Scanner:

The PRO-56 covers from 144 to 174 MHz and also 430 to 512 MHz. It is a small scanner with 8 channels, and is powered by a 9 volt battery, or battery eliminator.

This one works fine and looks fine as well.

It includes a telescoping antenna for $15.

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end.
It is about 60 feet long.

The coax is labeled 50-2 V. It is slightly larger
in diameter than RG-8 X, but not quite as large
as RG-8.

This piece is in good condition, with heat shrink
around the connector for strain relief. $35

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

I have quite a few different variety of "N" connectors.
Please send your request.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58. 50 cents each

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package. $1

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, and many miscellaneous accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1714. FS: Set of 4 Military Radio shock mounts

Yahoo group: hamstuff
Date: 2014-04-09 12:27:35 UTC
From: bcarling@...
Topic: 1714 Message: 1714

FOR SALE: Set of 4 Military Radio shock mounts (new)

Made by Barry Electronics of New York.

These sturdy metal mounts measure about 2.5" square by 1" tall and have a threaded mount in the top for #10 screws. Base mount is via four mounting holes suited for #8 screws. Picture available...

They are brand new and unused and in good condition.

Will sell the set for $36.00 plus shipping

Contact me off the list if interested.

73 - Brian, AF4K
Brian Carling, Radio AF4K

1715. FS: TEN-TEC 238 Antenna Tuner

Yahoo group: hamstuff
Date: 2014-04-24 11:33:55 UTC
From: bcarling@...
Topic: 1715 Message: 1715

FOR SALE: Tentec 238 antenna tuner. 2000 watt rated.

This excellent condition 2000 W tuner was designed to match the Omni five and Omni six transceivers but looks good with any Tentec equipment.

Excellent working condition. Looks good inside and outside. Comes with the original manual. Pictures available on request.

If you're interested, name a reasonable price that we can both agree on.

Best regards - Bry Carling, AF4K
Sanford, FL

Brian Carling, Radio AF4K

1716. Wattmeters, Coax Switches and Connectors FS

Wattmeters, Digital Rotor Control Box, Coaxial Antenna
Switches, and Coax Connectors For Sale:

Bird 43 Watt Meter:

The Bird 43 is an insertion type RF watt meter, designed
to measure RF power and load match in 50 ohm coaxial
transmission lines. It is intended for use with CW, AM,
FM, and TV modulation. It measures power from 100 mw
to 10KW, depending on the element used. The meter provides
direct readings in watts with an expanded scale for easy
reading. The scale is graduated for 25, 50, and 100 full
scale. Elements are available in a variety of power, and
frequency ranges.

This particular meter is model 4300.21 manufactured in
March 1957, so it is the older, well constructed model.
It has "N" connectors, with the leather handle, which
is in good shape.

The meter works well. $175

50 H Element for Bird Wattmeter
This measures 50 watts full scale over the HF spectrum
from 2 to 30 MHz. $65

Buy both of the above together for $225.

VHF Wattmeters:

The first two of these have sensors that may be separated
from the meter.

Drake WV-4 Watt Meter
This wattmeter covers from 20-200 MHz, and has full
scale readings of 100 W and 1000 W.
It has type N connectors in and out.
This one works fine and looks like new. No scratches.
With paper work for $80.

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 covers 50 to 160 MHz, with 250 and 25 watt
scales. It can be used to check SWR. SO-239 connectors
in and out.
This particular meter works great, looks great, and
includes paper work for $45.

MJF 812 B VHF Wattmeter SWR Bridge:
The MFJ-812 B measures forward / reflected power and
SWR. The wattmeter measures power on two scales, 30 Watts
and 300 Watts. It is designed for 2 meters and 220 MHz,
but can be used down to 21 MHz. It includes a field strength
meter.
It works fine and looks fine. With paper work for $25.

HyGain DCU-1 Deluxe Digital Rotor Control Box:

The innovative DCU-1 Pathfinder Digital Rotor control unit
gives you automatic operation of your brake and rotor. It
has computer control with RS-232 pass through and is compatible
with many logging and contest programs as well. It has 6 presets
for your favorite beam settings, 1 degree heading accuracy,
automatic 8-second brake delay, and 360 degree choice for
center of rotation. It operates at 110V.

The DCU-1 digital rotor control unit is compatible with the
T-2X, HAM-IV, and HAM-V families of rotators.

This unit works fine and looks fine as well.
Paper work is included for $450.

Coaxial Antenna Switches:

All work fine, look fine, and use SO-239 connectors.

B & W Model 550 A Coax Switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. Coax comes out the side, like
spokes of a wheel.
It will handle the full legal limit. $35

SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box.
Connectors on the back. In original box. May be new. $25

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz
with low insertion loss less.
All are two position and are typically rated for 2500 W PEP,
and good to 600 MHz.

Diawa CS-201 - $22
Opek CX-201 - $22
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package $1

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1717. Kenwood and related items FS

Yahoo group: hamstuff
Date: 2014-08-23 12:59:55 UTC
From: Ken Simpson, W8EK
Topic: 1678 Message: 1717

Kenwood and related Items For Sale:

Two meter muti-mode transceiver, 2 meter mobile rig, Dual Band HT, Microphones, High Power Antenna Tuner, Original Boxes, Coaxial Antenna Switches, HT Accessories, Noise Filter, Original Manuals, and more

Kenwood TS-711, multimode 2 meter transceiver:

This unit is an FM, SSB, and CW transceiver for 2 meters. It has 40 memory channels, and up to 25 Watts of output power, which is continuously variable (no Hi or Low switch, but a front panel control to continuously vary power). Of course it will scan, and do the things one expects in a 2 meter rig. It has a GASFET in the front end for one of the best receivers I have ever used. The 120 V AC power supply as well as 13 V DC, is built in. The case looks very similar to a TS-440 or TS-450 HF rig.

This particular unit is very nice. I do not find any scratches, but it does show slight use. It has the optional TU-5 subaudible tone PL encoder in it, so it can be used with modern repeaters. Power cord and mic are included, with paper work for $425.

Kenwood TM-G 707 A Dual Band Transceiver:

The TM-G 707 has an extra-large control panel with the welcoming glow of its amber-colored LCD. This mobile transceiver provides 50 watts on 2 meters and 35 watts on 440 MHz. The TM-G 707 offers features such as memory name function, tone encode/decode, dimmer, and auto power-off. Non-simultaneous cross-band repeat is supported.

Receive coverage is 118-174 and 410-524 MHz.
Transmit range is 144-148 and 430-450 MHz.
It requires 13.8 VDC at 11 amps.

Features include:
180 Alpha Memories
Big Display
Guide Function
Auto Repeater Offset
Dimmer
Time Out Timer
Visual Scan
Priority Scan
DTSS Selective Call

PL Decode/Encode
Packet 1200/9600 DIN plug
Hi/Med/Lo RF Out

This particular unit is still in its original box. It functions 100%, and looks the same. As best I can tell, even all of the little packages of screws, fuses, etc. are included. $250

Kenwood TH-78 A Dual Band HT:

The Kenwood TH-78A is a sophisticated dual-band HT. It has built in tone and paging functions, alphanumeric memory and message paging. Additionally it has dual-frequency receive capability (including VHF+VHF and UHF+UHF). There are 50 memory channels. The operator can choose from 8 different scan types. DTSS allows DTMF access to the transceiver.

The receive range is 118-173.995 and 438-449.995 MHz.
It has three RF output levels of about 5.0/0.5/0.02 watts.

Features include:
Two Line LCD Display
50 Memories
Alphanumeric Memory
Message Paging
Cross Band Operation
Backlit Keypad
Multi Scan Function

This one works fine, and looks fine. It includes the HT, rubber duck antenna, wall charger, and paper work.
A PB-13 standard battery is included, that holds its charge fine. Also included are two PB-17 heavy duty packs that are in bad condition. $135

Kenwood MC-60 A Deluxe Desk Microphone:

The Kenwood MC-60A has been a popular desk mic among Kenwood owners for many years. It has a communication type dynamic unidirectional moving coil type mic element and features UP-DOWN tuning (on compatible Kenwood transceivers) plus a built-in pre-amp. There is a switch for PTT (push to talk) and also a lock feature. The mic impedance may be set for 50K ohms or 500 ohms. The frequency response is 150 Hz to 10 kHz (-6dB) with the Preamp off and 200 Hz to 7 kHz (-6 dB) with the Preamp on.

The heavy zinc die-cast base provides extra stability. The mic terminates to a standard 8 pin mic plug. The preamp requires two AA cells which are mounted through the bottom of the base. Please note that the earlier MC-60 (non-"A")

version featured a 4 pin mic plug and did not have UP-DOWN tuning.

This one works 100% and looks very close to new.

With paper work for $100.

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and others, including Alinco and ADI. It says "Electret Condenser Mic" on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more features. It has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer, and never used. $30

Dentron Super Super Tuner High Power Antenna Tuner:

Dentron made a very heavy duty antenna tuner. It covers from 160 meters thru 10 meters continuously, including the WARC bands, and includes a balun that is also very heavy duty. This is one of the most rugged tuners available.

The super super tuner is rated at 3000 Watts and a real brute. I don't think there is a heavier one made! Unless you are running far more than legal power, you do not need to worry about this one!

This one works fine and looks extremely nice. At first glance, it looks like new, but there are a couple of very light scratches that can be seen if the light is just right. With paper work for $225.

Original Boxes for Kenwood VHF / UHF Rigs:

The following original boxes for Kenwood equipment are available. They are all in very nice condition, and include the molded styrofoam inserts to protect the rig, plus the box itself.

Kenwood TM-221 two meter transceiver $5

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

Special Kenwood "Tone Plugs":

Many years ago, Kenwood used a special plug to go into the back
of many of their radios. If my memory is correct, these rigs
included some TR-2200 models, TR-7400, TR-9000, and some others.

This plug is about 1/4 inch in diameter, and has four small pins
arranged in the shape of a Y. It was used to provide an audio
input for things such as a touch tone DTMF pad or other audio,
plus provide voltage to operate the external device, PTT and
ground.

Recently these plugs have been "Unobtanium". I have found two
from a silent key stash. These are new, still in the plastic
bag. They are $10 each.

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
an SO-239 on the other end, to accept a PL-259. $5

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $8

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz
with low insertion loss less.
All are two position and are typically rated for 2500 W PEP,
and good to 600 MHz.

Diawa CS-201 - $22
Opek CX-201 - $22
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

APC "Pro 7" Noise Filter and Surge Suppressor:

This unit has 7 outlets, with a 6 foot cord, and provides
surge suppressor for your equipment. It also provides
noise filtering / EMI / RFI suppression of 60 db. There
is $75,000 worth of insurance included. It comes with a
lifetime warranty, and I think this is APC's "Top of the
line" unit.

Detailed specs can be found at
http://www.apc.com/products/resource/include/techspec_index.cfm?base_sku=PRO7

This one appears to be new, unused, in its original box. $18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are Operating manuals unless otherwise specified.
All are original manuals only.

SPECIAL:
Buy two, three, or four of my books/manuals, and take 10% off.
Buy five or more and take 20% off.

TH-21 HT for 2 m, $8
TH-215/315/415 HT for 2 m, 220 MHz, or 440 MHz, $10
TH-225, 2 m HT, $12
TH-235, 2 m HT, $15
TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz, $12
TM-221/421 2 m or 440 MHz mobile, $12
TM-261/461 2m or 440 MHz mobile, $12
TM-2570/2550/2530 2 m mobile, $15
TR-2400, 2 m HT, $12
Service manual for TR-2600, 2 m HT, $12
TR-9000, 2 m multimode, $12
TS-120 S/V, HF xcvr, $20
TW-4000 dual bander mobile, $15
Service manual for TW-4000 dual bander $20
TW-4100 dual band mobile, $15

BC-5 DC to DC quick charger $2
LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $4
MS-1 mobile stand $3
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PB-24 battery pack for TR-2400 $2
PB-25 H battery pack for TR-2500 $2
PS-6 power supply $5
PS-30 power supply $4
SMC-24 speaker mic $3
SMC-25 speaker mic $3
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

Versión en español de Kenwood TM G-707 manual de Venta:

Versión en español del Manual de Operación
para el Kenwood TM G-707 transmisor-receptor de banda dual

Este es el manual de instrucciones original, en español.
Parece que es bastante extensa y detallada.
Es básicamente nuevo, sólo se abre para observar que
es sólo en español. Es original de Kenwood.

$ 8 más gastos de envío de la Florida.

Spanish Version of Kenwood TM G-707 manual:

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver

This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $8

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Cable / Adapter, Speaker Microphones, Communications Speakers,
Manuals, and other Miscellaneous Items

Accessories that fit the Icom A6, A24, V8, V82, U82, and
other Icom HTs:

Batteries America CBE-20 Battery eliminator
Goes on HT; plugs into cigarette lighter to power HT.
Appears new, unused. $18

Icom BP-210 Battery, 7.2 V, 1650 mahr
Heavy duty, high capacity NiMH battery.
Looks like new; holds charge well. $30

Icom BP-222 Battery, 7.2 V, 600 mahr
Light duty, light weight NiMH battery.
Looks like new; holds charge well. $15

Icom BC-146 Desk charger
Use with BP-209, BP-210, and BP-222 battery packs.
Appears to be new. Includes the "spacer". $15

Icom BC-147 A, Wall charger
Can be used to charge the HT direct, or to power
the BC-146 desk charger (above).
In original box. $15

Icom MB-86 Belt clip
Connects to the BP-208, 209, 210, and 222 battery packs.
New condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Accessories for Icom IC-2A, 3A, 4A, 02 A, etc. series of HTs:

Icom BC-30 desk charger
This charger will fast charge many different battery packs used
on the Icom IC-2 AT, IC-02 AT, and other HTs of this series. This
includes the BP-2, BP-3, BP-4, BP-5, etc. With paper work for $30.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery
pack. If 13 V DC is applied, it converts the voltage to
the proper voltage for the HT. This one works fine, and
looks fine. With paper work for $12.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items needing the 2.1 mm coaxial power plug. The opposite end has a cigarette lighter plug on it. $10

Belt Clip for the above HTs.
Complete with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A, 03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-3 Battery pack
This was the "standard" battery that came with many of these HTs. It can be charged with a BC-25 U wall charger, or the BC-30 or BC-35 desk chargers, or with 12 V DC.
This one appears to hold a charge OK. $10

Icom BP-5 Heavy duty battery pack
This battery has several times the capacity of the BP-3, and slightly higher voltage for more power output.
It must be charged by a desk charger (BC-30 or BC-35).
Good condition. $15

W & W aftermarket BP-8 Heavy duty battery pack
This is a NiMH pack, 8.4 V at 2700 mahr; extremely heavy duty, long life.
This one looks close to new; excellent electrical condition. $30

DC Power Cable

This is the heavy duty power cable as used on most of the Icom HF rigs, plus also many Kenwood, Alinco, and others.
It has the 6 pin molex connector, with four pins used - two for plus and two for ground. The cable may not have ever been used. It looks good, and of course works fine. $22

Original Boxes for Icom IC-27 mobiles and IC-V8 HT:

The box for the IC-27 includes the two internal styrofoam inserts that holds the rig, the cardboard box for accessories that also acts as a spacer, and even includes the original plastic bag for the rig.
It is in nice condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Several Speaker Microphones:

All of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Icom HM-9
This mic was originally used on the Icom IC-2 AT series of HTs. This one works fine and is in great cosmetic condition. Mic clip included. $18

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $18

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It has a 3.5 mm (1/8 inch) mono plug, as used by most modern rigs. Gimbal mount included. It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise cancelling speaker. 10 Watt rating. Still in original box, new. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original Icom manuals only.

SPECIAL:
Buy two, three, or four manuals and take 10% off.
Buy five or more and take 20% off.

Mobile transceiver and HT manuals:
IC-2 AT, 2 meter HT, still in plastic bag, $6
IC-22 A, 2 m FM transceiver, $10
IC-22 S, 2 m FM transceiver, $12
IC-27 A/E, 2 m transceiver, still in plastic bag, $15

IC-27 H, 2 m FM transceiver, $12
IC-28 H, 2 m FM transceiver, $12
IC-290 H, 2 m FM transceiver, still in plastic bag, $15
IC-736/738, HF + transceiver, $20
IC-751, HF transceiver, still in plastic bag, $22
IC-765, HF Transceiver, appears to be new, $18
IC-3200 A/E, Dual Band FM Transceiver, $15
IC-V8, 2 meter HT, $6

Other Icom manuals:
BC-30 Desk Charger, $4
BC-35 Desk Charger, $5
BP-2, BP-3, BP-4, BP-5 battery packs, $3
BP-21, BP-22, BP-23, and BP-24 Batteries, $3
DC-1 DC pack for IC-2 AT series HTs, $4
EX-310 Voice Synthesizer, $5
HM-8 Hand Microphone, w/schematic, $5
HM-10 scanning microphone, $3
IC-3 PA Power supply / speaker, $10
MB-5 mobile bracket, $2
MB-65 mobile bracket mount, $2
RC-10 Frequency controller, $4
SM-5 desk microphone, $3
SM-6 desk microphone, $3
UT-16 Voice Synthesizer, $5

These are original Icom manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Topic: 1719 Message: 1719

VHF and UHF Antenna related items For Sale:

Mobile Antenna Mounts:

Larsen LM-MM Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an Larsen LM
type antenna (5/16 inch stud). It includes coax for $18.

Round NMO Mag Mount
Black, 4 + inches in diameter, with coax. $24

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $22

Trunk Lip Mount
3/8 inch 24 thread stud, with coax. $10

Round Mag Mount for "Antenna Specialists" antenna
It uses the sort of reversed PL-259 type antenna that
was used for many years by Antenna Specialists.
With coax for $10.

Round Mag Mount
has 5/16 inch threaded connection, with coax $10.

White Round Mag Mount
1/4 inch threaded connection, with coax for $10.

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side,
and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Antenna Specialists Antenna Mounting Hardware:

All of the following hardware is NEW, unused, still in their
original boxes, with original paper work.

HM-66 Gutter Clip Mount
This gutter clip takes a standard 3/8 inch 24 thread antenna.
It includes coax. It is suitable for VHF/UHF antennas, but is

not rugged enough for HF antennas. NEW $15

K-221 NMO Trunk Lip Mount
This takes any of the NMO VHF or UHF type antennas. It is a
nice trunk lip mount, complete with coax. NEW $15

K-66 NMO Hole Mount
This takes any of the NMO type antennas. It is made to mount
in a 3/4 inch diameter hole, and includes coax. NEW $15

M-3 Ball Mount
This is a standard, heavy duty ball, suitable for use with HF
antennas, or VHF antennas requiring a 3/8 inch, 24 thread antenna.
NEW $15

ASC-3D Heavy Duty Ball Mount
Extremely heavy duty, Chrome plated, for 3/8-24 antennas. NEW $28

Mobile Antenna Springs:

These mobile antenna springs appear to be new. They are the chrome
plated type, and designed for light to medium duty use, i.e. use
on VHF type antennas, and not for heavy duty HF use.

These are about 3 inches long. I have some that are for 1/4 inch
diameter antenna mounts, some for 5/16, and some for 3/8 inch.
Please let me know what size you need.

These appear to be new, or at least unused.
They are $5 each.

Dual Band 2 m / 440 MHz Mag Mount Antenna:

This antenna has a very strong mag mount. The antenna itself is
a quarter wave antenna on 2 meters (unity gain), and provides a
couple db gain on 440 MHz. It seems to be very rugged, and even
has extra strain relief on the PL-259 coax connector. It is about
20 inches tall, including the mag mount.

This particular antenna appears to be new, unused. It is the black
color (not silver). $30

Hustler UHT-1, VHF / UHF mobile antenna:

The Hustler UHT-1 is 1/4 Wave Hole Mount Antenna.
It can be cut for any frequency from 136 to 500 MHz. It is low
profile, with a 3/4" hole required. Includes 15' coax and connector,
and is rated to handle up to 200 Watts of power. This particular
antenna is new, still sealed in its original shrink wrap package. $15

Larsen mobile antennas for NLA Mounts:

Both of these fit the Larsen NLA mounts.

Larsen NLA-150
This antenna provides about 3 db gain over a quarter wave,
and is a very rugged antenna, about 4 feet long. In very good
condition, it the fits Larsen NLA mounts.
Coil only $10
Coil with whip $17

Larsen NLA-UHF coil for 440 MHz
This is the coil only for NLA mounts, for use on the amateur
440 MHz band and UHF public service bands.
Good condition. $10

Cushcraft 4 element 124 WB, 2 meter beam:

The Cushcraft 124WB is a 4 element wideband boomer for 2
meters. It is the right choice for packet systems and
other applications requiring a dedicated directional antenna.

124WB Specifications:
Frequency: 144-148 MHz
Elements: 4
Gain: 10.2 dBi
Front To Back Ratio: 19 dB
VSWR 2:1 Bandwidth: 4 MHz.
Power: 2000 watts PEP
Longest Element: 41 inches (1.04 m)
Turning Radius: 8.8 Ft. (2.7 m)
Boom Length: 4 Ft. (1.22 m)
Wind Surface: 0.34 sq. feet
Connector: UHF (SO239)
Weight: 3 Lbs (1.6 kg)

This one is in extremely nice shape. No corrosion.
Only $75.

Coaxial Antenna Switches:

All work fine, look fine, and use SO-239 connectors.

B & W Model 550 A Coax Switch
This model will switch up to 5 antennas, and does NOT ground
unused antennas. Coax comes out the side, like spokes of a wheel.
It will handle the full legal limit. $35

SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box. Connectors on
the back. In original box. May be new. $24

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz with
low insertion loss less. All are two position and are typically rated
for 2500 W PEP, and good to 600 MHz.

Diawa CS-201 - $20
Opek CX-201 - $20
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Topic: 1550 Message: 1720

Antenna related items For Sale:

Antenna Books:

All are paper back, in nice condition.

The ARRL Antenna Book - 13th Edition - 1974
Close to new condition - $12

The ARRL Antenna Book - 14th Edition - 1984
Close to new condition, although some yellowing of pages, $12

The ARRL Antenna Book - 17th Edition - 1994
Several inches thick! - $18

Antennas - Selection, Installation, and Projects
Published by Radio Shack - 3rd Edition by Evans and Britain - $6

UHF Antennas, Converters, and Tuners by Milton Kiver
Sams Book - $10

Mobile Antenna Mounts:

Larsen LM-MM Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an Larsen LM
type antenna (5/16 inch stud). It includes coax for $18.

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $22

Trunk Lip Mount
3/8 inch 24 thread stud, with coax. $10

Round Mag Mount for "Antenna Specialists" antenna
It uses the sort of reversed PL-259 type antenna that
was used for many years by Antenna Specialists.
With coax for $10.

Round Mag Mount
has 5/16 inch threaded connection, with coax $10.

White Round Mag Mount
1/4 inch threaded connection, with coax for $10.

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side,
and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Antenna Specialists Antenna Mounting Hardware:

All of the following hardware is NEW, unused, still in their
original boxes, with original paper work.

HM-66 Gutter Clip Mount
This gutter clip takes a standard 3/8 inch 24 thread antenna.
It includes coax. It is suitable for VHF/UHF antennas, but is
not rugged enough for HF antennas. NEW $15

K-221 NMO Trunk Lip Mount
This takes any of the NMO VHF or UHF type antennas. It is a
nice trunk lip mount, complete with coax. NEW $15

K-66 NMO Hole Mount
This takes any of the NMO type antennas. It is made to mount
in a 3/4 inch diameter hole, and includes coax. NEW $15

M-3 Ball Mount
This is a standard, heavy duty ball, suitable for use with HF
antennas, or VHF antennas requiring a 3/8 inch, 24 thread antenna.
NEW $15

ASC-3D Heavy Duty Ball Mount
Extremely heavy duty, Chrome plated, for 3/8-24 antennas. NEW $28

Mobile Antenna Springs:

These mobile antenna springs appear to be new. They are the chrome
plated type, and designed for light to medium duty use, i.e. use
on VHF type antennas, and not for heavy duty HF use.

These are about 3 inches long. I have some that are for 1/4 inch
diameter antenna mounts, and some for 3/8 inch.
Please let me know what size you need.

These appear to be new, or at least unused.
They are $5 each.

Dual Band 2 m / 440 MHz Mag Mount Antenna:

This antenna has a very strong mag mount. The antenna itself is
a quarter wave antenna on 2 meters (unity gain), and provides a
couple db gain on 440 MHz. It seems to be very rugged, and even
has extra strain relief on the PL-259 coax connector. It is about
20 inches tall, including the mag mount.

This particular antenna appears to be new, unused. It is the black color (not silver). $30

Hustler UHT-1, VHF / UHF mobile antenna:

The Hustler UHT-1 is 1/4 Wave Hole Mount Antenna.
It can be cut for any frequency from 136 to 500 MHz. It is low profile, with a 3/4" hole required. Includes 15' coax and connector, and is rated to handle up to 200 Watts of power. This particular antenna is new, still sealed in its original shrink wrap package. $15

Hustler "Double Talk" Phasing Harness:

Back in the 1970's, Hustler sold a harness of coaxial cable that they called a "Double Talk Harness". It was used to connect to two mobile ball mounts, each of which would have an antenna for the same band. In theory, they would be phased such that there was about 3 db gain, but the reality is that they really shined by reducing QSB, in effect acting as a sort of diversity system.

This phasing harness looks fine and works fine. $17

Heavy Duty Mobile Antenna Ball and Spring:

This is an extremely heavy duty mobile ball mount designed for heavy HF antennas. Also included is a very heavy duty spring. Both are stainless steel. This is NEW, still in its original package, complete with paper work and all hardware. $50

Quick Disconnects
Hustler QD-1, stainless steel, still sealed in package. $18
Lakeview set of four top portions, and one lower portion, often used with Hamsticks. Like new. $24

Hustler RSS-2, Stainless steel resonator spring
Appears to be unused. No blemishes. $10

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side, and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Larsen mobile antennas for NLA Mounts:

Both of these fit the Larsen NLA mounts.

Larsen NLA-150
This antenna provides about 3 db gain over a quarter wave, and is a very rugged antenna, about 4 feet long. In very good condition, it the fits Larsen NLA mounts.
Coil only $10
Coil with whip $17

Larsen NLA-UHF coil for 440 MHz
This is the coil only for NLA mounts, for use on the amateur
440 MHz band and UHF public service bands.
Good condition. $10

Cushcraft 4 element 124 WB, 2 meter beam:

The Cushcraft 124WB is a 4 element wideband boomer for 2
meters. It is the right choice for packet systems and
other applications requiring a dedicated directional antenna.

124WB Specifications:
Frequency: 144-148 MHz
Elements: 4
Gain: 10.2 dBi
Front To Back Ratio: 19 dB
VSWR 2:1 Bandwidth: 4 MHz.
Power: 2000 watts PEP
Longest Element: 41 inches (1.04 m)
Turning Radius: 8.8 Ft. (2.7 m)
Boom Length: 4 Ft. (1.22 m)
Wind Surface: 0.34 sq. feet
Connector: UHF (SO239)
Weight: 3 Lbs (1.6 kg)

This one is in extremely nice shape. No corrosion.
Only $75.

Coaxial Antenna Switch:
SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box. SO-239 connectors
on the back. In original box. It looks to be new. $22

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1845. Test Equipment FS

Yahoo group: hamstuff
Date: 2015-02-06 16:25:06 UTC
From: Ken Simpson, W8EK
Topic: 1845 Message: 1845

Test equipment for sale:

Heath VC-3 Oscilloscope "Voltage Calibrator":

This unit is used to output precise values of voltage so that an oscilloscope can be calibrated. It uses three tubes and some very precision resistors.

Apparently this unit was produced in the late 1950's and early 1960's. This one looks very nice. It does have a small chip out of the back corner, but otherwise is very good. It has had the electrolytic caps in it replaced, and it has output which varies as one turns the amplitude switch.

Paperwork is included for only $20.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $85

Micro-Z Frequency Prescaler:

Do you have a frequency counter that does not cover 2 meters, but you want to check the frequency of your 2 meter rig? If so, this is what you need. It is a divide by 10 frequency prescaler. Connect the prescaler to your frequency counter, and a short antenna to the prescaler, and you can do it.

This unit works OK, and looks OK, assuming you like the red color of the cover that Micro-Z used. Powered by 115 V AC.
$15

SWR Bridges / Wattmeters For Sale:

All have SO-239 connectors and work fine.

Vanco SWR-2 SWR Bridge / Wattmeter
It covers from 1.7 to 150 MHz. It has a single meter, and
is actually a 10 W and 100 W full scale watt meter as well
as the "normal" SWR meter. It is still in its original box,
with original paper work, and appears to be new. $25.

Lafayette 99-25835 SWR Bridge
This HF single meter SWR Bridge also functions as a field
strength meter. This one is also in its original box, with
original paper work and appears to be new. $20

Radio Shack 21-524 SWR and Power Meter
This HF meter measures both average and PEP power in 20/200/2000
watt ranges as well as functioning as a regular SWR meter.
Looks close to new. With paperwork for $25.

This SWR bridge is good for use from 3 to 150 MHz, meaning it will
cover the HF bands (not including 160 meters), but also 2 meters
and 6 meters. This is a well constructed homebrew unit measuring
about 4 x 4 by 2 1/2 inches (plus knob and connectors).
SO-239 connectors are on the side.
This one works fine and looks fine as well. $12

25 KHz Crystal Calibrator:

This unit is marked "25 Kc Frequency Standard".
It produces markers at 25 KHz intervals for calibrating
your receiver.

This unit is a homebrew unit using two transistors and one
IC, and is powered by three AA batteries. Of course it
includes a 100 KHz crystal that is divided by four. It is
in a black enclosure about 5 inches wide by 4 1/2 inches
deep by 3 1/2 inches high. $15

Miscellaneous Heath Parts:

Heath HM-102/HM-2102 Wattmeter Parts (all are common to both meters):

Outer clam shell cabinet (left and right sides plus top) in nice
condition. $12

Dark Green knobs with aluminum skirt, 1 1/8 inch in diameter.
These are the same knobs as used in all of the SB series of
transceivers, receivers, transmitters and accessories. $5 each

Set of four feet, w/hardware. $10

Three position SWR/Power switch
Switches between SWR, high and low power. $7

I have many Heath SB-630 Station Console parts available. Most of
the internal parts are available, but no clock. The clock movement,

knobs, front panel, outer case and reflectometer assembly are gone, but switches, etc. are still available. Please let me know what you need.

I also have parts from a Heath HD-15 phone patch available. What do you need?

Parting out Daiwa Wattmeter:

These parts all come from a Daiwa CN-460 M wattmeter which covers from 140 to 460 MHz. This is the "mobile" type of meter. Except for the actual reflectometer assembly, the other parts should fit any of the various "mobile" Daiwa wattmeters.

Reflectometer assembly
Covers from 140 to 450 MHz. SO-239 connectors in and out. Includes the three wires that go to the switch board, and mounting screw. $12

High Low Power Switch board
This includes the switch and the small circuit board that includes the four adjustment pots - high power forward and reflected, and low power forward and reflected. Single mounting screw included. $7

Light assembly
With two good bulbs, circuit board, wire pigtail, and two mounting screws. $6

Outer plastic case
Should be the same as all of the mobile meters.
With mounting screw. $5

Buy all above for $25.

Micronta Radio Shack 22-024 Transistor Tester:

This unit is capable of checking a wide range of transistor types, either "in circuit" or out of circuit. It was designed to utilize dynamic testing under current amplifier conditions. The visual indication of the output signal is the result of dynamic current gain in an actual operating circuit.

This particular unit is in the original box. However someone left a battery in it, so it needs the battery holder cleaned, plus some general clean up.

With paper work for $15.

Solid State 5U4 Rectifiers:

These are solid state replacements for 5U4 vacuum tube rectifiers. Basically it is a glob of epoxy with an

octal base to plug into the original 5U4 socket. The
silk screen on the base says "S-5U4 Silicon Rectifier
Tube Replacement." No manufacturer indicated.

Two are available for $15 each.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol $.75; NON-Amphenol $.50

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "L" Elbow, 90 degree connector $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

Electronic Catalogs FREE:

I have a variety of electronic catalogs available free for
the cost of shipping. The shipping cost should be relatively
low since they can be shipped via "Media Mail". Of course
some of these are several inches thick.
All are in extremely good condition.

Here is what is available:

Mouser #641 for Feb-June 2010

DigiKey # A091B for 2009

Newark
#103 for 1985
#115 for 1997
#116 for 1998

Allied
1987
2001
2002/03
2007

EEM - Electronic Engineering Master
2000
2008

Electronic Industry Telephone Directory
2003
2004

Take any or all.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1866. Power Supplies FS

Yahoo group: hamstuff
Date: 2015-02-08 18:27:51 UTC
From: Ken Simpson, W8EK
Topic: 1614 Message: 1866

Power Supplies For Sale:

Regulated 13 Volt DC power supplies:

TenTec Switching Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $140

GSC 20 R, 20 amp
This supply is rated at 20 amps. Output terminals are on the back,
with the fuse, power switch, and pilot light on the front. This one
works fine, and looks fine, except for a few scratches on the bottom.
$50

EVG Model 10-395, 4 amp power supply
This supply is regulated, with switch and pilot bulb on the front,
and binding post output on the rear panel, along with the fuse.
It works fine and looks good. $30

Micronta 22-120 A
This supply is rated at 2.5 amps. It is well regulated. It has a
switch and LED light on the front, with a circuit breaker and output
terminals on the back. The case (left & right side & top) is
basically all a heat sink. This one works fine and looks like new.
No scratches. $30

Homebrew Power Supply:
This power supply is in a very nice gray and black enclosure with
binding posts for the output on the front, along with a pilot bulb
and power switch. The back panel has a fuse and the regulator.
It looks to be good for about 1.5 amps.
It works fine and looks really great. No scratches or defects. $15

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $85

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sorts of noise in your receiver. Use one of these, and you will not need to put up with all of the interference.

There are many uses for the 12 volt variety.
These all have 2.1 mm coaxial connectors with center positive.
12 V DC at 800 ma $15
12 V DC at 625 ma $14
12 V DC at 500 ma $12
12 V DC at 300 ma $10

13.5 V DC at 800 ma $16

12 Volt AC at 1 amp - Note it is AC, not DC. $15

9 Volt DC at 500 ma
This unit was used on a MFJ 422 keyer, but will also power other items needing 9 V DC. It has a 2.5 mm male plug on it, tip positive. $12

Icom BC-25 / Santec HT Charger
Same thing, with slightly different tags. 2.1 mm coaxial power plug output, with center +. 12 V DC at 50 ma. Still in box, unused. $12

Eico 751 AC power supply / Speaker:

This power supply is used with tube type transceivers. It includes a speaker as well as the power supply in a very nice cabinet. It was designed to be used with the Eico 753 transceiver, but can be used with most any of the tube type rigs from the 1960's and 70's.

The manual says it provides the following voltages:
750 V DC at 300 ma High Voltage
280 V DC at 170 ma Low Voltage
-100 V DC at 5 ma for bias
12.6 V AC at 4 amps for filaments

This supply comes from a silent key estate; I am sure it has not been used for years. I do not have a rig to test it, but

would expect it to work fine, but the filter capacitors likely will need to be replaced, as is the case with any of the units of this vintage.

With manual for $120.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

1994. HTs and HT Accessories FS

Yahoo group: hamstuff
Date: 2015-02-22 23:02:25 UTC
From: Ken Simpson, W8EK
Topic: 1994 Message: 1994

HTs and HT accessories For Sale:

Icom IC-W31 A, dual band HT:

The Icom IC-W31A dual bander has alphanumeric and memory
display. The transceiver's two dials are used for independent
tuning of the VHF and UHF band. This allows you to receive both
VHF and UHF simultaneously; or use the V/V and U/U functions
for receiving two frequencies on the same band. Full crossband
duplex is supported. Great for satellites.

You get 100 memories; each can be assigned a name. Alpha tagging
is also available for DTMF memory channels. You also get programmed,
full and memory skip scanning. Other features include impressive
audio, backlit LCD, 50 frequency PL encode, auto power off and
3 power levels.

Features
100 Alpha Memories
Extended Receive
3 RF Levels
Auto Repeater
DTMF Keypad
Battery Saver
DTMF Memories

This one works 100% and looks like new. It includes antenna,
belt clip, wrist strap, paper work, and an almost new battery
for $140.

Radio Shack 2 meter and 440 MHz HTs:

Radio Shack HTX-404 HT for 440 MHz
This HT covers the 440 MHz band and includes SubAudible PL
tones, DTMF tones, Memories, Scan, and the things that one
expects in an HT these days. The receiver is especially good,
with a "tight" front end. This one is like new. It looks
like it has hardly been used. Its original manual even looks
new! Of course it works fine. $60

Radio Shack HTX-202 HT for 2 meters
This HT is the companion to the HTX-440, but covers two
meters. It works fine, and looks great. Not quite as good
as the HTX-404 above, but close. $50

Buy both of the above together for $100.

HT Speaker Microphones:

Both of these speaker mics have the 3.5 mm and 2.5 mm two
conductor plugs that are spaced about 3/8 inch apart, and
are molded into a single connector. They are used on Icom,
Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other
radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful
speaker as well as a high-quality condenser-style microphone
element that produces excellent transmitted audio clarity.
The microphone may be secured to the user's lapel or shoulder.
It also features a built-in 3.5mm jack for using an external
earphone. $17

DM-100
Appears to be the same as the SPM-100 above, but just with
a different label. $17

Kenwood "Soft Case" for HTs:

SC-35 soft case
For Kenwood TH-78 dual band HT. Looks like new.
Only $12.

SC-8 T soft case
For Kenwood TH-21, TH-31, TH-41 series HTs.
Like new condition. $10

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
Appears to be unused, $10

Antenna adapter that fits the TH-21 series HTs, and has an SO-239
on the other end, to accept a PL-259. $5

Antenna adapter that fits the TH-21 series HTs, and has a BNC on
the other end. $8

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries for
the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Accessories for Icom IC-2 AT series HTs:

These items can be used on the IC-2A, 3A, 4A, 02A,
03A, 04A, 2GAT, 32AT series HTs plus many others.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery pack. If

13 V DC is applied, it converts the voltage to the proper voltage
for the HT. This one works fine, and looks fine. With paper work
for $12.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items
needing the 2.1 mm coaxial power plug. The opposite end has a
cigarette lighter plug on it. $10

W & W aftermarket BP-8 Heavy duty battery pack
This is a NiMH pack, 8.4 V at 2700 mahr; extremely heavy
duty, long life.
This one looks close to new; excellent electrical condition. $30

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Belt Clip for the above HTs, with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A,
03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-3 Battery pack
This was the "standard" battery that came with many of
these HTs. It can be charged with a BC-25 U wall charger,
or the BC-30 or BC-35 desk chargers, or with 12 V DC.
This one appears to hold a charge OK. $10

Icom BP-5 Heavy duty battery pack
This battery has several times the capacity of the BP-3,
and slightly higher voltage for more power output.
It must be charged by a desk charger (BC-30 or BC-35).
For rebuild only $5

W & W aftermarket BP-8 Heavy duty battery pack
This is a NiMH pack, 8.4 V at 2700 mahr; extremely heavy
duty, long life.
This one looks close to new; excellent electrical condition. $30

Buy all for $45.

Icom BC-127 A, Battery Charger:

This charger charges the NiCads or NiMH for the IC-Q7 A
Dual band HT, and Icom R-2 receiver, and probably others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $10 plus shipping from Florida.

Accessories for Santec HTs:

These accessories fit most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, etc. They also can be used with some Icom HTs
of the IC-2 AT and IC-02 AT era.

Santec ST-MC, DC Charge cord
Cigarette lighter plug on one end, and 2.1 mm coaxial power connector
on the other. Drops 13 V DC down to the voltage required by the HT.
New, unused, in package, with paper work for $10.

Santec AC "Wall Wart" Charger
12 DC at 50 ma. Linear type, so no switching noise.
Same as Icom BC-25. New, unused, $15.

Real Leather Shoulder Strap
Although used for the Santec HTs, these can be used for many things.
Not only HTs, but also cameras, and other items.
New, unused, in package. $5

"Service Pack" for Santec ST-142/144 HTs
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $15

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Radio Shack HTX-202/404
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Radio Shack HTX-202/404
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

Threaded (as used by Motorola, etc.) - about 7 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs,
antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2059. Kenwood Monitor Scope, Mics, and other Kenwood Items FS

Yahoo group: hamstuff
Date: 2015-03-04 20:56:36 UTC
From: Ken Simpson, W8EK
Topic: 2059 Message: 2059

Kenwood Items For Sale:

Monitor Scope, Microphones, Original Boxes, HT Accessories,
Original Manuals, and more

Kenwood SM-220 Monitor Scope, with BS-8 Pan Adapter

The Kenwood SM-220 Station Monitor is a multi-function monitor
scope which functions as a band-scope since it includes the BS-8
pan display option, monitor and tone generator. It is the ideal
product for supporting, monitoring and calibrating equipment.
It can be used to observe SSB distortion, CW key clicks, and
test linearity of linear amplifiers. It has four sweep ranges
and also can serve as a RTTY tuning scope. Frequency range:
1.8-150 MHz. Maximum Power: 2000W 1.8-54 MHz and 100W 150 MHz.

Features:
Bandscope ± 100 kHz (with optional BS-8)
10 MHz Oscilloscope
Matches many Kenwood Transceivers
Wideband Transmission Monitor
RTTY X-Y Tuning Meter
Built-in 1000/1575 Hz Two-Tone Generator

Cosmetically, this one looks like new. I can not find a scratch
on it, and all lettering is nice and crisp. Electrically, it works
fine. The intensity varies as it should, the focus does as it
should, and when I connect a signal generator to it, the sine wave
looks like a sine wave. I have no TS-820 or TS-830 to confirm
that the BS-8 works, but I am fairly certain it is fine, since
other parts of it are fine. $350

Kenwood MC-48 DTMF Touch Tone Microphone
Used on most Kenwood rigs with round 8 pin mic plug.
Includes up/down switches as well as the 16 digit tone
pad. Excellent, close to new, condition. $40

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TM-241,
TM-2530, TW-4000, and others, including Alinco and ADI.
It says "Electret Condenser Mic" on the back, and
"Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has

up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer,
and never used. $30

Kenwood "Soft Case" for HTs:

SC-35 soft case
For Kenwood TH-78 dual band HT. Looks like new.
Only $12.

SC-8 T soft case
For Kenwood TH-21, TH-31, TH-41 series HTs.
Like new condition. $10

Original Boxes for Kenwood VHF / UHF Rigs:

The following original boxes for Kenwood equipment
are available. They are all in very nice condition,
and include the molded styrofoam inserts to protect
the rig, plus the box itself.

Original Box for Kenwood TM-221 two meter transceiver
It is in very nice condition, and includes the molded styrofoam
inserts to protect the rig, plus the box itself. $6

Original Box for TH-41, 440 MHz HT
Complete with insert. Looks like new. $8

Original box for Kenwood TR-2600, Two meter HT
Complete with insert. Looks like new. $8

Original box for TenTec 2591, Two meter HT
Complete with insert. Looks like new. $8

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
an SO-239 on the other end, to accept a PL-259. $5

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $8

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
In bag, with original paper work. May be new. $10

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

Threaded (as used by Motorola, etc.) - about 7 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are Operating manuals unless otherwise specified.
All are original manuals only.

SPECIAL:
Buy two, three, or four of my books/manuals, and take 10% off.
Buy five or more and take 20% off.

TH-21 HT for 2 m, $8
TH-215/315/415 HT for 2 m, 220 MHz, or 440 MHz, $10
TH-225, 2 m HT, $12
TH-235, 2 m HT, $15
TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz, $12
TM-221/421 2 m or 440 MHz mobile, $12
TM-261/461 2m or 440 MHz mobile, $12
TM-2570/2550/2530 2 m mobile, $15
TR-2400, 2 m HT, $12
Service manual for TR-2600, 2 m HT, $12
TR-9000, 2 m multimode, $12
TS-120 S/V, HF xcvr, $20
TW-4000 dual band mobile, $15

Service manual for TW-4000 dual bander $20
TW-4100 dual band mobile, $15

BC-5 DC to DC quick charger $2
LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $4
MS-1 mobile stand $3
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PB-24 battery pack for TR-2400 $2
PB-25 H battery pack for TR-2500 $2
PS-6 power supply $5
PS-30 power supply $4
SMC-24 speaker mic $3
SMC-25 speaker mic $3
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

Versión en español de Kenwood TM G-707 manual de Venta:

Versión en español del Manual de Operación
para el Kenwood TM G-707 transmisor-receptor de banda dual

Este es el manual de instrucciones original, en español.
Parece que es bastante extensa y detallada.
Es básicamente nuevo, sólo se abre para observar que
es sólo en español. Es original de Kenwood.

$ 8 más gastos de envío de la Florida.

Spanish Version of Kenwood TM G-707 manual:

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver

This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $8

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2187. FS motorola GP300.

Yahoo group: hamstuff
Date: 2015-03-22 22:50:46 UTC
From: goshawk on horseback
Topic: 2187 Message: 2187

hello all,
I have a Motorola GP300 handheld set with charger to clear. I got it in with some other stuff, but have no use for it myself.
it looks like it could do with a new aerial, and I will say that the charger seems to work, but can't get anything out of the radio.
I don't know if it is a fault with the set, or if the battery is just completely knackered. apart from the aerial, the set is in good condition.
open to sensible offers.

Simon

Icom and related items For Sale --
Deluxe HF Transceiver, Power Cable, Speaker / Phone Patch,
Hand Microphones, Many HT Accessories including batteries,
Original Boxes, Cable, Speaker Microphones, Communications
Speakers, Manuals, and other Miscellaneous Items

Icom IC-756 Pro II HF plus 6 meter Transceiver:

This rig will do it all! It has so many bells and whistles that
I am certain you will not use them all. It transmits on all ham
bands from 160 thru 6 meters, and receives from 30 KHz to 60 MHz.
The color LCD display provides all sorts of information, including
a real-time spectrum scope. The ProII has a DSP Digital IF filter
with 51 selectable bandwidths. You also get a microphone equalizer,
manual notch function, twin peak audio filter, digital twin pass
band tuning (PBT), all mode squelch, multi-function analog meter,
and much more.

For more info
http://www.universal-radio.com/catalog/hamhf/1756.html

This particular unit is immaculate. I can not find a scratch or
defect on it. Power output is 100 to 105 watts on all bands 160
thru 6 m. Receive is great. You will not be disappointed!

With mic, power cord, and paper work for $1200.

DC Power Cable

This is the heavy duty power cable as used on most of
the Icom HF rigs, plus also many Kenwood, Alinco, and others.
It has the 6 pin molex connector, with four pins used - two
for plus and two for ground. The cable may not have ever
been used. It looks good, and of course works fine. $22

Icom Speaker / Phone Patch

Although a phone patch is included, this is also a very nice speaker
with Icom styling.

This one works fine and looks great. $65

Icom HM-14 DTMF Touch Tone Microphone:

The Icom HM-14 has the standard round 8 pin connector as used
by most Icom radios. It has a 16 digit DTMF Touch Tone pad on
the back. It will work with the IC-25A, 28, 38, 45, 48, 77, 78,
120, 229, 271, 275, 290, 375, 451, 471, 475, 505, 575, 707, 718,

725, 728, 729, 735, 736, 737, 745, 746, 751, 756/PRO, 761, 765,
775, 781, 820H, 821H, 900, 901, 970, 1201, 1271, 1275, 2400,
3200, 3210, and probably others. It can be used to add a DTMF
microphone to a rig that does not normally have one.

This one has good audio quality, all 16 digits on the DTMF pad
work like they should, and the coiled cord is in extremely good
shape. $40

Icom HM-36 Hand Microphone:

The Icom HM-36 is used on most of the Icom HF rigs. It has
a round 8 pin plug, making it compatible with almost any of
the Icom rigs with this connector. This includes the IC-746
and 756 series, plus many more. It can also be used on VHF
UHF rigs.

It also has up / down buttons on the top for changing the frequency.

This one works 100% and looks like it is new. It likely was put
in a drawer after receiving it with a rig, and never used. $35

Extra mobile mounting bracket for IC-28 (or any rig needing a
5 1/2 inch wide bracket) $15

Accessories for Icom IC-2A, 3A, 4A, 02 A, etc. series of HTs:

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery
pack. If 13 V DC is applied, it converts the voltage to
the proper voltage for the HT. This one works fine, and
looks fine. With paper work for $12.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other
items needing the 2.1 mm coaxial power plug. The opposite
end has a cigarette lighter plug on it. $10

Belt Clip for the above HTs.
Complete with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A,
03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-3 Battery pack
This was the "standard" battery that came with many of
these HTs. It can be charged with a BC-25 U wall charger,
or the BC-30 or BC-35 desk chargers, or with 12 V DC.
This one appears to hold a charge OK. $10

Icom BP-5 Heavy duty battery pack
For rebuilding only. Battery is dead. $5

Original Boxes for Icom IC-27 mobiles and IC-V8 HT:

The box for the IC-27 includes the two internal
styrofoam inserts that holds the rig, the cardboard
box for accessories that also acts as a spacer,
and even includes the original plastic bag for
the rig.
It is in nice condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Several Speaker Microphones:

All of these speaker mics have the 3.5 mm and 2.5 mm two
conductor plugs that are spaced about 3/8 inch apart, and
are molded into a single connector. They are used on Icom,
Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other
radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful
speaker as well as a high-quality condenser-style microphone
element that produces excellent transmitted audio clarity.
The microphone may be secured to the user's lapel or shoulder.
It also features a built-in 3.5mm jack for using an external
earphone. $18

DM-100
Appears to be the same as the SPM-100 above, but just with
a different label. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. It has a 3.5 mm (1/8 inch) mono
plug, as used by most modern rigs. Gimbal mount included.
It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise
cancelling speaker. 10 Watt rating. Still in original
box, new. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.

These are original Icom manuals only.

SPECIAL:
Buy two, three, or four manuals and take 10% off.
Buy five or more and take 20% off.

Mobile transceiver and HT manuals:
IC-2 AT, 2 meter HT, still in plastic bag, $6
IC-22 A, 2 m FM transceiver, $10
IC-22 S, 2 m FM transceiver, $12
IC-27 A/E, 2 m transceiver, still in plastic bag, $15
IC-27 H, 2 m FM transceiver, $12
IC-28 H, 2 m FM transceiver, $12
IC-290 H, 2 m FM transceiver, still in plastic bag, $15
IC-736/738, HF + transceiver, $20
IC-751, HF transceiver, still in plastic bag, $22
IC-820 H, Dual Band Transceiver, original, $18
IC-820 H, good copy, not original $10
IC-3200 A/E, Dual Band FM Transceiver, $15
IC-V8, 2 meter HT, $6

Other Icom manuals:
BC-30 Desk Charger, $4
BC-35 Desk Charger, $5
BP-2, BP-3, BP-4, BP-5 battery packs, $3
BP-21, BP-22, BP-23, and BP-24 Batteries, $3
DC-1 DC pack for IC-2 AT series HTs, $4
EX-310 Voice Synthesizer, $5
HM-8 Hand Microphone, w/schematic, $5
HM-10 scanning microphone, $3
IC-3 PA Power supply / speaker, $10
MB-5 mobile bracket, $2
MB-65 mobile bracket mount, $2
RC-10 Frequency controller, $4
SM-5 desk microphone, $3
UT-16 Voice Synthesizer, $5

These are original Icom manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

3021. Microphones FS

Yahoo group: hamstuff
Date: 2015-08-04 14:34:35 UTC
From: Ken, W8EK
Topic: 1621 Message: 3021

Icom, Kenwood, Yaesu, DTMF Touch Tone, Speaker
Microphones, etc. For Sale:

Icom Microphones:

Heil Microphone and Cable:

Heil HM-I Microphone for use on Icom rigs.
This mic is a beautiful gold/bronze color. It has BOTH
the wide (designed for rag chewing and full fidelity) and
the narrow (designed for maximum "punch", especially
for DX pileup penetration) elements. It also has a PTT
switch on the mic, which has a 4 pin XLR connector.

This one works great, and looks great as well. $85

Cable for use with Icom rigs
Has 4 pin XLR connector to mate with the above mic, with a
very nice rubber covered cord, and a round 8 pin connector
wired for Icom on the other end, along with a 1/4 jack that
can be used with an external PTT switch, if desired. $25

Buy both of the above for $100.
Cable sells only with or after the mic.

Icom HM-133 V Remote Control DTMF Microphone:

This mic has a DTMF Touch Tone pad on it, but also offers
full remote control including VFO select, Up-Down tuning
and memory select. It also has keypad back lighting. It
has an 8 pin modular plug and is used with the IC-2100,
IC-2200, IC-2300, IC-2725, IC-V8000, and others.

This one appears to be new, unused, still in its original
plastic bag.

With paper work for $40.

Kenwood Hand Microphones:

Kenwood MC-44 DM, DTMF Touch Tone Mic
Used on many Kenwood rigs with round 8 pin mic plug.
Includes up/down switches, and lock switch, along with
the 16 digit DTMF pad. Excellent condition. $40

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and others, including Alinco and ADI. It says "Electret Condenser Mic" on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more features. It has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer, and never used. $30

Yaesu Hand Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons. Of course the PTT is on the side. This one has the round 6 pin connector. It works fine and looks close to new. $40

Yaesu YM-17 hand mic:
The YM-17 is a hand microphone with up/down switches on the top corner. It has the round 6 pin connector. This one works fine and looks really great. $30

Yaesu YM-31 hand mic:
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

DTMF Touch Tone Microphones For Sale:

Kenwood MC-44 DM, DTMF Touch Tone Mic
Used on many Kenwood rigs with round 8 pin mic plug. Includes up/down switches, and lock switch, along with the 16 digit DTMF pad. Excellent condition. $40

Yaesu MH-15 DTMF Touch Tone Mic
The MH-15 c6 is a hand microphone with a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons.
This one presently has the round 6 pin connector, which can be changed of course.
It works fine and looks close to new. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

HT Speaker Microphones:

Both of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $17

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $17

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

3029. HF Amplifiers and Amp related items FS

Yahoo group: hamstuff
Date: 2015-10-10 15:10:45 UTC
From: Ken, W8EK
Topic: 3029 Message: 3029

HF Amplifiers and Amplifier Related Items/Parts For Sale:

Heath SB-1000 HF Amp, Kenwood TL-922 HF Amp, SB-614 Monitor Scope, Parts for Amp Supply LK-500 Z A, Parts for Heath SB-220/221, NOS Raytheon 572 B tubes, and more

Heath SB-1000 HF Linear Amplifier (Heath's version of AL-80 A):

The SB-1000 uses a single 3-500 to produce up to 1000 watts output on the 160 thru 10 meter HF bands. I questioned Heath's claim of 1000 watts out with a single 3-500, but depending on band, this one does actually produce 1000 watts out. To be a bit more conservative, 50 W drive typically gives about 750 W out. This is using 120 V AC.

This particular amp has had a glitch resistor added, along with some protective diodes. It looks like the filter caps may have been replaced by a previous owner. In any case, they seem to be in good condition. The 3-500 is an Eimac that is in great shape.

Cosmetically, this unit looks extremely nice. I do not find any scratches or defects. This is a terrific HF amp.

Paper work is included for $750. Pickup near Ocala FL is preferred, although shipping is possible.

Kenwood TL-922 A, HF Linear Amplifier:

The Kenwood TL-922A HF linear amp is designed to provide close to maximum legal power, utilizing two 3-500Z high performance transmitting tubes. The amp features two meters for maximum operating convenience. Power is 2000W PEP SSB, 1000W DC CW/ RTTY input. Drive power is about 80 W.

For all practical purposes, the TL-922 A is similar to the SB-220/ 221, but with improvements added, since it was designed after the Heath amps. It also includes 160 meters. It has larger transformers, and heavier duty tank circuit.

This one has had the filter capacitors replaced, the Harbach "Soft Key" added, along with a glitch resistor, and various protective diodes. All bulbs have been replaced.

The Eimac 3-500's produce from 1300 watts to over 1500 watts into a dummy load, depending on band. Power output was measured with an LP-100 A wattmeter, calibrated traceable to NBS.

Electrically, this amp is a 10, and cosmetically it is a 9.9.
It is an exceptionally nice amp, both electrically and cosmetically.

Power requirement is 120V AC at 28A or 240V AC at 14A.

Paper work is included for $1250. Pickup near Ocala, FL,
is definitely best.

Linear Amp Switching Cable for Kenwood Rigs:

This cable goes from a Kenwood transceiver to a linear
amplifier to switch the amp from transmit to receive.

One end has a DIN connector, as is used with most Kenwood
rigs. The other end has an RCA phono plug, as used by most
linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver, and the requirements
of your amplifier.

This cable is for switching the relay. $15

Cable as above, but also includes the connection for ALC in
addition to the amplifier relay keying. $20

Heath SB-614 Monitor Scope:

This unit matches the SB line of Heath equipment, and is
made to monitor your transmitted signal. It uses a 3 inch
CRT.

Heath has designed at least three different monitor scopes.
This is the latest model, and is all solid state, except for the
CRT.

I have used it to monitor transmit signals, and it works great.
Cosmetically, it looks great as well. The graticule is sharp and
nice. No scratches or defects that I can find. Pristine!

With paper work for $150.

Amp Supply LK-500ZA HF Amplifier Parts:

The LK-500 ZA uses a pair of 3-500 tubes, to produce close to
legal limit power. Parts from one are being sold. Most of these
parts could be used on other amps using a pair of 3-500 tubes.

High Voltage Power Transformer
This is the good Peter Dahl transformer. After the full wave bridge
rectifiers, it produces about 3100 volts with currents towards an
amp. This is a very heavy duty transformer! $275

Filament / Control transformer
Provides 5+ volts at 30 amps for the 3-500 filaments, plus 18 V to

be used in control circuitry. $50

Input matching board
This amp has a separate board to be used to match the rig to the amp. It covers 160 thru 10 meters, and is switched by relays. $100

Other parts are available. Please e-mail or call for more info.
Pickup near Ocala FL would be preferred for the heavy parts.
Shipping is not included in the above prices.

Heath SB-220 / SB-221 parts:

Heath SB-221 logo
This is the logo with the Heath name and SB-221, that goes in the upper left of the front panel. It looks perfect. No scratches or defects. $15

Heath SB-220 original metering and rectifier PC board
This is the original board from an SB-220 HF amp that was replaced with one of the Harbach boards. Almost all of the resistors on this board drift over time, and result in inaccurate meter readings. This board has had ALL of the metering resistors replaced with 1% or 2% precision resistors. The 4.7 Meg resistors in the high voltage measuring section have been replaced with resistors rated to take the high voltage, as well as being more precision. This board includes the 10 watt zener diode. This effectively makes the board very similar to the Harbach board, which they sell for $38. Buy this board for only $25.

Original metering rectifier board, as above, but does NOT have the 10 watt zener diode included. $20

Original 10 watt 5.1 volt zener diode for SB-220. $10

SB-220 grid choke (1 mh, Part # 45-4, RFC 4 and 5)
These often go up in smoke when there is a tube problem. These are fine, with no problems. $5 each

Knobs for SB series:
Dark green knobs with aluminum skirt, 1 1/8 inch in diameter. These are the medium size knobs used in all of the SB series of transceivers, receivers, transmitters and accessories.
Two available at $5 each.

Pair of 572 B tubes
This is a pair of NOS Raytheon 572 B tubes. The Raytheon are often considered to be as good as the Cetron 572 B's, and may even have been made in the same factory. These are pristine, unused tubes in their original boxes. Just what you need to make your SB-200 return to original specs. $150 for the pair.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF

and VHF/UHF antennas, connectors, miscellaneous accessories,
etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.
On the heavy items, pickup near Ocala FL is much preferred.

Thanks.

3031. Wattmeters / SWR Bridges FS

Yahoo group: hamstuff
Date: 2015-11-03 23:34:37 UTC
From: Ken, W8EK
Topic: 1093 Message: 3031

Wattmeters / SWR Bridges For Sale:

All of these are good for the HF bands. Some may also
include 6 and 2 meters in addition.

Kenwood SW-2100 Wattmeter / SWR Bridge:

The Kenwood SW-2100 is both an accurate HF wattmeter and
also an SWR meter. It will handle up to 2000 Watts of power,
but only requires about 30 watts (depending on band) to
get an accurate reading. It has 2000 W and 200 W scales.
It features two meters -- one reads power and one reads SWR.
The meters are fairly large 3 inch meters.

This meter works 100%. Paper work is included for $75.

MFJ 814 HF Wattmeter / SWR Bridge:

The MFJ 814 is listed as an HF Wattmeter and SWR bridge. It
reads 200 W or 2000 W both forward and reflected, and also
can be set for SWR. It has a large (about 3 inch) meter that
has a back light if 12 Volts is applied.

This unit works fine, including the meter light. Cosmetically it
is very good, but not perfect. Only $45

HF Peak / Average Wattmeter:

Radio Shack 21-524 HF Wattmeter with peak or average readings.

Full scale power readings of 2000 W, 200 W, and 20 W, with a
switch to select either peak or average. Of course it also reads
SWR. It is rated for 3 to 30 MHz.

This one works fine and looks perfect. I can not find a scratch
on it. It appears that it might never have been used, but simply
stored in a drawer. Its accuracy compares very favorably to a
wattmeter calibrated traceable to NBS.

Paper work is included for $30.

Siltronics SWR-2 Dual Meter SWR Bridge:

This SWR Bridge features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on the
antenna at the same time. They were made in Japan in the 1970
and 80's, and labeled with various names, including Swan, Siltronix,

Quement and others. One of the nice things is that this meter is rated to work up thru 150 MHz, so is also good for 6 and 2 meters, in addition to HF.

This one works fine and looks great. It includes paper work with power charts, and detailed info, including schematic, for $30.

Vanco SWR-2 SWR Bridge / Wattmeter
It covers from 1.7 to 150 MHz. It has a single meter, and is actually a 10 W and 100 W full scale watt meter as well as the "normal" SWR meter. It is still in its original box, with original paper work, and appears to be new. $25.

Motorola S-1352A
This unit is an SWR Bridge and a Wattmeter with 10 W and 100 Watt scales. It can also function as a field strength meter. It works fine and looks close to perfect. $25

Homebrew 3 to 150 MHz SWR Bridge:
This unit will cover the HF bands (not including 160 meters), and also 2 meters and 6 meters. It is a well constructed homebrew unit measuring about 4 x 4 by 2 1/2 inches (plus knob and connectors). SO-239 connectors are on the side.
It works fine and looks fine as well. $12

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

3032. AEA Antenna Tuner and PS FS

Yahoo group: hamstuff
Date: 2015-11-07 12:48:26 UTC
From: Ken, W8EK
Topic: 3032 Message: 3032

AEA Items For Sale:

AEA AT-3000 High Power HF Antenna Tuner:

The AEA AT-3000 is an extremely rugged antenna tuner, rated to handle 3000 watts. It will certainly easily handle the full legal limit.

The AT-3000 has two variable inductors and a single large variable capacitor. It also has an antenna switch that will switch between two coax antennas, a balanced antenna (it includes a VERY large built in balun), and dummy load. There is also a cross needle meter that reads forward and reverse power, and hence SWR, all simultaneously. It also has a back light, if 12 V is applied. Instead of the normal high and low power ranges, this tuner has three ranges of 3000 W, 300 W, and 30 W full scale. It also reads both average and peak power. This is an exceptional tuner!

This particular unit works 100% and looks like it just came from the factory. No scratches or defects. Pristine!

With paper work for $325.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc.
This is a "regular" wall wort -- not the new switching type that creates all sort of noise in your receiver.
Get this one, and leave the noise behind. $14

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

3067. NOS Kenwood TL-922 A, HF Amp FS

Yahoo group: hamstuff

From: Ken, W8EK
Topic: 3067 Message: 3067

For Sale:

NOS Kenwood TL-922 A, HF Amplifier

I know that NOS (New, but old stock) is usually used
for tubes, but in this case it applies to this amplifier.
To the best of my knowledge it has never been used.
I was told that it has been in the bedroom closet of a
climate controlled house, in its original box, for the
last seven years or so. Prior to that, no one can remember
seeing it in use. It does not even have any dust, which
is something that would happen even with a little use.

Although it is apparently new, unused, it is still on the
order of 20 years old. Obviously it still has its original
filter capacitors which need to be replaced before use.
The outer box looks like it probably was moved a few
times, which corresponds to what I was told, as the
previous owner changed QTHs.

I can sell this unit in one of three ways:

1) As it presently is, in its original box, but needing new
filter capacitors, for $1000. If you are handy and/or
would like to do your own work, this is the best option.
Obviously this is the easiest option for me.

2) I replace the filter capacitors and verify it works.
Cost would then be $1200. This is the option that I
least prefer.

3) I replace not only the filter capacitors, but add a
glitch resistor in the B+, protective diodes where needed
(primarily in metering circuit and across relay coils),
change biasing of the tubes, and add a soft key circuit.
Cost would then be $1300.

Obviously, I would prefer pickup in the Ocala FL area,
very close to I-75. Being that it has its original boxes, I
could ship, although it would be costly, which is obviously
not included in the above prices.

If you have been looking for a really terrific, pristine,
mint, TL-922 A, this is it. Due to the many options, it
would be best to talk on the phone. (352) 732-8400

Thanks.

3068. High Power Antenna Tuners FS

Yahoo group: hamstuff

From: Ken, W8EK
Topic: 3068 Message: 3068

Two high power, full legal limit, antenna tuners For Sale:

AEA AT-3000 High Power HF Antenna Tuner:

The AEA AT-3000 is an extremely rugged antenna tuner, rated to handle 3000 watts. It will certainly easily handle the full legal limit.

The AT-3000 has two variable inductors and a single large variable capacitor. It also has an antenna switch that will switch between two coax antennas, a balanced antenna (it includes a VERY large built in balun), and dummy load. There is also a cross needle meter that reads forward and reverse power, and hence SWR, all simultaneously. It also has a back light, if 12 V is applied. Instead of the normal high and low power ranges, this tuner has three ranges of 3000 W, 300 W, and 30 W full scale. It also reads both average and peak power. This is an exceptional tuner!

This particular unit works 100% and looks like it just came from the factory. No scratches or defects. Pristine!

With paper work for $325.

TenTec 229 B HF antenna tuner:

This roller inductor tuner will handle full legal power.
It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match.
The "L" match is also more efficient. Electrically, it is the same as both the 229 series and 238 series.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.

It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the Corsair I with a sort of very dark chocolate brown (almost black) color, although it certainly can be used with any HF rig or legal limit amplifier.

This unit has had the problematic dial and elastic cord changed to a turns counter for better reliability.

This particular unit functions 100%, and looks great.
I can not find a scratch on it. Paper work is included
for $300.

I also have many other accessories of many different brands
available.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.
